Notes

1) provisional data/advance information.
2) measured at 175.25 MHz (ch 7) with V_o=50 dBmV
3) intermodulation distortion= −60 dB (DIN 45004, para. 6.3 :tone), V_p=V_o, f_p=35.25 MHz, V_q=V_o−6 dB, f_q=42.25 MHz, measured at f_{p+q-r}=33.25 MHz
4) as 3) but with f_p=187.25 MHz, f_q=194.25 MHz, f_r=196.25 MHz, f_{p+q-r}=185.25 MHz
5) measured at 445.25 MHz (ch H22) with V_o=46 dBmV
6) as 3) but with f_p=440.25 MHz, f_q=447.25 MHz, f_r=449.25 MHz, f_{p+q-r}=438.25 MHz
7) high slope pre-amphasis, for details see data sheet
8) 36 channels; measured at 433.25 MHz (ch H20) with V_o=46 dBmV
9) measured at 547.25 MHz (ch 27) with V_o=44 dBmV
10) as 3) but with f_p=540.25 MHz, f_q=547.25 MHz, f_r=549.25 MHz, f_{p+q-r}=538.25 MHz
11) measured at 595.25 MHz (ch 35) with V_o=44 dBmV
12) as 3) but with f_p=590.25 MHz, f_q=597.25 MHz, f_r=599.25 MHz, f_{p+q-r}=588.25 MHz
13) measured at 745.25 MHz with V_o=44 dBmV
14) as 3) but with f_p=740.25 MHz, f_q=747.25 MHz, f_r=749.25 MHz, f_{p+q-r}=738.25 MHz
15) as 3) but with f_p=341.25 MHz, f_q=348.25 MHz, f_r=350.25 MHz, f_{p+q-r}=339.25 MHz
16) as 3) but with f_p=851.25 MHz, f_q=858.25 MHz, f_r=860.25 MHz, f_{p+q-r}=849.25 MHz
17) frequency range: 470 - 860 MHz, gain measured at 470 MHz
18) see specific date sheet for preliminary data

*CONTACT FACTORY FOR AVAILABILITY
1) measured at −60 dB intermodulation distortion to DIN45004B, par.6.3, 3-tone
2) the typical maximum VSWR occuring in the frequency range for a sample connected to a 75Ω line
3) also available as A version without internal collector coil and blocking capacitor
4) for 40-600 MHz frequency range
5) measured at −35 dB intermodulation distortion to DIN45004B, par.6.3, 3-tone
6) under development

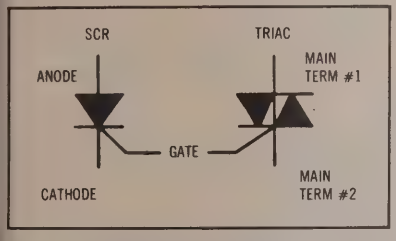
MINIGLOSSARY THYRISTORS/ HIGH POWER DIODES

THYRISTORS

A thyristor is a four-layer semiconductor (pnpn) that can be switched from an OFF to an ON state. This is usually done by a voltage or current pulse to the gate terminal. The device will then continue to conduct so long as the principal current of the device flows through the thyristor's two main terminals.

In many respects a thyristor is analogous to an electromechanical latching relay. In fact, thyristors have largely replaced these relays in newer equipment designs. But, misapplications and/or failure to fully understand the parameters of these and other solid state devices often leads to catastrophic field failures.

The terminology shown on this page has been condensed from common industry data books and is intended to be a guide for the engineer.



di/dt: *Critical rate of rise of ON state current* is the user's maximum design limit (Fig. 1).

di_R/dt: *Rate of decay of ON state current* (Fig. 1 & 2).

dv/dt (critical): *Rate of rise of OFF state voltage.* Lowest voltage rate of rise to cause a thyristor to turn ON.

dv/dt (reapplied) : *Rate of rise of reapplied OFF state voltage.*

I_{FSM}: *Nonrepetitive ON state surge current in diodes.* Maximum peak value of ½ cycles (60 Hz) a diode can withstand up to 100 times in its lifetime.

I_{TSM}: *Nonrepetitive ON state surge current in thyristors.* Maximum peak value of 60 Hz cycles a thyristor can withstand up to 100 times in its lifetime.

I_{DRM}/I_{RRM}: *Maximum peak forward/ reverse leakage current* at specified temperature and repetitive conditions.

I_{GDM}: *Continuous gate current not to trigger.* Highest dc gate current that will *not* cause thyristor to switch from OFF to ON at a specific temperature.

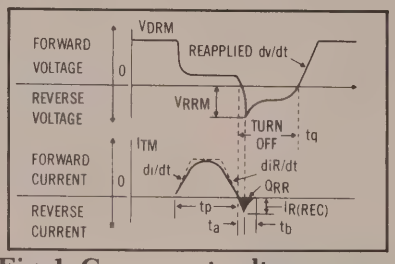


Fig. 1. Concurrent voltage and current waveforms

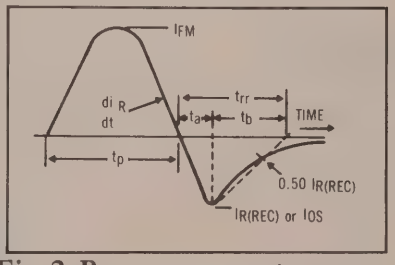

Fig. 2. Recovery current waveform

I_{GT}: *Continuous gate trigger current.* Absolute minimum gate current required to switch thyristor from OFF to ON.

I_H: *Holding Current.* Minimum current required to hold thyristor ON.

I_L: *Latching current.* Minimum current required to hold thyristor ON after removal of gate drive.

$I_{(REC)}$; *Recovery current.* Peak value of reverse current during recovery or turn OFF (Fig. 1 & 2).

I_{OS}: *Overshoot current.* See $I_{R(REC)}$.

I^2t: Maximum ON state, short time thermal capacity of the silicon element for operations less than ½ cycle of 180° conduction angle.

$I_{T(AV)}$: *Average ON state current* (max.)

Q_{RR}: *Reverse recovered charge* (Fig. 1).

$R_{\theta JC}$: *Junction-to-case thermal resistance* in degrees C per watt.

$T_{C(MAX)}$: *Max. allowable case temperature.*

$T_{J(MAX)}$: *Maximum allowable junction temp.*

t_d: *Delay time.* Interval between a specified point at beginning of gate pulse and the instant at which the principal voltage drops to a specified value. (OFF-ON) (Fig. 3)

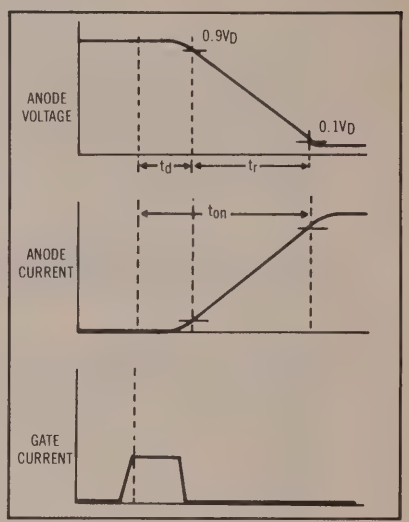

Fig. 3. Turn-on time waveforms

t_{on}: *Turn-on time.* The sum of delay time and rise time. (OFF-ON) (Fig. 3)

t_q: *Turn-off time.* Time between principal current reaching zero and the instant thyristor can block forward voltage without turning ON. (Fig. 1)

t_r: *Rise time.* Time between principal voltage dropping from one value to a second lower value when thyristor turns from OFF to ON. (Fig. 3)

t_{rr}: *Reverse recovery time.* (Fig. 2)

V_{DRM}/V_{RRM}: *Maximum repetitive peak OFF state/reverse voltage* excluding non-repetitive transients.

V_{DSM}/V_{RSM}: *Maximum nonrepetitive peak OFF state/reverse voltage.*

V_{FM}/V_{TM}: *Maximum forward voltage drop* at a specific forward current and case temp.

V_{GDM}: *Gate nontrigger voltage.* Highest dc voltage that will *not* cause thyristor to switch from OFF to ON.

V_{LATCH}: *Latching voltage.* Voltage required for thyristor to latch ON at a given gate current and junction temp.

$V_{TM(DYN)}$: *Dynamic ON state voltage.* Transient ON state voltage of thyristor when triggered into conduction for a given load and time.

Universal Replacement Semiconductors

LINEAR INTEGRATED CIRCUITS
Linear IC and Module Circuits — Op amps, wideband amplifiers, single and dual comparators, voltage regulators, VCO's, Audio PO's, zero crossing switches and timing circuits. Some in choice of, package styles. Popular types of op amps in surface mount also. A to D converters used in many meter lines.

OPTO-ELECTRONIC DEVICES
Discrete LED Indicators
Infrared Emitting Diodes
Phototransistor Detectors
Optoisolators
Opto Interruptors
Bar Graph & LED Arrays
— Red, orange, green, yellow and IR, in both narrow and wide angle. Photo-transistors to cover the IR and visible spectrum. Optoisolators with transistor, Darlington, SCR or TRIAC outputs. Both 1 and 2 digit numeric displays.

INTERFACE INTEGRATED CIRCUITS
Display Driver Circuits — Analog and digital IC's for both decoding and driving from both CMOS and TTL logic.

DIGITAL INTEGRATED CIRCUITS
CMOS — 4000, 4500 series and 40000 series.
TTL (Including 74C CMOS Series) — 74C, 74H, 74HC, 74HCT, 74L, 74LS, 74S and 7400 series.
DTL
HTL
RTL
HLL

SPECIAL PURPOSE DEVICES
Silicon Unijunction Transistors (UJT)
Programmable Unijunction Transistor (PUT)
Silicon Bilateral Switch (SBS)
Silicon Unilateral Switch (SUS)
Silicon Asymmetrical Switch (SAS
Silicon Controlled Switch (SCS)
Bilateral Trigger Diodes (DIACs)

ECG®

Universal Replacement Semiconductors

Maintenance — Routine Preventative Maintenance
Repair — Repair of Equipment Failures
Operations — Plant/Equipment Renovations

TRANSISTORS	79 case styles to fit almost every application
Bi-Polar Types	Both Silicon and Germanium
Complementary Pairs	Up to 250 watts, up to 1500 volts
Bi-Polar Selector Guide (Silicon & Germanium)	
RF Selector Guide	Covering RF Power devices to 870 MHz
Field Effect Transistors (FET)	Both single and dual gate devices. Suitable from audio through UHF
Power MOSFET Transistors	Up to 800 volts, I_D to 32A
Darlington Power Transistors	Gain up to 90K, power up to 300W, IC to 50A
DIODES AND RECTIFIERS	55 case styles for most applications
General Purpose	Both Silicon and Germanium
PIN Diodes	For fast switching
HV Rectifiers	Voltages to 45,000 volts
Varistors (Temperature Compensating Diodes)	Biasing diodes to achieve stability
Varistors (Voltage Compensating Diodes)	
Varactors (Variable Capacitance Diodes)	For tuning, AFC
Bridge Rectifiers	1 Amp to 100 Amps, up to 1000 volts
HV Rectifiers (Avalanche Silicon)	High voltage and high current
ZENER DIODES	From ½ to 50 watts, from 2.4 to 200 volts, axial and stud cases
INDUSTRIAL RECTIFIERS	From 3 to 2200 Amps up to 1600 volts, Schottky and Ultra-Fast types
SILICON CONTROL RECTIFIERS (SCR)	
Phase Control	0.6 to 1880 Amps, voltage to 1200 volts
Switching	Frequencies to 16 kHz
TRIACS	0.8 to 45 amperes, with voltages up to 1000 volts in a variety of case styles to accommodate most applications
MICROPROCESSORS/RAM's	Seven popular microprocessors and their peripherals, SRAM, DRAM & PROMs in various size configurations
MECHANICAL ACCESSORIES	
IC Sockets	Standard low profile, wire wrap and shrink type (.070 ctrs)
Insulator (Mica/Rubber)	
Transistor Sockets	
Heat Sinks/Clamps	
Transistor Mounting Kits

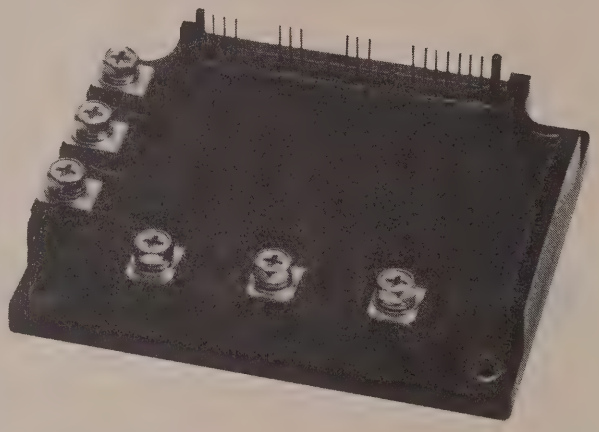
Powerex Technology Has Produced the Best Selection of Rugged and Design-Adaptable Power Modules Available Today.

Like our isolated INTELLIMOD™, which features combined components to allow easy integration, and to reduce circuit design costs, allowing you to get your product to market in half the time. INTELLIMOD™ offers fail-safe protection against excess currents, temperatures, undervoltage lock, and short circuits. Rated 10-600A/600V, 10-300A/1200V.

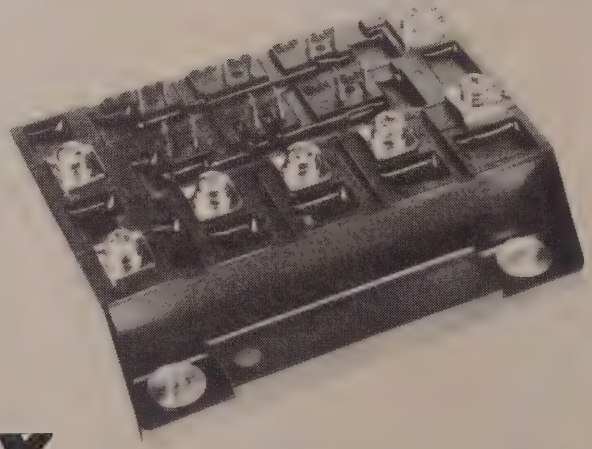
Then there's our family of IGBT isolated modules. Powerex IGBTs outperform the competition by 10-15% in even the harshest environments. Features like square switching, large safe-operating area, reduces steady-state switching, and increased short circuit withstand time, make Powerex IGBT's the natural choice for applications that call for maximum durability. Designed for 20 Khz operation with rating to 15-600A/600-1400V or our genuine low Vce (SAT) G-Series™ for ≤ 5 Khz.

To choose from lead, stud, disc or modular packages in product lines listed below, or for additional product information and technical support, contact Powerex Marketing Department or Applications Department.

INTELLIMOD™
Design Friendly



IGBT
Performance Tough



- **Standard Rectifiers** 1.5-4800A, 50-4400V
- **Fast Recovery Rectifiers** 1.5-1500A, 50-3500V, 3-25 μsec
- **Phase Control Thyristors** .5-2750A, 25-4500V
- **Inverter Grade SCRs** 63-2360A, 100-3000V, 10-100 μsec
- **Triacs** 8-30A, 200-600V
- **INTELLIMOD™ Isolated Power Modules** 10-600A/600V 10-300A/1200V
- **IGBT Isolated Power Modules** 15-600A, 600-1400V
- **GTO Thyristors** 300-4000A (I_{TGO}), 200-6000V
- **Power Transistors** 1.5-800A, 40-1200V
- **Darlington Transistor Modules** 5-1000A, 200-1400V
- **FETMOD™, MOSBIP™ Isolated Power Modules** 8-300A, 50-1000V
- **SCR/Diode Isolated Power Modules** 20-400A, 50-2400V
- **High Power Isolated Modules** 300-800A, 600-3000V
- **Assemblies** .6-8700A, 1-72 kV
- **Isolated Fast and Super Fast Recovery Diode Modules** 20-400A, 200-500 ηsec

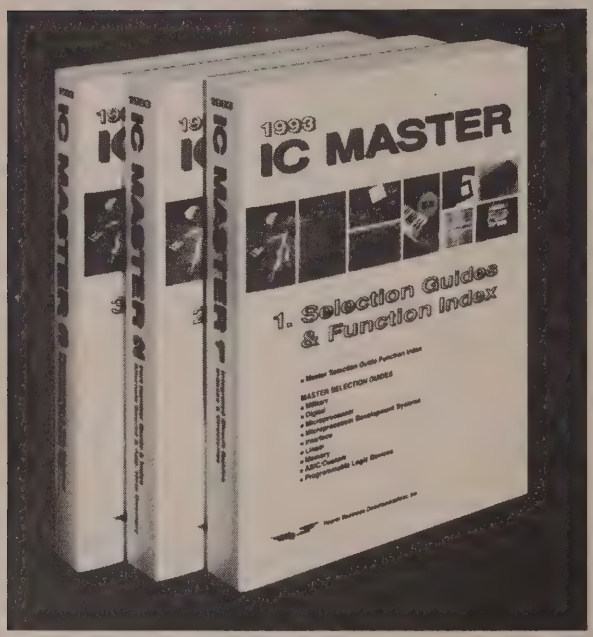
SSSUPER TTIME SSSAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your job has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516)227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, FAX Marie at (516)-227-1901. She'll FAX the IC Master subscription form back to you right away.

And, if you tell her you saw it in the 1993/94 EEM, she'll take $10 off the subscription price!

IC MASTER

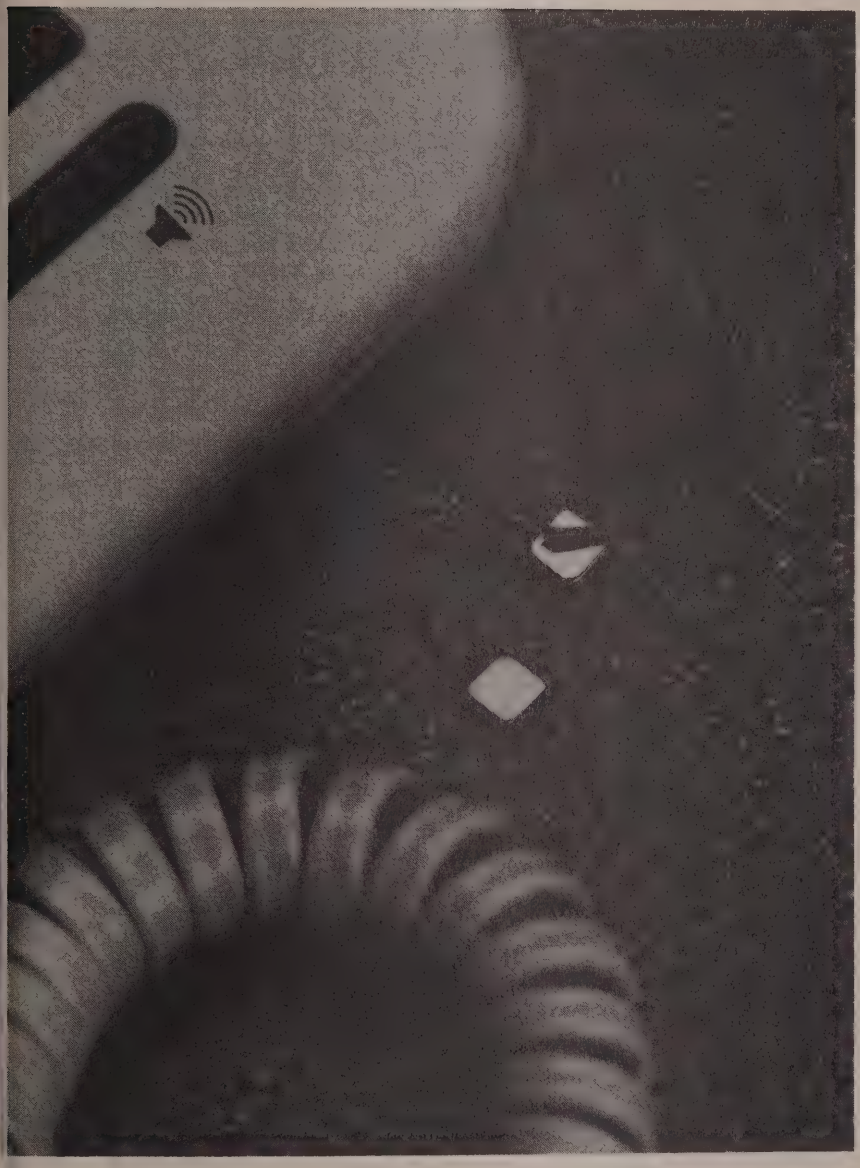
PolySwitch® **Resettable** Devices for theTelecom Market

PolySwitch Protectors are the Ideal Solution to Problems in Meeting UL 1459 Requirements



PolySwitch overcurrent protector TR600-150 is a positive temperature coefficient (PTC) device that acts like a resettable fuse to protect sensitive phone circuits from fault conditions. When a fault occurs, the PolySwitch device increases in resistance several orders of magnitude from its base resistance. When the resistance is increased, current is typically reduced to a few millamps. Unlike a fuse, once the fault condition is removed, the PolySwitch device will reset so normal circuit operation can resume.

The PolySwitch TR600-150 is "hold current" or "carry current" rated at .150 amps. It will "trip" at approximately .225 amps, shutting down the fault current before damage to the interface can occur. This is an important point, because most protection devices that are lightning robust will not trip until an overcurrent fault of >.500 amps exists.

The PolySwitch advantage: resettable protection

As mentioned before, PolySwitch protection devices reset themselves after an overcurrent fault is removed. This means that for the majority of overcurrent faults, the PolySwitch device (like a fuse) shut down the current and protect the circuit, but (unlike a fuse) restore the circuit to operative status once the fault is removed. This resettability eliminates service calls and loss of telecommunications system availability.

Many prominent equipment manufacturers use PolySwitch devices

PolySwitch devices have been in use for years as resettable overcurrent protection elements used by PBX, KTS, and other CPE primary protection module manufacturers, and central office switch manufacturers all over the world. More than 35 million phone line connections are protected by PolySwitch devices worldwide.

Corporate Profile

Semtech Corporation, headquartered in Newbury Park, California, manufactures high quality semiconductor products consisting of silicon rectifiers, rectifier assemblies, transient voltage suppressors, high voltage monolithic capacitors, commercial power hybrids and related devices. These products are mainly used to convert alternating current into direct current and are also used in electrical circuits to limit or regulate voltage or protect other devices or systems absorbing or diverting electrical energy. Semtech focuses its efforts on producing such high-quality, high-precision components for military and commercial customers. With the acquisition of its wholly owned subsidiary, Semtech Corpus Christi, the Company has extended its product line to include linear and switching voltage regulators of both monolithic and hybrid designs, darlington transistors, interface drivers, pulse width modulators, overvoltage protection devices, rectifiers and a wide selection of semiconductor die for hybrid circuit applications. Traditionally, these products have been manufactured for commercial, industrial and telecommunications power supply customers.

The Leader in Power Semiconductor Components

500 WATT AXIAL LEAD - HERMETIC

FEATURES:

- Low dynamic impedance.
- Hermetically sealed glass package.
- Metallurgically bonded.
- High surge capacity.
- Available in JAN, JTX, and JTXV versions per MIL-S-19500/551.

MAXIMUM RATINGS:

- Operating Temperature: -65°C to +175°C.
- Storage Temperature: -65°C to +175°C.
- **Surge Power: 500W.**

The Leader in Power Semiconductor Components

500 WATT AXIAL LEAD - TRANSIENT VOLTAGE SUPPRESSOR

FEATURES:
- 500 watts peak pulse power.
- Response time: 1 x 10^{-12}.
- Each device 100% Surge Tested to Ipp.
- Voltage range: 5v to 170v.
- Protects sensitive semiconductor circuits.
- Solid state silicon avalanche technology.

MAXIMUM RATINGS:
- Operating & Storage Temp: -65°C to +150°C.
- Forward surge rating: 70A, 1/120sec half cycle @ 25°C.
- Steady state power dissipation: 1 watt @ T_L = 75°C.

MECHANICAL CHARACTERISTICS:
- Molded epoxy case: DO-41.
- Body marking: P/N, date code, polarity band (cathode).

The Leader in Power Semiconductor Components

600 WATT AXIAL LEAD - TRANSIENT VOLTAGE SUPPRESSOR

FEATURES:
- 600 watts peak pulse power.
- Response time: 1 x 10^{-12}.
- Each device 100% Surge Tested to Ipp.
- Voltage range: 6.8v to 440v.
- Protects sensitive semiconductor circuits.
- Solid state silicon avalanche technology.

MAXIMUM RATINGS:
- Operating & Storage Temp: -65°C to +150°C.
- Forward surge rating: 100A, 1/120sec half cycle @ 25°C.
- Steady state power dissipation: 5 watt @ T_L = 75°C.

MECHANICAL CHARACTERISTICS:
- Molded epoxy case: DO-15.
- Body marking: P/N, date code, polarity band (cathode).

The Leader In Power Semiconductor Components

1500 WATT AXIAL LEAD - TRANSIENT VOLTAGE SUPPRESSOR

FEATURES:
- 1500 watts peak pulse power.
- Response time: 1 x 10^{-12}.
- Each device 100% Surge Tested to Ipp.
- Voltage range: 6.8v to 440v.
- Protects sensitive semiconductor circuits.
- Solid state silicon avalanche technology.

MAXIMUM RATINGS:
- Operating & Storage Temp: -65°C to +150°C.
- Forward surge rating: 200A, 1/120sec half cycle @ 25°C.
- Steady state power dissipation: 5 watt @ T_L = 75°C.

MECHANICAL CHARACTERISTICS:
- Molded epoxy case: DO-201.
- Body marking: P/N, date code, polarity band (cathode).

ELECTRICAL CHARACTERISTICS @ 25°C

NOTES

(1) Rating at Case Temperature T_C
Rating for each leg in multiple diode assemblies

(4) Measured on discrete devices prior to assembly

Add code for configuration # #:

01 = Non-isolated cathode to stud
02 = Isolated cathode to stud
03 = Non-isolated anode to stud
04 = Isolated anode to stud

NOTES: Operating and Storage Temperature Ranges are -55°C to +150°C unless otherwise indicated.

(A) Operating and Storage Temperature Range -55°C to +175°C.
(B) Operating and Storage Temperature Range -65°C to +150°C.
(C) Available as JTX to MIL-S-19500/483.
(F) These devices are available in Europe to F and FX levels.
(1) Ratings at Case Temperature T_C.
(2) Ratings at Ambient Temperature T_{AMB}.
(3) Measured on discrete devices prior to assembly.

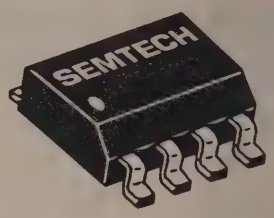
TRANSIENT VOLTAGE SUPPRESSION DIODE ARRAY



FEATURES:
- 300 watts peak pulse power.
- Data, signal, and Vcc Bus line protection.
- 100% surge tested.
- Unidirectional & Bidirectional.
- Standard SO-8 plastic package.

MAXIMUM RATINGS
- Peak Pulse Power: 300 watts (8x20µs) (see fig. 3).
- Operating & Storage Temperature: -55°C to +150°C.

MECHANICAL CHARACTERISTICS
- Molded SO-8 surface mount package.
- Marking: logo and part number or marking code.
- Pin #1 marked with dot on body.

1500 WATT AXIAL LEAD - PLASTIC IC PROTECTION

FEATURES:
- 1500 watts peak pulse power.
- Response time: 1 x 10^{-12} secs.
- Each device 100% Surge Tested to Ipp
- Very low clamping voltage
- Protection for CMCS. TTL devices.
- Solid state silicon avalanche technology.

MAXIMUM RATINGS:
- Operating & Storage Temp: -65°C to +150°C.
- Forward surge rating: 70A, 1/120sec half cycle @25°C.
- Steady state power dissipation: 1 watt @ T_L = 75°C

MECHANICAL CHARACTERISTICS:
- Molded epoxy case: DO-201.
- Body marking: P/N, date code, polarity band (cathode)

SEMTECH CORPORATION

The Leader in Power Semiconductor Components

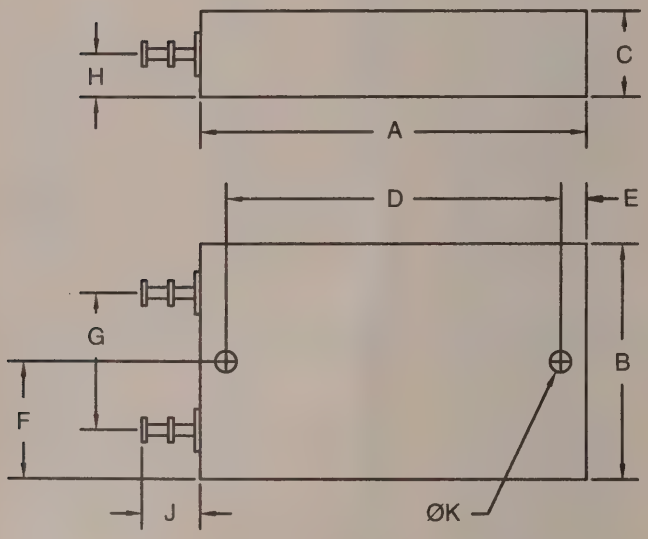
7500 & 15,000 WATT - MODULE

FEATURES:

- Wide voltage range (8.4 to 500 Volts RMS).
- Bidirectional for AC applications.
- **PIP** series designed for industrial applications.
- **PHP** series designed for aerospace, military, and shipboard applications.
- Each device is 100% tested.
- Custom voltages available from factory.



MAXIMUM RATINGS:

- Operating Temperature: -65°C to +150°C.
- Storage Temperature: -65°C to +150°C.
- Surge Power: 7.5KW & 15KW.
- Average steady state power dissipation @ 50°C: 7.5 Watts.

SCREENING:

- 100% TX level screening is available per MIL-S-19500/507, 516. For ordering, use the following suffix:
  H1 - Submodule screening
  H2 - Submodule & module screening
  H3 - Submodule & module screening. Group B & C lot testing.

SEMTECH CORPORATION

The Leader in Power Semiconductor Components

15,000 WATT - MODULE

FEATURES:
- 15,000 watts peak pulse power.
- 28 volts power supply protection.
- Each device is 100% tested.
- Molded case.
- For use in airborne equipment
- Custom voltages available from factory.

MECHANICAL:
- Molded case.
- Polarity: Positive terminal indicated.
- Body marked with Logo, part number, & date code.

MAXIMUM RATINGS:
- Operating Temperature: -65°C to +150°C.
- Storage Temperature: -65°C to +150°C.
- Surge Power: 15KW.
- Average steady state power dissipation: 10 Watts.

SCREENING:
- 100% TX level screening is available per MIL-S-19500/507, 516. For ordering, use the following suffix:
  H1 - Submodule screening
  H2 - Submodule & module screening
  H3 - Submodule & module screening. Group B & C lot testing.

DESCRIPTION:
The 704-15K36 & 704-15K36T series of transient voltage suppression modules is for use primarily in avionics equipment. This series meets all applicable environmental requirements of MIL-S-19500. In addition, the subassemblies can be 100% TX screened per MIL-S-19500/516 or 507. Although this series has been designed for 28 volt aircraft applications, different voltages may be special ordered for specific applications.

LOW-DROP LINEAR VOLTAGE REGULATORS

POSITIVE LOW-DROPOUT FIXED AND ADJUSTABLE VOLTAGE DEVICES

The LT1083 - LT1086 series of low-dropout regulators provide superb regulation and low output noise for applications demanding higH performance with little dissipated heat. Both fixed and adjustable output versions are available, which deliver 7.5A, 5A, 3A, and 1.5A of regulated output current with only 1.3V input-output differential voltage.

The Leader in Power Semiconductor Components

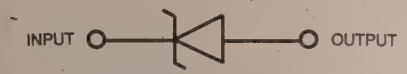
1A 5V TO 3.0, 3.3, ADJ EZ DROPPER™

FEATURES:
- Drops 5V to 3V, 3.3V, ADJ

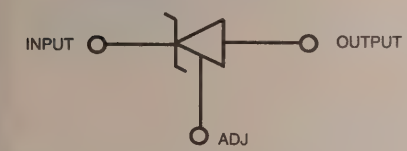
DESCRIPTION

The EZ5Z3 voltage converters are innovative 2 terminal devices that accept a regulated 5.0V input and reduce it to 3.0V or 3.3V over a range of 10mA to 1A. The EZ5Z3- ADJ is an adjustable 3 terminal model allowing output voltage trimming.

BLOCK DIAGRAMS



EZ5Z3-3.0 EZ5Z3-3.3



EZ5Z3-ADJ

ABSOLUTE MAXIMUM RATINGS

Parameter	Symbol	Minimum	Maximum	Units
Power Dissipation	P_D		2	W
Continuous Current	I_C		1	A
Thermal Resistance Junction to Case	B_{JC}		4	°C/W
Junction to Ambient TO-220/TO-223	O_{JA}		50/156	
Operating Temperature Range	T_J	-40	150	°C
Storage Temperature Range	T_{STG}	-65		
Lead Temperature (Soldering, 10 Sec. Time Limit)	T_{LEAD}		260	

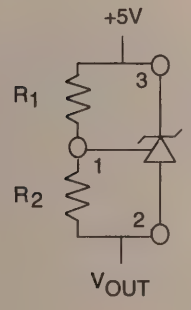
DEVICE SELECTION GUIDE

Device	V_{IN}	V_{OUT}	Package	Device	V_{IN}	V_{OUT}	Package
EZ5Z3-T3.0	5	3.0	TO-220 3 Pin	EZ5Z3-S3.0	5	3.0	TO-223
EZ5Z3-T3.3		3.3		EZ5Z3-S3.3		3.3	
EZ5Z3-TADJ		ADJ		EZ5Z3-SADJ		ADJ	

ELECTRICAL CHARACTERISTICS

Parameters	Symbol	Test Conditions			Test Limits			Units
		V_{IN}	I_O	T_J	Min.	Typ.	Max.	
EZ5Z3-3.0	V_O	5V	500mA	25°C	2.91	3.00	3.09	V
			10mA to 1A	-40 to 125°C	2.85		3.15	
EZ5Z3-3.3			500mA	25°C	3.20	3.30	3.39	
			10mA to 1A	-40 to 125°C	3.13		3.46	
EZ5Z3-ADJ	V_{REF}		500MA	25°C	1.21	1.25	1.28	
			10mA to 1A	-40 to 125°C	1.18		1.31	
REGULATION	REG (LOAD)			25°C		0.5	1.0	$\%V_O$
TEMP. COEFFICIENT	T_C		500mA	25 to 125°C		0.005	0.01	$\%V_O$/°C

ADJUSTING EZ5Z3-ADJ



$$V_{DROP} = V_{REF}(1+R_1/R_2)$$

$$V_{OUT} = V_{IN} - V_{DROP}$$

$$R_1 + R_2 \leq \frac{V_{DROP}}{300\mu A}$$

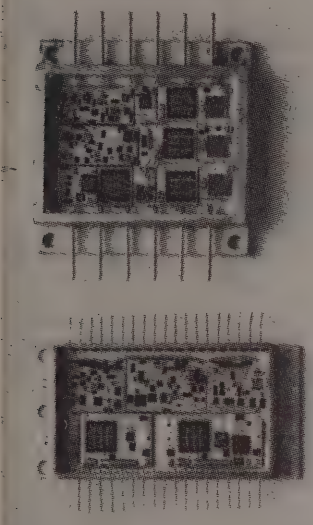
FOR OVER 30 YEARS

Solitron
Devices, Inc.

YOUR SOURCE FOR

POWER SEMICONDUCTOR COMPONENTS AND CIRCUITS



HYBRID CIRCUITS
- Power and Small-Signal
- Voltage Regulators
- Motor Controls
- Amplifiers
- Microwave
- Custom Circuits and Packages
- Over 400 Standard Packages

POWER TRANSISTORS
- Power MOSFETs, N and P Channel
- IGBTs
- Power BIPOLAR, NPN and PNP including Darlingtons
- TO-3, TO-204, TO-228, TO-254, TO-257, TO-258, TO-259, Interlocks, and All Standard Stud Packages
- Standard and Custom Lead Forming

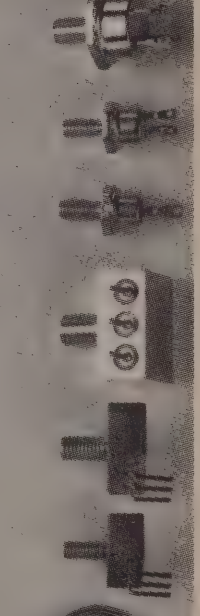
RECTIFIERS
- Schottky
- Fast Recovery
- Standard Recovery
- TO-254, TO-228, TO-257, TO-258, TO-259, and Interlock Packages
- Standard and Custom Lead Forming

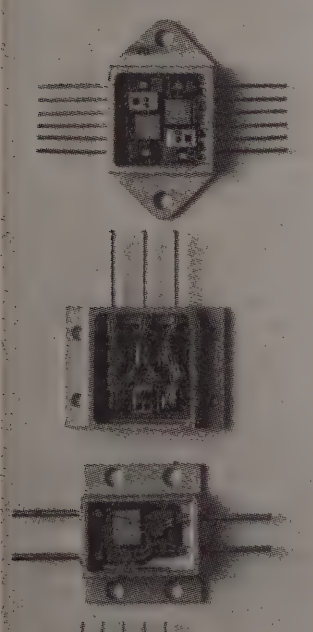
MULTI-CHIP POWER ASSEMBLIES
- H-Bridges; Full or Half
- 3-Phase Bridges
- Voltage Doublers
- Rectifiers with Snubbers
- Power Output Stages
- MOSFET/Rectifier or IGBT/Rectifier
- Custom Packaging for Power Efficiency and Minimum Circuit Parasitics

SMALL-SIGNAL DEVICES
- MOSFETs, N and P Channel
- J-FETs, N and P Channel

RESISTOR PRODUCTS
- Thin-Film Resistors
- Thin-Film Resistor Networks
- Attenuators

Solitron will accommodate any of your special requirements with custom packaging, special lead configurations and rapid prototype delivery. CALL US TODAY!





Government Approved QPL Supplier and MIL-STD-1772 Certified

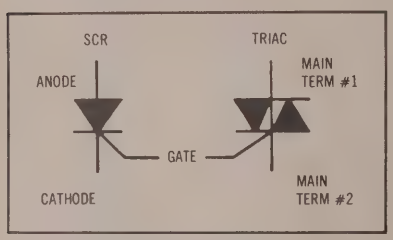
MINIGLOSSARY THYRISTORS/ HIGH POWER DIODES

THYRISTORS

A thyristor is a four-layer semiconductor (pnpn) that can be switched from an OFF to an ON state. This is usually done by a voltage or current pulse to the gate terminal. The device will then continue to conduct so long as the principal current of the device flows through the thyristor's two main terminals.

In many respects a thyristor is analogous to an electromechanical latching relay. In fact, thyristors have largely replaced these relays in newer equipment designs. But, misapplications and/or failure to fully understand the parameters of these and other solid state devices often leads to catastrophic field failures.

The terminology shown on this page has been condensed from common industry data books and is intended to be a guide for the engineer.



di/dt: *Critical rate of rise of ON state current* is the user's maximum design limit (Fig. 1).

di_R/dt: *Rate of decay of ON state current* (Fig. 1 & 2).

dv/dt (critical): *Rate of rise of OFF state voltage*. Lowest voltage rate of rise to cause a thyristor to turn ON.

dv/dt (reapplied) : *Rate of rise of reapplied OFF state voltage.*

I_{FSM}: *Nonrepetitive ON state surge current in diodes.* Maximum peak value of ½ cycles (60 Hz) a diode can withstand up to 100 times in its lifetime.

I_{TSM}: *Nonrepetitive ON state surge current in thyristors*. Maximum peak value of 60 Hz cycles a thyristor can withstand up to 100 times in its lifetime.

I_{DRM}/I_{RRM}: *Maximum peak forward/ reverse leakage current* at specified temperature and repetitive conditions.

I_{GDM}: *Continuous gate current not to trigger*. Highest dc gate current that will *not* cause thyristor to switch from OFF to ON at a specific temperature.

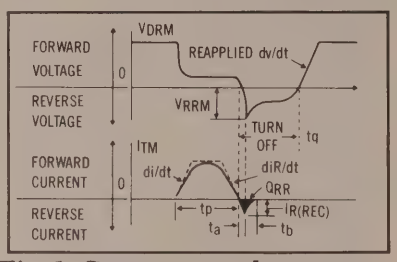


Fig. 1. Concurrent voltage and current waveforms

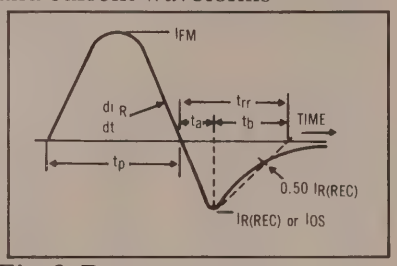

Fig. 2. Recovery current waveform

I_{GT}: *Continuous gate trigger current.* Absolute minimum gate current required to switch thyristor from OFF to ON.

I_H: *Holding Current*. Minimum current required to hold thyristor ON.

I_L: *Latching current*. Minimum current required to hold thyristor ON after removal of gate drive.

$I_{(REC)}$; *Recovery current*. Peak value of reverse current during recovery or turn OFF (Fig. 1 & 2).

I_{OS}: *Overshoot current*. See $I_{R(REC)}$.

I^2t: Maximum ON state, short time thermal capacity of the silicon element for operations less than ½ cycle of 180° conduction angle.

$I_{T(AV)}$: *Average ON state current* (max.)

Q_{RR}: *Reverse recovered charge* (Fig. 1).

$R_{\theta JC}$: *Junction-to-case thermal resistance* in degrees C per watt.

$T_{C(MAX)}$: *Max. allowable case temperature*.

$T_{J(MAX)}$: *Maximum allowable junction temp.*

t_d: *Delay time*. Interval between a specified point at beginning of gate pulse and the instant at which the principal voltage drops to a specified value. (OFF-ON) (Fig. 3)

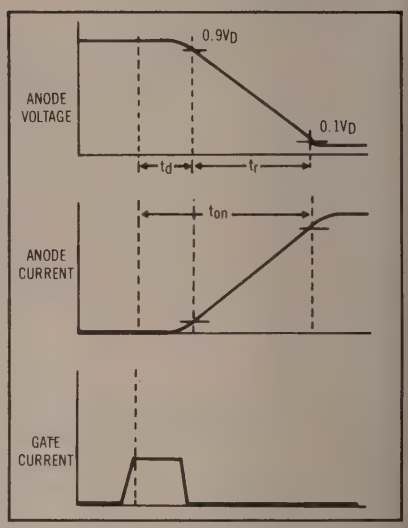

Fig. 3. Turn-on time waveforms

t_{on}: *Turn-on time*. The sum of delay time and rise time. (OFF-ON) (Fig. 3)

t_q: *Turn-off time.* Time between principal current reaching zero and the instant thyristor can block forward voltage without turning ON. (Fig. 1)

t_r: *Rise time*. Time between principal voltage dropping from one value to a second lower value when thyristor turns from OFF to ON. (Fig. 3)

t_{rr}: *Reverse recovery time*. (Fig. 2)

V_{DRM}/V_{RRM}: *Maximum repetitive peak OFF state/reverse voltage* excluding non-repetitive transients.

V_{DSM}/V_{RSM}: *Maximum nonrepetitive peak OFF state/reverse voltage*.

V_{FM}/V_{TM}: *Maximum forward voltage drop* at a specific forward current and case temp.

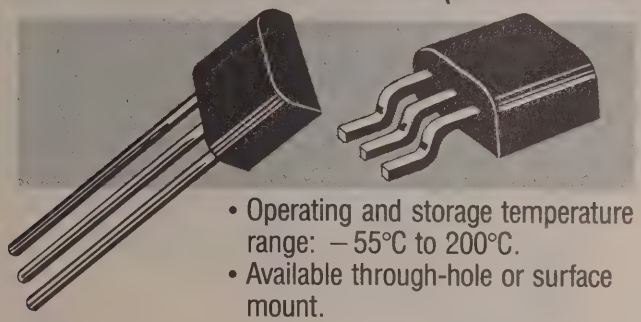
V_{GDM}: *Gate nontrigger voltage*. Highest dc voltage that will *not* cause thyristor to switch from OFF to ON.

V_{LATCH}: *Latching voltage*. Voltage required for thyristor to latch ON at a given gate current and junction temp.

$V_{TM(DYN)}$: *Dynamic ON state voltage*. Transient ON state voltage of thyristor when triggered into conduction for a given load and time.

ZETEX SEMICONDUCTOR PRODUCTS

HIGH PERFORMANCE TO-92 (SUPER E-LINE)



- Operating and storage temperature range: −55°C to 200°C.
- Available through-hole or surface mount.

HIGH PERFORMANCE TO92 (SUPER ELINE) TRANSISTORS * – 1.2WATTS

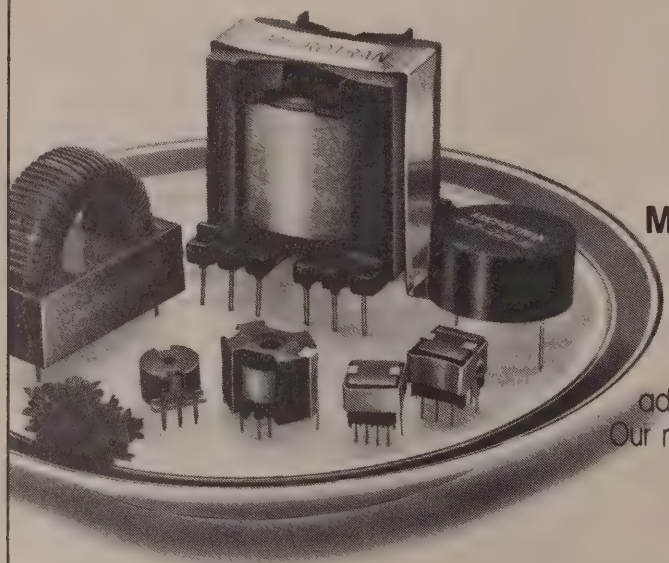
MICROTRAN ...for all your magnetics needs

Ready to go...

2,000 catalog items in stock

Microtran provides immediate delivery from distributors plus factory back-up inventory. . . at very attractive prices. Our Total Quality Management commitment permits certification for ship-to-stock, and we can provide JIT delivery. If you have any other needs, please call. We're very accommodating.



...Full menu

Magnetics for myriad applications

For over 40 years, we have manufactured transformers for Telecommunications; Military/ Aerospace; Instrumentation, Control and Automation; Switch Mode Magnetics. We keep adding new products to anticipate industry demand. Our new low-profile SMT transformer, for example, is only 8mm high. A first!

Designer friendly

Modified catalog or application-specific

For your special needs, we can modify catalog items at low cost; or for unique applications, we design magnetics from scratch. . . and fast. Our credentials include: MIL-I-45208 compliance; MIL-T-27 QPL listing; MIL-STD-981; MIL-STD-202 solderability.

145 E. Mineola Avenue • P.O. Box 236 • Valley Stream, NY 11582 • Tel: (516) 561-6050 • Fax: (516) 561-1117

See our data pages in EEM Transformer Section 5600 and Coil Section 1800.

Abbott TECHNOLOGIES, INC.

60 & 400 Hz Military & Industrial Transformers

Since 1961, Abbott Technologies, Inc. has been commited to providing high quality, reliable power transformers and inductors to the electronics industry.

Abbott now offers over 2,000 standard catalog models to choose from-all of which will satisfy your most demanding requirements. Also, if you don't see the exact specifications you require, we have the expertise to design and produce custom and special transformers up to 30,000 watts.

For your convenience, the Ready Reference Guide below will allow quick selection of the model that best fits your requirement. For complete information and a copy of the Abbott Transformer Catalog, contact the office or representative nearest you.

Abbott TECHNOLOGIES, INC.

QPL Transformers

Over 750 Power Transformers Qualified to MIL-T-27

As a design engineer or purchasing agent for a military prime contractor or sub-contractor, you now can achieve rapid project approval and eliminate the time and expense of transformer qualification simply by specifying Abbott QPL transformers.

Abbott offers over 750 military transformers—six complete product lines—proven to meet the demanding requirements of MIL-T-27.

- Thermal Shock 25 cycles (−55°C to +130°C)
- Humidity
- Shock
- Life Testing
- Vibration
- Immersion
- Flammability

Abbott's military transformers have proven themselves in the Space Shuttle, B-1 Bomber, Cruise Missile, Phalanx, Ram, Harpoon, AWACS and Apache Helicopter programs.

Only Abbott offers a selection this wide.

60 Hz	400 Hz (1ϕ and 3ϕ)
5-220 Volts	5-300 Volts
5-300 VA	2-375 VA
Grade 4, Class S	Grade 5, Class S

(See "Ready Reference Guide" on adjacent page for more model information.)

Only Abbott offers this commitment to quality

Our reputation for reliability has been earned by a conservative design philosophy in which special attention is given to thermal margins and the use of quality materials. Our Quality Assurance program is in accordance with MIL-I-45208A and MIL-STD-45662. Each transformer is 100% tested to the following requirements: visual and mechanical, turns ratio, excitation current, dielectric withstanding voltage and continuity.

We have our own fully equipped test laboratory which has been accepted by the Defense Logistics Agency to perform qualification testing and Group A and B Inspection to military specification MIL-T-27. This is a reflection of our commitment to serving the defense electronics and aerospace industries.

NEW Abbott Catalog including QPL Cross-references

To help you take advantage of Abbott's QPL status, we have included all QPL Cross-reference numbers in our new catalog. Call or write today for your free copy.

Abbott TECHNOLOGIES, INC

60 Hz MIL-T-27 Transformers

MODEL P

SPECIFICATIONS

INPUT PRIMARY: 115 VAC, 60 Hz ± 5 Hz, 1 phase.†
"A" Option: 230 V ac. Add suffix "A" to model number, e.g., 5P10CTA (Fig. 1).
"B" Option: 115/230 V ac. Add suffix "B" to model number, e.g., 5P10CTB (Fig. 2).
REGULATION: 10% no load to full load.
SECONDARY VOLTAGE TOLERANCE: Within 3% of listed output voltage when measured at full load and 115 VAC input.
CONSTRUCTION: To MIL-T-27, Grade 4, Class S, Case: steel.
ENVIRONMENT: To operate in 95°C maximum ambient temperature. Encapsulated to meet MIL-STD-810 for vibration, shock, acceleration, sand, dust, humidity, salt-spray, fungus, sunshine, rain, explosion, and altitude (to a vacuum). NOTE: For high altitude operation, encapsulate terminals.
INSULATION TEST: 1750 VAC.
SECONDARY: See output voltage and current of specific models listed.

†For 50 Hz operation, reduce secondary current by 10% of ratings listed. These units are capable of 400 Hz operation; however, see Abbott's distinct line of miniature 400 Hz transformers.

Abbott TECHNOLOGIES, INC

60 Hz MIL-T-27 Transformers

MODEL 6C

SPECIFICATIONS

INPUT PRIMARY: 115 VAC, 50 to 65 Hz, 1 Phase. See "A" and "X" options below.
REGULATION: 10% no load to full load.
SECONDARY VOLTAGE TOLERANCE: Within 3% when measured at full load and 115 VAC input.
INSULATION TEST: 1500 VAC.
OPERATING TEMP.: 90°C maximum ambient temperature.
CONSTRUCTION: To MIL-T-27, Grade 4, Class S, life "X" (10,000 hrs.)

EFFICIENCY: From 80% to 90% typical.
ENVIRONMENT: Encapsulated to meet MIL-STD-810 for vibration, shock, sand, dust, humidity, salt spray, fungus, sunshine, rain, explosion, and altitude (to a vacuum). NOTE: for high altitude operation, encapsulate terminals.
OPTIONS AVAILABLE: Other output voltages and 230 VAC input are available. Please consult our nearest office for complete information.

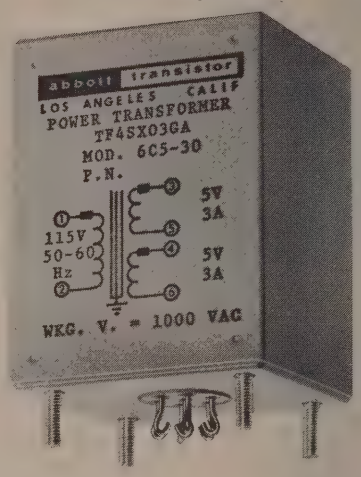
NOTE: These units are also capable of 400 Hz operation.

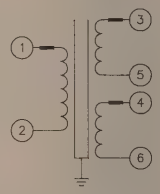
Now QPL!



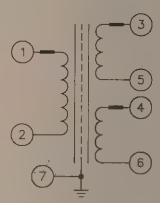
TF4S03 ___

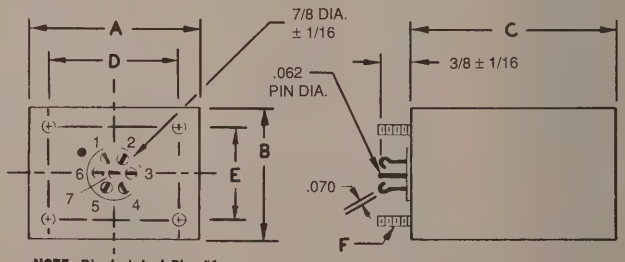
Circuit Diagram

Standard and "A" Option
Series Connected: Connect 4 and 5.
Parallel Connected: Connect 3 and 4, 5 and 6.
230 V ac. Add suffix "A" to model number, e.g., 6C5-5A.



"X" Option
Series Connected: Connect 4 and 5.
Parallel Connected: Connect 3 and 4, 5 and 6.
Electrostatic shield grounded to case and Pin 7.
Add suffix "X" to model number, e.g., 6C5-5X.





NOTE: Black dot at Pin #1.

60 Hz, 3 Ø MIL-T-27 and Industrial Transformers

MODEL 6D

SPECIFICATIONS

INPUT PRIMARY:

WYE:	120V L-Com. or 208V L-L	Suffix A
DELTA:	120V L-L	Suffix C
DELTA:	230V L-L	Suffix E
DELTA:	440V L-L	Suffix F

NOTE: To order a specific input voltage add suffix to model number. (EXAMPLE: 6D ( ) 15-200E has input 230V L-L (3 wire DELTA)).

INPUT FREQUENCY: 50 Hz to 65 Hz.

OUTPUT: See specific models listed.

OUTPUT VOLTAGE TOLERANCE: Within 5% when measured at full load and nominal VAC input.

REGULATION: 10% max. no load to full load. (6% on size 3 thru 6).

INSULATION TEST: 1500 VRMS

EFFICIENCY: Ranges from 90% to 95% typical.

OPERATING AMBIENT TEMP.: 80°C maximum on sizes 1-6; 60°C maximum on sizes 7-9.

MIL-T-27 CONSTRUCTION: (Grade 5 Class S). Specify the letter "M" in the model number. (Example: 6DM15-200 ( )).

NOTE: MIL-T-27 add .20 to Dim. A, B, C. Other inputs and/or outputs available.

INDUSTRIAL CONSTRUCTION: Industrial Grade (open frame): Specify the letter "F" in the model number. (Example: 6DF 15-200 ( )).

Abbott TECHNOLOGIES, INC — 50/60 Hz Universal Isolation Transformers

MODEL 6H/6J

- **3 phase and single phase models**
- **Multiple taps for a wide range of input/output combinations**
- **All units feature electrostatic shielding**
- **250VA-15KVA, 3 phase**
- **250VA-10KVA, single phase**

Input/Output Voltages: Reversible, allowing use of transformer in step-up or step-down application.

3 phase

WYE 120/208V: WYE 120/208V	**Suffix A**
WYE 120/208V: DELTA 220/240V	**Suffix B**
WYE 120/208V: DELTA 440V	**Suffix C**
DELTA 220/240V: DELTA 220/240V	**Suffix D**
DELTA 220/240V: DELTA 440V	**Suffix E**
DELTA 440V: DELTA 440V	**Suffix F**

Single phase (see schematic for various voltage combinations available through series/parallel connection.)

120/240V primary to 120/240 secondary	**Suffix H**
120/240V primary to 220/440V secondary	**Suffix K**

Input Frequency: 47-65 Hz

Dielectric Withstanding Voltage: 2000VRMS, 60HZ, for 1 minute.

Operating Ambient Temperature: 60 Degrees C Max.

Adjustable Voltage Taps: Allow adjustment of output voltage, (use of tap on primary side raises output approximately 5%.)

ORDER INSTRUCTIONS: FOLLOW EXAMPLE BELOW TO SPECIFY MODEL CONFIGURATION:

60 Hz Industrial Transformers

OTHER STANDARD MODELS AVAILABLE TO 20KVA

MODEL 6B

SPECIFICATIONS

INPUT PRIMARY: 115 VAC standard. 230 VAC at 10% additional cost. Specify by suffixing "A" to model number. 115/230 VAC dual input at 10% additional cost. Specify by suffixing "B" to model number.

INPUT FREQUENCY: 50 to 400 Hz, 1 phase.

REGULATION: 15% Max. from no load to full load (6% on units size 8 and larger).

SECONDARY VOLTAGE TOLERANCE: Within 5% of listed output voltage when measured at full load and 115 VAC input.

INSULATION TEST: 1500 VAC.

OPERATING TEMPERATURE: 80°C maximum ambient (70°C on units size 8 and larger).

APPROXIMATE EFFICIENCY: Ranges from 80% to 90% typical.

CONSTRUCTION: Commercial grade using Silicon Iron for core and heavy insulated synthetic film magnet wire with class "B" rating impregnated with a high quality insulating varnish having a class "H" rating. Other outputs and/or inputs available on request.

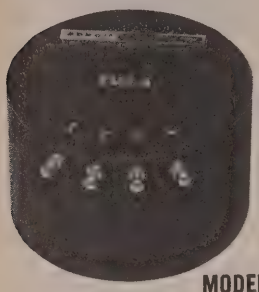
400 Hz MIL-T-27 and Industrial Toroid Transformers

MODELS TM TF

Now QPL!



MODEL TM
TF5S03ZZ

SPECIFICATIONS

INPUT PRIMARY: 115V, 400 Hz ±20 Hz, 1 phase; for 230V operation add the suffix "A"

REGULATION: 5% or less, no load to full load

SECONDARY VOLTAGE TOLERANCE: Within 5% when measured at full load and 115 VAC input

INSULATION TEST: 1000 VAC

OPERATING TEMPERATURE: MODEL TM 90°C maximum ambient/MODEL TF 80°C maximum ambient.

APPROXIMATE EFFICIENCY: 90% to 95% typical.

OUTPUT SECONDARY: See voltage and current of specific models listed

CONSTRUCTION: MODEL TF — Open frame, Industrial Grade with Teflon leads 6" long. MODEL TM — to meet MIL-T-27, Grade 5, Class S, MIL-type Designation TF5S03ZZ

OPTIONS: "A" option is for 230V input primary. Add suffix "A" to model number (i.e. TF10-1A). "C" option is for center tapped output. Add suffix "C" to mode number (i.e. TF10-1C)

400 Hz MIL-T-27 Transformers

MODEL E

SPECIFICATIONS

Input Primary:
115 VAC, 400 Hz ± 20 Hz, 1 phase.

Regulation:
10% no load to full load. (12% for 2E models)

Secondary Voltage Tolerance: Within 5% when measured at full load and 11 VAC input

Construction:
To MIL-T-27, Grade 5, Class S Molded Daillyl Phthalate (Low Outgassing)

Environment:
Encapsulated to meet MIL-STD-810, including vibration, ambient temperature to 85°C, shock, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion, and altitude (to a vacuum).

Secondary:
See output voltage and current of specific models listed.

Other models are available. Contact our nearest office for complete information.

Abbott TECHNOLOGIES, INC

400 Hz MIL-T-27 Transformers

MODEL 4A

SPECIFICATIONS

INPUT PRIMARY: 115 V, 400 Hz ±20 Hz, 1 Phase.

"A" Option: 230 V ac. Add suffix "A" to model number, e.g., 4A5-50A.

"X" Option: Electrostatic shield grounded to core. Add "X" to model number, e.g., 4A5-50X.

REGULATION: 10% no load to full load.

SECONDARY VOLTAGE TOLERANCE: Within 5% when measured at full load and 115 VAC input.

INSULATION TEST: 1500 VAC.

OPERATING TEMP.: 95°C maximum ambient temperature.

CONSTRUCTION: To MIL-T-27, Grade 5, Class S, life "X", (10,000 hrs.)

EFFICIENCY: From 90% to 93% typical.

ENVIRONMENT: Encapsulated to meet MIL-STD-810 for vibration, shock, sand, dust, humidity, salt spray, fungus, sunshine, rain, explosion, and altitude (to a vacuum). NOTE: for high altitude operation, encapsulate terminals.

OPTIONS AVAILABLE: Other output voltages and 230 VAC input are available. Please consult our nearest office for complete information.

Abbott TECHNOLOGIES, INC

400 Hz MIL-T-27 Power Transformers

MODEL 4C

- **Military Designation No. TF5S03ZZ**
- **Rugged construction for high shock and extreme environments**
- **High-temperature operation**
- **Designed for airborne, missile use**

Specifications:

Input Primary: 115VAC, 380-1000 Hz, 1 phase

Regulation: 10% or less, (+/- 4% voltage adjust taps - select models, typical), no load to full load.

Secondary Voltage Tolerance: Within 5% when measured at full load and 115 VAC input.

Dielectric Withstanding Voltage: 1500 VRMS

Efficiency: Ranges from 68% to 96% typical

Operating Ambient Temperature: 85 deg. C maximum ambient temperature. 130 deg. C maximum operating temperature.

Construction: To MIL-T-27, Grade 5, Class S.

Environment: MIL-STD 810C, including vibration, shock, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion, and altitude (to a vacuum).

Output Secondary: See voltage and current of specific models listed.

Other outputs and/or inputs available upon request.

Note 1 — SM series are two hole mounting with holes on center line. #4-40 Pem nuts are fastened to the bracket.
Note 2 — #6-32 Pem nuts on bracket are standard.
Note 3 — #8-32 Pem nuts on bracket are standard.
Note 4 — Overall dimensions approximate; given for reference only.
Note 5 — MTG dimensions tolerance ± .010

- All primaries 380-1000 cps
- Dielectric test voltages:
  PRIMARIES 1500 Volts RMS
  SECONDARIES 1500 Volts RMS
- Encapsulant: filled semi-rigid, cycloaliphatic epoxy resin.

* For Suffix "A" and "B" DELTA numbers, call factory. **QPL Testing underway.

SPECIFICATIONS

INPUT PRIMARY: WYE: (4 wire) Line to Common 115 VAC
WYE: (3 wire) Line to Line 200 VAC
DELTA: (3 wire) Line to Line 115 VAC (see option "A")
DELTA: (3 wire) Line to Line 200 VAC (see option "B")

INPUT FREQUENCY: 400 Hz ±20 Hz.

OUTPUT: See specific models listed.

OUTPUT VOLTAGE TOLERANCE: Within 5% when measured at full load and nominal VAC input.

REGULATION: 10% no load to full load.

INSULATION TEST: 1500 VRMS

EFFICIENCY: Ranges from 90% to 95% typical.

OPERATING TEMPERATURE: 80°C maximum ambient temperature.

TEMPERATURE RISE: Less than 50°C.

Construction: To MIL-T-27 Grade 5, Class S.

ENVIRONMENT: Encapsulated to meet MIL-STD-810, including vibration temperature to 80°C, shock, sand, dust, humidity, salt spray, fungus, sunshine, rain, explosion. Note: For high altitude operation, encapsulate terminals.

Option "A"—To order DELTA input 115 VAC L-L; Add suffix "A" to Model No., e.g., 4D5-90A.

Option "B"—To order DELTA input 200 VAC L-L; Add suffix "B" to Model No., e.g., 4D5-90B.

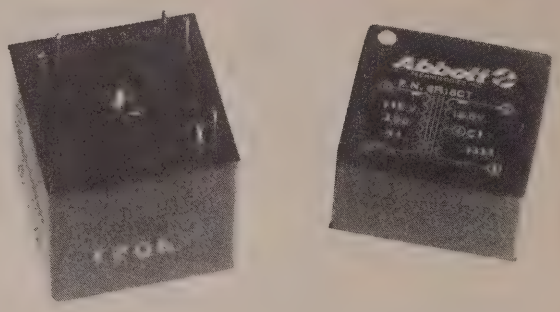
Abbott TECHNOLOGIES, INC — 400 Hz MIL-T-27 P.C. Toroid Transformers

MODEL R

- Military designation TF5S03ZZ
- Compact toroidal construction in a convenient printed-circuit mount package
- Power levels 1.5, 3, 6, and 9 VA
- Standard output voltages 5 to 300 volts
- Low outgassing molded construction for high-altitude operation



SPECIFICATIONS

INPUT PRIMARY: 115 VAC, 400 Hz ± 20 Hz, 1 phase.
REGULATION: Ranges from 10% to 23% maximum
ELECTROSTATIC SHIELD OPTION: (1.5, 3, 6 VA only) add "X" suffix to part number (eg: 3R6CTBX)
SECONDARY VOLTAGE TOLERANCE: Within 3% of listed output voltage when measured at full load and 115 VRMS input
DIELECTRIC WITHSTANDING VOLTAGE: 910 VRMS (1624 VRMS −200 to 300 V outputs)
EFFICIENCY: Ranges from 70% to 83% minimum
OPERATING AMBIENT TEMPERATURE: 95°C maximum
CONSTRUCTION: To MIL-T-27 Grade 5, Class S
ENVIRONMENT: Encapsulated to meet MIL-STD-810, including vibration, shock, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion and altitude (to a vacuum).

ORDER INSTRUCTIONS: R Line Toroid Transformers can be ordered in A or B configuration, and with electrostatic shielding ("X" Option). Add "A" or "B" suffix to model number to select configuration. Add "X" suffix after A or B to order electrostatic shielding. (Not available as standard on 9 VA models). Follow this example:

1.5R110CTBX

Model number — Configuration — Electrostatic shielding option

TL Power Inductors

MODEL TL

MILITARY CONSTRUCTION: Encapsulated to meet construction requirements of MIL-T-27E Type TF5S04ZZ.

APPLICATION: These inductors have low losses in the 3 to 100 kHz frequency range, making them ideal for switching regulator and AC filter choke applications.

INDUCTANCE: Part numbers correspond to inductance values in microhenries, which are measured at 1 V, 10 kHz, 0 DC with an inductance tolerance of + 15%, -5%. Values of inductance other than listed in an existing size are available. Part Number would be: TL(A, B, or C) -- (inductance in Microhy at 0 DC).

CURRENT RATINGS: Listing I_1 is for approximately 10% drop in inductance with a typical 20 degree C temperature rise, and Listing I_2 is for approximately 20% drop in inductance with a typical 40 degree C temperature rise.

Abbott TECHNOLOGIES, INC

Custom-Designed MIL-SPEC Magnetics

Abbott is a leading source of custom-designed magnetics which comply with the rigorous requirements of today's military environment. Abbott custom magnetics have successfully performed in some of the most demanding applications known. A sample of these applications is shown on the opposite page.

A Broad Range of Capabilities

Abbott's design team is experienced with a broad range of magnetic technologies, and can develop solutions to your magnetic problems, in a very short amount of time. Our custom designs reflect the same high standards and conservative design margins of our standard products. The table below describes our normal capabilities.

Our standard quality system is in compliance with MIL-I-45208 and enhanced quality assurance is available to conform to MIL-Q-9858. Our designs normally comply with MIL-STD-454, and MIL-T-27. Special testing can be performed on these units to demonstrate compliance with MIL-STD-810, and MIL-STD-202. Other testing is available upon request.

Many custom requirements can be satisfied by modifying an existing product which can shorten the time needed for delivering the initial prototype. Often we can qualify a modified standard unit to various MIL specs by SIMILARITY, thereby reducing testing costs. We have the capability of providing customers QPL qualification on their custom or modified standard designs.

ENCAPSULATED POWER TRANSFORMERS

Step Down Size... Step Up Performance..!

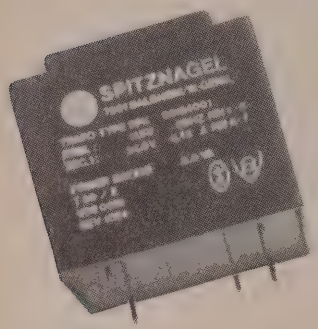
PC-Mountable Power Transformer

- are manufactured according to the International Safety Standards, such as UL, VDE, IEC.
- provide an insulation system which allows the 5,000 Vrms HiPot Test (up to 12,000 Vrms on request.)
- are encapsulated for a higher heat transfer, which results in a higher power/volume ratio.
- are encapsulated for mechanical strength, shock resistance, moisture resistance, better insulation system for the price of the open frame version.
- provide an interchangeable pin placement on the bobbin base, which increase the available options for custom-made transformers.

SPACE LIMITING SPK SERIES

Offers 9 sizes from 0.2 VA to 5.5 VA (power ratings up to 50 VA on request).

The SPK series is manufactured with a split bobbin, which allows the primary and secondary to be wound side by side, rather than one over the other.



AVAILABLE VOLTAGES:

SINGLE PRIMARY DUAL PRIMARY	115V, 60 HZ or 2x115V, 50/60 HZ
DUAL OR SINGLE SECONDARY	6, 9, 12, 15, 18 and 24 V
LOAD REGULATION	30% SPK060 25%
TEMPERATURE RISE	<35° C Class B 130
Hi Pot TEST	5000V RMS

ALBAR's Magnetics

Custom fits.

PART OF THE SOLUTION

When you need a solution for your power problems, don't buy one designed for someone else. ALBAR, a leader in power conversion technology, can design and build superior custom magnetics that will fit into your application for optimal performance, and be cost-effective, too.

ALBAR has made it's name as a manufacturer of custom magnetics and power supplies (linear, ferroresonant and switch mode). Since 1979, our products have been specified in diverse fields like communications, health care and entertainment.

AN ENGINEERING STAFF THAT'S UP TO THE CHALLENGE

Our engineers have a wealth of experience, from microwatt to megawatt power ranges. They hold many patents in the field and have published widely in technical journals. You can be sure that they will be able to solve whatever problems your applications present.

ALBAR's customers know that we ship only top quality, 100% tested products from our plant in Lynnwood, Washington. With our advanced manufacturing capabilities, you'll get the best products and get them on time.

Get a solution that works just for you. Talk to ALBAR for the one that fits.

We're here to help.

When you are ready to discuss your application or just ask a question, call ALBAR toll-free at **1-800-822-5227**.

altran
ALTRAN CORP.

ALTRAN CORP. is located in Crystal Lake, Illinois, 50 miles northwest of Chicago. Our main offices and production facilities are conveniently accessible from both Chicago's O'Hare Airport, and Milwaukee's Mitchell Field. Driving time from either facility is about one hour. As designers and manufacturers of quality magnetic components, we provide many facets of the electronics industry with an array of bobbin, toroidal and printed circuit type transformers and inductors.

Quality Magnetic Components for . . .
Power Conversion • International Medical Electronics • Telephony

POWER CONVERSION

ALTRAN's skilled engineers and precision manufacturing facilities are capable of designing and producing the finest magnetics for power conversion requirements. By utilizing our U. L. recognized insulation systems, we can satisfy virtually any specifications a customer may require.

Linear power conversion can be accommodated for 50 Hz, 60 Hz, 400 Hz or any other frequency up to 1.5 KVA.

Power transformers and associated filtering magnetics can be readily produced to precise performance levels.

Switchmode inverters, converters, drive and filtering magnetics can be manufactured for switching frequencies from below 20 KHz to above 100 KHz.

The development and production of power conversion components has been a major part of **ALTRAN's** history as a reliable source for quality, high-performance magnetics–the cornerstone of our company

COMPONENTS SHOWN APPROXIMATELY 47% ACTUAL SIZE.

INTERNATIONAL MAGNETICS

In this era of expanding global markets, many manufacturers are finding needs to employ magnetic components which are compatible with foreign power specifications. **ALTRAN** has the engineering expertise to produce components to meet the electrical requirements and standards of Europe, Australia, Japan and most countries throughout the world.

To comply with foreign standards **ALTRAN** has received approvals directly, or through our customer's products from V. D. E., I. E. C., DENTORI, SEMKO and British regulatory agencies - to mention a few.

If your product is distributed internationally, or you plan to introduce them abroad, **ALTRAN** can assist in fulfilling your magnetics requirements.

TEL: (815) 455-5650 • FAX: (815) 455-3171

ALTRAN's engineers and technicians develop the optimum design to always meet your requirements of performance, size and cost. Our objective is to give our customers exactly what they need...when they need it...and do so within budgetary limitations.

We welcome your inquiries regarding transformers and coils for:
•Power Conversion •Audio to r.f. Frequency impedance Matching
•Telephone Voice Frequency & Data Coupling and •Filtering

altran
ALTRAN CORP.

The Combination of the Latest Technology & Highest Quality . . .

COMPONENTS SHOWN APPROXIMATELY 50% ACTUAL SIZE.

MEDICAL ELECTRONICS

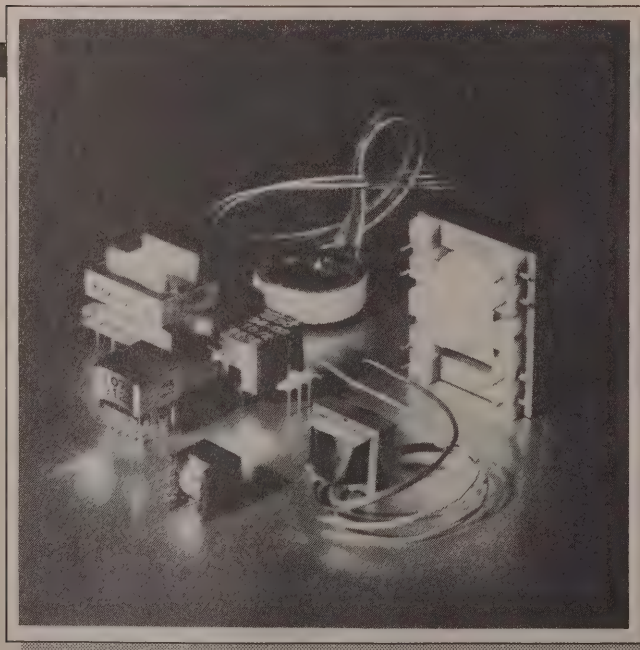
To accommodate the ever-increasing requirements and demands of the Medical Electronics industry, **ALTRAN** now designs and manufacturers inductors and transformers that meet and fully comply with UL 544, CSA C22.2, IEC 601-1 and other international agency standards.

ALTRAN builds linear and switching magnetics for medical power conversion, as well as isolation-to-patient coupling devices.

In addition, we are currently manufacturing specialized magnetic components for application to EKG, defibrillator and other cardiac equipment.

As applications and usage of magnetic components develop within the Medical Electronics industry. **ALTRAN** will be prepared to answer the questions and satisfy the requirements of this critical market. When there is virtually no margin for error, we know what that means–we do it daily.

COMPONENTS SHOWN APPROXIMATELY 54% ACTUAL SIZE.



MAGNETICS FOR TELEPHONY

As with many industries utilizing specialized and advanced technologies, **ALTRAN** encourages a close liaison with the customer's design engineers to develop magnetics which will help solve complex transmission problems–today...and in the future.

In the field of telephony where miniaturization is often a critical consideration, **ALTRAN's** engineers have made the development of miniaturized components a major goal. **ALTRAN** offers coupling, feedbridge and hybrid transformers measuring under one-half inch (13 mm) in height, which handle D. C. loop currents.

If high performance within space limitations are a necessary factor, consult with **ALTRAN** for your optimum solution.

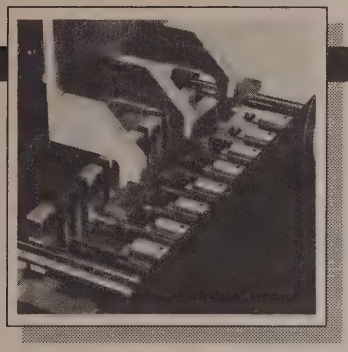
altran
ALTRAN CORP.

From design & development...to delivery you can always rely on ALTRAN to meet your Magnetics requirements.



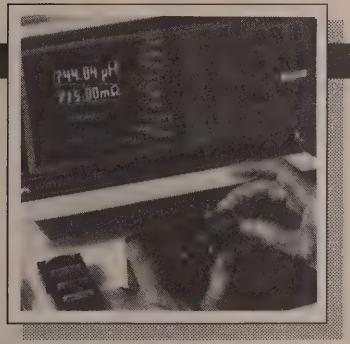
PRODUCTION CAPABILITIES

ALTRAN has the manufacturing capabilities to produce any size order. We are cost efficient in providing relatively small prototype quantities, and extremely competitive in producing high volume runs.

As design and technology in the magnetics industry has rapidly advanced, equally has the sophistication of **ALTRAN's** manufacturing facilities. Our production equipment includes monitored, computer controlled automatic winding and wire wrapping machines for high volume runs requiring precision accuracy and concise tolerances.

Supplementing our high volume multiple winding and wrapping equipment, **ALTRAN** utilizes shuttle-type winding machines for toroids, accurate heavy-duty machines for heavy gauge magnet wire, and specialized equipment for winding switch-mode components of the highest reliability.

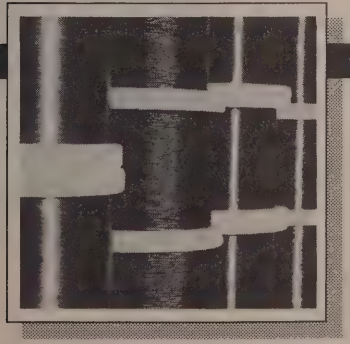
The management and staff of **ALTRAN** all recognize the crucial importance of meeting our customers production schedules. When placing an order with **ALTRAN**, you can rest assured that it will be completed and delivered as per your requirements.



QUALITY CONTROL

Our testing laboratory has the mechanical and electrical equipment to test and analyze any parameter. **ALTRAN's** calibration program assures us, and you of the most accurate and precise testing of components possible.

We work closely with every customer to meet the exact A. Q. L. level they require. In addition, we maintain our own standards–performing very close to a zero defect program.



SELECTED MATERIALS

To further assure the reliability and performance of our products, **ALTRAN** uses only the highest quality materials in the assembly of all magnetic components.

For products utilizing our U. L. recognized insulation system, we use only all U. L. recognized materials–without exception.

In addition, all magnetic wire, electrical steel laminations, ferrite core, coil forms and other constructive materials are specifically selected and inspected by **ALTRAN**.

AMECON
THE ENERGY SAVER FOR 22 YEARS

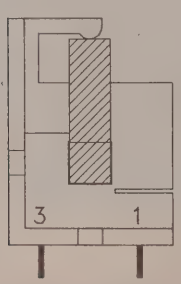
SNAP–ON LOAD DETECTOR "LD–50"

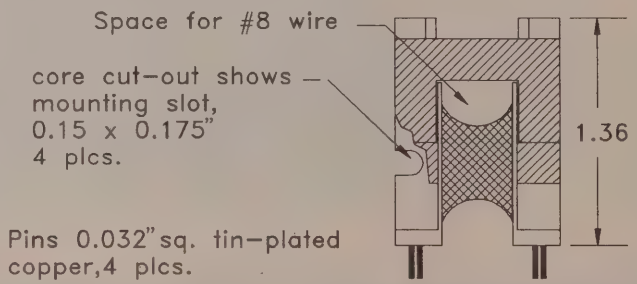
- This new revolutionary snap–on load detector mounts on pre–wired systems without disrupting existing connections. (Field assembleable.)
- Broad frequency response: 30Hz. to 15kHz. (See Curve.)
- Measure currents up to 50Amps continuous, 150Amps intermittent.
- High reliability long lasting magnetic device.
- Output linear to within 3% from 5 to 50Amps input. (See VL/Ip vs. Ip curves.)
- Less than $2.00 in production quantities.
- Excellent for low–budget energy management and automation control.
- Available pre–assembled or un–assembled, to snap over existing wiring.
- Note: These features have made this new device the answer to a myriad of new applications such as monitoring relays and lamps, Hi/Low current limits, instrumentation, solid–state switchgear, motor controls, and much more.

NEW HIGH SENSITIVITY CURRENT TRANSFORMERS.

The high–sensitivity series of current transformers has been specifically designed for those applications where a low value of current is to be monitored. A primary winding is supplied (pins 1&2) which helps increase the sensitivity of the transformer.

LD–50





5360 SERIES.

THE ENERGY SAVER FOR 22 YEARS

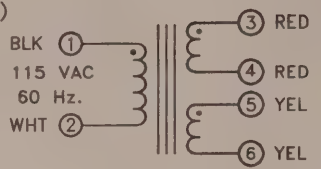
LARGEST SELECTION OF HEAVY DUTY 60Hz. TOROIDAL POWER TRANSFORMERS.

SOME ADVANTAGES OF TOROIDAL POWER TRANSFORMERS COMPARED TO LAMINATED TRANSFORMERS.

- Higher efficiency (Save Energy)
- Lower Mechanical hum.
- Lower electrical noise
- Lower Magnetic leakage
- Easier to electrostatically shield.
- Lower weight
- Smaller dimensions
- And most important price competitive compared to old fashioned laminated transformers.



208, 220 OR 230 VAC PRIMARY ON REQUEST

IMPORTANT NOTES.

1: All transformers have been designed for 50/60 Hz.
2: 60 Hz TO 400 kHz. Designs available upon request.
3: Custom designs tailored to your specs are made & evaluated on a 2 wk. cycle.
4: 100% electrostatic shielding available on all transformers with a small power derating.
5: Magnetic shielding & lower magnetic leakage designs for sensitive areas such as encountered in computers & audio equipment are available on all transformers.
6: Low profile designs are available upon request.
7: Amecon has the world's most complete toroidal mfg. facilities. We can machine wind toroids in excess of 50"dia & 2000 LB.

SERVING YOU SINCE 1972 WITH KNOWLEDGE & SENSIBLE PRODUCTS

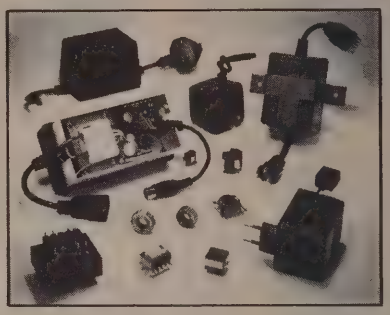
1900 CHRIS LANE / ANAHEIM, CA 92805 / 714-634-2220 / FAX 714-634-0905

apx TECHNOLOGIES INC.

We are a manufacturer of **POWER SUPPLIES** and **MAGNETIC PRODUCTS** with engineering sales offices in the **U.S.** and manufacturing in the **Far East.**

Our Products Include:

- AC and DC External Power Supplies
- Regulated Linear Power Supplies
- Custom Made Specialized Power Supplies
- Battery Chargers
- Power, Pulse and Telecommunication Transformers
- Inductors and Specialized Magnetic Products



Power Transformers 0.1-250VA

AVAILABLE FEATURES

- Any combination of output voltages and load currents
- Single and dual primaries 120/240 volts
- 50/60 Hz operation
- Single or split secondaries
- Split bobbin or concentric winding
- Vertical or horizontal mounting
- Leads or terminals
- Specified breakdown voltage 500–4000 VAC
- High efficiency, specified power dissipation
- Designed to meet UL/CSA/VDE as required

HARDWARE MOUNTED

STYLE PCH STYLE PCL

POWER AND SIZE

Power (VA)	Sizes EI
3	EI–35
6	EI–35, EI–41
15	EI–41, EI–48
40	EI–57, EI–60
60	EI–66
100	EI–76, EI–85
180	EI–85
250	EI–96

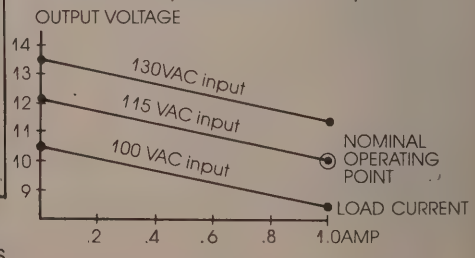
The sizes shown above are recommended sizes for consideration up to the indicated power level.

The optimum selection depends on your exact requirements. Please discuss it with our engineers.

International Transformers IEC BABT

We design and manufacture transformers to the international standards such as VDE, BSI and other agencies. These transformers have larger clearance distances, higher breakdown voltages and provide 220/240 VAC 50 Hz operation.

TYPICAL OUTPUT LOAD CURVES for transformer with nominal output 10VAC @ 1 Amp



See our Power Supply Pages in Volume D Section 4000

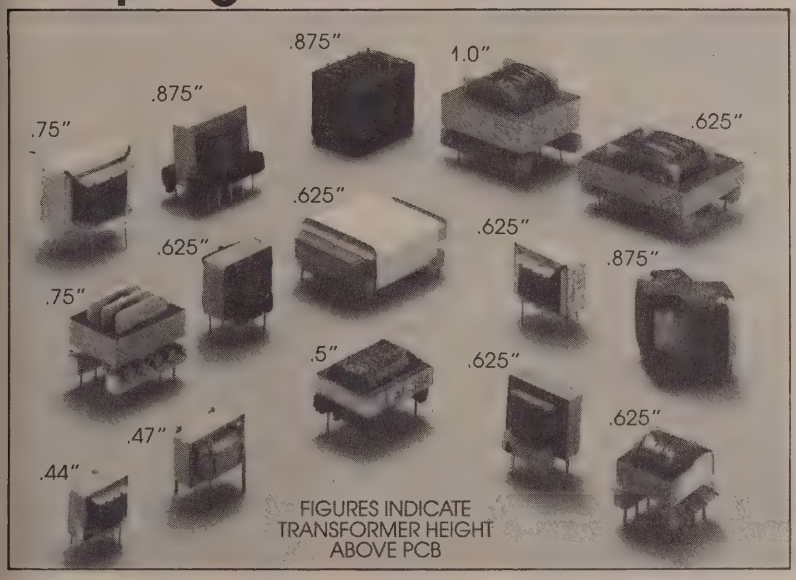
apx TECHNOLOGIES INC.

COMMUNICATIONS TRANSFORMERS, INDUCTORS & SPECIALIZED MAGNETIC PRODUCTS

Our products are manufactured in the **FAR EAST** and are competitively priced. We can cross reference to standard designs or our engineers will help you select the features which will best fit your application.

Coupling Transformers

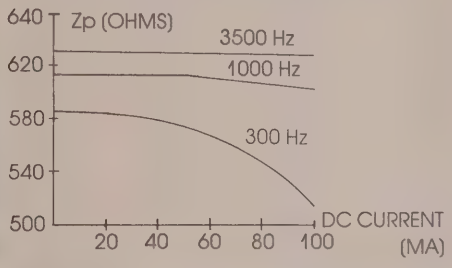


PARAMETERS SELECTION GUIDE

Impedance	Ohms
Return Loss	DB
DC Current	0-120 MA
DCR	Ohms
Frequency Response	DB
Insertion Loss	DB
Max. Power Level	DBM
Longitudinal Balance	40–90 DB
Cross Talk	60–90 DB
Breakdown Voltage	250–4000 VRMS

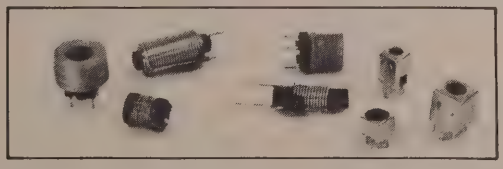
*We will help you select the optimum design in the smallest package based on your exact parameters.

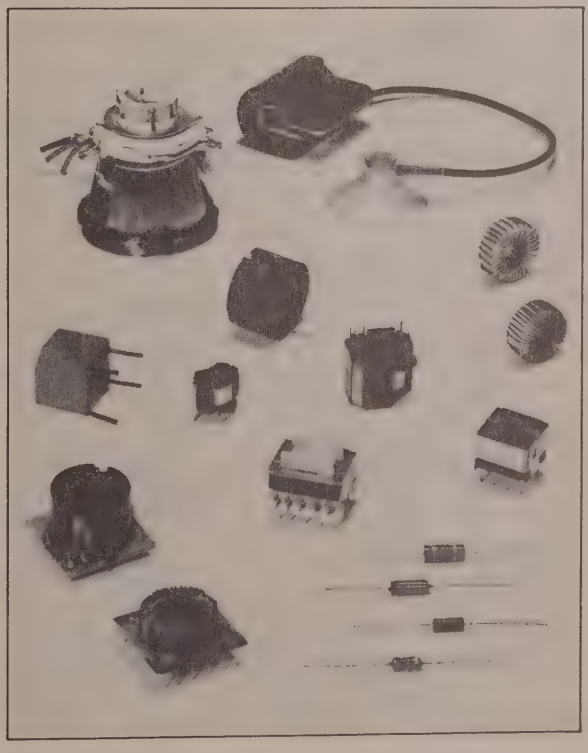
Typical reflected impedance Vs DC Current in coupling transformer primary



Inductors and Specialized Magnetic Products:

- Molded Inductors
- DC Carrying Axial Inductors
- Toroidal Inductors
- Fly Back Transformers and Yokes
- Specialized Magnetics Components





We are transformer and magnetics specialists! You get technical assistance from our engineers here and top performance at low prices from our factories in the FAR EAST. We provide approval samples on quantity orders prior to production. TECHNICAL EXPERTISE, PERFORMANCE, PRICE...It's all here!

AT&T Microelectronics

TRANSFORMERS

Miniature Pulse Transformers — 2745 & 2741 Series For Primary-Rate T-Carrier and CEPT

Description

The 2745 and 2741 Miniature Pulse Transformers are ferrite-core devices. They have a compact design for use on densely populated boards. They are compatible with water-soluble fluxes and can be cleaned with aqueous or solvent systems. The devices are packed in tubes for easy machine insertion and are available in through-hole or surface-mount technology. These devices are just two of the many quality transformers offered by AT&T.

Application

The 2745 and 2741 Transformers are designed for use as line interface transformers and are compatible with the AT&T Digital Signaling Interface (DSI) devices. These transformers contain well-balanced windings to help cancel common-mode noise on the line and improve longitudinal suppression. The 2758 series is a surface-mount version of the 2745 and 2741 units.

AT&T Microelectronics

TRANSFORMERS

ISDN Basic-Rate Interface Transformers

Description

The 2718, 2754, and 2717 are ferrite-core pulse transformers. They are compatible with water-soluble fluxes and can be cleaned with aqueous or solvent systems. The 2718 and 2717 units are packaged in tubes for easy machine insertion. The 2754 type transformers are packaged in boxes, not tubes, due to the larger size.

AT&T also offers a line of ferrite-core surface-mount structures for high-frequency power transformer applications. For more information, contact AT&T Microelectronics.

Application

AT&T supplies isolation transformers for use at the two-wire U-Interface and for use at the S/T Interface. These transformers meet the ANSI T1.601-1988 (2B1Q line code) for the 2754 series transformers, and the 2718 series meets the CCITT basic-rate 2B+D applications. The 2717B was designed for the prestandard AMI line code.

Electrical Characteristics

Component Code	Turns Ratio (PRI:SEC)	Minimum Primary Inductance (mH)	Maximum Primary Leakage Inductance (μH)	Maximum Interwinding Capacitance (pF)	Maximum dc Resistance Primary (Ω)	Maximum dc Resistance Secondary (Ω)	Minimum ac Breakdown (Vac)	Figure	Schematic

GENERAL SPECIFICATION— PRINTED CIRCUIT, FLEXIBLE LEAD STYLE

Input line voltage: 115 or 230V
Frequency: 50/60Hz Operating range 47 to 400Hz
Secondary voltage tolerance: within 3% at nominal input and full load.
Primary to Secondary insulation: 2500V r.m.s.
Maximum operating temperature 55°C ambient.
Leads: 10 in. long, stranded.
Also available with UL recognition.

GENERAL SPECIFICATION

Primaries: 120V + 120V
Frequency: 50/60 Hz
Operating range: 47 to 400 Hz
Secondary voltage tolerance: within 3% at nominal input and full load.
Primary to secondary insulation: 4000V rms
Ambient plus temperature rise should not exceed 105°C
Leads: 6 inches long pvc insulated

Load VA	Regulation %	Temp. Rise °C	Iron Loss W	Copper Loss W
30	16	50	0.40	4.8
60	13	50	0.9	7.8
100	10	50	1.2	10
160	9	56	2.0	14.4
230	8	56	2.75	18.4
330	7	58	3.4	23
530	6	60	5.0	32

CUSTOM MADE TOROIDAL POWER TRANSFORMERS...ASK AVEL

Toroids – the lighter – quieter – smaller – lower in stray field alternative to laminated transformers.

When your design indicates more than an off-the-shelf type, let Avel quote to your specifications.

Consider the options/parameters below when planning your design.

Finishes: Polyester tape • Encapsulated – metal/plastic • Vacuum varnish impregnated.

Terminations: Stranded leads • Solid leads • PCB style • Terminals • Tag band.

Method of mounting: • Epoxy center with threaded bush/clearance hole.

• Fixing kit (dished metal washer & bolt)

• Mounting frame

Shielding: Can be added to further reduce the inherent low radiated field-of the toroidal transformer in the form of exterior metal shielding or for interwinding shielding – copper foil.

Agency standards: UL 506 recognized • IEC 742 approved, covering VDE 0550/0551.

Construction to UL 544, 1411 etc. CSA, and most international specifications.

EXAMPLE OF COMMON SIZES 50/60 Hz

VA RATING	NOMINAL SIZES IN.	WEIGHTS POUNDS	REGULATION	SUGGESTED FIXING DISC/BOLT
15	2.8 x 1.1	0.77	16%	2 in./3/16 in.
30	2.8 x 1.2	0.93	16%	2 in./3/16 in.
60	3.5 x 1.3	1.87	13%	2.8 in./1/4 in.
100	3.6 x 1.7	2.65	10%	2.8 in./1/4 in.
160	4.5 x 1.7	4.19	9%	3.5 in./1/4 in.
230	4.7 x 2.0	5.89	8%	4.3 in./5/16 in.
330	5.2 x 2.0	7.28	7%	4.3 in./5/16 in.
530	5.9 x 2.4	11.03	6%	4.3 in./5/16 in.
600	6.5 x 3.0	13.23	5%	2 x 1/4-20 Spaced 1 in.
800	7.1 x 3.0	15.44	4%	2 x 1/4-20 Spaced 1 in.
1000	7.7 x 3.2	17.64	4%	2 x 1/4-20 Spaced 1 in.
1500	8.3 x 3.5	19.85	3%	Fixing Bracket
2000	8.5 x 3.9	20.95	3%	Fixing Bracket
2500	8.5 x 4.7	26.46	2.5%	Fixing Bracket
3000	9.6 x 4.7	33.08	2%	Fixing Bracket

Heat rise typically 40°C at 50 Hz.

A smaller transformer will result if design is for 60 Hz only, or if a higher temperature rise is specified.

Fixing Bracket will increase height by 0.4 inch.

Avel Transformers Inc.

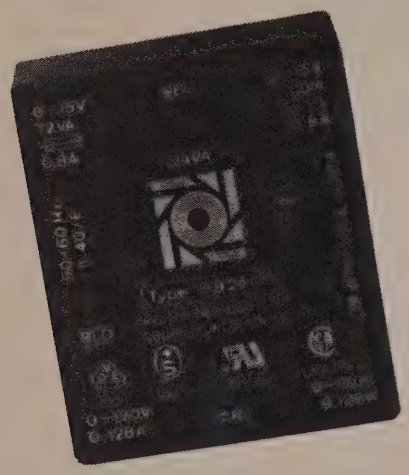
LOW PROFILE POWER TRANSFORMERS...ASK AVEL

THE INTERNATIONAL TRANSFORMER



ENCAPSULATED – SLIM LINE – PCB MOUNTED,
LOW INTER-WINDING CAPACITANCE – 5000 V HIPOT TESTED

CERTIFIED TO:
IEC 742, DIN/EN60 742, UL 506, CSA 22.2, SEV TP 21/2A, VDE 0551-9.75

The OB range bobbin transformer was designed for use where a power supply is an integral part of a printed circuit board especially for close card spacing and/or where regulatory agency recognitions are needed.

Resin filled under vacuum into a thermoplastic case, allowing for a 5000 V hipot in a low profile package.

BOARD DETAILS –
2, 4, 6 VA.

10 BASE T INTEGRATED MODULES

- Autoinsertable Packages For High Speed Manufacturing
- Approved For Use By The Major Semiconductor Manufacturers
- Molded Unibody Construction For High Reliability
- Filter/Transformer Combinations
- Filter/Transformer/Common Mode Choke Combinations
- Surface Mount Packages Available
- Sip Packages Available For Hub Applications

Electrical Ratings All Units

- Cut Off Frequency; 17 MHz
- Insertion Loss (1-10 MHz); 1 db Max
- Inband Variation (1-10 MHz); 0.30 db Max
- Isolation (Input To Output): 2000 Vrms

Bel Fuse manufactures a complete line of 10Base T "Single Chip Solutions." These products include all of the magnetics, semicoductors, and glue components to manufacture an entire 10Base T M.A.U. all in one (1) simple unit.

Seven Pole Transmit Butterworth Filter

Basic Filter Specifications

f_c (3dB Cutoff): 17MHz
Inband Variation (5-10MHz): <0.5dB
Attenuation at 30MHz
Transmit Filter: >27dB
Receive Filter: >17.5dB
I/O Impedance: 100Ω
Insertion Loss (5-10MHz): <1dB
Isolation Input to Output: 2000Vrms for 1 min.

Note: All dimensions are in inches ±.005 unless otherwise specified.

HIGH FREQUENCY ISOLATION TRANSFORMERS AUTOINSERTABLE ETHERNET/LAN NETWORKING APPLICATIONS

- IEEE 802.3 Compatible (10Base2 & 10Base5)
- High Temperature Suitable (0° to 70°C. Operable)
- Custom Designs Available
- Low Profile 14 And 16 Pin Styles Available For Autoinsertion
- Cost Effective Triad Packaging
- Fast Rise Times—Efficient Operation
- All Packages Comply With International Safety Requirements For LANS; Including 2,000V RMS Isolation
- Suitable For High Frequency Applications

Table of Electrical Specifications @ 25°C.

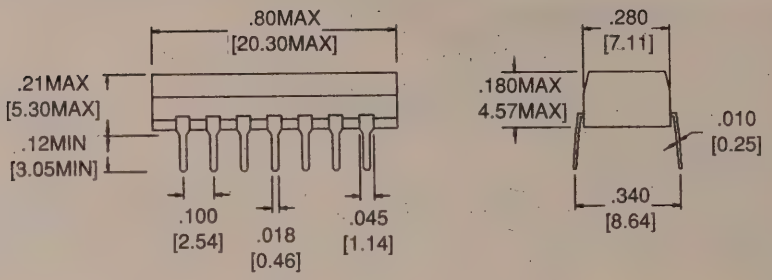
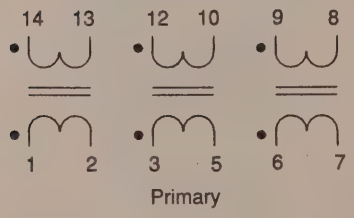
PACKAGE STYLES AVAILABLE

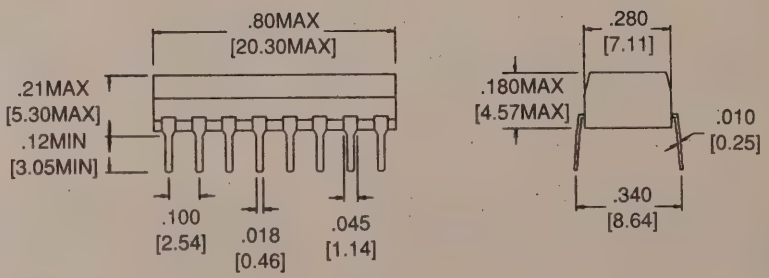
Package A



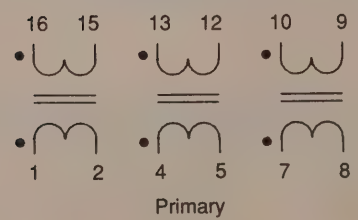
Pinouts For 14 Pin Pkg.



Package B



Pinouts For 16 Pin Pkg.



bel/ defining a degree of excellence

TOKEN RING MAGNETICS
4 mbt / 16 mbt MAGNETICS

High Reliability Autoinsertable Packaging

- Low Insertion Loss Over Wide Frequency Ranges (1 MHz - 32 MHz)
- Autoinsertable Packaging Available
- High Isolation To Meet International Requirements
- UTP / STP Applications
- Common Mode Chokes Available
- Single Packages Including Impedance Matching Transformers, Filtering And Common Mode Chokes
- Cost Savings Over Hand Insertion / Epoxy Filled Parts

MINIGLOSSARY ENCAPSULATION

MATERIALS/HANDLING

Catalyst: A substance which changes the *rate* of chemical reaction. Very small quantities can cause fast change.

Conformal coating Sprayed or dipped. A thin conformal jacket which protects an assembly from moisture or other degrading environments.

Curing agent: See catalyst.

Hardener: See catalyst.

Hermetic: A permanent gas-tight seal.

RTV: Room Temperature Vulcanizing. Associated with silicone rubber sealants which vulcanize at room temperature.

Thermoplastic: Plastic materials which can be made to flow *repeatedly* with the application of heat.

Thermosetting: Plastics which once cured cannot be made to flow again.

Thixotropy: The property of a coating compound which has low viscosity when agitated, but which thickens when the agitation ceases.

Viscosity: Measured in units of *poise* or *centipoise*. The property of a liquid which resists internal flow. Low viscosity equates with thin and vice-versa.

PROCESSING

Casting: Parts or assemblies are placed in a mold. Encapsulating material is added and cured. Part is then removed from the mold.

Dip coating: Part or assembly is dipped into the encapsulating material. Final thickness is determined by number of dips, viscosity, rate of withdrawal, and temperature.

Embedding: Wherein an encapsulant substantially fills all voids in and about an assembly.

Impregnation: A process of encapsulation involving evacuating all air and then allowing the encapsulating material to flow in and fill all voids.

Molding: Similar to casting except this process usually implies multicavity molds and costly machines.

Potting: Wherein the part or assembly is immersed in an encapsulating material contained in a shell which becomes a permanent outer surface after curing.

DIELECTRIC

Arc resistance: An encapsulant's resistance to the formation of a conductive path or track. Measured in time.

Breakdown voltage: The voltage at which an encapsulant fails electrically.

Capacitance: The property of conductors and dielectrics which allows the storage of an electrical charge when the voltage is applied.

Corona: A luminous discharge of electricity due to air ionization when a certain voltage is reached. Can be internal or external. The formation of ozone can cause rapid deterioration of certain materials.

Dielectric: Insulator (Nonconductor.)

Dielectric constant: The property of a material that determines its ability to store electrostatic energy.

Dielectric strength: The ratio of dielectric breakdown to the thickness of insulating material.

Dissipation factor: The ratio of a dielectric material's energy losses.

Flashover: Point at which an electric discharge occurs around an edge or across a surface. Can result in a carbon track and permanent degradation.

Insulation resistance: (IR) An insulating material's total DC leakage.

Surface resistivity: The resistance of the surface of an insulating material to the flow of direct current.

Voltage endurance: Sometimes called corona resistance. The ability of a material to withstand the application of sustained high voltage.

Volume resistivity: The resistance of a material to direct current flow as a measure of volume. Expressed as ohm-centimeters.

Why 201-694-5000 is the number to call for custom transformers.

Our 30 years' experience brings you fast, accurate solutions to tough transformer application problems. Power range from 10 VA to 300 kVA.

If you need a single special transformer with unusual requirements, we'll build it, and deliver it to you as promised. And if you need moderate to OEM quantities, call us too—we'll fit our schedule to your schedule.

As you can see from the photos, our typical models cover a wide range. Call us. Our design and engineering expertise is ready to help you.

Meeting military specs (T-27D, T-16315, E-917C, and others) is as routine for us as building to UL, VDE, CSA, and other international standards.

- 50/60/400 Hz and higher
- 48-hour turnaround on prototypes
- Fast rebuild of large transformers
- No order too small, or too large
- Design services available

- Open-type
- Enclosed
- Encapsulated
- Hermetic

- Power transformers
- Current transformers
- Toroids
- High frequency
- Constant voltage

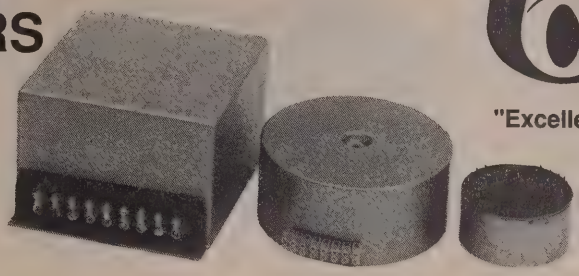
TOROIDAL POWER TRANSFORMERS

INFORMATION

BICRON™

"Excellence Through Teamwork"



Type 4 Mounting
Available in a Variety
of Sizes, Mountings
and Terminations.

IMPORTANT ADVANTAGES FOR YOUR PRODUCT

VERY HIGH EFFICIENCY
(between 85-97%)

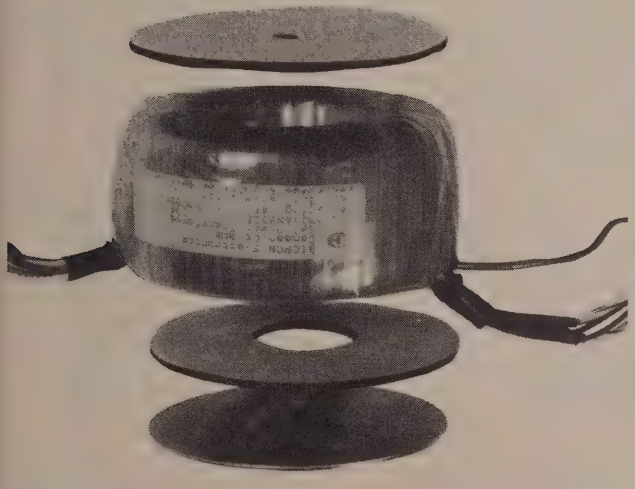
LIGHTWEIGHT
(1 KVA weighs 16 lbs.)

SMALL SIZE
(.6 KVA is 5.7 X 3.2)

LOW STRAY FIELDS
(.5 Gauss @ 1 inch attainable)

SILENT OPERATION
(<10db)

AGENCY APPROVALS
(UL478, UL544, UL1411, IEC601)



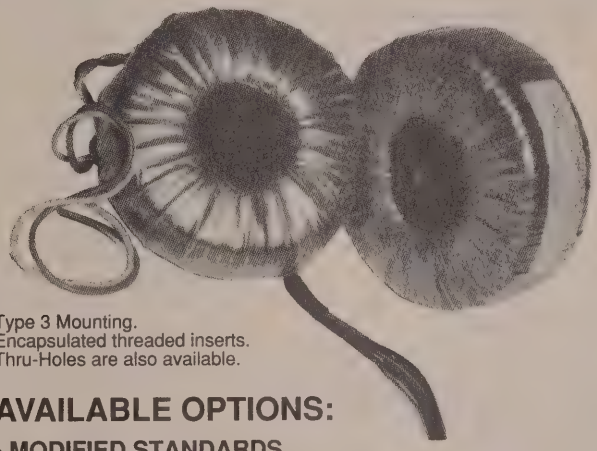
Standard Configuration Type 2.
Shown above is the Standard Method of Mounting.
Transformers can be supplied without steel washer
and insulating pads (specify Type 1.)

The Company

BICRON ELECTRONICS, employing over 150 people, was founded in 1964 as a manufacturer of custom magnetics components for military and industrial markets. The product mix expanded to encompass TOROIDAL POWER TRANSFORMERS, CURRENT TRANSFORMERS, SPECIALTY MAGNETICS and SOLENOIDS. Our customer base includes Fortune 500 companies such as GE, Westinghouse, Motorola, Lucas, with whom we have long standing relationships. Our 150 9001 Quality System and Total Quality Management has enabled us to certified by numerous customer's.

OVERVIEW

Toroidal transformers are the next best answer to the ideal conception of a power transformer. The compactness of the rolled core utilizing high quality silicon iron, grain oriented steel provide maximized magnetic efficiency. The large surface areas allow excellent heat transfer for the windings while minimizing the length of wire per turn. The magnetic flux flows along the magnetically oriented grains of the toroid core, without stray force lines, due to the closed field and lack of air gaps. The tightly wound core surrounded by wire and insulation confine the audible hum created by magnostriction.



Type 3 Mounting.
Encapsulated threaded inserts.
Thru-Holes are also available.

AVAILABLE OPTIONS:

• **MODIFIED STANDARDS**
A program allowing our customers to optimize their systems requirements and overall costs. (See next page.)

• **MOUNTING**
Tie-Wrap • Washer/Insulators • Bolt-Mount • Moulded-In-Threaded-Insert • Encapsulated with Leads, PC pins, or Terminal Blocks.

• **SHIELDING**
Faraday shielding between primary and secondary and/or secondary and secondary
Magnetic shielding around the circumference or totally encompassing the transformer.

GENERAL PURPOSE TOROIDAL POWER TRANSFORMERS

BICRON™

"Excellence Through Teamwork"

Standard Bicron Power Transformers for Industry

Specifications

UL 478 Recognized
Standard leads are PVC, Class A, 10" long
Dielectric strength 2500Vrms, primary to secondary
Maximum transformer operating temperature 265°F
Maximum temperature rise 150°F at rated power
Supplied with either metal mounting disk and two insulating pads (series AU2/BU2) or moulded-in threaded insert (series AU3/BU3) as specified
50/60 Hz power rating designed for 120/240 volt operation
60 Hz only power rating designed for 120 volt operation

Options

Full encapsulation
PC mounting
Terminal strips
Additional magnetic shielding
Special marking and mounting arrangement
Consult Bicron for other sizes and voltages

Transformer Connections

NOTES:
SIZE: dimensions include mounting hardware.
SPECIFY: part number by inserting code eg: AU223AD...D + CODE = AU223AD100D defines transformer operation at 50/60 hz; rated at 230VA; dual pri. and sec. windings; each sec. winding rated 100V @ 1.15 Amps. BU32A0S...D + CODE = BU32A0S060D defines transformer operation 60 hz only; rated 2400VA; 120V pri. and dual sec. windings; each sec. winding rated 60V @ 20 Amps.

Bicron's "Modified Standard" Option

INFINITE ELECTRICAL CONFIGURATIONS

This program permits our customers to optimize their system requirements and overall costs by incorporating electrical and mechanical modifications to standard product without voiding BICRON's product recognition. These safety agency recognitions include IEC-601, UL544, UL1411, UL478.

VERSATILE MECHANICAL CONFIGURATIONS

Our customers are provided this service without significant engineering or manufacturing charges. When you need fast, reliable technical service, responsive delivery of prototype and production products at standard prices, CALL BICRON.

- O^2/CO^2 Monitors
- Image Processing
- MRI
- Ultrasound Diagnostics
- Power Conditioners
- ECG Analyzers
- APEA Monitors

Standard Bicron Power Transformers for Medical Equipment

Specifications

100, 120, 200, 220, 240 Volt, 50/60 Hz operation
Standard leads are PVC, Class A, 10" long
Dielectric strength 4000 VRMS, primary to secondary
Max. transformer operating temperature 265°F
Max. temperature rise 150°F at rated power
Supplied with either metal mounting disk and two insulating pads (TYPE 2) or molded-in threaded insert (TYPE 3) as specified
UL 544 • IEC601
Special manufacturing methods to minimize mechanical noise (hum)
Safety shield
Thermal protected
Leakage current less than 50 µA

Options

Full encapsulation
PC mounting
Terminal strips
Additional magnetic shielding
Special marking and mounting arrangement
Consult Bicron for other sizes and voltages

eem MINIGLOSSARY ELECTROMECHANICAL RELAYS

RELAYS

Hybrid: Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

Differential: Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

Close-differential: The dropout value is specified close to the pickup value.

Frequency sensitive: Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

Hermetically sealed: Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

Encapsulated: Imbedded in a suitable potting compound.

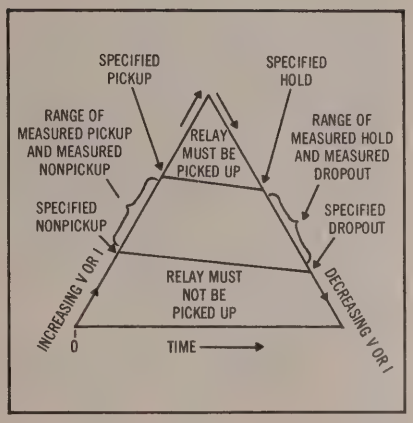
Sealed: Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

Covered: Unsealed metal or plastic enclosure or housing.

CONTACTS

Dry circuit: contacts that carry current but do not open or close during energizing of the load circuit. Often wrongly used in reference to low level contacts.

Low Level: Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.



OPERATING CHARACTERISTICS

Measured dropout: The value at which all contacts restore to their unoperated position as current or voltage decreases.

Specified dropout: The value at or *above* which all contacts *must* restore to their unoperated position as voltage or current is decreased.

Specified hold: The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

Specified nonpickup: The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

Measured pickup: The value at which all contacts function as voltage or current increases on an unoperated relay.

Specified pickup. The value at or *below* which all contacts *must* function as voltage or current increases on an unoperated relay.

Sensitivity: Specified pickup expressed in watts.

Normal bridging: The make-before-break action between adjacent contacts on relays designed for this purpose.

Abnormal bridging: The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

Magnetic freezing: Sticking of the armature to the core as a result of residual magnetism.

TIME

Actuation: The interval from coil energization or de-energization to the functioning of a specified contact.

Initial actuation: The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

Final actuation: Sum of initial actuation *and* bounce intervals following an actuation.

Contact bounce: The interval from close or opening of a contact to the end of the bounce of "chatter."

Chatter: See bounce.

Operate: Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

Release: Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

Transfer: The interval between opening a closed contact and closing an open contact of a break-before-make relay.

eem MINIGLOSSARY CONNECTORS

Connector terminology is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

Shape—Circular, cylindrical, and rectangular.

Electrical application—High voltage, RF, microwave, input/output, etc.

Mechanical application—Printed circuit, rack & panel, cable, etc.

Conductor type—Coaxial, flat cable, ribbon cable, flex circuit, etc.

Termination method—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

Contact: The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination.* This is the point where the wires or PC board is attached to the connector.

Contact alignments: Often called *contact float.* Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

Male vs. female: In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

Closed entry: A female contact which prevents entry of a male contact larger than a specific size.

Open entry: A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

Hermaphrodite: Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

Hermetic seal: Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

Waterproof seal: May or may not be truly *waterproof.* May prevent easy entrance of casual water by means of a rubber or other boot.

Printed circuit connector: Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

Edgeboard. May be called *edge* or *card.* The printed circuit (PC) board edge enters the connector.

Two-piece: One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

Readout: Describes the arrangement at the terminating edge of a PC board. May be single or double. A double readout PC board has termination strips on each side not usually interconnected.

Ribbon connectors: A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

Ribbon contact connector: Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

Solderless terminal: Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement.*

Crimp termination: A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

Insulation displacement: Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

Service rating: The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage.* Can be confused with the term used to describe how many times a connector may be mated and separated.

Withstanding voltage: Also called *test voltage.* The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

COMMUNICATION COIL , INC. ✦ ASSURED RELIABILITY ✦ CUSTOM DESIGNS ✦ TIMELY DELIVERY ✦ MANUFACTURED TO SPEC.

COMMUNICATION COIL, INC. has been designing and producing high reliability Power Magnetics since 1944... to high exacting standards for communications, filters, and power supplies in military, avionics, satellite, telemetry, marine, GPS and commercial applications.

Using the latest CAE and CAD technology our engineers use patented and propriety syntheses software to perform complete simulations of your unique design requirements. Our optimization system enables us to rapidly produce reliable up-to-date designs. We will custom design **power magnetics** to meet your exacting requirements. Our Toroids, SMPS transformers, Inductors, Chokes and Baluns utilize the state-of-the-art high permeability magnetic materials required for tomorrow's needs.

Each and every unit is 100% parametric tested. Our ultra-modern computerized **magnetics** testing equipment can provide complete data on each part, if desired. Complete lot traceability is available.

Our award-winning quality control program is approved by major customers world-wide.

Our **power magnetics** are designed and manufactured in Chicago, Il U.S.A. to meet rigid global marketplace demands.

Call us at 312/637-1333 today and speak directly to the Communication Coil design & applications engineering staff with your questions, orders or sample requests...or FAX your requirements to 312/637-8564.

■ Knowledge.
Our design staff specializes in custom switchmode, linear and toroidal magnetics development and problem solving.

■ Responsiveness.
We offer samples in two weeks - usually at no charge. We stock to build any cataloged magnetic in prototype and production quantities.

■ Standardization.
We attempt to meet your requirements with industry standard materials.

■ Experience.
Cramer has thirty years in the custom magnetics business.

Switching Magnetics

CSM Series Switchmode Power Transformers

The CSM series offers common building blocks for the use as switchmode power transformers.

The materials utilized by this series offer high inductance and negative core loss versus temperature (to 80° C). This means reduced transformer size for modern switchmode supplies. CSM Series transformers are designed for use in all switching topologies (Forward, Flyback, Push-Pull, Bridge and Half-Bridge).

The power output ratings listed on this page are based on a forward converter operating at 50 KHz, 48% duty cycle, 50 ° C ambient temperature, and 1500 volt hipot. Within these conditions the flyback topology reduces power output by 20% or more.

Safety agencies include V.D.E., I.E.C., C.S.A. and U.L. Most designs are constructed to Underwriters Laboratories, Inc. recognized Class 130(B) electrical insulation system (OBJY2), file #110339.

Linear Magnetics

CHPT Series Power Transformers

Our most economical and versatile linear power tranformers feature low capacitive coupling and 2500 VAC dielectric. Six pins per side allow for multiple primaries either series/parallel or multiple tapped, limited to 480 volts. The secondaries are supplied series/parallel, 3 isolated or 2 isolated centertapped. **Constructed to Underwriters Laboratories Inc., recognized Class 130(B) electrical insulation system (OBJY2). System designation C5; File # E110339.**

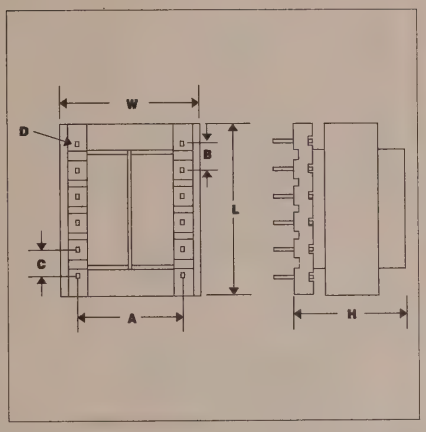

Table:

SIZE	VA	L	W	H	A	B	C	D*

* Square

CIPT Series International Power Transformers

Constructed to meet International safety specifications, the CIPT series offers low capacitive coupling and a standard 4000 volt hipot. PC and chassis mount styles are available. Multiple primaries are supplied in series/parallel or series tapped configurations, limited to 480 volts, and the number of available terminals or pins per side. The secondaries are supplied with series/parallel, multiple tapped or isolated configurations. **Constructed to Underwriters Laboratories Inc., recognized Class 130(B) electrical insulation system (OBJY2). System designation C5; File # E110339.**

* Square

CLF Series Power Transformers

CLF chassis mount power transformers offer small size, low capacitive coupling, a standard 2500 volt hipot and .187 faston tabs for quick installation. They are supplied with single or multiple primaries. Multiple primaries are supplied in series/parallel or series tapped configurations limited to 480 volts and the 4 available lugs. Secondaries are supplied series/parallel or multiple tapped. **Constructed to Underwriters Laboratories Inc., recognized Class 130(B) electrical insulation system (OBJY2). System designation C5; File # E110339.**

CSPE Series Slim Pack Power Transformers

The CSPE features low profile, semi-toroidal hum bucking construction, low capacitive coupling and 2500 VAC dielectric. They are supplied with series/parallel primaries and secondaries limited to VA rating. Two isolated secondaries can be supplied when they have approximately equal VA ratings. **Constructed to Underwriters Laboratories Inc., recognized Class 130(B) electrical insulation system (OBJY2). System designation C5; File # E110339.**

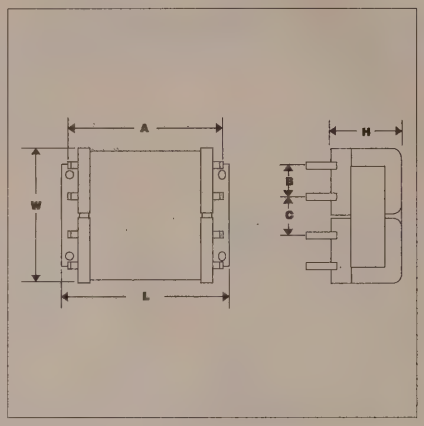

Table:

SIZE	VA	L	W	H	A	B	C	WT

CTFE Series Power Transformers

The CTFE series is built around cost-effective industry standard packaging. It features PC board mountability, 2500 VAC dielectric and low capacitive inductance. It can be supplied with single or multiple primaries. **Constructed to Underwriters Laboratories Inc., recognized Class 130(B) electrical insulation system (OBJY2). System designation C5; File # E110339.**

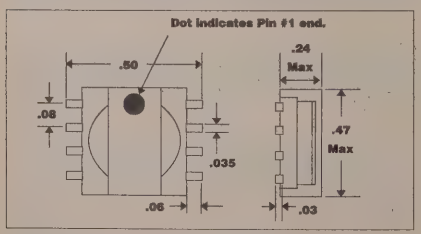
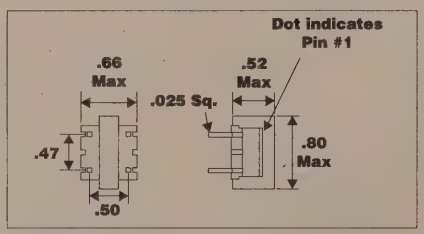
Custom and Telecommunications Magnetics

CTCT 500 Surface Mountable Modem Transformer



Impedance: Primary & Secondary - 600 Ohms each.Designed to reflect 600 Ohms on primary, with 500 ohm load on secondary.
DC Resistance: Primary: 58 ohms +/- 10%, Secondary: 72 ohms +/- 10%.
Insertion loss: 1.0 dB Max @1000 Hz.
Frequency response: 600 - 4000 Hz, +/- .5 dB, Ref. 1000 Hz.
Return Loss: 1 KHz - 20 dB Min., 600 Hz - 16 dB Min., 4 KHz - 26 dB Min.
Dielectric Strength: Primary - Secondary: 1500 Vrms.

CTCT 1104 Coupling Transformer



Impedance: Primary & Secondary - 600 Ohms each.Designed to reflect 600 Ohms on primary, with 600 ohm load on secondary.
DC Resistance: Primary: 30 ohms +/- 15%, Secondary: 40 ohms +/- 15%.
Insertion loss: 1.5 dB Max @1000 Hz.
Frequency response: 300 - 3000 Hz, +/- .5 dB, Ref. 1000 Hz.
Return Loss: 300 Hz - 20 dB Min., 1000 Hz - 26 dB Min., 3000 Hz - 20 dB Min.
Dielectric Strength: Primary - Secondary: 1500 Vrms.

Custom Coils

WE DO MORE!

Solenoids, air-core inductors, magnetic pick-ups and lvdts are examples of coils not listed on these pages. Cramer can manufacture these types within machine capabilities. If you have a specific requirement, or simply need help developing a new idea, PLEASE CALL. **Expert engineering support is offered for most custom requirements.**

MINIGLOSSARY CAPACITORS

Anode: One of two plates or conductors. In polarized capacitors, the anode should be connected to the positive conductor in the circuit.

Capacitive Reactance: The opposition (in ohms) of capacitance to the flow of alternating current, equal to the reciprocal of the product of the angular frequency (2π times frequency in Hertz) of the current times the capacitance in farads.

Cathode: One of two plates or conductors. In electrostatic capacitors the cathode is metallic. In electrolytic capacitors the cathode is a liquid, gel or other conductive material which is in intimate contact with a metallic cathodic connection.

Dielectric Constant: The ratio of the capacitance of a capacitor with some material other than air between the capacitor plates to the capacitance of the same capacitor with air between the plates. For example, the dielectric constants of air, Teflon®, polystyrene and ruby mica are 1, 2.1, 2.6 and 5.4, respectively.

Electrolytic: A capacitor with one metallic conductor (generally the anode) and with a liquid or semiconductor cathode. Nonpolarized electrolytic capacitors generally have two equal anodes as well as the liquid cathode. These anodes operate alternately as anode and cathodic connection as alternating current is applied.

Electrostatic: One of two general classes of capacitors in which two or more discrete metallic conductors are present and separated by an insulating dielectric material. Examples include: mica, ceramic, film, and paper types.

Farad: The basic unit of measure in capacitors. A capacitor charged to one volt with a charge of one coulomb (one ampere flowing for one second) has a capacitance of one farad. Capacitors are generally rated at portions of a farad (microfarads or picofarads).

1 farad (F) = 1,000,000 microfarads (μF) 1 microfarad (μF) = 1,000,000 picofarads (pF)

Impedance: All capacitors exhibit impedance. It is a function of capacitor type and internal construction. This can be particularly important in certain applications such as filters for switching power supplies. Capacitors used in these applications often have special multiple tab construction to shorten current paths and to reduce internal resistance.

Leakage Current: Expressed as dcl for electrolytic capacitors, a measure of the intrinsic losses in a charged capacitor. Generally speaking, the lower the dcl, the higher quality the capacitor.

Power Factor: A measure of the overall efficiency of a capacitor. Power factor ratings take all internal losses into consideration in a complex formula. This parameter of certain capacitors is often very important in AC applications such as motor-start and/or motor-run capacitors

Rated Voltage: The rated working voltage of a capacitor. Generally expressed in DC Volts (Vdcw). This is the voltage at which a capacitor may be safely operated at 25°C continuously within its overall parameters.

Ripple Current: The total amount of alternating and direct current that may be applied to an electrolytic capacitor under stated conditions. In general, the higher the ripple current applied, the shorter the operating life of the capacitor will be. Application of significantly higher than rated ripple currents can shorten the capacitor life dramatically and may even cause catastrophic failure (explosion).

Surge Voltage: The momentary surge voltage which may be applied for a stated length of time without doing permanent damage to the unit.

Temperature: Capacitors are generally rated at 25°C at sea level under specific humidity conditions. Operating temperature ranges are also given, along with derating (reliability) curves for operation at temperatures other than 25°C.

Temperature Coefficient: Expressed as TC in ppm (parts per million) or in percent (%) from the norm of 25°C. This is seldom a straight line and may vary widely for certain types. Most capacitors have positive TC in that the capacitance increases as temperature increases. Some types, however, have negative TC in that the capacitance decreases as temperature increases.

* Reference for TA-40-01 is 1.8 kHz. Model **TA-3** is the **low-cost** alternative to Model TA-1. For HOLDING COIL information, refer to MODEL TE/TD.

ELECTRICAL SPECFICATIONS

Power Level: - 45 dBm to + 7 dBm except TA-40-01 (- 45 dBm to + 10 dBm).

Longitudinal Balance: Per FCC 68.310. 60 dB minimum = 200 - 1000 Hz. 45 dB minimum = 1000 - 4000 Hz.

Dielectric Strength: Per FCC 68.304, 1500 V peak.

Frequency Range: Data/Voice = 300 to 3500 Hz. Data = 800 to 3500 Hz.

MECHANICAL SPECIFICATIONS

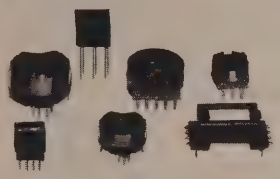
Coating: Impregnated with polyester varnish.

Terminals: Precision spaced P. C. type plug-in terminals.

MODELS PL-xx, PT, PT-xx, TC Transformers

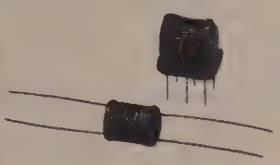
ISDN, Pulse, Trigger Type, SCR Isolation, Converter, Low Power

A COMPANY OF VISHAY DALE®



MODEL PT
ISDN
Transformers

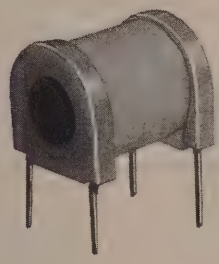
FEATURES
- Integrated Services Digital Network transformers that provide isolation for the line card and terminal in conjunction with both "S/T"and "U" interfaces
- Designed to meet CCITT I.430 pulse wave form template requirements
- Isolation voltage levels available for U.S. and International uses
- P. C. board mountable in through-hole and surface mount packages
- Standard and custom configurations available



MODELS
PT-10 and PT-20
Transformers
Pulse,
Trigger Type

FEATURES
- Choice of printed circuit or bobbin-type configurations
- Designed to transfer high amplitude or long duration pulses without saturation and for low-cost trigger source isolation in half and full wave SCR power control circuits, including motor speed controls, heater controls and incandescent lighting controls

ELECTRICAL SPECIFICATIONS
Primary Inductance Values: From 200µH to 5000µH.
Turns Ratio: 1:1, 1:1:1, 2:1, 2:1:1 and 5:1.
Temperature Range: - 10°C to + 70°C.



MODEL PT-50
Transformers
Trigger,
SCR Isolation

FEATURES
- Designed for low-cost trigger source isolation in SCR power control circuits and to transfer high amplitude or long duration pulses without saturation
- Small physical size and low profile provide packaging advantages
- Industrial and commercial applications include motor speed controls, lighting controls and heater controls
- Interchangeable. Designed for circuit board mounting using the same mounting dimensions as 11Z and PT-20 models.

ELECTRICAL SPECIFICATIONS
Primary Inductance Values: From 200µH to 5000µH.
Turns Ratio: 1:1, 2:1 and 5:1.
Temperature Range: - 55°C to + 105°C.

MODEL TC
Transformers
Converter

FEATURES
- Designed especially for low-power solid state circuits and for mounting on P. C. boards
- Miniature size for minimum space and choice of encapsulated or open (impregnated) styles
- High conversion efficiency from DC input to filtered DC output

ELECTRICAL SPECIFICATIONS
Transformer Power Rating: 3 watt.
Isolation, Primary-Secondary: 500 V 60 Hz. Operating characteristics may be varied to suit specific applications by appropriate selection of circuit components.
Operating Temperature Range: - 20°C to + 80°C. Intended for use in enclosed commercial and industrial applications.

Low Power
Transformers

MODELS PL-11, -12, -13, -14, -32, -33, -34
Single Primary, Input 115 V 60 Hz, Dual Secondary: PL-11 thru -14. Single Secondary: PL-32 thru -34.

MODELS PL-22, -23, -24, -42, -43, -44
Dual Primary - Dual Secondary
115 V 60Hz or
230 V 50 - 60 Hz

FEATURES
- P. C. pin mounting. Provides isolation from power line. Mounting frames and bobbin standoff available. Laminated construction for low-cost industrial applications.
- Recognized under the Component Program of Underwriters Laboratories, Inc. (UL File E71961). For general purpose transformers (UL Standard 506).
- **PL-11, PL-12, PL-13, PL-14:** Dual secondaries for **series connection** to obtain twice voltage with center tap or **parallel connection** for twice current rating
- **PL-32, PL-33, PL-34:** Single secondary and lower cost construction
- **PL-22, PL-23, PL-24, PL-42, PL-43, PL-44:** Dual Secondary for **series connection** obtains twice winding voltage with center tap or for **parallel connection** obtains twice winding current rating
- **PL-22, PL-23, PL-24:** Concentric windings for increased coupling, decreased leakage reactance and improved regulation.
- **PL-42, PL-43, PL-44:** Split-section winding for increased dielectric strength between primary and secondary windings plus reduced interwinding capacitance

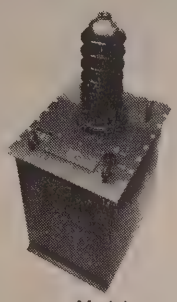
DEL ELECTRONICS CORPORATION

High Voltage Line Isolation Transformers In Oil Insulating Tanks



Model
3–TR–150–11

FEATURES:

- ▼ Complete varnish impregnation under vacuum
- ▼ Epoxy anchoring
- ▼ Immersed in high grade insulating oil*
- ▼ Electrostatic shield between primary and secondary windings
- ▼ "AN" type connector provided for input connections
- ▼ Good regulation

*Note: Shipped without oil to minimize transportation charges, except when otherwise specified in order.

SPECIFICATIONS:

- ▼ Each model available with porcelain output insulator
- ▼ Models also available with two shielded polyethylene output cables in place of porcelain insulator
- ▼ Standard types available for 120V and 240V input lines in 1:1, 1:2, and 2:1 voltage ratios with other input and output voltages available upon request
- ▼ Recommended for industrial, research, and developmental applications

Custom Designs for 3-phase power available upon request.

Standard 60Hz Types				
Model No.*	Max. kVA	kV dc Insulation	Tank Size (in.) (W X D X H)**	Insulator Height (in.)***
1-TR-30-XX	1	30	10 X 12 X 11	6

2-CTR-250-XX	2	250	25 X 33 X 37 5/16	
3-CTR-250-XX	3	250	29¾ X 29¾ X 36⅜	
4-CTR-300-XX	4	300	25 X 33 X 37¼	
5-CTR-250-XX	5	250	39½ X 47½ X 50½	

*Note: Add the following suffix in place of XX:

For	Suffix	For	Suffix
120/120	11	240/120	21
120/240	12	240/240	22

**Note: Dimensions are nominal and outline drawings are available upon request.
***Note: If shielded polyethylene output cables are desired in place of porcelain insulator, designate part number with a "C" prefix, e.g., 1-CTR-30-XX.

Transformer, High Voltage—Line Isolation Open Type Construction—Epoxy Coated

FEATURES:

- ▼ Designed for continuous operation at rated voltage and power
- ▼ Epoxy coated, air insulated up to 30kV dc, oil insulated over 30kV dc
- ▼ Well suited to applications requiring reliable isolated line voltage at power ratings up to 1kVA
- ▼ Other higher voltage and power units available upon request

SPECIFICATIONS:
Primaries: 115V or 230V, 60Hz
Secondaries: 115V

MINIGLOSSARY
BASIC CAPACITOR FORMULAS

I. Capacitance (farads)

English: $C = \frac{.224\,K\,A}{t_D}$

Metric: $C = \frac{.0884\,K\,A}{t_D}$

II. Energy stored in capacitors (Joules, watt-sec)

$E = \frac{1}{2}\,CV^2$

III. Linear charge of a capacitor (Amperes)

$I = C\frac{dV}{dt}$

IV. Total Impedance of a capacitor (ohms)

$Z = \sqrt{R_s^2 + (X_C - X_L)^2}$

Where Rs = ESR

V. Capacitive Reactance (ohms)

$X_C = \frac{1}{2\pi fC}$

VI. Inductive Reactance (ohms)

$X_L = 2\pi fL$

VII. Phase Angles:

Ideal Capacitors: Current leads voltage 90°
Ideal Inductors: Current lags voltage 90°
Ideal Resistors: Current in phase with voltage

VIII. Dissipation Factor

$DF = \tan\delta \text{ (loss angle)} = \frac{ESR}{X_c} = (2\pi fC)\,(ESR)$

IX. Power Factor

PF = Sine δ (loss angle) = Cos ϕ (phase angle)
PF = DF (when less than 10%)

X. Quality Factor (dimensionless)

$Q = \text{Cotan } \delta \text{ (loss angle)} = \frac{1}{DF}$

XI. Equivalent Series Resistance (ohms)

$ESR = (DF)\,(Xc) = (DF)\,(\frac{1}{2}\pi fC)$

XII. Power Loss (watts)

Power loss $= (2\pi fCV^2)\,(DF)$

XIII. KVA (Kilowatts)

$KVA = 2\pi fCV^2 \times 10^{-3}$

XIV. Temperature Characteristic (ppm/°C)

$TC = \frac{Ct - C_{25}}{C_{25}\,(T_t - 25)} \times 10^6$

XV. Cap Drift (%)

$C.D. = \frac{C_1 - C_2}{C_1} \times 100$

XVI. Reliability of Ceramic Capacitors

$\frac{L_O}{L_t} = \left(\frac{V_t}{V_O}\right)^x \left(\frac{T_t}{T_O}\right)^\tau$

XVII. Capacitors in Series (current the same)

Any number: $\frac{1}{C_T} = \frac{1}{C_1} + \frac{1}{C_2} \cdots + \frac{1}{C_N}$

Two: $C_T = \frac{C_1\,C_2}{C_1 + C_2}$

XVIII. Capacitors in Parallel (voltage the same)

$C_T = C_1 + C_2 \cdots + C_N$

XIX. Aging Rate

A.R. = % Δ C/decade of time

XX. Decibels

$db = 20 \log \frac{V_1}{V_2}$

Metric prefixes:

Pico	X 10^{-12}
Nano	X 10^{-9}
Micro	X 10^{-6}
Milli	X 10^{-3}
Deci	X 10^{-1}
Deca	X 10
Kilo	X 10^3
Mega	X 10^6
Giga	X 10^9
Tera	X 10^{12}

Symbols:

K	=	Dielectric Constant
A	=	Area of electrode overlap
t_D	=	Dielectric thickness
V	=	Voltage (volts)
t	=	time (hours)
R_S	=	Series Resistance (ohms)
f	=	frequency (Hertz)
L	=	Inductance (henries)
δ	=	Loss angle
ø	=	Phase angle
x+y	=	Exponent effect of voltage and temperature
L_O	=	Operating life (hours)
L_t	=	Test life (hours)
V_t	=	Test voltage (volts)
V_o	=	Operating voltage (volts)
T_t	=	Test temperature (°C)
T_o	=	Operating temperature (°C)

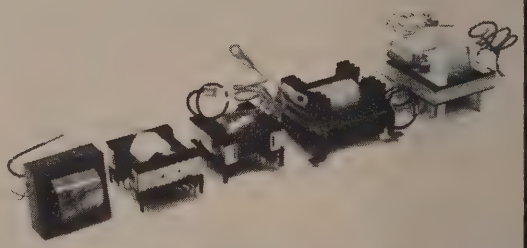
SWITCHMODE POWER SUPPLY MAGNETICS



Transformers — driver, interstage, and output

We have standard designs for your custom requirements. Selected ferrite "E" cores with associated nylon bobbins are predesigned to minimize the custom design effort to meet your needs.

- Low prices
- High quality
- Custom designs

Inductors — toroidal and lamination types

- Designs available up to 300 amps
- Minimum possible size
- Selection of sizes
- Available with open winding or encapsulated or partial encapsulated

- Low prices
- High quality
- Custom designs

Transformers — current sense (toroidal)

- Fourteen (14) standard designs
- Low prices (cost effective designs)
- Open, sealed, or totally encapsulated

- High quality
- Custom designs

- UL, CSA, VDE and IEC Capabilities
- Designs to Military Specifications

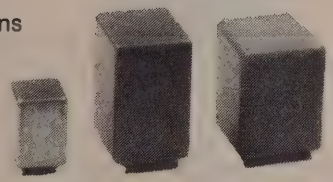
CUSTOM MIL-T-27 TRANSFORMERS

- For military applications
- For hi-rel industrial applications
- Competitive prices

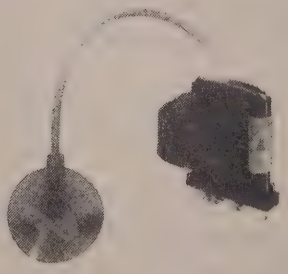


- Construction to MIL-T- 27D, grade 4 or 5, Class "S", life "X", (10,000 hrs.)
- Encapsulated to meet MIL-STD-810C for vibration, shock, sand, dust, humidity, salt spray, fungus, sunshine, rain, explosion, and high altitude.

Call us for your special requirements!

FLYBACK TRANSFORMERS (HIGH VOLTAGE)

- Up to 30KV output
- Epoxy (or silicon) encapsulated
- Up to 32 KHz, typical
- Varicus footprint styles available



- Made to customer specifications

Please send us your specifications for high voltage transformers (flyback). Our engineers will work with you to design transformers for your special needs.

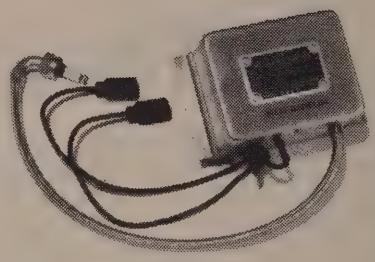
HIGH VOLTAGE TRANSFORMERS

IGNITION TRANSFORMERS

Various types of custom ignition transformers are offered ranging from the continuous sparking type to the high energy arc exciters that deliver up to a 12 joule arc at a rate of 4 times per second.

Custom ignition transformers/modulators for military applications, such as large tent heaters, are also offered.

Contact us to design custom type ignition transformers to meet your requirements.

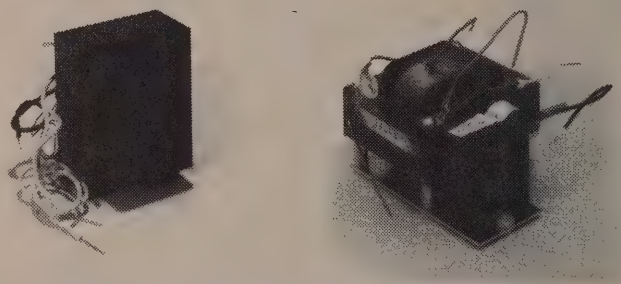


Ignition modulator for military tent heater.

OZONE GENERATOR TRANSFORMERS

Custom ozone generator transformers can be designed to meet your specific ozone generator application. Units of different frequency and voltage combinations are offered as required by the plate designs.

For your specific requirement, please contact us for engineering discussions and price quotations.

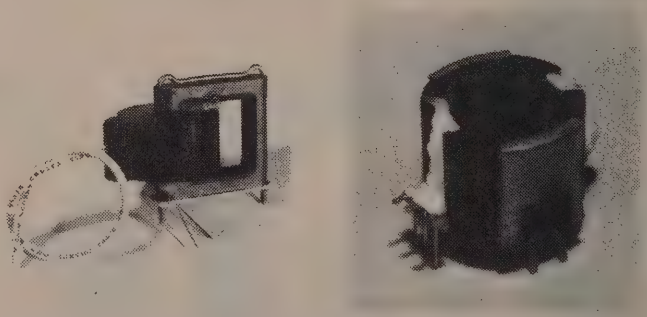


Custom ozone generator transformers

AIR CLEANER & ION GENERATOR TRANSFORMERS

Various types of air cleaner transformers for electrostatic cleaning and transformers for ion generation are offered.

Contact us to design custom units to meet your specific requirements.



Custom air cleaner and ion generator transformers

OTHER HV TRANSFORMERS

Contact us for any high voltage transformer application.

• Low Prices • High Quality • Custom Designs

WALL PLUG-IN, DESK TOP, AND WALL MOUNT UNITS

AC/AC, AC/DC, and AC/DC Regulated

AC/DC ADAPTERS

Up to 14 case sizes are offered with a variety of output cord and connector configurations to meet your specific requirement. Units can be custom designed to meet your input and output ratings. Plug types for many different countries are available. Several standard models with UL, CSA and other approvals are offered.

Centertapped or multi-secondary versions with three or four conductor output cords are availalbe. Screw terminal outputs are also offered on some case sizes.

Wall plug-in units for North American receptacles.

AC/DC ADAPTERS

These adapters are unregulated, filtered, DC output units offered in up to 14 case sizes with a wide variety of output cord and connector configuation. Dual or triple DC outputs with three or four conductor output cords are available. Input plug types of many different countries are offered.

UL and CSA approved standard models are available. Units designed to meet VDE, TUV, and others are also offered.

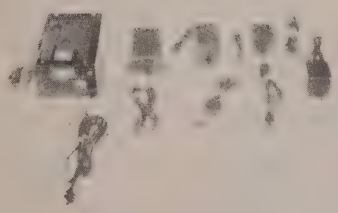
Wall plug-in units for various International receptacles.

LINEAR REGULATED POWER SUPPLIES

The larger case sizes are used for the linear regulated DC power supply units. Some of the larger cases are of the wall plug-in type mainly for North American receptacles. Most of the larger cases are of the desktop (or wall mount) style.

Single or multiple regulated outputs are offered with 2, 3, 4, or 5 conductor output cords available. Input cords for most countries are available in the desk top or wall mount units.

Custom designs can be made to meet your specific requirements.



Desktop and wall mount units with input cords for North American receptacles or various International receptacles.

SWITCHING POWER SUPPLIES

the switching regulated power supplies are offered primarily in the larger case sizes. Some versions are available in wall plug-in type cases but most offerings are in desk top units. Units are designed to meet EMI requirements per FCC Docket 20780 Class B. Wide input voltage ranges of 90–130 and 180-260 VAC are standard.

Custom designs can be made to meet your specific requirements.

- Low prices
- High quality.
- Custom designs to meet your exact requirements.
- Standard designs available with UL and CSA approvals.
- UL, CSA, and VDE submittals upon request.
- Quick delivery on preproduction units (made in USA)
- Plugs for Continental Europe, UK, Australia, North America, and others.

THE FAST AND EASY WAY TO FIND IC MANUFACTURERS' DATA BOOKS!

The 1993 DIRECTORY OF IC MANUFACTURERS' DATA PAGES is a unique index designed to save you time and help you find the manufacturers' precise data book or sheet that you need on any integrated circuit listed in the 1993 IC Master.

Simply look up any IC by base number. The cross-reference will show you the manufacturer's complete device number together with the name and issue date of the applicable manufacturers' data book.

For example: If you wanted the complete manufacturers' data on device number ADOP07. Look up base number 07. Following the base number is the manufacturer's name...Analog Devices, the complete device number ADOP07 and the page number of where the device is described in the IC Master. The listing will then show you that the manufacturer's data book is Analog Devices "Linear Products DataBook" .

Now you can contact Analog Devices by phone or FAX and request the EXACT data book you need. No wasted words, no wasted time.

Plus, where and whom to call for technical information, at any IC manufacturer, is at your fingertips in the complete Manufacturers & Distributors Directory.

A guaranteed time saver, this unique directory is a must for every engineering department!

Don't waste another precious engineering minute.

ORDER THE 1993 DIRECTORY OF IC MANUFACTURERS' DATA PAGES...TODAY!

To order your 1993 Directory of IC Manufacturers' Data Pages,
Contact your local IC MASTER distributor or,

Ensign Corporation

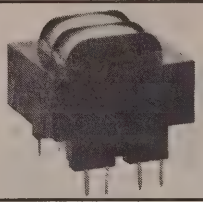
PRE-DESIGNED TRANSFORMERS

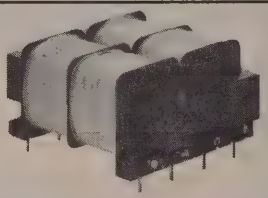
Reduce the time and cost to go from concept to market by using pre-engineered UL recognized power transformers. Use as is or make custom modifications. UL insulation systems from 130°C to 200°C. Except where noted, all operate in both 50 Hz and 60 Hz applications.

PRINTED CIRCUIT



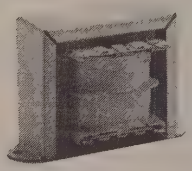
The industry standard for printed circuit applications. Sizes to 36 VA. Output ranges from 5 VAC to 120 VAC.

PRINTED CIRCUIT (LOW PROFILE)



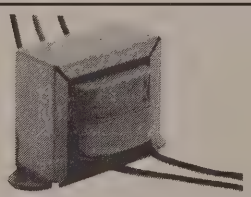
Ideal for multi-layer PCB's, or in tight quarters. Complete winding isolation. Sizes to 48 VA. Output ranges from 5 VAC to 240 VAC.

QUICK-CONNECT/ SOLDER TERMINALS



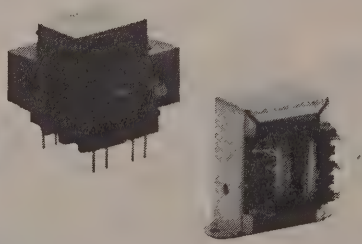
Securely anchored integral terminals function either as convenient solder lugs or 3/16" male quick-connects. Sizes to 100 VA. Output ranges from 10 VAC to 120 VAC. Chassis mount.

COLOR-CODED LEAD WIRES



Inputs and outputs easily identified by 600V rated lead wires. Ready for harnessing or direct soldering. 6" standard, other lengths upon request. Sizes to 100 VA. Output ranges from 10 VAC to 120 VAC. Chassis mount.

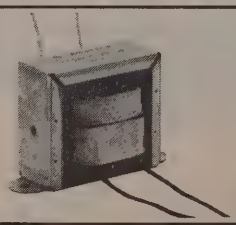
INTERNATIONAL



Meet construction & performance required by IEC, VDE, TUV, etc. 4000V dielectric strength. Provide creepage & clearance distances. Windings enclosed in protective shroud. Single, dual, or multi-tap inputs.

Printed circuit versions in sizes to 80 VA. Chassis mount versions with solder lugs, quick-connect terminals, or color-coded lead wire in sizes to 200 VA. Output ranges from 10 VAC to 240 VAC.

LOW VOLTAGE (12V) LIGHTING



60 Hz applications only. Available in 120V, 120/240, 208, 240, 277, & 120/277V input versions. Output voltage regulation specifically designed for 12V halogen & incandescent lamps.

50 watt & 75 watt sizes standard. UL 200°C insulation systems standard. Available in several chassis mount styles.

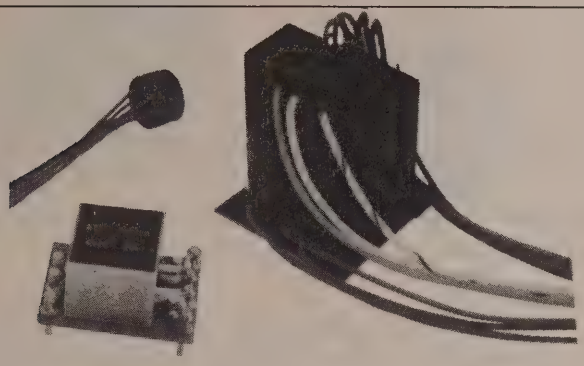
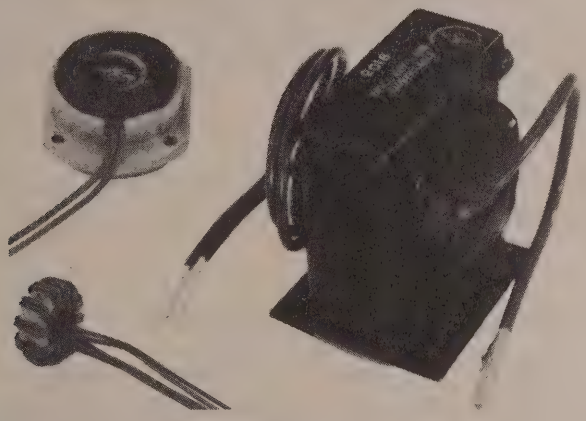
ESC

TRANSFORMERS

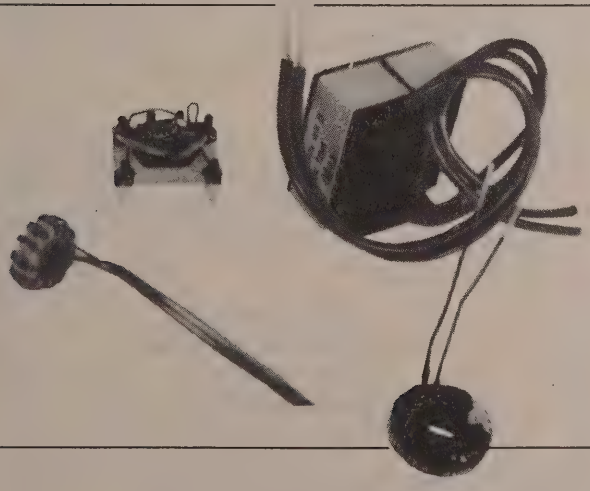
MILITARY AEROSPACE INDUSTRIAL



ESC will manufacture your transformer/coils in strict accordance with your engineering design documents. Our 35 years of manufacturing experience will be incorporated into each product which will be an exact reflection of your design. Timely and economical advantages as well as customer visibility is offered by our service to you.



ESC maintains a Quality Control System that conforms to MIL-I-45208 and MIL-Q-9858, as applicable. Equipment calibration is per MIL-STD-45662 and in-line testing is performed as well as 100% final testing of your products. All applicable testing is in accordance with MIL-T-27E. Soldering workmanship is certified to per MIL-STD-2000.



ESC is fully versed and experienced with the military and aerospace requirements as well as high volume commercial and industrial products. Our high volume capacity is achieved through manufacture in any one of our five offshore plants. Contact us for further information regarding our ability to meet your requirements.

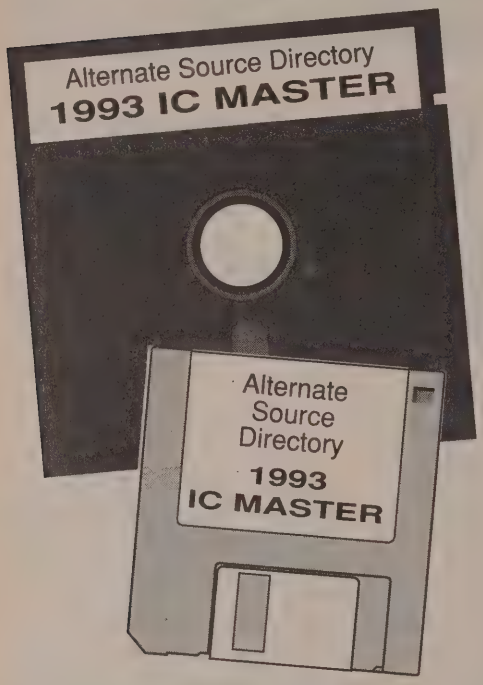
Hearst Engineering Software

ICMASD

Alternate Source Directory



The all new 1993 ICMASD-IC Alternate Source Directory on Disk is identical to the Alternate Source Directory Section contained in Volume Two of the printed version of the 1993 IC Master. All you need is an IBM XT/AT or 100% compatible personal computer with hard drive.

ICMASD is the most comprehensive and reliable guide available to all ICs known to have a realistic replacement or alternative. The 1993 version contains over 106,000 listings to help you find the functional equivalents for both current and discontinued parts.

The electronic ICMASD is fast, convenient...and can be customized for your specific needs!

ENHANCED FLEXIBILITY

ICMASD is organized in a similar fashion to the printed version in the IC MASTER. The database is arranged by manufacturer, showing the manufacturer's original basic part number. All known replacements for that part are listed in alphanumeric order.

The enhanced flexibility of the electronic ICMASD allows you to add comments, up to 19 digits long, to any device listing in the system. These comments can be part numbers, project notes, prices, or any information unique to your application.

USER FRIENDLY

ICMASD is very user friendly. There are no tricky commands to learn. The software is completely menu driven. ICMASD comes complete with documentation that is brief and to the point. It can be ordered on five 51/4" double-sided, double-density disks OR on one 51/4" high-density disk OR on one 31/2" high-density disk.

Published annually in March

FAST AND CONVENIENT

ICMASD includes a complete Manufacturers & Distributors Directory listing the addresses and phone numbers of every manufacturer in the IC industry. With this complete directory any manufacturer or distributor is just a phone call away.

To order your 1993 ICMASD,
contact your local IC MASTER distributor or, send your purchase order and check for $179.50 plus tax* to:

Marie Botta
Hearst Business Publishing

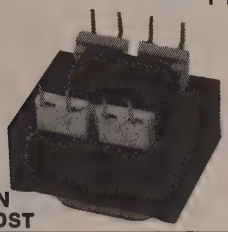
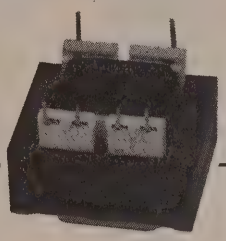
Miniature Split-Bobbin Plug-In Power Transformers

For printed circuit applications

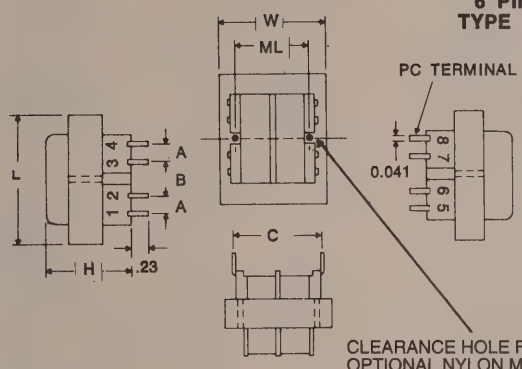


SPLIT BOBBIN — HIGHLY ISOLATED

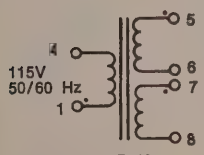


8 PIN TYPE DST

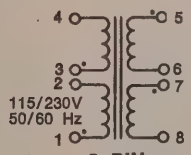
6 PIN TYPE ST



NOTE: PINS 2 & 3 OMITTED ON SINGLE PRIMARY VERSIONS



6 PIN TYPE ST



8 PIN TYPE DST

TRANSFORMERS WOUND ON A SPLIT BOBBIN PERMIT THE PRIMARIES AND SECONDARIES TO BE WOUND SIDE BY SIDE RATHER THAN ONE OVER THE OTHER.

FEATURES ARE:

2500V RMS Hipot
Elimination of electro-static shield
No cross-overs of primary and secondary leads
Class B insulation — 130°C

Transformers can be supplied with single 115V or 115/230V, 50/60 Hz dual primaries. Secondaries can be series or parallel connected.

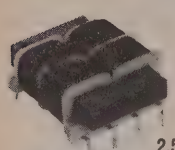
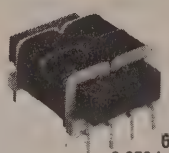
Miniature LO-PROFILE Plug-In Power Transformers

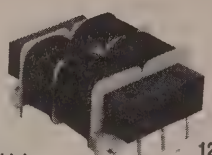
Recognized Component Underwriters Labs, Inc.



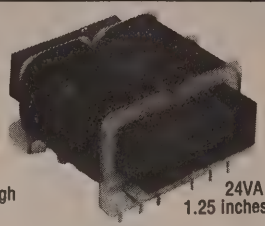
2.5VA
0.650 inches high



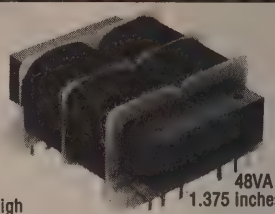
6VA
0.850 inches high



12VA
1.065 inches high



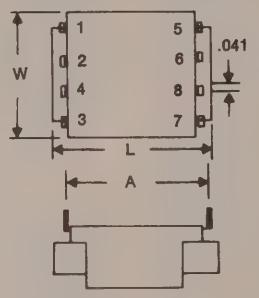
24VA
1.25 inches high



48VA
1.375 inches high

FIVE SIZES:

EWC's Lo-Profile, plug-in power transformers are designed for low height, critical pc board applications in semiconductor control and instrumentation. Interchangeable with those of other manufacturers, the units are for use in single, dual or reference dc supplies or isolated control circuits. Sizes 2, 6 and 12 are available encapsulated in form-fitting shells to protect against possible damage due to water-soluble or other fluxes as well as electrolytic corrosion experienced on open-type constructions.



Size 24 C = .530
Size 48 C = .660
Others C = B

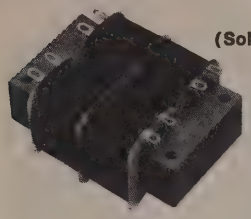
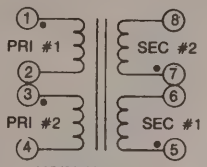
LO-PROFILE Hi-Power Humbucking Transformers



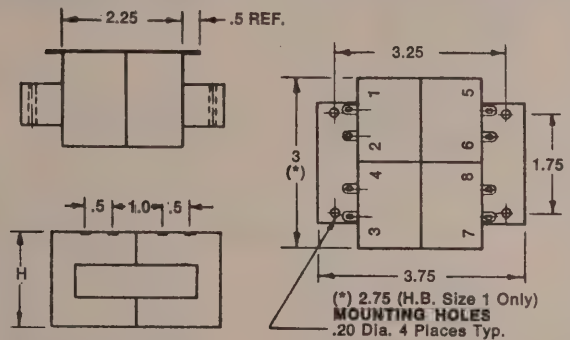
(Solder Terminals)

Varnish Finish (Standard)



115/230V 50/60 Hz
DUAL PRI.

SOLDER TERMINALS (.5-1-.5) Approx. Spacing



H.B. Size	H (Max.)	Wt. (lbs.) (Approx.)	VA (Nom.)	Reg. (%) (Typ.)	T. Rise (°C) (Typ.)
I	.850	1.00	20	30	25
II	1.25	1.75	50	30	45
III	1.50	2.25	75	25	55
IV	1.85	3.00	135	20	65
V	2.35	4.25	200	15	75

- **SOLDER TERMINALS**
- **SIDE-BY-SIDE BOBBINS**
- **20VA TO 200VA • 115/230V @ 50/60Hz**
- **1.5KV RMS HIPOT • CLASS B (130°C)**

ADVANTAGES:

- Side-By-Side Bobbins (Secondary Wound alongside of Primary) Lower Interwinding Capacitance — eliminates the need for electro-static shield
- Hum-bucking (Semi-Toroidal) Construction [Lower Radiated Magnetic Fields, Balanced Wdgs., Larger Heat Radiating Surface and Lower Center of Gravity]
- High Power for Low Panel Heights and Narrow Card Spacing

MOUNTING: (4) Lamination Holes .20 Dia. Insulated hardware required.

RATINGS PER SECONDARY OUTPUT: VA-SEC = 0.5 x VA (Output) • V-SEC = V-SEC (Parallel) • I-SEC = I-SEC (Series)

NON-STANDARD RATINGS: Tapped primaries, secondaries different voltages, currents or frequencies can be furnished.

Units with higher VA ratings up to 1.25 KVA can also be supplied.

EWC, Inc. reserves the right to make changes without notice in design and specifications in order to effect product improvement.

INTERNATIONAL SERIES POWER TRANSFORMERS

UL, VDE, IEC and CSA certified.

In addition to being certified to VDE 0806, IEC 380, CSA 22.2 No. 66 and UL506, the EWC series of International Transformers is designed and built to meet most other international safety standards.

These transformers are available in both PC and chassis-mount construction. With power ratings of 2.5VA to 175VA, these transformers are built on dual-bobbins with insulating shrouds to provide 4000V RMS isolation between primary and secondary. The non-concentric construction reduces primary to secondary capacitance and eliminates the need for an electrostatic shield.

International Triple Output Power Transformers

These transformers were designed around our standard international series and are rated in terms of the final DC ouput after regulation by a 3-terminal IC regulator. Isolation is 4000V.

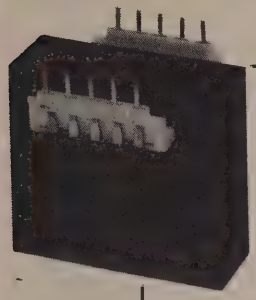
Triple Output Power Transformers

For triple-output regulated supplies

IDEAL FOR MICROPROCESSOR APPLICATIONS

These lines were designed around our standard PC, LP and CHASSIS-TRAN series transformers and are rated in terms of the final DC output after regulation by a 3-terminal IC regulator. 1500V Hipot is standard.



TYPE MPC AND DMPC

QUICK CONNECT POWER TRANSFORMERS

2500 Volt RMS Hipot in a variety of practical sizes. Maximum operating temperature 130°C available with either single 115 or dual 115/230V primary.

EWC's split bobbin and non-concentric winding provide better insulation and high signal isolation, thus eliminating the need for electrostatic shielding.

Adaptations of standard transformers are also available. Dots on schematics shown below indicate like polarity.

Toroidal Power Transformers

Toroidal Power Transformers Up to 1.0 KVA

Standard transformers suitable for use in applications where low magnetic noise and superior electrical performance in a small package is required. Designed and built to meet the basic requirements of UL, CSA, VDE and IEC, these transformers are 100% dielectric tested at 4000V rms and utilize a Class B, 130C recognized insulation system. Available with either 115V, 50-500Hz or 115/230, 50-500Hz primaries and up to 1KVA output, these transformers may be specified for use in many applications.

Optional mounting hardware includes two Neoprene pads and a metal washer. Standard leads are 8″ long self-leads. Other ratings available upon request.

Power Isolation Transformers

These transformers are designed to eliminate the necessity of specifying many different power transformers due to variations in input line-voltage conditions. Two 120V primary windings with taps at 104V and 110V permit operation from 104V, 110V, 120V, 208V, 220V, 230V or 240V power lines. Multi-tapped secondary windings provide additional flexibility permitting a large number of possible input/output combinations including autotransformer connections which effectively double output VA ratings.

A grounded electrostatic shield, 1/4" thick terminal boards with plated hardware, varnish impregnation and 2500Vrms hipot are standard.

Audio Transformers 5W

MILITARY AND COMMERCIAL APPLICATIONS (MEETS THE REQUIREMENTS OF MIL-T-27 GRADE 5, CLASS - S)

SPECIFICATIONS

- **Power:** 5 W Max at 200 Hz; 500 MW Max at 60 Hz
- **Response:** ±1 db 60 to 10,000 Hz
- **Terminals:** Pin, Dumet, tin plated
- **Mounting:** Two 4-40 inserts, 0.80" x 0.80"
- **Weight:** 2.5 oz.

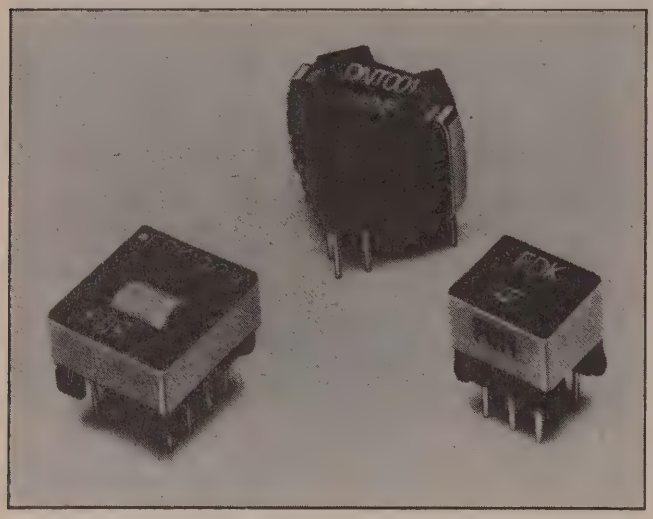
ISDN INTERFACE TRANSFORMERS



Features

- Compliance with the CCITT I. 430 in relation to:
  - Pulse shape
  - Impedance characteristics
  - Longitudinal conversion loss
- Compact size
- High inductance, low capacitance
- Low leakage inductance
- Phantom feeding capability

Applications

- Private branch exchange (PBX) equipment
- Digital service unit (DSU)
- Terminal adapters
- Terminal units
  - G4-mode facsimiles
  - ISDN telephones and the like

Electrical Characteristics

Models	DNT001	DNT301	DNT302	DNT303	DNT502	DNT601
Complying interfaces	Basic-rate (192kbps)				Primary-rate (1.544Mbps)	
Winding ratio	2:1 (P1+P2: S1+S2)	1:2 (P1+P2:S1+S2+S3) 1:1.5 (P1+P2:S1+S2)		1:2 (P1+P2+:S1+S2)	2.65:1:1 (S1: P1: P2)	
Inductance (line side)	22mH min. (S1+S2) at 1kHz 0.1mA	22mH min. (P1+P2) at 10kHz 0.1V			300μH min. (S1) at 1MHz 0.1V	200μH min. (S1) at 1MHz 0.1V
Leakage inductance (line side)	—	10μH max. at 10kHz 7mV			1.5μH max. at 1MHz 0.1V	
Stray capacity (line side)	—	120pF max. at 1MHz 0.1V		150pF max. at 1MHz 0.1V	—	—
DC resistance	3.0Ω max. (S1+S2)	P1+P2:5Ω max. S1+S2+S3:10Ω max.		P1+P2+:5Ω max. S1+S2:10Ω max.	S1: 0.55Ω max. P1, P2:0.25Ω max.	
Insulation withstanding voltage	DC 100V for 1 min.	AC 500V for 1 min.			DC 100V for 1 min.	
Complying LSIs	Siemens PEB2080, 2085 AMD Am79C30, 79C31 National semiconductor TP3420	Fujitsu MB86402		Siemens PEB2080, 2085 AMD Am79C30, 79C31 National semiconductor TP3420	Siemens PEB2235

802.3: 10Base2 and 10Base5

Key Features

- Universal AUI Transformer may be used for typical applications requiring 75, 100 or 150 µH.
- All FEE Fil-Mag components are manufactured in ISO 9001 certified facilities to meet the highest international standards
- IEEE 802.3 (10Base2, 10Base5) compatible
- 2000 Vrms isolation meets IEEE 802.3 safety requirements for LANS
- Low leakage inductance and coupling capacitances mean fast rise times
- Ideal for thick and thin coaxial Ethernet

Surface Mount

- Proven in all surface mount soldering processes
- Small form factor, 50-mil lead spacing
- Available in tubes; tape and reel optional

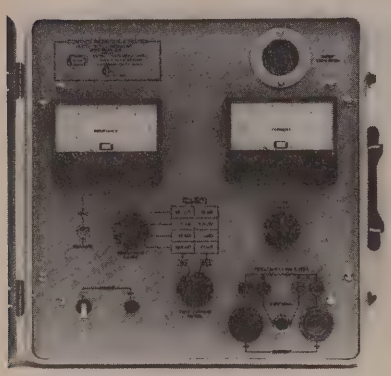
ELECTRO TECHNIK

TEST EQUIPMENT

CONTACT-RESISTANCE TESTER



The AOT-10 is designed to test the contact resistance of circuit breakers, connectors, bus bar connections, etc. A four-terminal ohmmeter, it will measure resistance over five ranges from 0-10 microohms to 0.1 ohm. Two test current ranges are standard on the unit, 0-10 A and 0-100 A. The ohmmeter reads accurate resistance for any indicated test current within its range.

INSULATION RESISTANCE TESTERS

IRT-5000 – A rugged line operated unit with a continuously adjustable D.C. test potential from 0 to 5000 volts. There are four resistance ranges covering values from 1 - 1,000,000 megohms. Deadman safety switch removes high voltage and discharges load build-up capacitance. Ideal for long cables.

BIRT-5000 – Electrically similar to above unit but with built in rechargeable battery.
Hand crank models to 5000 volts are also available.
Custom designs can be manufactured to suit your individual requirements.

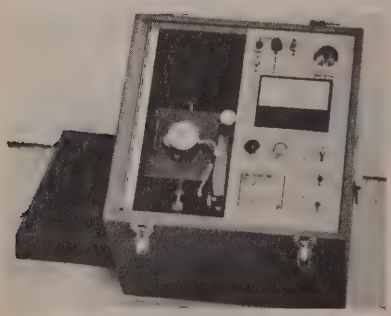
PORTABLE BREAKDOWN TESTERS

Two standard models, the AVC-25V (2500 V ac) and the AVC-50 V (5000 V ac) cover more than 95% of these requirements. Both units offer a continuously adjustable output voltage to their maximum rated values.
All units are equipped with a high-voltage pilot lamp, power and fault lamps, automatic cut-out and a heavy duty retractable high-voltage probe.
These units also automatically verify the grounding and polarity of the supply receptacle.
Other units, for special applications, are available on request.

EARTH TESTERS

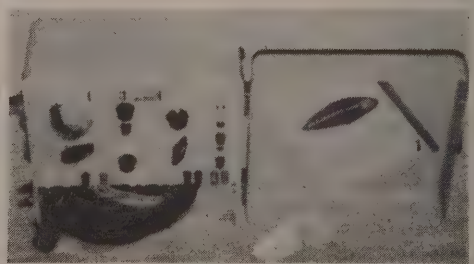
For the measurement of earth resistance of service ground rods and station ground grids. Useful as well for earth resistivity measurements for transformer station site selection.
Geohm II – a galvanometer type instrument with 4 ranges: 0-5/50/500/5000 ohms. Unit utilizes a convenient potentiometer adjustment for balance.
Geohm III – an electronic, direct reading, digital instrument. High and low range selection with automatic range switching within ranges, permit accurate resistance measurements from 0-199.99 kΩ. Range selected, low battery, high spike resistance and overflow are indicated on edges of display.The high 0.01-ohm resolution, and filtering to reject the influence of stray voltages in the earth, produce an instrument very suitable for station ground grid measurements and loop testing on neutralizing transformer installations. Uses four 'C' cells.

PORTABLE OIL TEST SET



AVO-600 – A high voltage test set to establish dielectric breakdown of transformer and other insulating oils. This unit features 3 selectable motorized rates of voltage rise to a maximum of 60 kV. The voltmeter freezes at the breakdown voltage. The unit meets ASTM specifications.

POWER TRANSFORMER RATIOMETER



TR-1A – A precision instrument for testing single phase, or three phase transformers without lead changing. Test potential is 120 V for power transformers, 2.5 volt for current transformers. The ratio readout is from 0.00000 to 0.99999, accuracy is ±0.005% at 120 V. Leads included.

PRODUCT CAPABILITY

FETCO has total capability for the design, development and manufacture of the following components and sub-systems for the defense industry. Our engineering staff is always available for consultation to ensure the optimum solution for any application.

- Power supplies up to 25 kV and 1 kW DC to DC, AC to DC and DC to AC
- Transformers from miniature signal type up to 35kVA
- Inductors DC, AC and RF
- Magnetic amplifiers and saturable reactors
- Various signal processing and conditioning sub-systems
- Build-to-print production of all the above categories

If your requirement falls into any of these areas, we would welcome the opportunity to provide a proposal or quotation as appropriate.

POWER SUPPLIES

POWER SUPPLIES

A broad variety of low and high voltage and current power supplies are manufactured to standard designs and for special applications.

AC Our ac designs are rugged, and include ammeter and voltmeter as required. Regulated high current designs are available for special applications, up to **2000 A.**

DC Manufactured in bench-top or rack-mount models, standard and custom designs are available with both fixed and adjustable outputs.

Typical Specifications: Line Regulation – ±0 03% of output voltage for line variation of ±10%. Load Regulation – 0.03% from zero to full load. Ripple – 2 mV rms. Short-circuit protection.
Voltmeter and ammeter as required.

QUALITY MAGNETICS

Fernwood Transformer

MILITARY • AEROSPACE • INDUSTRIAL

Fernwood Transformer will manufacture products from your drawings or from your written requirements through our computer-aided design department. This program will produce optimum design and size for your high frequency requirements. Power range up to 50 KVA and frequencies up to 1 GHZ.

Fernwood Transformer is on the QPL list for grade 4 and grade 5, MIL-T-27E. Military demands high quality and reliability. Our assembly lines have in-process inspection and all products are tested 100%. Our facility is approved to MIL-I-45208 and instrument calibration is per MIL-STD-45662. Our soldering is certified to MIL-STD-2000.

We design to meet UL, CSA, and VDE when required. Our production is computer-controlled so each customer can have a timely flow chart of materials, processes, and delivery dates.

MANUFACTURED IN USA BY KIMBUS

3 reference sources on a single compact disk! **CD-ROM PLUS** is fast, easy to use and very user friendly. It combines all of the Master Selection Guides and all of the Indexes from the printed IC Master with hundreds of additional manufacturers data sheets. **CD-ROM PLUS** also includes the entire Directory of IC Manufacturers' Data Pages plus a powerful Inquiry Generation and Tracking System.

- **You can find the exact IC you need in seconds...**
- **Compare specs on your screen...**
- **Print the search results directly to your computer or printer!**

PLUS...

- **You can access over 1,100 manufacturer's data sheets and send them to your laser printer.**

Published annually in the Spring

CD-ROM PLUS runs on any ISO9660 CD-ROM reader and any IBM AT or better PC (or 100% compatible).

No complex software involved. Start your reader and play CD-ROM PLUS. Once you experience the simplicity and speed of CD-ROM PLUS, you'll never work without it again!

JOIN THE CD-ROM BANDWAGON.

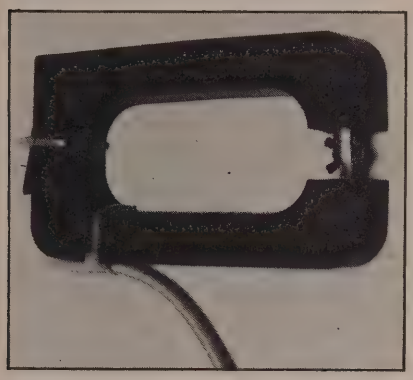
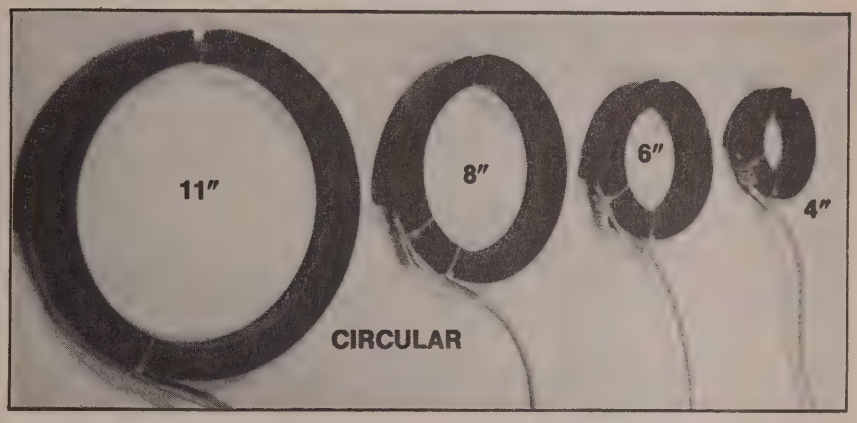
SPLIT CORE CURRENT (INSTRUMENT) TRANSFORMERS

GUARANTEED 24-HOUR DELIVERY ON ALL STOCKED PRODUCTS

RECTANGULAR 2.75" X 6.63"





Four models are available for round conductors plus one for buss bars. Use with any 5 amp indicating or recording ammeter or with an Amp or Watt transducer. The flexible core is made of directional silicon steel. The secondary windings are copper wire. Encapsulation is silicon rubber to protect against moisture, dirt, oil and corona. Remains flexible from -45°C to +200°C. Insulation level 600 Vac and can be used over insulated conductors at higher voltages. Frequency: 50-60 Hz. Safety Factor: An electronic voltage clamp holds secondary voltage to less than 1 Volt when open circuit voltage exceeds 40 Vac. Transformer is red and secondary leads are yellow with spade connectors.

Specialist In Creating and Manufacturing Of Custom And Standard Inductor And Transformer Components...

TRANSFORMERS

TRANSFORMERS: Hisonic's special power/converter and signal/matching transformers for both audio and wide video ranges are used in airborne comm/nav and ground communications systems. Included are toroidal, pot core, and laminated core types manufactured to commercial and MIL specifications. Our 30 year experience is at your disposal to help solve your transformer and inductor problems.

HITRAN

Key source for reliable magnetic components, power supplies and control systems for over 40 years.

300 VA TO 3000 KVA STANDARD & SPECIALTY MAGNETIC COMPONENTS

Also see our catalog pages under AC POWER SUPPLIES and DC POWER SUPPLIES.

STANDARD TRANSFORMERS

DIT SERIES — Drive Isolation Transformers. (12-550KVA, U.L. Listed)

Designed to provide electrical isolation and voltage transformation for SCR adjustable-speed motor drives. Dry type. 600V class. Single phase and three phase. 50HZ and 60Hz. 5% FCAN and FCBN primary taps. Open frame or NEMA 1 enclosed, 150°C rise/220°C insulation class standard, 115°C or 80°C or 55°C rise/220°C insulation class optional.

Size Range (KVA)

Single Phase

• 1, 1½, 3, 5, 8, 12, 15, 20, 27, 30, 34

Three Phase

• 8, 12, 15, 20, 27, 34, 40, 51, 63, 75, 93, 120, 150, 180, 220, 280, 330, 440, 550, 660, 760, 870, 980, 1100.

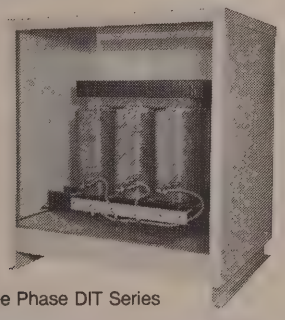
Standard Voltages Available

Single Phase

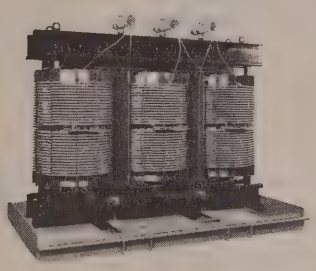
• Primary or Secondary 208, 230, 380, 460, 575, 230/460, 415

Three Phase

• Primary (△) 208, 230, 380, 460, 575, 230/460, 415
• Secondary 208Y/120, 230Y/133, 380Y/220, 460Y/266, 575Y/332, 230x460Y/133x266, 415Y/240



Three Phase DIT Series



HVDT 15KV Class Transformer

GPT SERIES—General Purpose Transformers (3-500KVA, UL Listed)

Designed to provide electrical isolation and voltage transformation for lighting, electric heating and industrial motor loads. Dry type, 600V class, single phase and three phase, 50Hz and 60Hz. FCAN and FCBN primary tap arrangements are standard. 150°C rise/220°C insulation class standard, 110°C or 85°C rise/220°C insulation class optional.

Size Range (KVA)

Single Phase

• 3, 5, 7½, 10, 15, 25, 37½, 50, 75, 100, 167

Three Phase

• 3, 6, 9, 15, 25, 30, 45, 50, 60, 75, 112½, 150, 225, 300, 400, 500, 750, 1000

Standard Voltages Available

Single Phase

• Primary (3KVA-15KVA) 240/480, 208, 277, 480, 600
(25KVA-167KVA) 240x480, 600
• Secondary (All KVA sizes) 120/240

Three Phase

• Primary (Δ) 240, 480, 600
• Secondary 208Y/120, 240Δ, 480Y/277

HVDT SERIES—High Voltage Distribution Transformers

Designed for in-plant distribution and voltage step-down. Conventional dry type or resin cast coil. 5KV through 15KV class. Single phase and three phase. 50Hz and 60Hz. FCAN and FCBN primary tap arrangements are standard. 150°C rise/220°C insulation class standard, 110°C or 85°C or 55°C rise/220°C insulation class optional.

Size Range (KVA)

Single Phase

• 3, 5, 10, 15, 25, 37½, 50, 75, 100, 167, 200, 250, 333, 500

Three Phase

• 15, 30, 45, 75, 112½, 150, 225, 300, 400, 500, 750, 1000

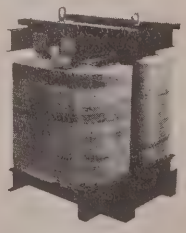
Standard Voltages Available

Single Phase

• Primary
5KV Class: 2400/4160Y
8.66KV Class: 4160/7200Y
15KV Class: 7200/12470Y
7620/13200Y, 7960/13800Y
• Secondary (All KVA Sizes)
120/240

Three Phase

• Primary (△)
5KV Class: 2400, 4160, 4800
8.66KV Class: 7200
15 KV Class: 12000, 12470, 13200, 13800
• Secondary
208Y/120, 240△, 480Y/277



DC Link Choke
4 mH at 1000 Adc
5 KV Class

SPECIALTY MAGNETIC COMPONENTS

Transformers

• Convection, forced air or water cooled.
• Dry type, liquid filled, cast-resin.
• Low voltage, high voltage to 300KV.
• High current to 20,000 Amperes.
• High frequency to 10KHz.
• Low temperature rise, high efficiency.
• Ferroresonant transformers - conventional constant voltage and harmonic-neutralized.
• Computer grade isolation transformers to 0.001 picofarads.
• Low capacitance transformers, electrostatic shielded.
• High reactance transformers - short circuit current limited.
• Modulation (Output) transformers to 50KW.
• Rectifier and filament transformers.

Inductors

LC Series - Link Chokes (DC)

Designed for use as a smoothing inductor in the DC link between rectifier and inverter in variable-speed AC motor drives from 15 to 1000 HP. Dry type, 600V class.

LR Series - Line Reactors (AC)

Designed for use as a line reactor in the three phase input lines supplying variable-speed AC motor drives from 15 to 1000 HP. Dry type, 600V class; three phase; 50Hz and 60Hz.
Other specialty inductors include:
• AC, DC.
• Iron-core, air-core.
• Linear, swinging.
• AC current limiting reactors.
• AC power factor correction reactors.
• DC filter chokes.
• AM modulation reactors.

Saturable Reactors:

Low voltage, High voltage to 15 KV. Sizes to 1000 KVA.

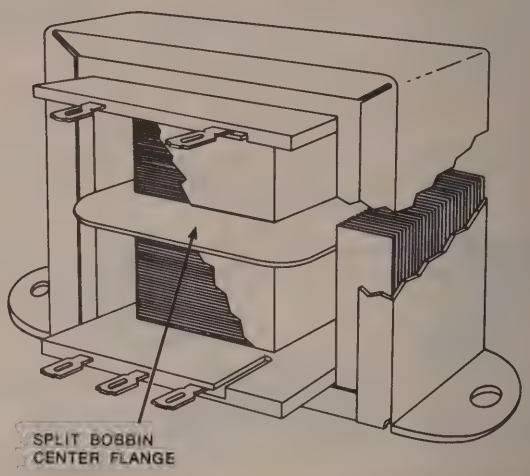
Split Bobbin Power Transformers & Split Bobbin Isolation Transformers

JM transformer
YOUR PRIMARY SOURCE

- 50/60 Hz
- Power Ratings to 1800 VA
- Single, Dual, and Tapped Primaries
- Single and Multiple Outputs
- Terminals for Quick-Connect or Soldering
- Flexible Leads also Available
- Available enclosed with Steel Covers

- Non-Concentric Winding — Lower Capacitance — Better Insulation — **2500-4000** VRMS Hipot — No Need for Electro-static Shield
- **LOW LEAKAGE**
- We design to meet UL, CSA, VDE, IEC, and TUV Standards.

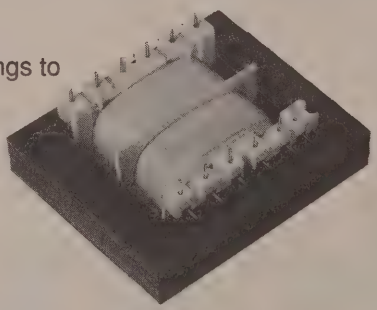
WE SPECIALIZE IN POWER TRANSFORMERS AND ISOLATION TRANSFORMERS FOR MEDICAL ELECTRONICS (PATIENT ATTACHED EQUIPMENT) FOR DOMESTIC AND FOREIGN APPLICATIONS.



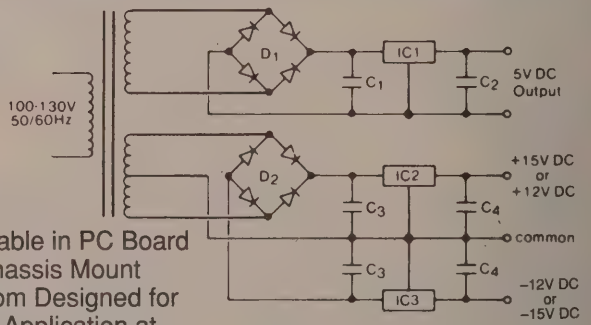
CUSTOM PROTOTYPES AVAILABLE WITHIN ONE WEEK

Split Bobbin and Low Profile Split Bobbin PC Board Transformers

- 50/60 Hz
- Power Ratings to 48 VA



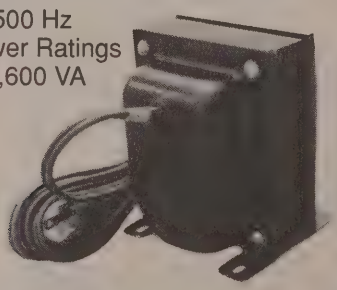
Transformers for Triple Output (Microprocessor) Applications



- Available in PC Board or Chassis Mount
- Custom Designed for Your Application at NO Extra Cost

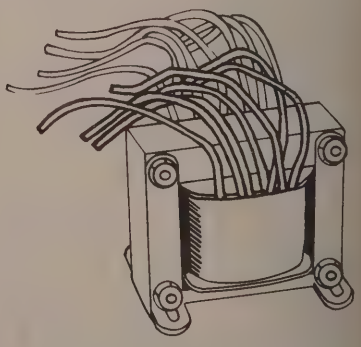
Auto-transformers

- 50/500 Hz
- Power Ratings to 3,600 VA



Rectifier Power Transformers with Flexible Leads

- 50/500 Hz
- Power Ratings up to 1800 VA
- Wide Range of Voltages
- Single, Dual, and Tapped Primaries
- Single and Multiple Outputs
- Available Enclosed in Steel Covers



WE DESIGN TO MEET UL, CSA, VDE, IEC, & TUV STANDARDS

See the Following Pages for Our Standard Split Bobbin Power, Isolation and PC Board Transformers and Toroidal Transformers

J M Transformer Co., Inc.

MANY OTHER SIZES ARE AVAILABLE.

Phone or send your requirements for immediate response.

J M Transformer Co., Inc. 112 FLORIDA STREET, FARMINGDALE, NY 11735 • (516) 293-0475 • FAX: (516) 293-3923

Split Bobbin Transformers

JM transformer
YOUR PRIMARY SOURCE

The use of a Split Bobbin allows winding to be nonconcentric (side-by-side), consequently high isolation is achieved at low cost.

- Better insulation — 2500 VRMS hipot is standard.
- Lower capacitance — no need for electro-static shield.
- Low Leakage

Also available:

- **Units with 4000 VRMS hipot**
- Steel covers
- **Flexible leads**
- Multiple outputs
- Tapped primaries
- Quick disconnect terminals
- Consult factory for any other configurations you may require
- **High voltage transformers**
- **We Design to Meet UL, CSA, VDE, IEC, & TUV Standards.**

Split Bobbin PC Board Transformers

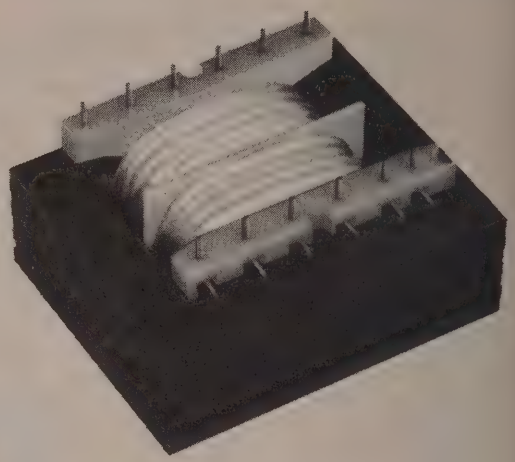
JM transformer
YOUR PRIMARY SOURCE

The use of a Split Bobbin allows winding to be nonconcentric (side-by-side), consequently high isolation is achieved at low cost.

- Better insulation — 2500 VRMS hipot is standard.
- Lower capacitance — no need for electro-static shield.

Please note that the standard items listed below utilize 6 or 8 pins, while 12 pins are available. We would like to quote your more complex requirements . . . you may save cost and space by combining two less complex Transformers into one.

We would also be glad to quote your less complex requirements. For example, if only a Single Primary and Single Secondary are needed, you can save considerable cost by utilizing only 4 Pins.



CUSTOM PROTOTYPES AVAILABLE WITHIN ONE WEEK

YOUR PRIMARY SOURCE

Low Profile Split Bobbin PC Board Transformers

- **Only 1.13″ high**

XL Series transformers offer a particularly low profile for 18VA, allowing for 1.25″ card spacing.

The use of a split bobbin allows winding to be non-concentric (side-by-side), consequently high isolation is achieved at low cost.

- Better Insulation — 2500 VRMS hipot is standard.
- Lower Capacitance — no need for electro-static shield.

If the standard items shown here do not fit your requirements, we would be glad to quote on your custom needs. Often this can save space and considerable cost.

KAPPA® TECHNOLOGIES INC.

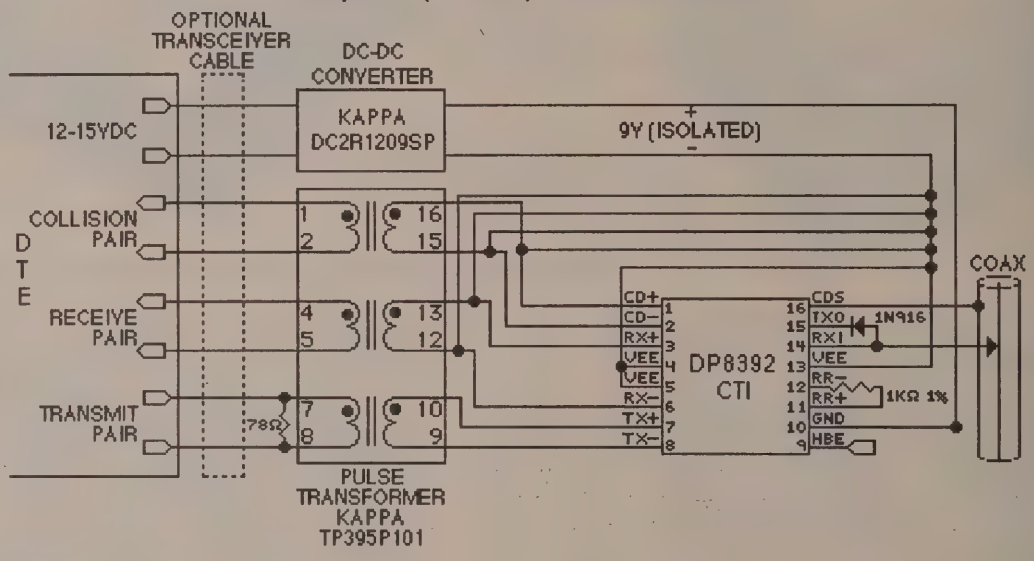
ETHERNET
Isolation Transformers

Features

- IEEE 802.3 compliant
- 16-pin DIP and SMD package options
- 2000Vrms isolation (500Vrms optional)
- SMD withstands all standard attachment processes

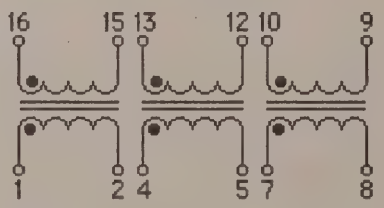
Typical Application

Cheapernet (10Base2) Transceiver or MAU

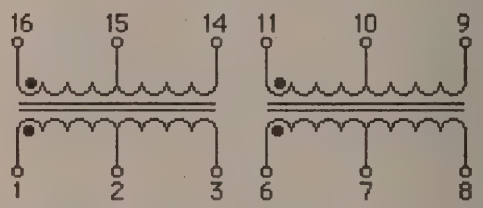


Schematic Diagrams

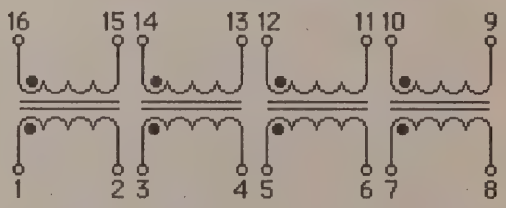
TP395 Series



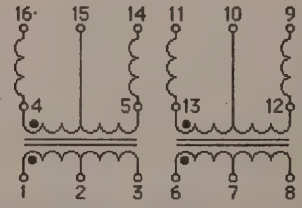
TP2031 and TP396 Series



TP497 Series



TP2032



Ratings

- Peak pulse voltage .....50V peak-to-peak
- Dissipation Rating.....75mW typical
- Avg Power Rating (40°C rise).....250mW typical
- Insertion loss[1], 1-10MHz .....0.5db maximum
- Return loss[1,2], 1-10MHz.....-20db typical
- Crosstalk[1], 1-10MHz .....-45db minimum
- Common mode Atten, 1-10MHz[1,3]...-50db minimum

Environmental Specifications

- Operating temperature range .....-0°C to +70°C
- Storage temperature range .....-40°C to +100°C
- Isolation[4], Pri-to-Sec.....>10GΩ @ 2KVrms
- Marking permanency[5] .....per Method 215
- Lead solderability[5] .....per Method 208

(*) Insert package code: "**D**" = SOIC Gull-wing SMD (0.050" pitch); "**G**" = Standard Gull-wing SMD (0.100" pitch); "**P**" = DIP

Notes to **Ratings** and **Electrical Specifications**:

[1] Insertion loss, Return loss and Crosstalk apply to TP2031 and TP2032 only, and Common mode attenuation to TP2032 only.

[2] Return loss is measured with R_G=100Ω and R_L=200Ω on "XMT" leg, and R_G=R_L=100Ω on "RCV" leg.

[3] Figures are for common-to-common mode attenuation. Common-to-differential mode attenuation will be -60db min.

[4] For 500V_{RMS} version, add suffix "A" to the part number.

[5] "Method" numbers refer to MIL-STD-202 test methods.

[6] **TP497** series is available only in "**G**" or "**P**" packages.

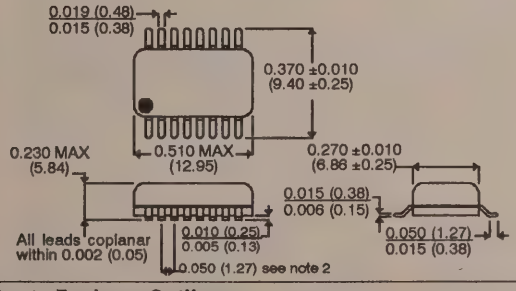
[7] Inductance is measured using the "open-circuit" method. OCL is measured @ 100KHz & 20mV_{rms}. $C_{W/W}$ and L_L is measured @ 1MHz & 20mV_{RMS}.

[8] High voltage isolation requirements per IEC 380.

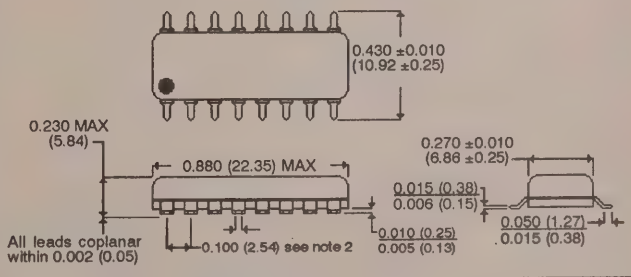
[9] Other package styles available upon special request.

Package Outlines

16-pin SOIC Gull-wing SMD (0.050" pitch)



16-pin Standard Gull-wing SMD (0.100" pitch)



Notes to **Package Outlines**:

[1] Dimensions shown are expressed in inches (mm).

[2] Lead spacing shall be measured within this zone.
a. Shoulder & lead tip dimensions are to centerline of leads.

[3] Tolerance non-cumulative.

[4] Lead material: Alloy 42, electrotin-plated per MIL-T-10727.

[5] Body material: Plastic (epoxy or Diallyl Phthalate).

[6] Round recessed hole in bottom-left corner, or notch on left end, denote lead no. 1.

[7] Body dimensions do not include molding flash which shall not exceed 0.006 (0.15).

[8] Each lead is within ±0.010 (±0.25) radius of its true position at maximum material dimension.

[9] Unit marking shall include manufacturer's name, part number, date code and index mark.

16-pin Dual-In-Line

KAPPA® TECHNOLOGIES INC.

Token Ring
Isolation Transformers

General Description

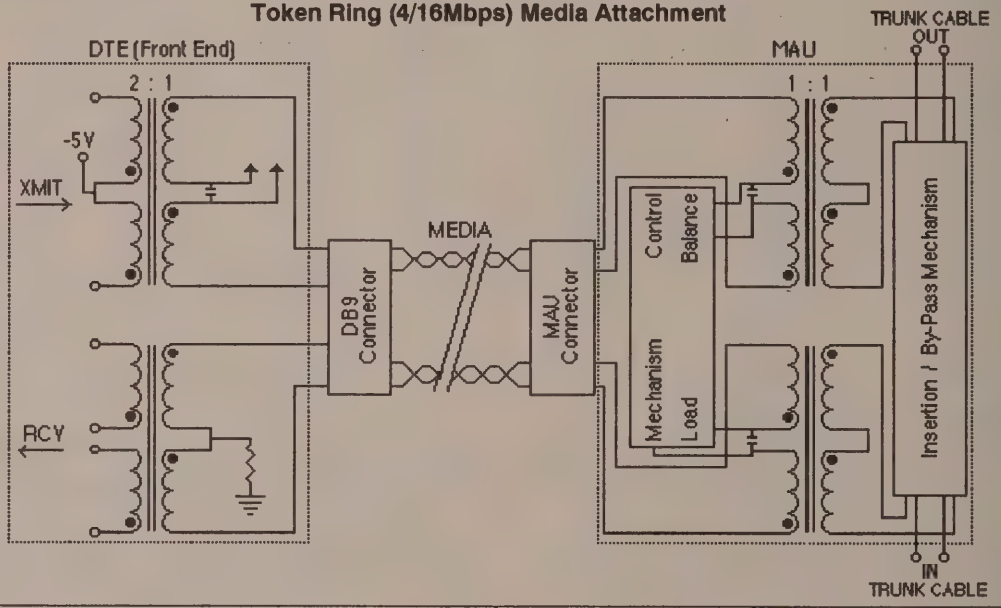
This Series of transformers is designed to meet the requirements of IEEE 802.5 standard for 4Mbps and 16Mbps Token Ring applications. The units provide both DC isolation as well as impedance-matching for DTE (2:1), MAU (1:1) or STP-to-UTP step-down applications, and are available in single (8-pin), dual (16- and 20-pin) DIL through-hole and SOIC surface mount packages.

Features

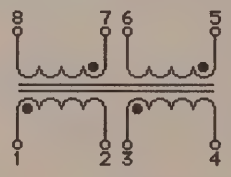
- IEEE 802.5 Compliant
- Low insertion loss (<-0.5db @ 10MHz)
- 4Mbps and 16Mbps data rates
- Both through-hole & surface mount package options

Typical Application

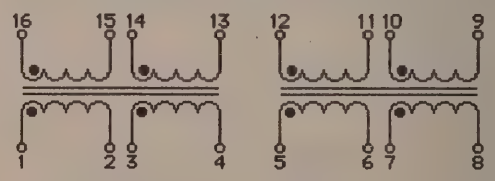
Token Ring (4/16Mbps) Media Attachment



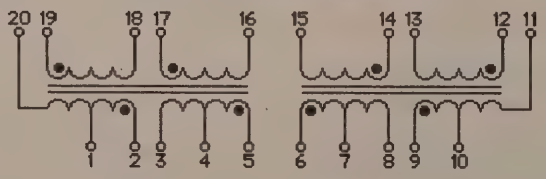
Single Transformer Units



Dual Transformer Units



TP293W225 Transformer



Ratings

- Insertion Loss @ 10MHz (@ 20MHz for TP293W225) .....-0.50db maximum
- Common-mode Attenuation @ 1MHz .....-60.0db minimum
- Return Loss @ 1MHz.....-20.0db minimum (see note 2)
- Crosstalk from 1-10MHz (dual units only) .....-43.0db minimum from section-to-section

Kappa Technologies Inc. • 1443 Pinewood Street Rahway, N.J. 07065 • Phone (908) 396-9400 • **Toll Free (800) 223-0603** • Fax (908) 388-4786

KAPPA® TECHNOLOGIES INC.

Token Ring
Isolation Transformers

Environmental Specifications

- Operating Temperature .....-0°C to +70°C
- Non-operating Temperature .....-40°C to +100°C
- Isolation (primary-to-secondary) ....500Vrms - 1 min.
- Insulation Resistance .....>10GΩ @ 500Vrms
- Marking Permanency.....per Method 215, MIL-STD-202
- Lead Solderability.....per Method 208, MIL-STD-202

Electrical Specifications @ +25°C

N/A	TP293W225	225	1:4:10	15.0	5.0	0.30	0.40	0.80	16Mbps

(*) Insert package code: "**D**" = SOIC Gull-wing SMD (0.050" pitch); "**W**" = Wide-body Dual-In-Line

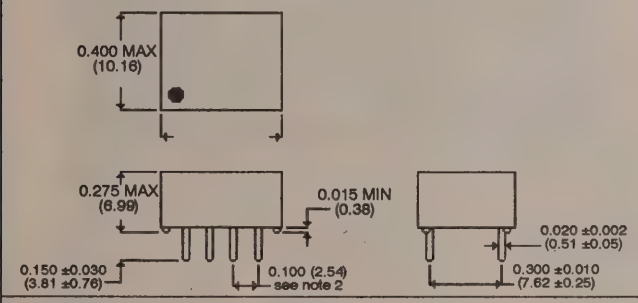
Notes to **Ratings** and **Electrical Specifications**:

[1] Inductance is measured using the "open-circuit" method. Primary inductance is measured @ 100KHz @ 20mVrms. Leakage inductance and Interwinding capacitance is measured @ 1MHz @ 20mVrms.

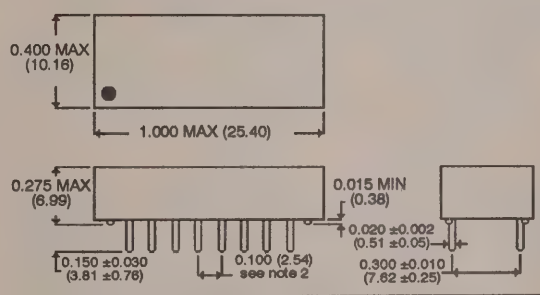
[2] Return loss on TP293W225 is as follows: -22db min (1-8MHz), -20db min (8-16MHz) and -18db min (16-24MHz).

Package Outlines

8-pin Dual-In-Line



16-pin Dual-In-Line



Notes to **Package Outlines**:

1. Dimensions are expressed in inches (mm).
2. Lead spacing shall be measured within this zone.
   a. Shoulder and lead tip dimensions are to centerline of leads.
3. Tolerance non-cumulative.
4. Lead Mtl: Alloy 42 per ASTM F-30 or equiv., electrotin-plated per MIL-T-10727.
5. Body Material: Plastic (epoxy or Diallyl Phthalate).
6. Round emboss in bottom-left corner, or notch on left end, denote lead no. 1
7. Body dimensions do not include molding flash which shall be ≤0.006 (0.15).
8. Each lead is within ±0.010 (±0.25) radius of its true position at max. mtl dimension.
9. Unit marking includes mfr's name, part number, date code and index mark.

LUMINTECH

Toroidal Transformers, Current Transformers and Chokes

Toroidal Transformers Advantage

- Compact size
- Low magnetic radiation
- Low noise
- High efficiency
- Easy installation
- Unlimited flexibility

Standard Stock

We Stock a large number of different types of transformers.

Custom Transformers

We can produce transformers to your specifications:

- Output 15VA-5000 VA
- Dimensions: Flat or high
- Static copper foil shield
- Frequencies up to 20 KHZ
- Magnetic screening
- Secondary voltages up to 1000V

Transformer meeting other special requirements are made according to customer's request. When ordering please give the following information:

- Max. dimensions (Ht. and Dia.)
- Output
- Frequency
- Primary Voltage(s)
- With or without static screen
- Secondary voltage(s) at full load
- Max. no load voltage(s)
- Continuous or intermittent service
- Ambient temperature
- Mounting hardware

Lumintech is Dedicated to Quality, Price and Customer Service.

A Full Line of High Quality Magnetic Components

CALL 803-878 4700 FAX 803-878 0507

For Standard & Fast Turnaround Custom Applications

MILITARY • AEROSPACE • INDUSTRIAL

Twenty five years of experience designing and building magnetic components to military specifications allows MagneComp to deliver prompt accurate solutions to your most difficult requests. Powers up to 1 kVA and frequencies to 500 mHZ.

From one special transformer to thousands we'll deliver what you need when you need it. Call us. Our experienced engineers are ready to help you.

The photos show only a small fraction of the types and styles of magnetic components available. All can be designed and manufactured to meet military specifications MIL-T-27 and others. Our quality control system is designed to meet MIL-I-45208. Instrument calibration is per MIL-STD-45662.

• POWER TRANSFORMERS •
50 Hz to 5 KHz up to 1 KVA • Laminated
• toroidal • cut core •
• SWITCHING POWER TRANSFORMERS •
Up to 1 MHz and 500 Watts
• SWITCHING INDUCTORS •
Up to 1 MHz and 30 Amps
• PRECISION RATIO TRANSFORMERS •
Decade and digitally tapped
accuracies to 10 parts per million.
• SCOTT-T TRANSFORMERS •
Synchro to resolver. Resolver to synchro. Synchro and resolver isolation. Both miniature and powers up to 30 VA, as well as reference isolation. Shaft angle accuracies to 10 seconds of arc.
• CURRENT MONITORING AND TRIGGER •
For high power industrial SCR circuits,
for commutation at any frequency.
• OPEN • ENCAPSULATED • HERMETIC •
• SINGLE PHASE • THREE PHASE •
• MULTI PHASE •

MAGNECOMP

MAGNELAB

DESIGN & MANUFACTURE OF TRANSFORMER PRODUCTS

MEETING THE NEEDS OF TODAY'S HIGH TECHNOLOGY

Science and industry rely on today's complex electronics technology to support a wide array of advanced equipment and systems such as:

- Medical
- Computer
- Instrumentation
- Energy
- Aerospace
- Military

MAGNELAB has been playing an important role in each of these fields for over twenty-five years.

RANGE OF PRODUCTS

- Power Transformers
- Current Transformers
- Toroid Transformers
- Surface Mounts
- Power Inductors
- Filter Inductors
- Miniature coils
- Antenna coils
- Converter Transformers
- Pulse Transformers
- DIP Transformers
- Toroid Inductors
- Tuning Inductors
- EMI Filters
- Self-bonded coils
- Solenoids

ENGINEERING

MAGNELAB has a completely equipped engineering facility to serve you:

- Computerized Designing
- Spectrum Analyzers
- Precision Inductance Analyzers
- Automatic Data Acquisiton
- Precision Voltage and Current Generators
- Environmental Testing
- Design ability to MIL, UL, TUV, CSA and ETL Standards.

TOOLING

At MAGNELAB you will find an extensive tooling facility along with the skills to develop the intricate fixtures required for precision manufacturing. We are particularly proud of this capability in providing you with just the right part.

STATISTICAL PROCESS CONTROL (SPC)

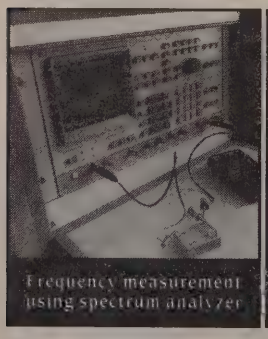
MAGNELAB'S philosophy is ZERO DEFECTS through continuous on-line and off-line SPC, involving:

- Fast, accurate data acquisition
- IEEE data bussing
- Continuous X-bar-R charting
- Total employee participation
- Cause and effect diagramming
- Targeting critical processes and measurements
- Timely corrective action

VOLUME MANUFACTURING

MAGNELAB operates a competitive volume manufacturing operation, delivering orders from a few dozen to many thousands of parts. A wide array of equipment and facility allows us to manufacture a great variety of products from simple antenna coils to complex military switching transformers. SPC and precision tooling play a key role in the uniform quality parts we produce.

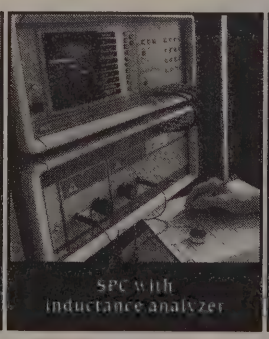
We look forward to helping you solve your next magnetics problem and delivering quality production parts.



Frequency measurement using spectrum analyzer

Computerized milling operation

Custom fixturing



SPC with inductance analyzer

Production run of precision inductors

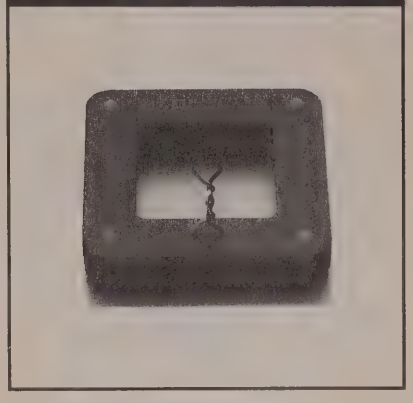
OPENING CURRENT TRANSFORMERS

ECT

SCT

LCT



LOW PHASE-ANGLE OPENING CURRENT TRANSFORMERS

The ECT series is designed to monitor service entrance currents with high accuracy and very low phase angle.

Opening current transformers are ideal for applications where the service is not easily interrupted during installation.

Model No.	Rating
ECT-1250-100	100 Amp
ECT-1250-200	200 Amp
ECT-1250-400	400 Amp
ECT-1250-600	600 Amp
ECT-1250-800	800 Amp

- Accuracy ±1%
- Phase angle <20 minutes
- Size (see drawing below)

A-3.375"
B-3.375"
C-1.313"
D-1.250"
E-1.313"

SMALL OPENING CURRENT TRANSFORMERS

The SCT family is designed for tight spaces.

Model No.	Rating
SCT-0750-005	5 Amp
SCT-0750-015	15 Amp
SCT-0750-030	30 Amp
SCT-0750-050	50 Amp

B	2.100"	3.350"
C	0.610"	1.000"
D	0.750"	1.250"
E	0.750"	1.250"

LARGE-FRAME OPENING CURRENT TRANSFORMERS

The LCT series is designed to measure currents in large conductors or where multiple conductors must be simultaneously measured.

Model No.	Rating
LCT-3000-400	400 Amp
LCT-3000-600	600 Amp
LCT-3000-800	800 Amp
LCT-3000-1000	1000 Amp

- Accuracy ±2%
- Phase angle <3 degrees
- Size (see drawing below)

A-5.250"
B-5.250"
C-0.750"
D-3.000"
E-3.000"

Features common to all opening current transformers:

- Output is 0.333 V at rated current.
- Internal precision burden resistor across secondary.
- Leads-8 ft. twisted pair.
- Epoxy encapsulated housing.
- Accuracy is measured from 10% to 130% of rated current.
- No exposed metal parts on assembled transformer.
- Shrouded core blades for protection during installation.
- Core interleaved at joints for accuracy.
- Phase angle is measured at 50% of rated current.

(a) Thruput power with square wave drive at 100 khz for 1408 and larger, 250 khz for 1107 and smaller.

(b) Surface mount available for 1107 and smaller.

To order, specify:

1. Input voltage and range.
2. Waveform and frequency.
3. Output voltages.
4. Output currents.
5. Circuit topology.
6. Isolation requirements.
7. Desired family & size code.

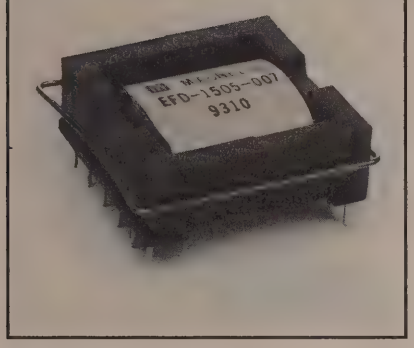
SEMI-CUSTOM FERRITE-CORE TRANSFORMERS

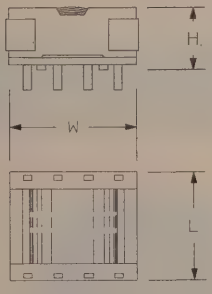
EFD



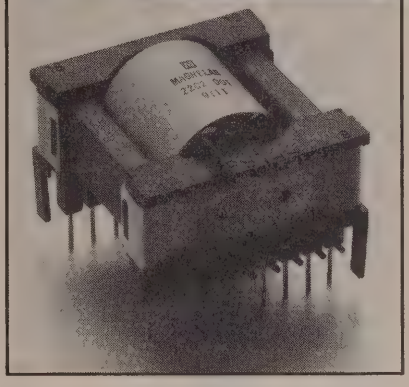
LOW PROFILE SWITCHING POWER TRANSFORMERS

Size Code No.	Power (watts) (a)	Dimensions W	L (inches)	H
1105	56	0.64	0.64	0.32
2007	103	0.79	0.84	0.40
2509	233	0.99	1.00	0.50
3009	291	1.15	1.12	0.50

(a) Thruput power at 500 khz for square wave drive.



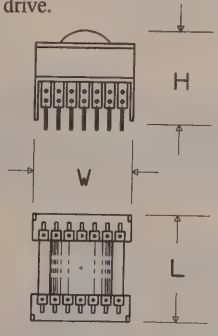
ETD



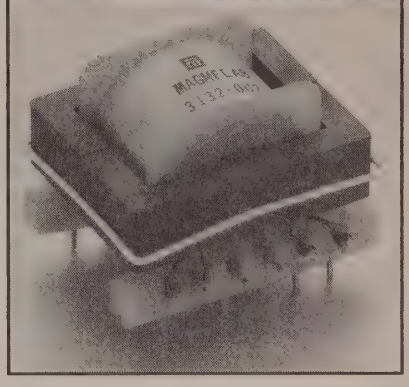
HIGH PERFORMANCE SWITCHING POWER TRANSFORMERS

Size Code No.	Power (watts) (a)	Dimensions W	L (inches)	H
0290	200	1.00	1.00	0.80
0340	375	1.66	1.56	1.35
0390	600	1.87	1.76	1.46
0440	900	2.07	1.96	1.57
0490	1100	2.26	2.15	1.67

(a) Thruput power at 100 khz for square wave drive.



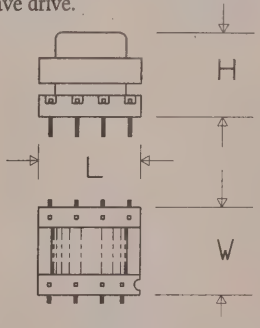
FEP



LOW COST SWITCHING POWER TRANSFORMERS

Size Code No.	Power (watts) (a)	Dimensions W	L (inches)	H
0187	45	0.73	0.66	0.63
0250	75	1.01	0.77	0.81
0375	250	1.38	1.13	1.01
0500	480	1.63	1.32	1.14
0625	600	1.88	1.50	1.27
0750	1000	2.25	1.88	1.49

(a) Thruput power at 100 khz for square wave drive.



Information common to all ferrite switching power transformers

To order power transformer, specify:
1. Input voltage & range
2. Waveform and frequency
3. Output voltages
4. Output currents
5. Circuit topology
6. Family and size code (i.e.: ETD-0390)
7. Isolation requirements

To order switching power inductors, specify:
1. Inductance
2. Peak current
3. Frequency
4. Peak voltage expected across inductor
5. Circuit topology
6. Family and size code (i.e.: FEP-0250)

TOROID CT'S OTHER PRODUCTS

UCT

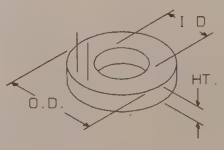
UL RECOGNIZED TOROIDAL CURRENT TRANSFORMERS

The UCT family is designed for measuring service entrance and circuit currents where interruption during installation is permitted.

- Precision burden resistor.
- Leads-8 ft. twisted pair.
- Epoxy encapsulated housing.
- Output 0.333 V at rated current
- Accuracy ±1% from 10% to 130% of rated current.
- Phase angle <1 degree at 50% of rated current.

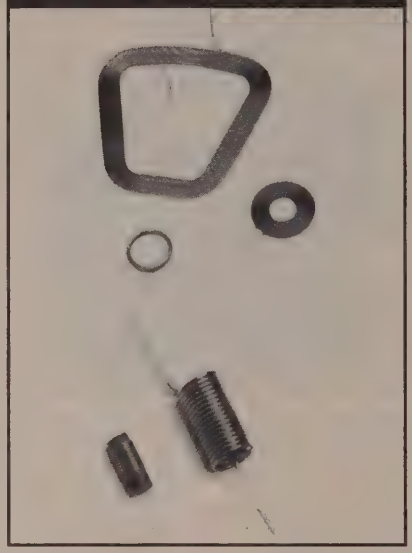
Model No.	Rated Amps	Size Code
UCT-0300-005	5	A
UCT-0300-030	30	A
UCT-0500-060	60	B
UCT-0750-100	100	C
UCT-1000-200	200	D
UCT-1250-400	400	E

Size Code	I.D.	O.D. (inches)	HT.
A	0.30	1.70	0.75
B	0.50	1.90	0.75
C	0.75	2.10	0.75
D	1.00	2.40	0.80
E	1.25	2.70	0.80



Other UL Recognized models available. Contact factory for further information.

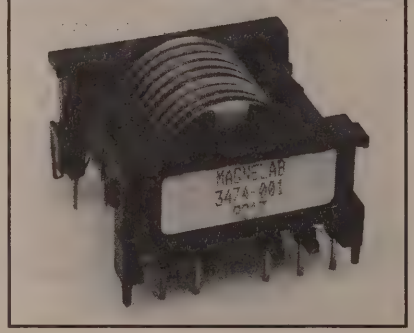
CUSTOM COILS



Magnelab specializes in the tooling and manufacture of custom coil products for many applications such as:

- Loop antennas
- Planar inductors
- Flat motor field coils
- Stick antennas

HIGH VOLTAGE HIGH ISOLATION TRANSFORMERS



Custom high voltage and high isolation transformers are a Magnelab specialty. Applications include medical on-patient care products and aerospace instrumentation.

AC MAGNETIC FLUX PROBE

MODEL 1846-001

Magnelab's AC flux probe is a highly sensitive, calibrated coil assembly which measures AC magnetic flux. Unwanted stray fields from transformers, motors, generators, relays, conductors, etc. are easily detected and mapped.

- Sensitivity-100 mV per gauss at 60 hz.
- Accuracy 5%
- Senses amplitude and direction.
- Electrostatically shielded.

CUSTOM DESIGNED TRANSFORMERS

Magnelab provides custom design and manufacturing to meet your needs.

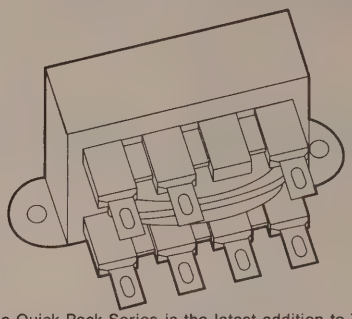
QUICK PACK POWER TRANSFORMERS



UL RECOGNIZED
Class B

The Quick Pack Series is the latest addition to Triad's extensive line of small power transformers. Quick Pack transformers can offer a significant reduction in size and weight for a given VA rating. Plus, these transformers come with special quick-connect or solder terminals. Quick Pack transformers are available in six sizes for a wide variety of applications.

Split Bobbin Non-Concentric Winding—Eliminates costly electrostatic shielding, reduces transformer size and space. The Quick Pack transformer's unique construction makes possible higher HiPot testing, 2500 V rather than 1500 V. This series is available with a single 115 VAC or dual 115/230 VAC primary, rated 50/60 Hz. Class B insulation insures maximum total temperature of 130°C continuous.

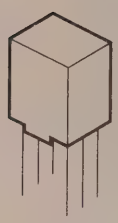
Audio Transformers

RED SPEC TRANSISTOR TRANSFORMERS



Transformers designed and constructed to conform to the rigid requirements of MIL-T-27D. Solid epoxy molded case, permanent and legible circuit data on every unit, base mounting pad for easy inspection of all soldering joints, high strength gold-plated nickel alloy leads, base dimensions of only 0.31″ × 0.41″. Total height of only 0.465″, weight of 1.10 ounce.

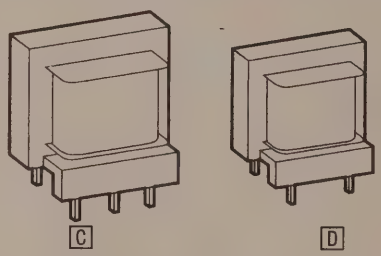
†Split wiring

TELEPHONE COUPLING TRANSFORMERS



Transformers specifically designed and manufactured to telephone company requirements for voice/data use over leased private line or through the dial-up switched telephone network. Used for impedance matching, isolation, line balance, bridging, hybrid and holding-coil applications. All units in plug-in printed circuit construction. **Frequency Response:** 300-3500 Hz. ±0.5 dB. **Longitudinal Balance:** 45 dB min. **Return Loss:** 26 dB min. **Distortion:** 0.5% max. **Impedance Matching:** ±10%. **Power Level:** −45 dBm to +7 dBm.

Power Transformers

SPLIT-BOBBIN TRANSFORMERS

Split-bobbin transformers are nonconcentrically wound with primary and secondaries wound side by side, unlike the secondary-on-top-of primary windings of standard PC board transformers. Split-bobbin winding and the resultant low capacitive coupling eliminate costly electrostatic shielding. The unique construction also makes possible higher voltage ratings—2500 V rather than 1500 V.

Cletronics

Custom Designers and Manufacturers of Special Transformers For All Applications . . . Commercial or Military

TRANSFORMERS

TRANSFORMERS

TRANSFORMERS

- Power — 0 to 35 KVA
- Voltage — 0-3000 Volts Peak 1 to 3 Phase
- Frequency — Audio (3 Hz) through Radio (500 KHz)
- Packaging — Air Cooled, Potted, Encapsulated, Enclosed
- Impregnation — Vacuum (20 microns) and/or pressure (3 atmospheres)
- Core Types — C, E, I, Ferrite, Toroid, Pot Cores and others as necessary.
- Usage — Industrial, Inverter, Isolation, Power, Pulse, Step-up Step-down and others as necessary.

Prototypes to Production

- Potted or Molded
- Open or Encapsulated
- UL Listed Insulation Materials
- CSA
- MIL-I-45208
- MIL-T-27
- In-house Machine Shop

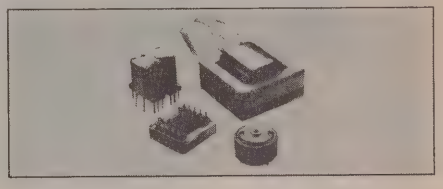
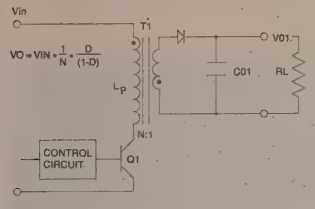
PWM AND RESONANT POWER CONVERSION TRANSFORMERS

TYPICAL TOPOLOGIES

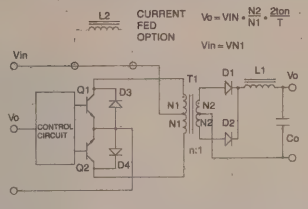
Actual circuit operation verified in switching topology. Leakage inductance, efficiency, temperature rise, and SRF characterized. Single-ended 20 Khz-500 Khz to 250 watts. Bridge and push-pull 20 Khz-250 Khz to 1 Kw. Low profile designs are available for sem modules. Proximity effect and skin depth accounted for. Our wide variety of cores in stock allows quick custom modification. Call, write, or fax for specific device bulletin.



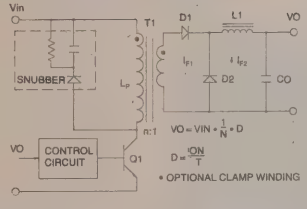
DISCONTINUOUS/CONTINUOUS MODE FLYBACK REGULATOR



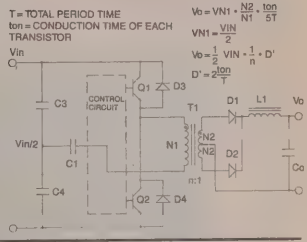
CENTER TAPPED PUSH-PULL SWITCHING REGULATOR



DOUBLE/SINGLE ENDED FORWARD CONVERTER



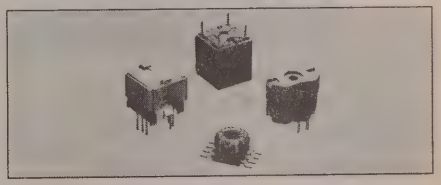
HALF-BRIDGE CIRCUIT



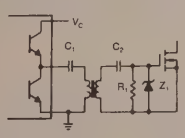
GATE DRIVE TRANSFORMERS

TYPICAL APPLICATION

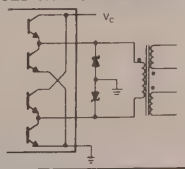
Meant to interface with PWM IC output or standard driver IC_S to supply Hi peak currents with low rise times to power fets. Low stray capacity - Hi SRF. Standard ratios 2:1, 1.5:1, 1:1. Models to 3750 DWV. Lowest leakage inductance on toroids. 20 Khz to 1 Mhz. Wide variety to choose from. Call, write or fax for catalog.



SINGLE ENDED TRANSFORMER DRIVE

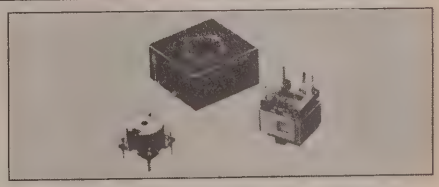


BALANCED TRANSFORMER DRIVE



CURRENT SENSE TRANSFORMERS

Typical applications shown. A wide variety of devices are offered in a variety of geometric shapes including toroids where the user can thread his current sense lead thru the center post. I_{IN} pk to 20 A in range from 10 Khz to 1 Mhz., Uni-polar or Bi-polar. High stock mounting available. Ratios from 1:20 to 1:200. Call, write, or fax for individual brochure.



CURRENT MODE CONTROL (slope added to inductor Waveform)

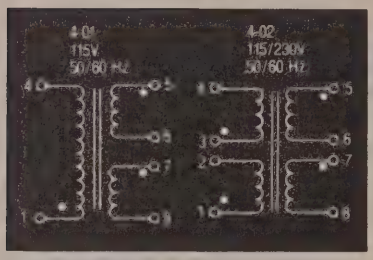
HORIZONTAL PC TRANSFORMERS

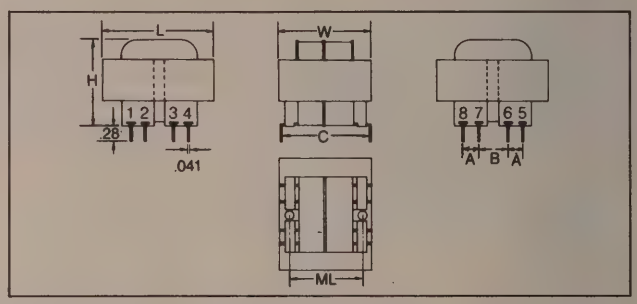
SERIES 4-01 & 4-02

Recognized Component Underwriters Labs Inc.

Available

2,500-volt RMS Hipot, available in a variety of sizes. Maximum operating temperature 130°C. Available with either single 115V, or dual 115/230V primary. MCI's pin configuration is designed for ease of connection in printed circuit boards. Heavier transformers are provided with mounting holes for additional mounting security. Adaptations of standard transformers are also available. Dots on schematics shown below indicate like polarity.





To determine part number for specific transformer to be ordered:

1. Locate the column, in the table, for the required voltage.
2. In the voltage column, locate the required current rating.
3. Moving left from the current rating, find the number indicating required primary—single 115V primary or dual 115/230V.
4. Derive part number by combining digits identifying required primary and digits at top of column giving required voltage.

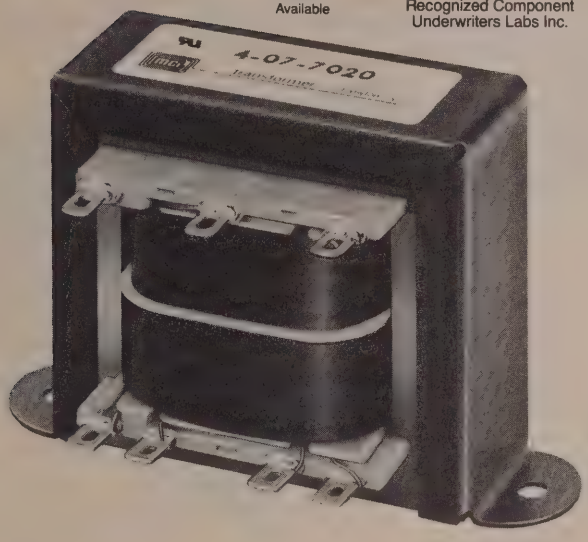
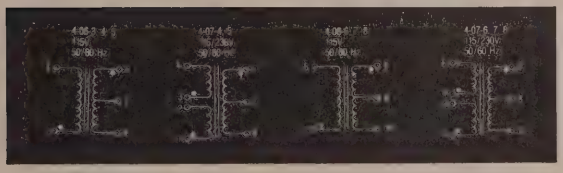
QUICK CONNECT POWER TRANSFORMERS

Available

Recognized Component Underwriters Labs Inc.

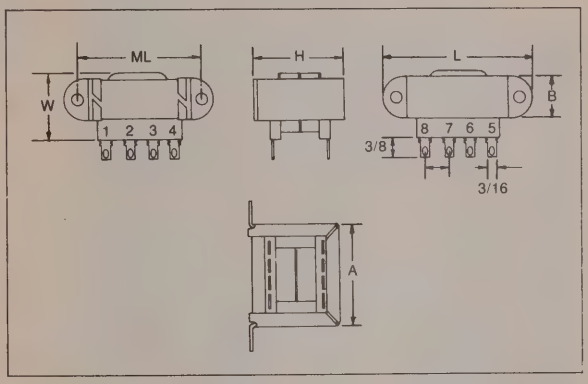




2,500 Volt RMS Hipot in a variety of practical sizes. Maximum operating temperature 130°C available with either single 115 or dual 115/230V primary (for all but 2.4 VA size).

MCI's split bobbin and non-concentric winding provide better insulation and high signal isolation, thus eliminating the need for electrostatic shielding.

Adaptations of standard transformers are also available. Dots on schematics shown below indicate like polarity.



To determine part number for specific transformer to be ordered:

1. **Locate the column, in the table, for the required voltage.**
2. **In the voltage column, locate the required current rating.**
3. **Moving left from the current rating, find the number indicating required primary—single 115V primary or dual 115/230V.**
4. **Derive part number by combining digits identifying required primary and digits at top of column giving required voltage.**

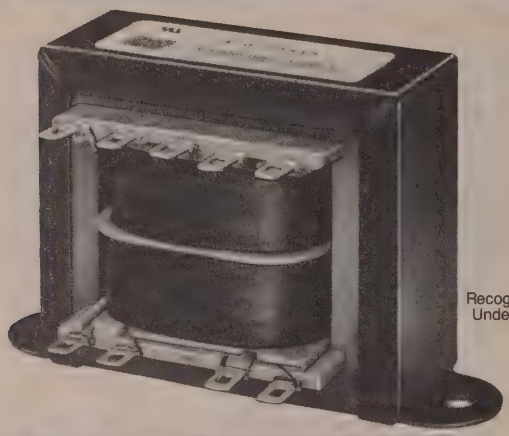
QUICK CONNECT TRIPLE OUTPUT TRANSFORMERS

SERIES 4-06-X5 4-07-X5

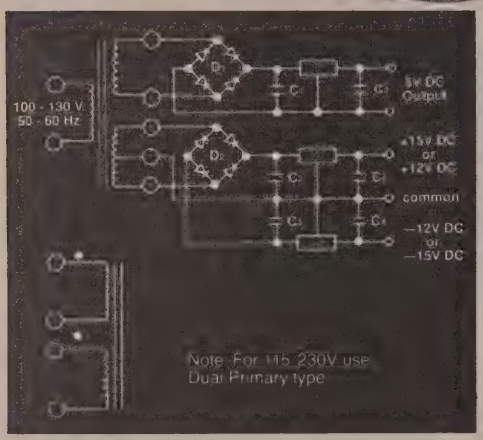


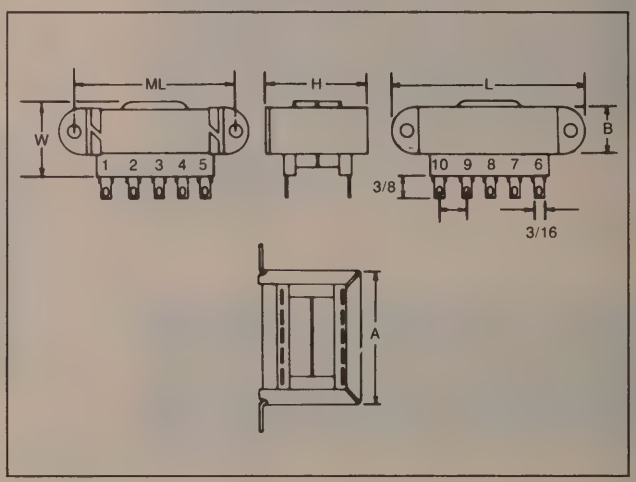
MCI has added these transformers to our product line for our customers with a need for one transformer to supply either 5VDC and ±12VDC or 5VDC and ±15VDC, in 3 power ratings of 35, 22.4, and 13.8 watts DC regulated.

There are 2 primary voltages available. Our 4-06 series which is for 100-130 volts, and our 4-07 series which is for either 100-130 volts or 200-260 volts.

The additional components necessary are supplied in the chart below.

Recognized Component
Underwriters Labs Inc.





To determine part number for specific transformer to be ordered:

1. **Locate the column, in the table, for the required voltage.**
2. **In the voltage column, locate the required current rating.**
3. **Moving left from the current rating, find the number indicating required primary—single 115V primary or dual 115/230V.**
4. **Derive part number by combining digits identifying required primary and digits at top of column giving required voltage.**

Note ①: Output capacitors C_2 and C_4 are required to stabilize regulators. Values can be 1 MFD min. tantalum or 10 MFD min. electrolytic, 20V min.
Note ②: LM-338 is an adjustable regulator and MFR's specifications (National Semiconductor) should be consulted for values of external components.
Note ③: All IC's are National Semiconductor types.
Note ④: All diodes are Motorola types.

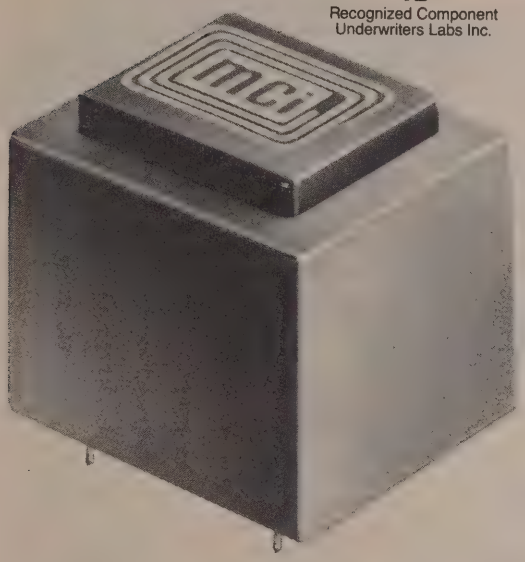
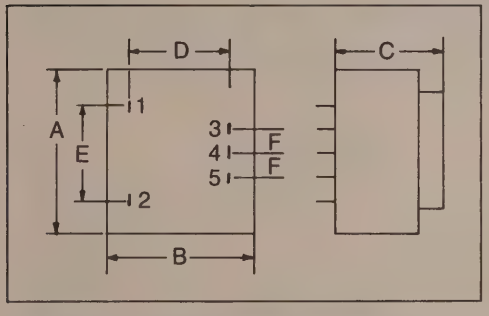
SERIES 4-11 & 4-12

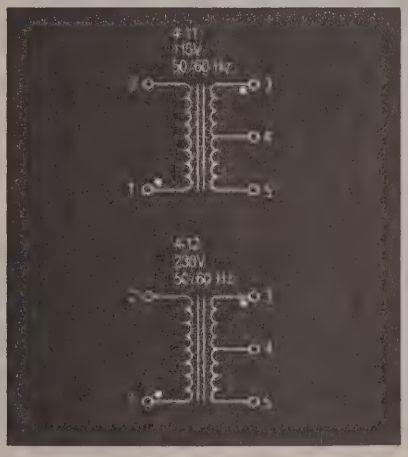
HORIZONTAL PC ENCAPSULATED TRANSFORMERS

Recognized Component
Underwriters Labs Inc.



Our encapsulated design offers high reliability because of its mechanical strength, electrical insulation and moisture resistance. The internal construction consists of a split bobbin which isolates the primary and secondary thereby eliminating any need for an electrostatic shield. The construction will pass requirements of U.L., C.S.A. and V.D.E.





To determine part number for specific transformer to be ordered:

1. Locate the column, in the table, for the required voltage.
2. In the voltage column, locate the required current rating.
3. Moving left from the current rating, find the number indicating required primary—single 115V primary or 230V.
4. Derive part number by combining digits identifying required primary and digits at top of column giving required voltage.

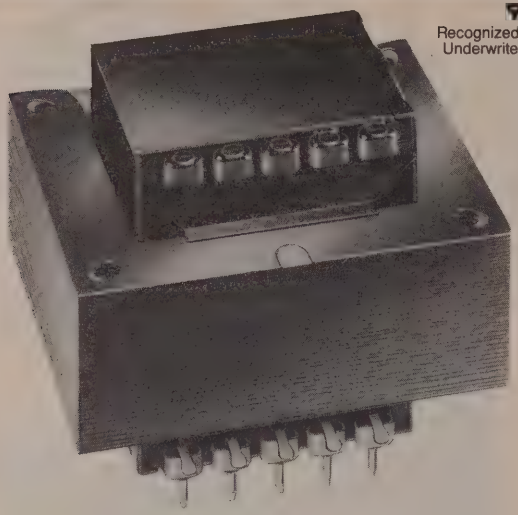
VDE HORIZONTAL P.C. TRANSFORMERS

SERIES 4-41& 4-42



Recognized Component
Underwriters Labs Inc.

4,000 Volt RMS Hipot. In a variety of sizes. Maximum operating temperature 130°C. Available with either 115V or dual 115/230V primary.

MCI's split bobbin and non-concentric winding provide better insulation and high signal isolation, thus eliminating the need for electrostatic shielding.

These transformers are designed to pass VDE's strict creepage distance requirements.

Adaptations of standard transformers are also available. Dots on schematics shown below indicate like polarity.

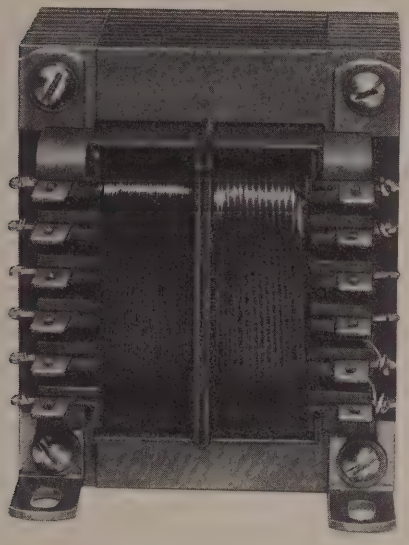
SERIES 4-49

VDE QUICK CONNECT TRANSFORMERS

Recognized Component Underwriters Labs Inc.

Has passed strict requirements of EN 6950 and EN 6742. VDE0551

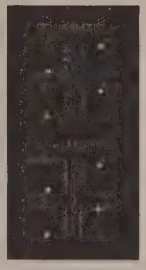


4,000 Volt RMS Hipot. In a variety of sizes. Maximum operating temperature 130°C. Available with either 115V or dual 115/230V primary.

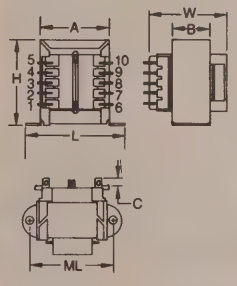
MCI's split bobbin and non-concentric winding provide better insulation and high signal isolation, thus eliminating the need for electrostatic shielding.

These transformers are designed to pass VDE's strict creepage distance requirements.

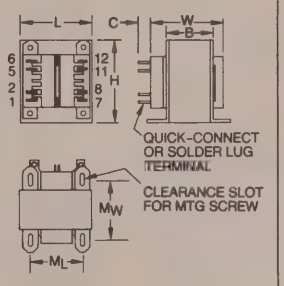
Adaptations of standard transformers are also available. Dots on schematics shown below indicate like polarity.



MOUNTING STYLE C



MOUNTING STYLE D



To determine part number for specific transformer to be ordered:

1. **Locate the column, in the table, for the required voltage.**
2. **In the voltage column, locate the required current rating.**
3. **Moving left from the current rating, find the number indicating required primary— dual 115/230V.**
4. **Derive part number by combining digits identifying required primary and digits at top of column giving required voltage.**

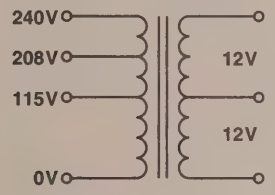
OTHER MCI TRANSFORMER PRODUCTS

HIGH VOLTAGE IGNITION/POTENTIAL TRANSFORMERS

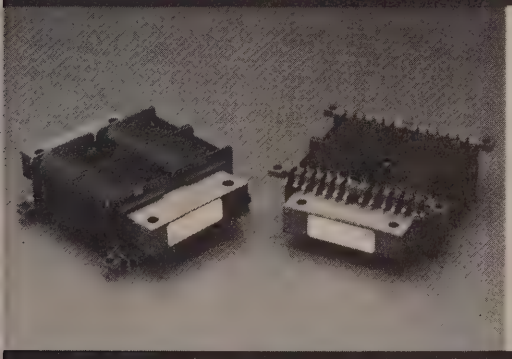
The MCI Multi Section HV coil is encapsulated in epoxy to provide the maximum reliability at minimum cost. Many variations of standard designs can be produced with up to 10,000V output.

Designs presently CSA certified are 120 V in with 5,000 or 6,000 Volts out, current limited to 19 ma.

CLASS 2 UNIVERSAL INPUT VOLTAGE UL & CSA



P/N 2-51-4024 IS 24V C/T AT 40VA
2-51-7024 IS 24V AT 80VA



VERY LOW PROFILE 55 VA 1.21" Height

This unique MCI design satisfies goals to streamline products and maintain cost objectives while meeting UL/CSA/VDE requirements. 14 output pins provide secure mounting along with availability of many isolated output windings.

INDUSTRY STANDARD LOW PROFILE FOR VDE/IEC APPLICATIONS

Industry standard 2.5 VA & 6 VA designs encapsulated to meet VDE and IEC rqmts. See page 6 for current and voltage ratings. Add E to part number for encapsulated version.

SMPS MAGNETICS

toroidal power inductors

OUTLINE DRAWINGS FOR SL SERIES

New Swinging Chokes for Switch Mode Power Supplies, Regulators, and EMI/RFI Filter Applications

- Specially designed for controlled saturation — repeatable specific inductance at a specific current.
- Designed to handle high current spikes typically encountered in high current SMPS applications.
- Application frequencies up to 1 MHz.
- Toroidal construction — closed magnetic field — low EMI.

OPEN FRAME -F

Tinned leads to 1/16" of body for PCB mounting. Additional mechanical mounting recommended for larger units with finer wire. To order add -F to Part No., i.e. SL2-50-F.

DIMENSIONS (Inches)

Series	D Max.	W Max.	Wt. Oz.
SL05-F	.56	.30	.13
SL06-F	.87	.40	.45

*** Add either -F, -B, or -M to Part No. to designate construction.**
See photos and outline drawings on adjacent page.

NOTES:

1. Non-standard inductance values available on special order, i.e., specify P/N SL2-75-F for 75 μH.
2. Inductance ±15% measured at 1 kHz. See drive level test condition chart.
3. DCR measured at 20°C. 130°C insulation system.
4. Current values for percentage inductance drop are typical.
5. Recommended PC board clearance hole .065 dia. min.

DRIVE LEVEL TEST CONDITIONS

Inductance	Drive Level @ 1 kHz
0-200 μH	100 mA AC
200 μH — 2 mH	10 mA AC
2 mH — 20 mH	1 mA AC

145 EAST MINEOLA AVENUE, P.O. BOX 236, VALLEY STREAM, NEW YORK 11582-0236 • TEL.: 516-561-6050 • FAX: 516-561-1117

MICROTRAN company, Inc.

SMPS MAGNETICS

common mode suppression inductors

For Elimination of Line Transmitted EMI/RFI Interference from SMPS Equipment

- 3750V RMS hipot.
- 130°C insulation system.
- VDE, IEC, UL, CSA compatible.
- Cost effective design.

Minimizes AC line-conducted interference from switching power supplies and regulators. Balun winding to within 1% produces opposing magnetic fluxes in the core to effectively cancel differential-mode noise signals. Substantially reduces component count as well as inductor size, as compared to differential filtering. Constructed with spacing between windings to meet international safety requirements.

Part No.	Inductance mH Min.	RMS Max. Amps	DCR Max. Ohms	Fig.

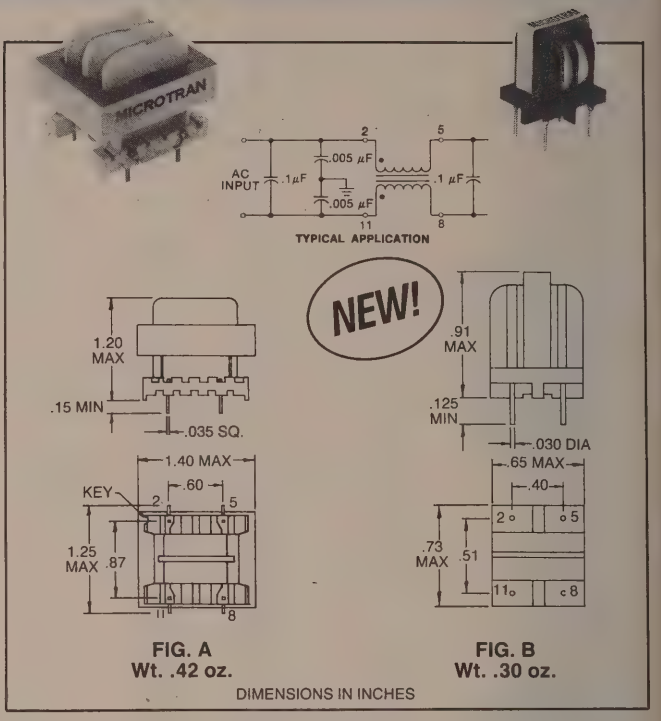
SC2-00330	.33	1.50	.052	B
SC2-00120	.12	2.0	.024	B

NOTES: Inductance shown is for each winding measured @ 10 kHz, 1V RMS. Inductance with each winding connected series opposing under 100 µH typical @ 10 kHz, 1V RMS. Inter-winding capacitance: 5 pF typical @ 10 kHz, 1V RMS.



custom switch mode power transformers

For Switching Power Supplies

Utilizes latest core materials and shape factor to provide smallest possible volume and minimum PC board footprint for effective manufacturing cost reduction. These transformers are available in standard size/power ratings from 25 to 880 watts output for use over a wide frequency range. Standard configurations allow short turn-around time on custom-design samples. Other packaging and styles are available, such as horizontally mounted units. For application assistance, contact our Engineering Department.

- Standardized components speeds delivery.
- VDE, IEC, UL, CSA compatible.
- Frequency range 20 kHz — 300 kHz and higher.
- Core material for newest generation of higher frequency SMPS.

POWER TRANSFORMERS

MICROTRAN company, inc

SPLITFORM® split bobbin power transformers

For PC Board Solid-State Power, Control, and Instrumentation Applications

- Split Bobbin Construction
  - Center Flange Insulation Barrier
  - High Isolation for Low Leakage Applications
  - Low Capacitive Coupling Minimizes Line Noise and False Triggering
- 2,500V RMS Hipot
- 115V Single or 115/230V 50/60 Hz Dual Primary
- Dual Secondaries may be either Parallel or Series Connected
- Precision Spaced Terminals
  - Terminal Numbers are Molded on Bobbin
- 130°C Insulation System
- Attractive Pricing — Superior Quality

POWER TRANSFORMERS

MICROTRAN company, inc.

international series power transformers

For PC Board Solid-State Power, Control, and Instrumentation Applications

- UL Recognized — Meets IEC-65 Safety Requirements for Worldwide Usage. UL 1411–File #E82992.
- Physical Barriers Between Primary and Secondary — Double Protection System — 4,000 Volt Hipot

PW SERIES — FOR CONTROL AND POWER SUPPLY APPLICATIONS

POWER TRANSFORMERS

FLATSTACK® low profile power transformers—50/60 Hz

For Low Height PC Board Solid-State Power, Control, and Instrumentation Applications

- **FOUR SIZES**

NEW! 2.5 VA Size 0.650 inches high for 13/16″ Card Spacing
6 VA Size 0.85″ high for 1″ Card Spacing
12 VA Size 1.065″ high for 1 1/4″ Card Spacing
24 VA Size 1.250″ high for 19/16″ Card Spacing

- **SPLIT BOBBIN**—Primaries and Secondaries Wound Side by Side.
  High isolation for Low Leakage Applications. 1500V Hipot.
  Low Capacity Coupling Minimizes Line Noise and False Triggering
- **HUM-BUCKING SEMI-TOROIDAL CONSTRUCTION**
- **PRECISION SPACED MOLDED-IN TERMINALS**
- **DUAL PRIMARIES: 115/230V, 50/60 Hz.**

QE SERIES

Ultra miniaturized with low height design. Exceptionally high "Q" and wide frequency range. Frequency range of QEL Series 1 to 300 kHz; QEM, 3 to 500 kHz. Accuracy, ±2%. Molded in epoxy resin with .020" × 2" tinned copperweld leads. Size, .450" dia. × .285".

QG SERIES

Frequency range of QGL Series, to 20kHz; QGM Series, 2 to 100 kHz. Accuracy, ±2%. **QG-F:** Open frame, microcrystalline wax dipped with 4" #28 AWG leads. Size .625" dia. × .281". **QG-M:** Molded in high temperature epoxy resin with .020" × 2" tinned copperweld leads. Leads may be bent downward for plug-in printed circuit use. Size, .875" dia. × .375".

line coupling

UL 1459 File# E138028
See Application Notes

FOR INTERCONNECT OF VOICE/DATA MODEM TERMINALS TO TELEPHONE LINES

Provides line isolation and matching—Prevents line imbalance—Wide dynamic signal capability—Low distortion
Permits optimum use of Voice-Grade Telephone Lines for broadband data signals—Designed to meet FCC Part 68

- Frequency Response: 300-3500 Hz ±0.5 dB
- Longitudinal Balance: Per FCC 68.310
- Impedance Matching ±10% over entire frequency range
- Level: −45 dBm to +7 dBm
- Distortion: 0.5% Max.
- Dielectric Strength 1500V RMS

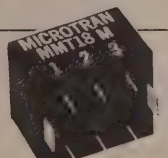
† Designed for optional bridging termination use to provide additional 6 dB output voltage gain.
‡ Frequency response measured with source equal to nominal primary impedance and with unloaded secondary except 100k load on S105 and S107 series.

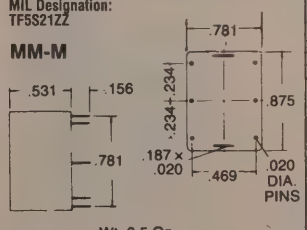


MOLDED

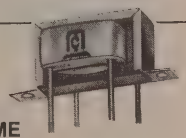
Designed for plug-in printed circuit applications. Cast Epoxy resin provides highest resistance to extremes of ambient.
To order add -M to Part No., i.e. MM2-M.

MIL Designation:
TF5S21ZZ

MM-M



Wt. 0.5 Oz.

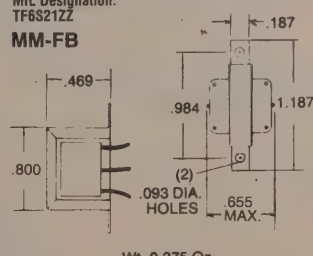


OPEN FRAME WITH CHANNEL

To order add -FB to Part No., i.e. MMT3-FB.
4 inch #28 color coded leads.

MIL Designation:
TF6S21ZZ

MM-FB



Wt. 0.375 Oz.

DIMENSIONS IN INCHES.

MICRO-MINIATURE—MM AND MMT SERIES

The low profile design of this series makes them ideal for use in plug-in printed circuit boards.

Available in open frame, hermetic, and molded constructions, all units are manufactured to MIL-T-27.

These units can be used as input, interstage, output, isolation and other impedance matching requirements.

Part No.	Primary Impedance	Secondary Impedance	Pri. Unbal. mA DC	Oper. Level dBm	Freq. Response ±2 dB

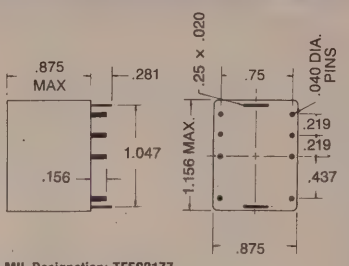
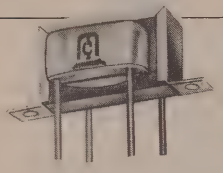
MICROTRAN company, inc.

MINIATURIZED AUDIO TRANSFORMERS

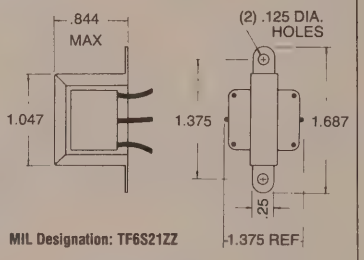
MOLDED M-M
To order add -M to Part No. For plug-in printed circuit applications. Epoxy resin provides resistance to extremes of ambient. Wt. 1.75 oz.



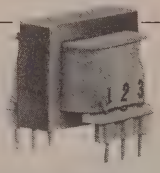
MIL Designation: TF5S21ZZ



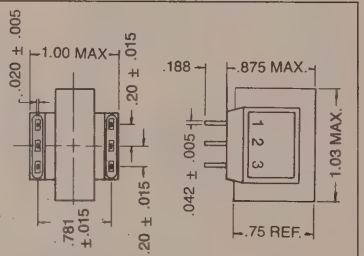
OPEN FRAME WITH CHANNEL M-FB
To order add -FB to Part No. Leads 4" long. #28 PVC Wt. 1.13 oz.



MIL Designation: TF6S21ZZ

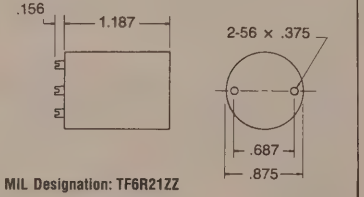


OPEN FRAME PRINTED CIRCUIT M-PC
To order add -PC to Part No. Units with more than 6 pins have 7 or 8 — .025 x .015 pins or .150 centers. Wt. 1.2 oz.



MIL Designation: TF6S21ZZ

ALUMINUM CASED M-A
To order add -A to Part No. Supplied with 2-56 screws. Wt. 1.25 oz.



MIL Designation: TF6R21ZZ

MINIATURE AUDIO M & MT SERIES

This group of transformers is often referred to as "the designers' series."

In this series, Microtran offers the widest spectrum of electrical and mechanical specifications. All units are manufactured in accordance with the requirements of MIL-T-27. All dimensions shown in inches.

All items shown in charts below are available in any of the mechanical packages shown. Primary and secondary windings may be interchanged to obtain required impedance matching.

Part No.*	Primary Impedance	Secondary Impedance	Primary Unbalance mA DC	Operating Level dBm	Frequency Response ±2 dB
M3-(*)•	7.5/30	50,000	0	5	20-20,000

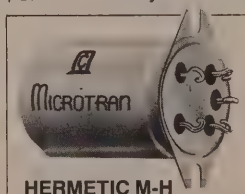
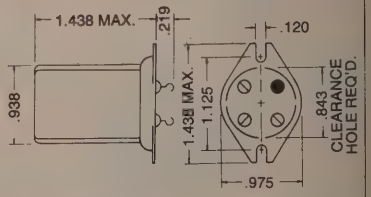
* Add -M, -PC, -A, or -FB to Part No. to designate construction.
• These items not available in -PC construction.
‡ For telephone line coupling or hybrid telephone line.
† Broadcast fidelity line matching transformer. Frequency response ±0.5 dB.



HERMETIC M-H
To order add -H to Part No. Grey Enamel Finish. High Compression Glass Terminals. Wt. 1.25 oz.



MIL Designation: TF4R21YY

World Leader In Telecom Transformers

671-8279

671-8269

671-8274

671-5832

From modem coupling transformers to international telephone transformers, Midcom products give you incredible advantages.

671-8253

671-6390

671-6630

Take our engineering expertise. Thanks to our sophisticated equipment and technology, we produce top-quality transformers that are second-to-none.

671-6629

671-8001

25¢

Plus, our diverse product line is available to fit any need you might have.

671-1538

671-8273

671-6911

Count on Midcom for on-time deliveries, competitive prices and a variety of custom products. Midcom is truly transforming the industry.

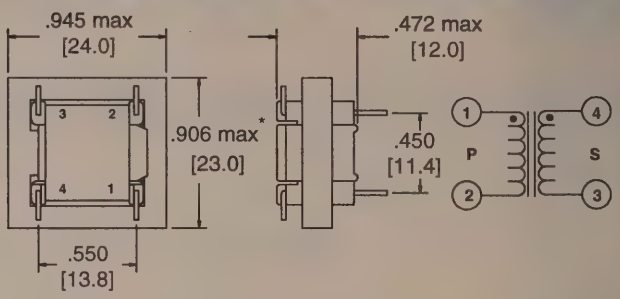
Low Profile Modem Transformers

Midcom™

- Small size, low profile
- Cost effective
- UL file number E99406
- CSA file number LR61218
- 671-8025 and 671-8031 are suitable for use in V.32 and V.32 bis applications
- 671-8039 is suitable for use in V.fast applications



*1.024 [26.0] for 671-8000, 671-8025, 671-8031 and 671-8039

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
A/D acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AFC audio frequency control
AFT automatic filter test
ALGOL algorithmic language
AM a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
ATG automatic test generation
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility syste

C
CAD computer-aided design
CAE computer-aided engineering
CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L
LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

THE ONLY ONE OF ITS KIND IN THE WORLD.

It's a prototype transformer, designed to our customer's specs.

We were happy to make just one. When he changed his specs, we made another.

After several more modifications, his system was operating the way he wanted it to, and we were ready to go into full production for him, up to 50,000 units.

This is what Mitchell Electronics is all about.

Because we're small and flexible, we can respond to your needs quickly, with dedicated attention to quality and detail. And because we're small, you'll work closely with one of our three generations of active, hands-on family management.

And while we're small, many of our customers are among the largest in the world. We've designed, engineered and manufactured transformers, reactors, filters and coils (up to 1.5 KVA)— iron core, ferrite and toroidal — for such electronic giants as IBM, GE, Westinghouse and Honeywell.

For more information on our custom design service, call Jonathan Lerner. We'll treat you like family.

MITCHELL ELECTRONICS CORPORATION
85 West Grand Street / Mount Vernon NY 10552

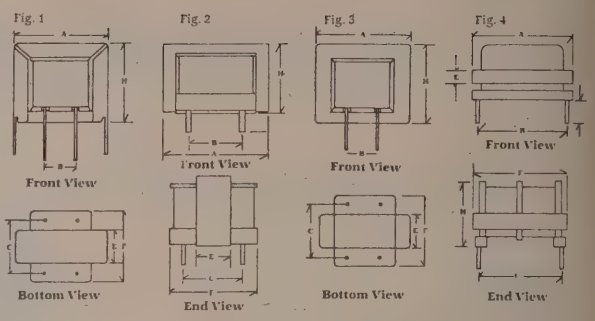
Audio Matching Transformers

MPI's miniature audio transformers are highly reliable and extremely economical. All can be supplied vacuum epoxy impregnated with standard leads or plug-in printed circuit construction. Several standard bobbins with various pin spacings permit optimum use of voice-grade telephone lines for broadband data signals.

Several standard cores can be used in the construction of specific high quality designs. MPI can also provide other custom designs with other ratings and constructions.



FEATURES

- Meet FCC part 68 specifications
- Frequency response ±.5dB from 300-3500 Hz
- Wide dynamic signal level
- Low distortion (0.5% maximum)
- Impedance matching of ± 10% over entire range.
- FAX or call for complete mounting details and further dimensional data.

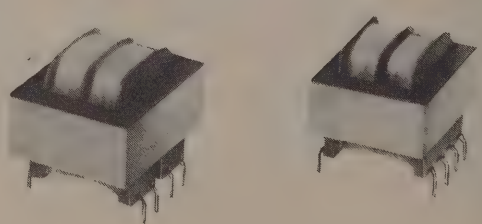
Power Transformers

Multiproducts International offers an extensive group of standard and custom, single and multiple input (120/240VAC) power transformers that are engineered and manufactured to the highest standards with stringent quality assurance. All MPI power transformers meet or exceed UL 1411 and other applicable agency standards.

The MPI family of PC board mount, split bobbin, high isolation power transformers is an example of our capabilities. Available in 4 sizes and supplied with 115 VAC or 115/230V primary inputs, these low profile units include a 130°C insulation system, and have an isolation rating of 2500 VAC, 60Hz, hi-pot. Special variations and non-standard products are also available.



FAX or Call for complete details and dimensional data on all multi MPI power transformer products.

SPECIFICATIONS

Input: 115V/230V and 115 VAC.

Input (V): 9 steps ranging from 10-120VAC.

Current (A): 9 steps ranging from 110mA-1.2A.

Model sizes: EI-35 to EI-48

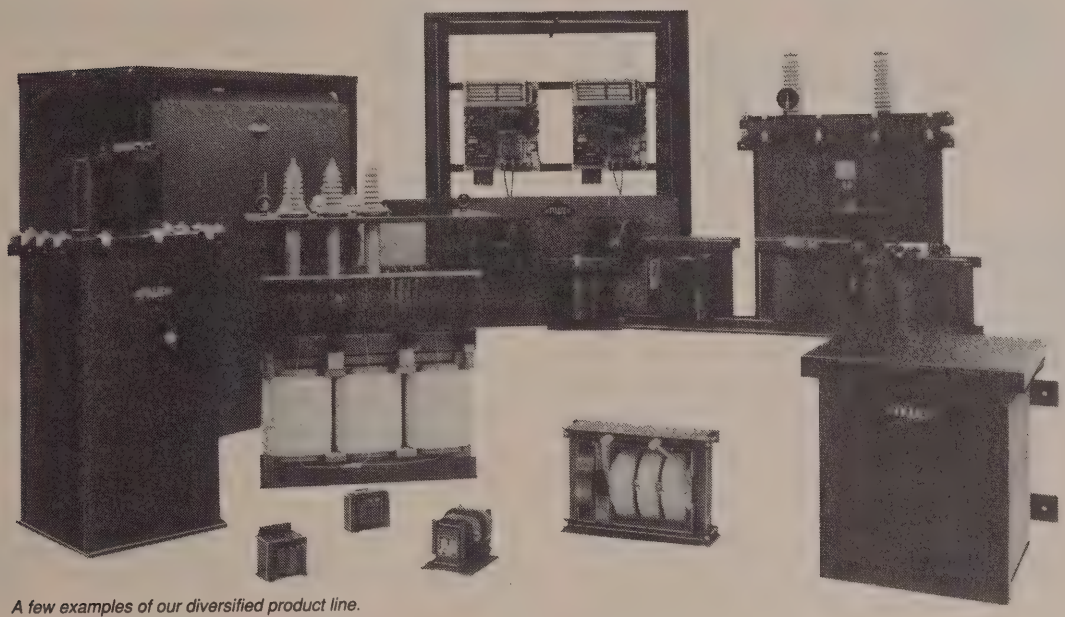
NWL... the Source for Custom Transformers Electronic & Industrial from Watts to Megawatts



A few examples of our diversified product line.

Designed and Manufactured to Your Specific Requirements

- **Transformers:** Plate, Water Cooled, Step Down, High Current, High Frequency, Instrument, Phase Changing, High Voltage Isolation, Welding, High Voltage, Testing, High Reactance, Output, Modulation, Epoxy Cast
- **Power Supplies:** AC/AC & AC/DC Power Supplies and Controllers, High Current & High Voltage Power Supplies, Electrostatic Precipitator, Transformer Rectifier Sets
- **Controls:** SCR Controls, Packaged Controls, Energy Management Software, Digital Voltage Controllers, Microprocessors
- **Reactors:** Saturable Core, Current Limiting, Chokes, Swinging Chokes, Air Core, AC, Line, Harmonic Filter

Capability Range

- **Voltage:** Up to 20 KV input, Up to 300 KV output • **Frequency:** 4 Hz to 50 KHz
- **Current:** Up to 40,000 amps DC or 50,000 amps AC output • **KVA:** Up to 6,000

WIDEBAND POWER DIVIDERS/COMBINERS

Series 01 and 10 Power Dividers are designed for applications in the 0.2 to 110 and 3.0 to 225 MHz frequency ranges.Hybrid Junction Techniques are employed to assure superior isolation and minimal insertion loss. VSWR is optimized at all ports. 50 and 75 ohm impedances are standard. Other impedances available on special order. Connectors are BNC.

WIDEBAND COAXIAL IMPEDANCE ADAPTERS

For interconnection of unbalanced circuits of different characteristic impedances with low insertion loss.

Line of standard models with combinations of type BNC male and female connectors match 50:75, 50:90, and 75:90 ohm circuits. Adapters transfer power bidirectionally and are matched in both directions.

Bandwidths shown correspond to low-end — 3 dB maximum cut-off frequency, and high end frequency at which VSWR does not exceed 1.25.

North Hills™ Signal Processing

A Porta Systems Company

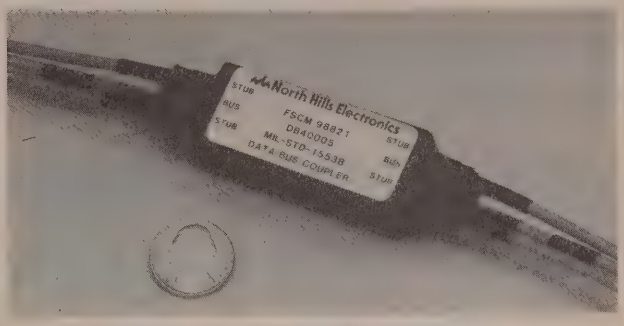
North Hills Electronics manufactures a full line of MIL-STD-1553 data bus couplers suitable for severe airborne and ground-based applications, as well as test and development systems. They are available in both box and in-line configurations and with a wide variety of connectors. All North Hill Electronics' couplers are manufactured with our own transformers built to MIL-T-21038 and have been qualified on many military programs. Consult us for details and qualification test data.

Couplers are available from stock in configurations ranging from 1 stub to 8 stubs and we would be pleased to provide you with devices to your own specific requirements. Consult us for details.

The tabulation below describes our standard product line of couplers and accessories



DB40005 4 STUB IN-LINE COUPLER

P/N	DESCRIPTION	CASE SIZE (L × W × H)
SINGLE STUB COUPLERS:		
DB01M01E	1553B, FLANGED, D-621/602	1.5 × 1.4 × .9

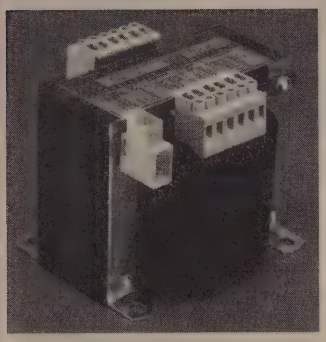
Isolation Step-Down Transformers (Low Leakage)



Isolation Step-down Transformers for use at 48-66Hz. Designed to meet requirements UL and CSA medical standards. Low-leakage: special safety design provides extra insulation between the primary and secondary windings. Check with us on availability of international models approved by VDE.
Input voltages: 100, 120, 200, 220, 240
Output voltages: 100, 120, 200, 220, 240 (±10%), jumper selectable.
Connections: Line connections are made via screw terminals on the terminal blocks which are completely insulated and touch-proof for safety. Jumpering connections are made with QDs (no QDs are used on model 82510050; use 14AWG hookup wire); Jumper wire assemblies (Part #82110060—16AWG, 1/4" QDs, 4-6") available separately.

SPECIFICATIONS

Safety: Built to UL 506, CSA 22.2/No. 66 (transformers); and UL 544, CSA C22.2/ No. 125 (medical products)

Approvals:
UL (File #E132834
CSA (File #LR 86160-1)

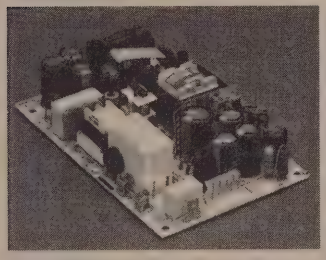
SCHEMATIC

International Switching Power Supply



#82310010: Switching power supply; specifications at right

Surface-mounted switching power supply can be adjusted for 115VAC/60Hz or international 230VAC/50Hz power and carries UL, CSA and TUV approvals. Miniature size (5.4" x 3.5"), low profile (1.1" high), high reliability (MTBF 80,000 hours min.). Internally filtered to meet FCC (FCC Docket 20780, part 15, class B) and VDE regulations (VDE 0871, level B) for conducted EMI. Short circuit protection for all outputs; overvoltage protection for ±5 output. Wiring harnesses available separately.

SPECIFICATIONS

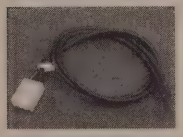
Input Characteristics:
Input voltage: 90-132VAC or 180-265VAC (jumper selectable)
Input frequency range: 47-63Hz, single phase
Inrush current (cold start): 25A 5ms max. at nom. line input, full load & 25°C ambient
Efficiency: 70% typical
Holdup time: 1 cycle min. at nominal line, full load condition.
Load transient response: 5% max. for 50% to 100% load change

Output Characteristics:

Max. power output (Watts)	Output Voltage (Volts)	Min. Load (Amps)	Max. Current (Amps)	Tolerance (%)	Noise Ripple (mv peak to peak)
40	+5	0.5	2.5	±3	50
	+12	0.4	2.0	±5	120
	-12	0.04	0.3	±10	120

Protection: Overvoltage protection: Standard on +5V output set at 6.25V ± 0.5V
Isolation: Input to output terminals: 1500VAC for 1 minute
Input to safety ground: 1500VAC for 1 minute
Output to safety ground: 500 VAC for 1 minute
Insulation Resistance: Output to safety ground: 50Ω min. at 500 VDC
Safety: Designed to meet UL 478, UL 1012, CSA 22.2 No. 154, VDE 804, VDE 806, IEC 380 and IEC 435
Approvals: UL (File #E87379), CSA (File #LR57908X), TUV (File #R74029)

Wiring harnesses (sold separately)



#82110011: Harness for AC Power Input

#82110020: Harness for DC Power Output

#82110030: Harness for Ground Connection

PARA-LINE TRANSFORMER COMPANY, INC.

Over 3600 VARIOUS TYPES OF TRANSFORMERS

AVAILABLE FROM STOCK

SSA SERIES		Primary Voltages Available 115 & 230 VAC, 50/60 HZ. Single Center Tapped Secondaries. Lead Wires or Lugs-Secondary Voltages Ranging from 4 VCT to 230 VCT. Power Ranging from 2 VA to 50 VA.
SSC SERIES		Printed Circuit Types with Single Primary. Available 115 or 230 VAC, 50/60 HZ, with Single Center Tapped Secondaries. Secondary Voltages from 4 to 230 VAC. Power Available from 0.5 to 20 VA.
CSC SERIES		Printed Circuit Types with Single Primary. Available 115 or 230 VAC, 50/60 HZ with Two Equal Secondaries. Secondary Voltages from 4 to 230 Total Series Volts. Power Available from 2 VA to 20 VA.
DSF SERIES		Lead Wires or Lugs with Dual 115 or 230 VAC Primaries, 50/60 HZ. Two Separate and Equal Secondaries. Total Secondary Volts in Series from 6.3 to 480 VAC. Power Available from 50 VA to 450 VA.
TTC SERIES		Telephone Couplers, Hybrids, and Holding Coils. Printed Circuit Types.
MSH SERIES		Dual Primaries for 115/230 VAC, 50/60 HZ Operation. Voltages from 6.3 to 480 VAC. Power from 50-450 VA. Multiple Secondary Types Including Designs for Microprocessor Supplies and Multiple-Tapped Control Types.
DLP SERIES		Low Profile Printed Circuit Types Dual Primaries for 115/230 VAC, 50/60 HZ Operation. Voltages from 6.3 to 230 VAC. Power from 5-50 VA.
MLP SERIES		Low Profile Printed Circuit Types with Multiple Dual 115 VAC Primaries and Secondary Outputs for Logic and OP AMP Supplies.
DHP SERIES		Printed Circuit Types-Compact Design. Single or Dual 115 VAC Primaries 50/60 HZ. Dual Identical Secondaries 5 to 230 VAC. Power from 5-80 VA.

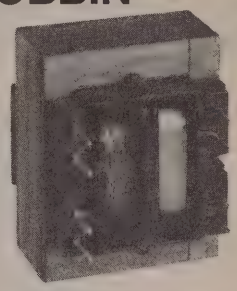
INTERNATIONAL SERIES LOW PROFILE DUAL BOBBIN PRINTED CIRCUIT POWER TRANSFORMERS



- **Designed to meet UL, VDE, IEC-65, CSA.**
- Dual bobbin construction with insulating shrouds—provides 4000V hipot and results in low interwinding capacitance, eliminating the need for electro-static shielding.
- 130°C insulating system—materials meet UL flammability requirements.
- Dual 115V/230V 50/60 HZ primaries.
- Dual secondaries for variety of utilization.
- Low cost.

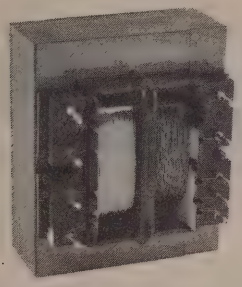
INTERNATIONAL SERIES DUAL BOBBIN MICROPROCESSOR TRANSFORMERS

VPCM - Printed Circuit



• Designed to meet UL, VDE, IEC and CSA

- Dual bobbin construction for low interwinding capacitance. Eliminates need for electro-static shielding and provides 4000V Hipot.
- 130°C insulation system. Exceeds UL flammability requirement.
- Dual 115V/230V primaries are standard.
- DC output combinations ±12V and 5V and ±15V and 5V. Rated at regulator output.

VRPM - Chassis Mount

LOW PROFILE SPLIT BOBBIN PRINTED CIRCUIT POWER TRANSFORMERS

- Low profile — allows closer printed circuit board stacking
- Split bobbin construction — center flange insulation barrier provides 2500 VRMs Hipot — non concentric coil winding results in low interwinding capacitance, eliminates need for electro-static shielding.
- Class S (130°C) insulation system
- Single 115V and dual 115V/230V primaries are standard.
- Dual secondaries for variety of utilization
- 12 pin bobbin design increases available options for multi-winding special orders
- Low regulation

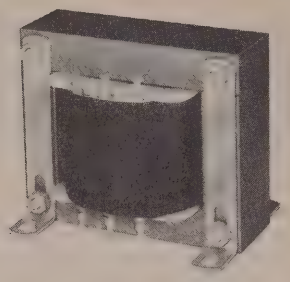
RECTIFIER POWER TRANSFORMERS



- Single 115V or dual 115V/230V — 50/60 Hz primaries.
- (2) center tapped secondaries provide variety of utilization.
- 1500 VRMS hipot.
- Class 130°C insulation system.
- Rugged construction — only prime raw materials are used.
- Secondary voltage and currents are R.M.S. and are designed for a wide range of rectifier power circuit applications. Our Engineering/Applications staff can assist you with selecting the unit that best suits your rectifier circuit requirements. Custom design and construction is available for your special requirements.

ISOLATION POWER TRANSFORMERS STEP-UP/STEP-DOWN VARIABLE VOLTAGE RATINGS

- The IPS Series features (4) identical windings; (2) primaries and (2) secondaries; each rated at 0/104/110/120 volts allowing for rating combinations of 104V, 110V, 120V, 208V, 214V, 220V, and 240V with primary and secondary isolated from each other. Step-down of 440V to 220V or step-up of 220V to 440V can be achieved by inter-connecting primaries and secondaries in an Auto-Transformer configuration. This eliminates isolation but a doubling of the power rating can be realized.
- The DIPS series is similar to the IPS series except the dual secondaries are each rated 0/208/220/240 volts.
- 50 Hz to 500 Hz operating frequency range.
- Electrostatically shielded with shield grounded to the core. This connection can be opened for floating shield.
- ¼ inch thick phenolic terminal boards with nickel plated brass hardware (#10-32 on 250 VA and 500 VA; ¼-20 on 1000 VA and 2000 VA). Voltage rating can be varied with easy to make interconnections.
- Completely varnish impregnated and ruggedly constructed with prime raw materials.
- Well insulated and designed to withstand 2500 VRMS hipot.
- 55°C temperature rise above ambient

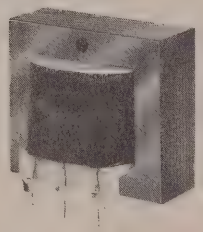
PLUG-IN PRINTED CIRCUIT TELEPHONE COUPLING TRANSFORMERS



Designed for Interconnection of Voice/Data Modem Terminals to Telephone Lines.

- Frequency response ±0.5dB 300Hz-3500Hz
- Power level −45dbm to +7dbm
- Longitudinal balance — per FCC Part 68
- Distortion — 0.5% max.
- Impedance matching ±10% over frequency range
- Return loss — 26dB min.

PEARSON ELECTRONICS, INC.

Wide Band, Precision Current Monitors

With a Pearson™ Current Monitor and an oscilloscope, you can measure pulse or ac currents from milliamperes to kiloamperes, in any conductor or beam of charged particles, at frequencies up to 200 MHz or down to below 1 Hz. The monitor is physically isolated from the circuit. It is a current transformer capable of highly precise measurement of pulse amplitude and waveshape. The Model 110, for example, offers pulse-amplitude accuracy of + 1%, -0% (typical of all Pearson current monitors), 20 nanosecond rise time, and droop of only 0.8% per millisecond. Three dB bandwidth is 1 Hz to 20 MHz. Whether you wish to measure current in a conductor, an electron device or a particle accelerator, it is likely that one of our off-the-shelf models (ranging from ¼" to 10¾" ID) will do the job. In addition to our standard models, we build many custom designed current transformers to meet special needs and applications.

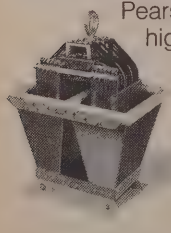
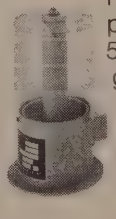
† Initial pulse response with one megohm in parallel with 20 pF load impedance. With the exception of the 2093, a 50 ohm termination will cut the output in half.
*Double Shielded **May need small bias current through secondary for maximum rating.

High Voltage Pulse Transformers



Pearson Electronics specializes in the design of high voltage pulse transformers, covering the range of 100kV to 500kV. Typical systems incorporating our pulse transformers include pulse modulators for klystron and traveling wave microwave tubes and voltage pulsers for particle accelerator injectors, x-ray tubes, and high power lasers.

Capacitive Voltage Dividers



Pearson high voltage coaxial capacitive dividers permit measurement of pulse voltages up to 500 kV. The incorporation of a simple yet elegant geometry assures precision, stability, and reliability. The units are designed for immersion in high voltage insulating oil and are frequently used in observing the output wave shape of our high voltage pulse transformers.

Contact us and we will send you engineering data.

SPECIFICATIONS:

- **MIL-T-27:** All units manufactured to MIL-T-27. Military Designation is TF5S21ZZ for Transformers.
- **FREQUENCY RESPONSE:** ±2dB, 300 Hz-50 KHz at 1.0 Milliwatt.

MAXIMUM DISTORTION: 5% With Rated Power Level at 1 KHz and 300 Hz.

DIELECTRIC STRENGTH: All Units Tested at 200 V RMS.

- **INSULATION RESISTANCE:** Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** 3 Grams

OPERATING TEMPERATURE: −55°C to +130°C

- **TERMINALS:** Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** 25 Cycles, Method 107D, MIL-STD-202E, Test Condition A-1.

***Discount Prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30%
Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

Delivery— stock to one week

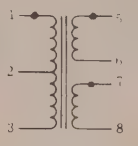
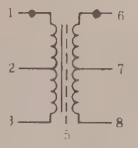
SCHEMATICS FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATICS FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELD DESIGN AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION CONTACT FACTORY FOR DETAILS

THIS PRODUCT IS PATENTED

New Surface Mount (.2"Ht.×.55"×.55")

For immediate engineering assistance or to place an order— ***Call Toll Free 800-228-9747***

SPECIFICATIONS

- **MIL-T-27:** . . . . . All units manufactured to MIL-T-27, Military Designation is TF5S21ZZ for Transformers, TF5S20ZZ for inductors.
- **FREQUENCY RESPONSE:** ±3db, 400 Hz-250 KHz at 1.0 Milliwatt.
- **MAXIMUM DISTORTION:** . . . 5% With Rated Power Level at 1 KHz and 400 Hz.
- **DIELECTRIC STRENGTH:** All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** . . . . . 1.5 GRAMS
- **TERMINALS:** . . . . . Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** . . . . . 25 Cycles, Method 107D, MIL-STD-202E, Test Condition A-1.

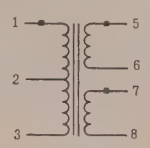
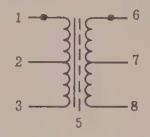
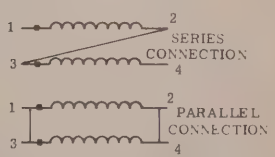
SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



SCHEMATIC FOR INDUCTORS



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELD DESIGN AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

THIS PRODUCT IS PATENTED

INDUCTORS

ALL INDUCTORS HAVE SPLIT WINDINGS AND MEASUREMENTS ARE LISTED FOR BOTH SERIES AND PARALLEL CONNECTIONS. TWO VALUES OF INDUCTANCE, EACH AT A PARTICULAR VALUE OF D.C. CURRENT, ARE LISTED FOR EACH INDUCTOR.

For immediate engineering assistance or to place an order— ***Call Toll Free 800-228-9747***

PICO Electronics, Inc.

453 N. MacQuesten Pkwy., Mt. Vernon, N.Y. 10552 • • FAX 914-699-5565

SURFACE MOUNT

PICO surface mount units utilize materials and methods to withstand extreme temperature (220°C) of vapor phase, I.R., and other reflow procedures without degradation of electrical or mechanical characteristics.

SPECIFICATIONS

- **MIL-T-27:** . . . . . All units manufactured to MIL-T-27, Military Designation is TF5S21ZZ for Transformers, TF5S20ZZ for Inductors.
- **FREQUENCY RESPONSE:** ±3db, 400 Hz-100 KHz at 1.0 Milliwatt.
- **MAXIMUM DISTORTION:** . . . 5% With Rated Power Level at 1 KHz and 400 Hz.
- **DIELECTRIC STRENGTH:** All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** . . . . . 3 Grams
- **TERMINALS:** . . . . . Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** . . . . . 25 Cycles, Method 107D, MIL-STD-202E, Test Condition A-1.

*INCLUDES ELECTROSTATIC SHIELD

***Discount Prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30%
Ordering Instruction: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

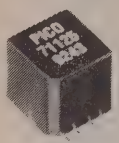
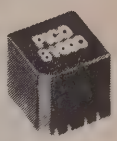
SURFACE MOUNT

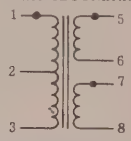
SERIES 71000



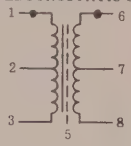
SERIES 81000



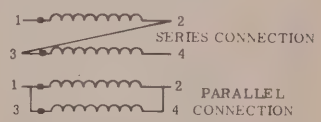
SCHEMATICS FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



SCHEMATIC FOR INDUCTORS



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELD DESIGN AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED.
- VARIATION OF STANDARD DESIGNS AVAILABLE
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

THIS PRODUCT IS PATENTED

INDUCTORS

ALL INDUCTORS HAVE SPLIT WINDINGS AND MEASUREMENTS ARE LISTED FOR BOTH SERIES AND PARALLEL CONNECTIONS. TWO VALUES OF INDUCTANCE, EACH AT A PARTICULAR VALUE OF D.C. CURRENT, ARE LISTED FOR EACH INDUCTOR.

**MINIATURIZED TELEPHONE COUPLING APPLICATION

SPECIFICATIONS

- **MIL-T-27:** . . . . . All units manufactured to MIL-T-27, Military Designation is TF5S21ZZ for Transformers.
- **FREQUENCY RESPONSE:** ±3db, 300 Hz-75 KHz at 1.0 Milliwatt.
- **MAXIMUM DISTORTION:** . . . 5% With Rated Power Level at 1 KHz and 400 Hz.
- **DIELECTRIC STRENGTH:** All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** . . . . . 5 Grams
- **TERMINALS:** . . . . . Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** . . . . . 25 Cycles, Method 107D, MIL-STD-202E, Test Condition A-1.

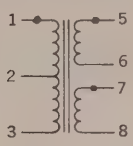
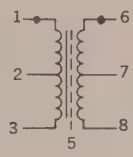
*INCLUDES ELECTROSTATIC SHIELD

SURFACE MOUNT SCHEMATIC FOR TRANSFORMERS WITH SPLIT WINDING



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED.
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

Delivery— stock to one week

PICO Electronics, Inc.
453 N. MacQuesten Pkwy.
Mt. Vernon, N.Y. 10552

For immediate engineering assistance or to place an order– ***Call Toll Free 800-228-9747***

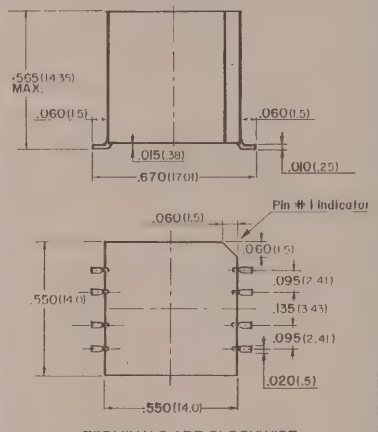
FAX 914-699-5565

SURFACE MOUNT

PICO surface mount units utilize materials and methods to withstand extreme temperature (220°C) of vapor phase, I.R., and other reflow procedures without degradation of electrical or mechanical characteristics.

PICO's ultra-miniature transformers

77000 SERIES



TERMINALS ARE CLOCKWISE FROM PIN #1.

- PIN #4 IS DUMMY PIN

DIMENSIONS ARE IN INCHES (MM)

SPECIFICATIONS

- **MIL-T-27:** . . . . . All units manufactured to MIL-T- 27, Audio Transformers are Type TF5S21ZZ
- **FREQUENCY RESPONSE:** ±3db, 150 Hz-75 KHz at 1.0 Milliwatt. (When Primary Impedance ≥ 50K Ohms, ±3 db 150 Hz to 20 KHz)
- **MAXIMUM DISTORTION:** . . . 5% With Rated Power Level at 1 KHz, 400 Hz and 150 Hz.
- **DIELECTRIC STRENGTH:** All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** . . . . . 7.5 Grams
- **TERMINALS:** . . . . . Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** . . . . . 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1.

Delivery— stock to one week

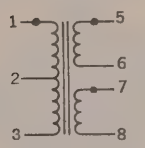
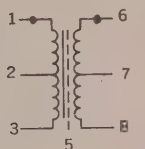
SURFACE MOUNT

PICO surface mount units utilize materials and methods to withstand extreme temperature (220°C) of vapor phase, I.R., and other reflow procedures without degradation of electrical or mechanical characteristics.

SURFACE MOUNT SCHEMATIC FOR TRANSFORMERS WITH SPLIT WINDING



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS

Delivery— stock to one week

PICO Electronics, Inc.

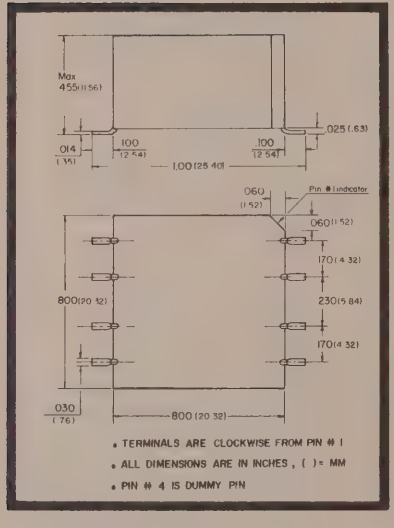
SURFACE MOUNT

PICO surface mount units utilize materials and methods to withstand extreme temperature (220°C) of vapor phase, I.R., and other reflow procedures without degradation of electrical or mechanical characteristics.

PICO's ultra-miniature surface mount transformers

SERIES 82000



SPECIFICATIONS

- **MIL-T-27:** .....
All units manufactured to MIL-T-27, and are Hermetically Sealed Audio Transformers are Type TF5R21ZZ.
- **FREQUENCY RESPONSE:** .....
±3db, 75 Hz-30 KHz at 1.0 Milliwatt.
- **MAXIMUM DISTORTION:** .....
5% With Rated Power Level at 1 KHz, 300 kHz and 75 Hz.
- **DIELECTRIC STRENGTH:** .....
All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** ...
Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** .....
12 Grams
- **OPERATING TEMPERATURE:**
-55°c to +105°c (All Units Can be Supplied to Class S Requirements, +130°c maximum).
- **TERMINALS:** .....
Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** .....
25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1.

THIS PRODUCT IS PATENTED

Delivery— stock to one week

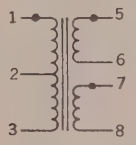
PICO's ultra-miniature surface mount transformers

SERIES 82000

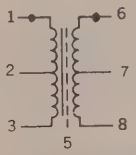
FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED.
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

SURFACE MOUNT SCHEMATIC FOR TRANSFORMERS WITH SPLIT WINDING



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



PICO Electronics, Inc.

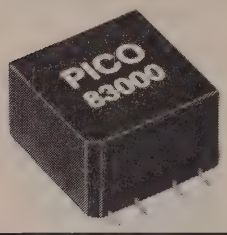
Delivery— stock to one week

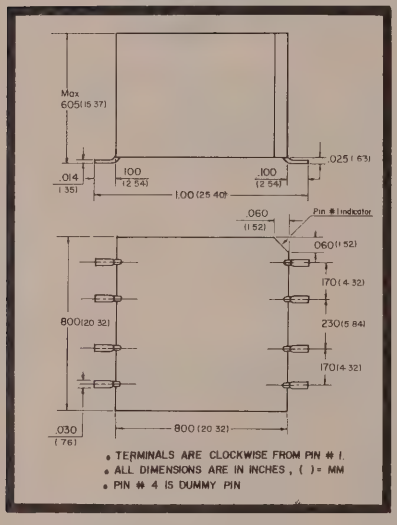
PICO's

SURFACE MOUNT

PICO surface mount units utilize materials and methods to withstand extreme temperature (220°C) of vapor phase, I.R., and other reflow procedures without degradation of electrical or mechanical characteristics.

ultra-miniature transformers SERIES 83000





SPECIFICATIONS

- **MIL-T-27:** ..... All units manufactured to MIL-T-27, and are Hermetically Sealed Audio Transformers are Type TF5R21ZZ
- **FREQUENCY RESPONSE:** ..... ±3db, 50 Hz-30 KHz at 1.0 Milliwatt. (±0.5 db, 300 Hz-5 KHz)
- **MAXIMUM DISTORTION:** ..... 5% With Rated Power Level at 1 KHz, 300 Hz and 50 Hz.
- **DIELECTRIC STRENGTH:** ..... All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** ... Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** ..... 17 Grams
- **OPERATING TEMPERATURE:** -55°c to +105°c (All Units Can be Supplied to Class S Requirements, +130°c).
- **TERMINALS:** ..... Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** ..... 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1.

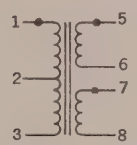
PICO's ultra-miniature surface mount transformers

SERIES 83000

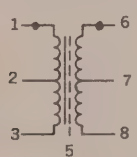
FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED.
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

SURFACE MOUNT SCHEMATIC FOR TRANSFORMERS WITH SPLIT WINDING



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



PICO Electronics, Inc.
453 N. MacQuesten Pkwy.
Mt. Vernon, N.Y. 10552

FAX 914-699-5565

For immediate engineering assistance or to place an order—

Call Toll Free 800-228-9747

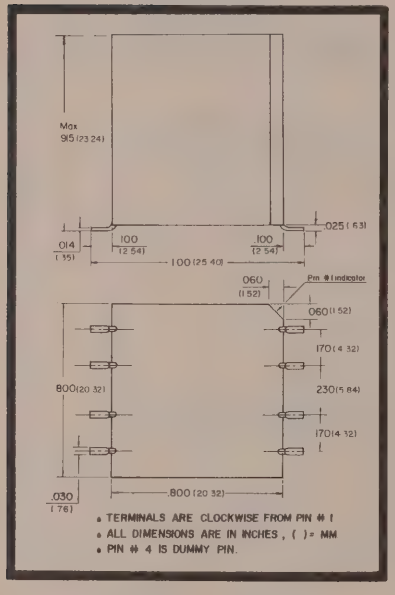
Delivery— stock to one week

SURFACE MOUNT

PICO surface mount units utilize materials and methods to withstand extreme temperature (220°C) of vapor phase, I.R., and other reflow procedures without degradation of electrical or mechanical characteristics.

PICO's ultra-miniature surface mount transformers

SERIES 84000



- TERMINALS ARE CLOCKWISE FROM PIN # 1
- ALL DIMENSIONS ARE IN INCHES, ( ) = MM
- PIN # 4 IS DUMMY PIN.

SPECIFICATIONS

- **MIL-T-27:** ..... All units manufactured to MIL-T-27, and are Hermetically Sealed Audio Transformers are Type TF5R21ZZ
- **FREQUENCY RESPONSE:** ..... ±3db, 20 Hz-25 KHz at 1.0 Milliwatt.
- **MAXIMUM DISTORTION:** ..... 5% With Rated Power Level at 1 KHz and 300 Hz. 10% Distortion at 20 Hz.
- **DIELECTRIC STRENGTH:** ..... All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** ... Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** ..... 28 Grams
- **OPERATING TEMPERATURE:** -55°c to +105°c (All Units Can be Supplied to Class S Requirements, +130°c).
- **TERMINALS:** ..... Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** ..... 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1.

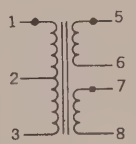
PICO's ultra-miniature surface mount transformers

SERIES 84000

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED.
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

SURFACE MOUNT SCHEMATIC FOR TRANSFORMERS WITH SPLIT WINDING



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD

PICO Electronics, Inc.

453 N. MacQuesten Pkwy., Mt. Vernon, N.Y. 10552 • • FAX 914-699-5565

PICO's miniature 400 Hz transformers

SURFACE MOUNT
PICO surface mount units utilize materials and methods to withstand extreme temperature (220°C) of vapor phase, I.R., and other reflow procedures without degradation of electrical or mechanical characteristics.

115V/26V Primary

FEATURES
- 400 Hz Aerospace Application
- Smallest Possible Size
- Secondary Has Split Winding (Secondary can Be Used at Half Voltage Twice the Current.)

SPECIFICATIONS
- Manufactured to MIL-T-27 (TF5S03ZZ)
- 90°c Ambient
- Input Primary 115v-400 Hz ±20 Hz or 26V-400HZ-±20 Hz (Your Choice-Just Choose The Proper Part No.)
- Regulation is 24% (T Units Have Regulation of 17%)
- Secondary Voltage Adjusted to Nominal Value at Half Load.

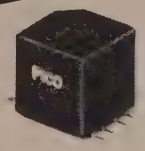
PICO's Pulse Transformers

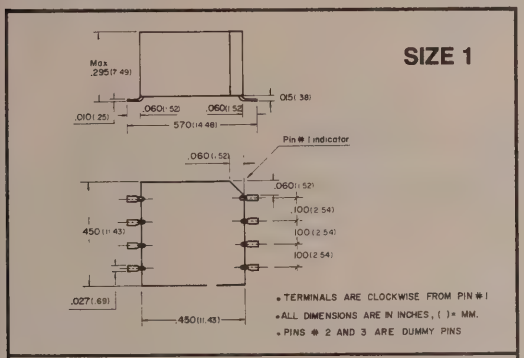
SURFACE MOUNT

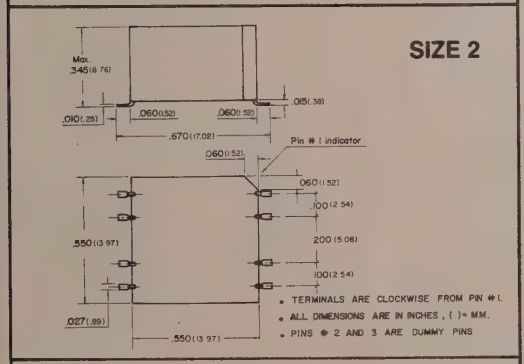
PICO surface mount units utilize materials and methods to withstand extreme temperature (220°C) of vapor phase, I.R., and other reflow procedures without degradation of electrical or mechanical characteristics.

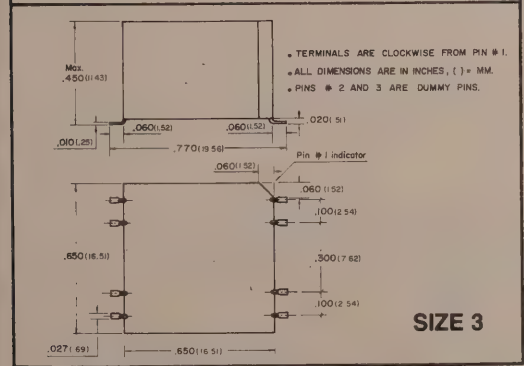


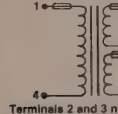
SPECIFICATIONS

- Units manufactured to MIL-T-21038 TP75SXNNNNK2
- **DIELECTRIC STRENGTH:** ..... All Units Tested at 500 V RMS.
- **INSULATION RESISTANCE:** ... Greater Than 10,000 Megohms at 700 V DC.
- **THERMAL SHOCK:** ..... 25 Cycles, Method 107C, MIL-STD-202E, Test Condition A-1.
- **OPERATING TEMPERATURE:** –55°c to +130°c).
- **TERMINALS:** Meet solderability per MIL-STD-202 Method 208
- **WEIGHT SIZE:** 1-2.5 Grams, 2-4.5 Grams, 3-8.0 Grams









Terminals 2 and 3 no connection mechanical stability only

THIS PRODUCT IS PATENTED

SURFACE MOUNT

PICO surface mount units utilize materials and methods to withstand extreme temperature (220°C) of vapor phase, I.R., and other reflow procedures without degradation of electrical or mechanical characteristics.

Ultra-Miniature DC-DC Converter Transformers

- These units can be used as self saturated or square wave driven
- Input voltages of: 5V, 12V, 24V and 48V
- Output voltages up to 300 Volts
- Power levels up to 40 Watts

All units can be supplied with higher or lower output voltages. Delivery- stock to one week, special voltages 9 days.

FEATURES

1) Units can be used as self-saturating or for linear switching applications. Operation over ambient temperature range from −55° to +105°c. All units manufactured to the requirements of MIL-T-27 (TF5S40ZZ)
2) All units can be supplied with higher or lower secondary voltages at the same power levels.
3) Secondary can be connected for full-wave bridge or dual bridge.

Delivery— stock to one week

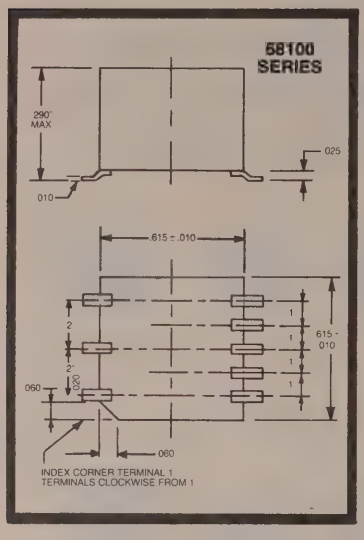
MIL-STD-1553 Interface Transformers
Multiplex Data BUS Pulse Transformers



These pulse transformers manufactured to MIL-STD-1553 COMMAND/RESPONSE MULTIPLEX DATA BUS requirements. They also are manufactured to MIL-T-21038 specifications and are designed to meet MAC AIR SPECIFICATIONS A3818, A5690, A5232 and A4905.

All of these transformers exhibit superior electrical performance. Common mode rejection ratio is greater than 45dB at 1 MHz. Input impedance is greater than 3000 ohms over the band from 75 kHz to 1mHz at 1V rms. This series possesses exceptional waveform integrity: Rise time and fall time is less than 100 nanoseconds. Overshoot and ringing is less than ± 1V peak. Droop is less than 20%.

SPECIFICATIONS:

- Units manufactured to MIL-T-21038 and MIL STD 1553
- IMPEDANCE ..... greater than 3KΩ over the band from 75kHz to 1MHz
- DROOP ..... 20% max.
- OVERSHOOT ..... 1V peak
- COMMON MODE REJECTION (CMR) greater than 45dB.
- DIELECTRIC STRENGTH: ..... All Units Tested at 200 V RMS.
- INSULATION RESISTANCE ..... Greater Than 10,000 Megohms at 300 V DC.
- WEIGHT: ... PLUG-IN 4 Grams. SURFACE MOUNT 5 Grams.
- OPERATING TEMPERATURE: ..... −55°c to +130°c).
- TERMINALS: Meet solderability per MIL- STD-202 Method 208

SPECIFICATIONS

- MIL-T-27: ..... All units manufactured to MIL-T-27, Military Designation is TF5R21ZZ for Transformers, TF5R20ZZ for Inductors.
- FREQUENCY RESPONSE: ..... ±3dB, 400 Hz-250 KHz at 1.0 Milliwatt.
- MAXIMUM DISTORTION: ..... 5% With Rated Power Level at 1 KHz and 400 Hz.
- DIELECTRIC STRENGTH: ..... All Units Tested at 200 V RMS.
- INSULATION RESISTANCE: ..... Greater Than 10,000 Megohms at 500 V DC.
- WEIGHT: ..... 1.1 Grams.
- OPERATING TEMPERATURE: ..... -55°c to +105°c (All Units Can Be Supplied to Class S Requirements, +130°c).
- TERMINALS ..... Solid .012 Diameter Conductor. Solderability per MIL-STD-202 Method 208.
- THERMAL SHOCK: ..... 25 Cycles, Method 107D, MIL-STD-202E, Test Condition A-1.

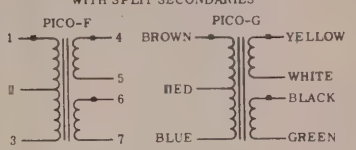
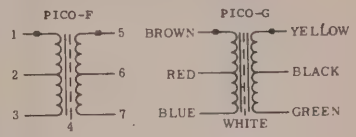
F SERIES Plug-In

G SERIES Insulated Leads

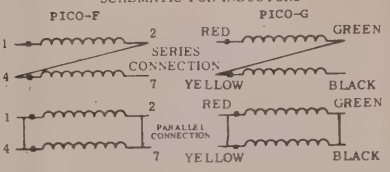
SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



SCHEMATIC FOR INDUCTORS



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- 5 MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

This Product is Patented

INDUCTORS

ALL INDUCTORS HAVE SPLIT WINDINGS AND MEASUREMENTS ARE LISTED FOR BOTH SERIES AND PARALLEL CONNECTIONS. TWO VALUES OF INDUCTANCE. EACH AT A PARTICULAR VALUE OF D.C. CURRENT, ARE LISTED FOR EACH INDUCTOR.

For immediate engineering assistance or to place an order— ***Call Toll Free 800-228-9747***

Delivery— stock to one week

PICO Electronics, Inc.

453 N. MacQuesten Pkwy., Mt. Vernon, N.Y. 10552 • • FAX 914-699-5565

PICO's ultra-miniature transformers

For Surface Mount Versions of this series, see pages A•2460 & A•2461.

SPECIFICATIONS

- **MIL-T-27:** ..... All units manufactured to MIL-T-27, Military Designation is TF5R21ZZ for Transformers, TF5R20ZZ for Inductors.
- **FREQUENCY RESPONSE:** ..... ±3db, 400 Hz-100 KHz at 1.0 Milliwatt.
- **MAXIMUM DISTORTION:** ..... 5% With Rated Power Level at 1 KHz and 400 Hz.
- **DIELECTRIC STRENGTH:** ..... All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** ... Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** ..... 2.5 Grams
- **OPERATING TEMPERATURE:** -55°c to +105°c (All Units Can be Supplied to Class S Requirements, +130°c).
- **TERMINALS:** ..... Solid .016 Diameter Conductor. Meet solderability per MIL-STD-202 Method 208
- **THERMAL SHOCK:** ..... 25 Cycles, Method 107D, MIL-STD-202E, Test Condition A-1.

Delivery— stock to one week

INDUCTORS

ALL INDUCTORS HAVE SPLIT WINDINGS AND MEASUREMENTS ARE LISTED FOR BOTH SERIES AND PARALLEL CONNECTIONS. TWO VALUES OF INDUCTANCE, EACH AT A PARTICULAR VALUE OF D.C. CURRENT, ARE LISTED FOR EACH INDUCTOR.

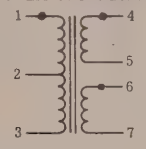
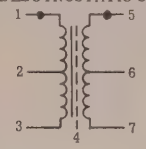
PICO's ultra-miniature transformers

W SERIES Plug-In

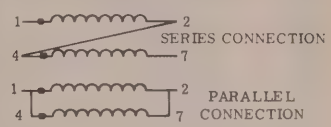
SCHEMATICS FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



SCHEMATIC FOR INDUCTORS



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

THIS PRODUCT IS PATENTED

Delivery— stock to one week

PICO Electronics, Inc.

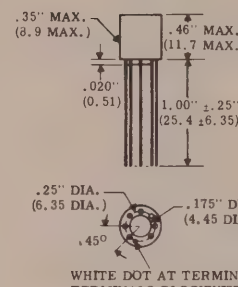
PICO's ultra-miniature transformers

Y SERIES Plug-In



SPECIFICATIONS

- **MIL-T-27:** All units manufactured to MIL-T-27, Military Designation is TF5R21ZZ for Transformers, TF5R20ZZ for Inductors.
- **FREQUENCY RESPONSE:** ±3db, 300 Hz-100 KHz at 1.0 Milliwatt.
- **MAXIMUM DISTORTION:** 5% With Rated Power Level at 1 KHz and 400 Hz and 300 Hz.
- **DIELECTRIC STRENGTH:** All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** 3 Grams
- **OPERATING TEMPERATURE:** -55°c to +105°c (All Units Can be Supplied to Class S Requirements, +130°c).
- **TERMINALS:** Solid .016 Diameter Conductor. Meet solderability per MIL-STD-202 Method 208
- **THERMAL SHOCK:** 25 Cycles, Method 107D, MIL-STD-202E, Test Condition A-1.

INDUCTORS

ALL INDUCTORS HAVE SPLIT WINDINGS AND MEASUREMENTS ARE LISTED FOR BOTH SERIES AND PARALLEL CONNECTIONS.

TWO VALUES OF INDUCTANCE, EACH AT A PARTICULAR VALUE OF DC CURRENT, ARE LISTED FOR EACH INDUCTOR.

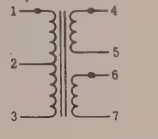
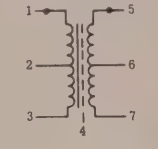
PICO's ultra-miniature transformers

Y SERIES Plug-In

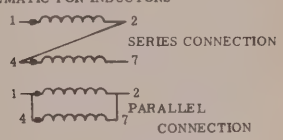
SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



SCHEMATIC FOR INDUCTORS



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT.
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

THIS PRODUCT IS PATENTED

Delivery— stock to one week

Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

*INCLUDES ELECTROSTATIC SHIELD
**MINIATURIZED TELEPHONE COUPLING APPLICATION

SPECIFICATIONS

- **MIL-T-27:** All units manufactured to MIL-T-27, Military Designation is TF5R21ZZ for Transformers.
- **FREQUENCY RESPONSE:** +3db, 300 Hz-75 KHz at 1.0 Milliwatt.
- **MAXIMUM DISTORTION:** 5% With Rated Power Level at 1 KHz and 400 Hz.
- **DIELECTRIC STRENGTH:** All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** 5 Grams
- **OPERATING TEMPERATURE:** -55°c to +105°c (All Units Can be Supplied to Class S Requirements, +130°c).
- **TERMINALS:** Solid .016 Diameter Conductor. Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** 25 Cycles, Method 107D, MIL-STD-202E, Test Condition A-1.

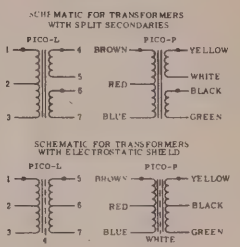
L SERIES Plug-In

P SERIES Insulated Leads



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED.
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT.
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

PICO Electronics, Inc.

SPECIFICATIONS

- **MIL-T-27:** ..... All units manufactured to MIL-T-27. Audio Transformers are Type TF5R21ZZ
- **FREQUENCY RESPONSE:** ..... ±3db, 150 Hz-75 KHz at 1.0 Milliwatt. (When Primary Impedance ≥ 50K Ohms, ±3 db 150 Hz to 20 KHz)
- **MAXIMUM DISTORTION:** ..... 5% With Rated Power Level at 1 KHz, 400 Hz and 150 Hz.
- **DIELECTRIC STRENGTH:** ..... All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** ..... Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** ..... 7.5 Grams
- **OPERATING TEMPERATURE:** ... -55°c to +105°c (All Units Can be Supplied to Class S Requirements, +130°c).
- **TERMINALS:** ..... Solid .016 Diameter Conductor. Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** ..... 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1.

Delivery: Stock to one week

THIS PRODUCT IS PATENTED

*INCLUDES ELECTROSTATIC SHIELD
**MINIATURIZED TELEPHONE COUPLING APPLICATION

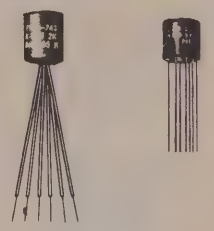
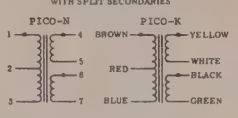
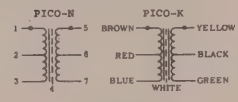
K SERIES Insulated Leads — N SERIES Plug-In



SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED.
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT.
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

PICO Electronics, Inc.
453 N. MacQuesten Pkwy.
Mt. Vernon, N.Y. 10552

FAX 914-699-5565

For immediate engineering assistance or to place an order—
Call Toll Free 800-228-9747

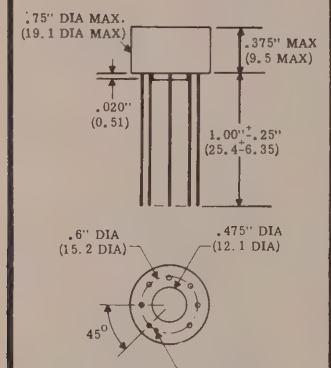
* INCLUDES ELECTROSTATIC SHIELD

*** Discount prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30%

Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York

PICO's ultra-miniature transformers

R SERIES Plug-In



All dimensions are in inches, ( ) = MM

SPECIFICATIONS

- **MIL-T-27:** ..... All units manufactured to MIL-T-27, Audio Transformers are Type TF5R21ZZ
- **FREQUENCY RESPONSE:** ..... ±3db, 75 Hz-30 KHz at 1.0 Milliwatt.
- **MAXIMUM DISTORTION:** ..... 5% With Rated Power Level at 1 KHz, 300 kHz and 75 Hz.
- **DIELECTRIC STRENGTH:** ..... All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** ... Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** ..... 12 Grams
- **OPERATING TEMPERATURE:** -55°c to +105°c (All Units Can be Supplied to Class S Requirements, +130°c maximum).
- **TERMINALS:** ..... Solid .016 Diameter Conductor. Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** ..... 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1.

THIS PRODUCT IS PATENTED

Delivery— stock to one week

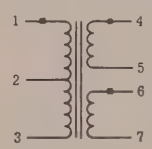
PICO's ultra-miniature transformers

R SERIES Plug-In

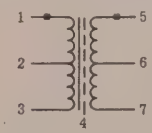
FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED.
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT.
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



PICO Electronics, Inc.
453 N. MacQuesten Pkwy.
Mt. Vernon, N.Y. 10552

FAX 914-699-5565

For immediate engineering assistance or to place an order—

Call Toll Free 800-228-9747

Delivery— stock to one week

PICO's ultra-miniature transformers

These units can be manufactured and tested to MIL-T-27/359. Contact factory for price and delivery information and appropriate parts numbers (MIL-T-27/359-01 thru MIL-T-27/359-147).

Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

SPECIFICATIONS

- **MIL-T-27:** ..... All units manufactured to MIL-T-27, Audio Transformers are Type TF5R21ZZ.
- **FREQUENCY RESPONSE:** ..... ±3db, 50 Hz-30 KHz at 1.0 Milliwatt. (±0.5 db, 300 Hz-5 KHz)
- **MAXIMUM DISTORTION:** ..... 5% With Rated Power Level at 1 KHz, 300 Hz and 50 Hz.
- **DIELECTRIC STRENGTH:** ..... All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** ... Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** ..... 17 Grams
- **OPERATING TEMPERATURE:** -55°c to +105°c (All Units Can be Supplied to Class S Requirements, +130°c).
- **TERMINALS:** ..... Solid .020 Diameter Conductor. Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** ..... 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1.

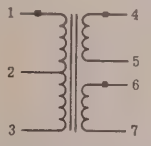
PICO's ultra-miniature transformers

S SERIES
Plug-In

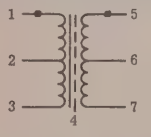
FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED.
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT.
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



PICO Electronics, Inc.
453 N. MacQuesten Pkwy.
Mt. Vernon, N.Y. 10552

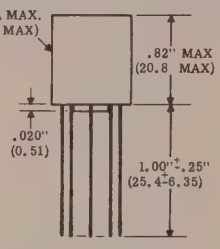
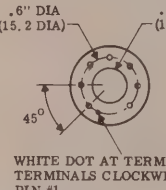
Delivery— stock to one week

PICO's ultra-miniature transformers

T SERIES Plug-In





Dimensions are in inches (MM)

SPECIFICATIONS

- **MIL-T-27:** ..... All units manufactured to MIL-T-27, Audio Transformers are Type TF5R21ZZ.
- **FREQUENCY RESPONSE:** ..... ±3db, 20 Hz-25 KHz at 1.0 Milliwatt.
- **MAXIMUM DISTORTION:** ..... 5% With Rated Power Level at 1 KHz and 300 Hz. 10% Distortion at 20 Hz.
- **DIELECTRIC STRENGTH:** ..... All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** ... Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** ..... 28 Grams
- **OPERATING TEMPERATURE:** -55°c to +105°c (All Units Can be Supplied to Class S Requirements, +130°c).
- **TERMINALS:** ..... Solid .020 Diameter Conductor. Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** ..... 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1.

THIS PRODUCT IS PATENTED

Delivery— stock to one week

PICO's ultra-miniature transformers

T SERIES
Plug-In

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED.
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT.
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

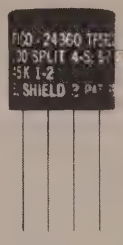
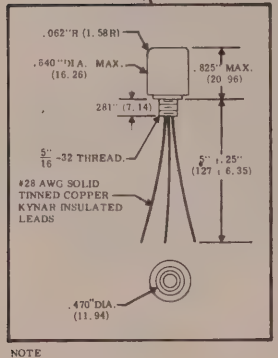
PICO Microphone/Transducer Audio Input Transformers

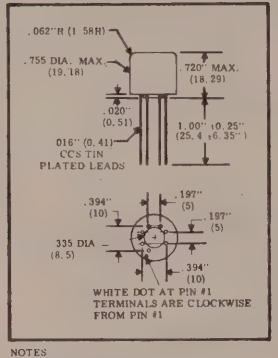
Used for Professional Sound Studios/Broadcast Mixing Consoles/Control and Instrument Amplifiers.

Interchangeable with transformers made by Beyer Dynamic of Germany.





NOTE
ALL DIMENSIONS ARE IN INCHES. ( ) = MM



NOTES
ALL DIMENSIONS ARE IN INCHES. ( ) MM.
CCS-COPPER CLAD STEEL, TINNED 100%.
ELECTROPLATED PER MIL-T-10727A AND ASTM CCS B452.

- *Large step-up ratios with flat frequency response over the entire audio range.*
- *Gapless laminations provide wide bandwidth with extremely low distortion. Use of two magnetic shields made with extra thick mu-metal and gapless core provide negligible hum pick up. All units provided with electrostatic shield.*
- *Your choice of two package styles, stud mounting with flying leads or low profile plug-in. Identical electrical performance regardless of package style.*
- *Frequency response ±1 dB, 30 Hz – 15 kHz.*
- *Low profile plug-in (24000 series) manufactured to MIL-T-27 (TF5R21ZZ).*
- *Because of gapless laminations, unbalanced DC current should be avoided.*
- *Typical distortion of 1% at power level of 0 dBm (1 Milliwatt), 30 Hz – 15 kHz. If the low frequency is raised, the power level for 1% distortion is as follows:*

50 Hz	-	3 Milliwatts (4.7 dBm)
100 Hz	-	10 Milliwatts (10 dBm)
300 Hz	-	150 Milliwatts (21.7 dBm)

For immediate engineering assistance or to place an order—
Call Toll Free 800-228-9747

All units have two extra thick mu-metal shields.

Delivery-Stock to 1 week

Modification of standards 9 days!

S	.52	.75	.6	.475	.020 (.51)
T	.82	.75	.6	.475	.020 (.51)

FEATURES
- 400 Hz Aerospace Application
- Smallest Possible Size
- Printed Circuit Plug-In Construction
- Secondary Has Split Winding (Secondary can Be Used at Half Voltage Twice the Current.)

SPECIFICATIONS
- Manufactured to MIL-T-27 (TF5S03ZZ)
- 90°c Ambient
- Input Primary 115v-400 Hz ±20 Hz or 26V-400HZ-±20 Hz (Your Choice-Just Choose The Proper Part No.)
- Regulation is 24% (T Units Have Regulation of 17%)
- Secondary Voltage Adjusted to Nominal Value at Half Load.

SPECIFICATIONS

- **MIL-T021038:** ..... All units manufactured to MIL-T-21038
- **DIELECTRIC STRENGTH:** ..... All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** ... Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** ..... 1.6 Grams
- **OPERATING TEMPERATURE:** -55°c to +105°c (All Units Can be Supplied to Class S Requirements, +130°c maximum).
- **TERMINALS:** ..... Solid .012 Diameter Conductor. Solderability per MIL-STD-202 Method 208.
- **THERMAL SHOCK:** ..... 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1.

THIS PRODUCT IS PATENTED

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- BUILT TO MIL-T-21038
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

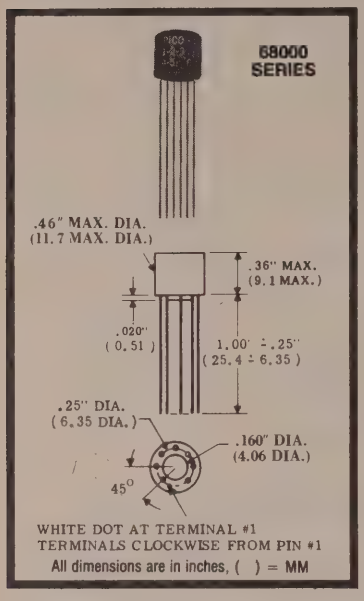
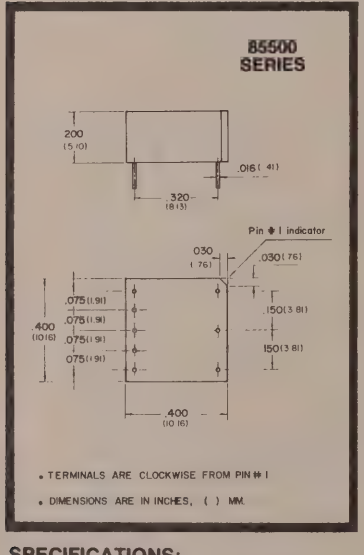
MIL-STD-1553 Interface Transformers Multiplex Data BUS Pulse Transformers





SPECIFICATIONS:

- Units manufactured to MIL-T-21038 and MIL STD 1553
- IMPEDANCE ..... greater than 3KΩ over the band from 75kHz to 1MHz
- DROOP ..... 20% max.
- OVERSHOOT ..... 1V peak
- COMMON MODE REJECTION (CMR) greater than 45dB.
- DIELECTRIC STRENGTH: ..... All Units Tested at 200 V RMS.
- INSULATION RESISTANCE ..... Greater Than 10,000 Megohms at 300 V DC.
- WEIGHT: ... PLUG-IN 4 Grams. SURFACE MOUNT 5 Grams.
- OPERATING TEMPERATURE: ..... −55°c to +130°c).
- TERMINALS: ..... Solid .012 Diameter Conductor. Meet solderability per MIL- STD-202 Method 208

These pulse transformers manufactured to MIL-STD-1553 COMMAND/RESPONSE MULTIPLEX DATA BUS requirements. They also are manufactured to MIL-T-21038 specifications and are designed to meet MAC AIR SPECIFICATIONS A3818, A5690, A5232 and A4905.

All of these transformers exhibit superior electrical performance. Common mode rejection ratio is greater than 45dB at 1 MHz. Input impedance is greater than 3000 ohms over the band from 75 kHz to 1mHz at 1V rms. This series possesses exceptional waveform integrity: Rise time and fall time is less than 100 nanoseconds. Overshoot and ringing is less than ± 1V peak. Droop is less than 20%.

QPL Standards

These Units Meet MIL-T-21038/27C, Type TP7SXNNNNKZ

SPECIFICATIONS:

- These units are in strict compliance to MIL-T-21038/27C, type TP7SXNNNNKZ
- IMPEDANCE . . . . . Minimum value shown in table. These values will be met from 75 kHz to 1MHz over temp. range of −55°C to +130°C
- DROOP . . . . . 20% max.
- OVERSHOOT . . . . . 1V peak
- COMMON MODE REJECTION (CMR) 45dB minimum
- DIELECTRIC WITHSTANDING . . . . . 100 VRMS
- INSULATION RESISTANCE . . . . . 1K meghoms min. at 100 VDC
- WEIGHT. . . . . 5 grams max.
- CASE. . . . . epoxy

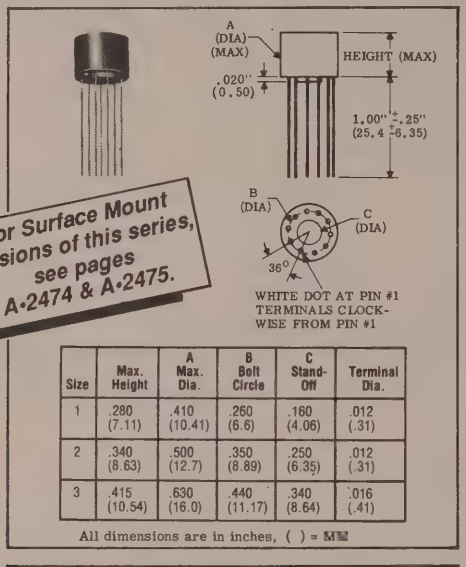
Ultra Miniature DC-DC Converter Transformers

Input Voltages of: 5V, 12V, 24V and 48V

Power Levels up to 40 Watts

All units are magnetically shielded

All units can be supplied with higher or lower output voltages. Delivery- stock to one week, special voltages 9 days.



For Surface Mount Versions of this series, see pages A•2474 & A•2475.

All dimensions are in inches, ( ) = MM
Note: Sizes 5 and 6 - pins 5, 8 and 9 are omitted

FEATURES

1) Units can be used as self-saturating or for linear switching applications. Operation over ambient temperature range from —55° to +105°c. All units manufactured to the requirements of MIL-T-27 (TF5S40ZZ)
2) All units can be supplied with higher or lower secondary voltages at the same power levels.
3) Secondary can be connected for full-wave bridge or dual bridge.
4) All units are magnetically shielded.

MINIATURIZED SWITCH MODE INVERTER TRANSFORMERS

50KHz-150KHz / 10 Watts-60 Watts

Engineers are increasing the frequency of operation in DC-DC Converters for higher power applications. The availability of power MOSFETS which do not exhibit some of the problems encountered with the bi-polar transistors help to ease the Designer's task. For this reason Pico has developed a series of standard 50KHz to 150KHz transformers for use in push-pull circuits.

For low power applications please consider our self saturating transformers shown on pages 20 and 21 which offer many advantages.

For your custom design applications please contact the Factory.

All dimensions are in inches, ( ) = MM

FEATURES:

- ***Frequency Range 50KHz–150KHz***
- ***Ultra-Miniature Size***
- ***MIL-T-27***
- ***Can be used for both MOSFET and Bi-Polar drives***
- ***Magnetically Shielded***
- ***LITZ Wire for Maximum Efficiency***
- ***Special units can be supplied with higher or lower secondary voltages, addition of extra windings and taps, smaller size***

SPECIFICATIONS:

- Frequency Range 50KHz–150KHz
- 20 volt input corresponds to 45% duty cycle (i.e. 4.5μsec on time per pulse for 100KHz operation). Units have been designed with an additional 1 volt output to account for losses in switchers, transformer, rectifier and filter.
- MIL-T-27
  All units manufactured to MIL-T-27 and are hermetically sealed in a metal case, Type TF5S03ZZ
- Magnetically Shielded
- Operating Temperature ..... −55°C to +90°C
- Dielectric Strength ..... 500V RMS
- Insulation Resistance ..... Greater than 10,000 Megohms at 500V DC
- Thermal Shock ..... 25 Cycles, Method 107C, MIL-STD-202D. Test Conduction A-1

PUSH PULL CONVERTER

20 Volt input corresponds to 45% duty cycle (i.e. 4.5μsec on time per pulse for 100KHz operation). Units have been designed with an additional 1 Volt output to account for losses in switcher, transformer, rectifier and filter.

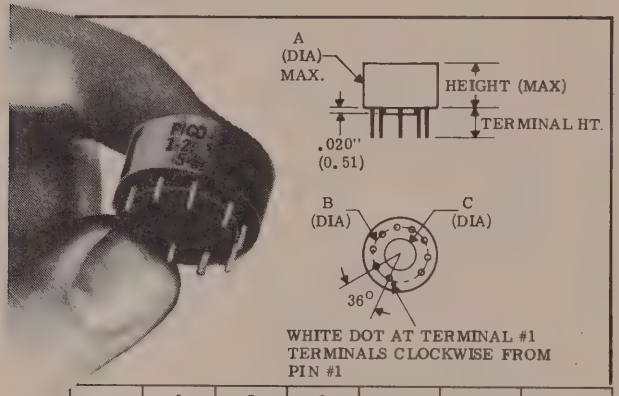
MINIATURE FLYBACK CONVERTER TRANSFORMERS

10 Watts - 50 Watts / 50KHz - 100KHz

FEATURES:

- ***Frequency Range 50KHz–100KHz***
- ***Ultra-Miniature Size***
- ***MIL-T-27***
- ***Magnetically Shielded***
- ***Special units can be supplied with higher or lower secondary voltages, addition of extra windings and taps, smaller size***



Size	Max. Height	A Max. Dia.	B Bolt Circle	C Stand-off	Terminal Dia.	Terminal Ht.	Wt. Nominal (Grams)

All dimensions are in inches, ( ) = MM

These Transformers are used in flyback converters where from a wide range of input variation a regulated output is obtained. Circuit simplicity and multiple isolated outputs are some of the advantages of this topology.

All units can be supplied with higher or lower secondary voltages. Additional windings, taps or lower power are also available.

For low power applications please consider our self saturating transformers shown on pages 24 and 25 which offer many advantages.

For your custom design applications please contact the factory.

SPECIFICATIONS:

- Frequency Range 50KHz–100KHz
- MIL-T-27
  All units manufactured to MIL-T-27 and are hermetically sealed in a metal case, Type TF5S03ZZ
- Magnetically Shielded
- Operating Temperature .... −55°C to +130°C
- Ambient Temperature ..... −55°C to +90°C (full power)
- Dielectric Strength ..... 500V RMS
- Insulation Resistance ..... Greater than 10,000 Megohms at 500V DC
- Thermal Shock ..... 25 Cycles, Method 107C, MIL-STD-202D. Test Conduction A-1

TOROIDAL TRANSFORMERS

CUSTOM QUOTES WITHIN HOURS
PROTOTYPES WITHIN DAYS

THE TOROIDAL ADVANTAGE

HIGH ELECTRICAL EFFICIENCY

The continuously wound core of the toroidal transformer has no air gap, resulting in a stacking factor of 95% of its theoretical weight. Since all the windings are symmetrically spread over the entire round gapless core, a higher flux density is possible (toroidal transformers operate at flux densities of 16 to 18 kilogauss, while traditional laminated transformers operate at 12 to14 kilogauss). The magnetic flux is in the same direction as the grain oriented silicon steel core, thus achieving very high electrical efficiencies. Typical efficiency figures for toroidal transformers are 95%. Also, because of low magnetizing current, a toroid requires only 10% of the off load power required by conventional transformers.

SMALL SIZE AND WEIGHT

A product of the high efficiency of toroidal transformers is reduced size and weight. Typically 50% lighter and smaller than conventional laminated transformers. Furthermore, the diameter to height ratio of a toroid can easily be varied (as long as the cross sectional is held constant) to suit the mechanical design - great for low profile equipment.

LOW STRAY MAGNETIC FIELDS

Toroids have no air gaps, and windings are uniformly wound around the core, which results in insignificant amounts of magnetic radiation. This eliminates the need for special shielding and makes toroidal transformers especially suitable for applications in sensitive electronic equipment, such as: low level amplifiers, medical equipment, and CRTs.

REDUCED TRANSFORMER HUM

The absence of an air gap typically provides an 8:1 reduction of induced noise. In addition, the windings enveloping the core effectively reduce magnetostriction — the main source of the familiar 'hum' found in standard vertically laminated transformers.

LOW OPERATING TEMPERATURE

PLITRON toroids have Fe losses measured typically as 1.1 w/Kg. These low losses provide cooler operating temperatures and low magnetizing current.

EASY TO MOUNT

A single center screw quickly and easily mounts a toroidal transformer. Compared to laminated transformer mounting, this cuts down on parts as well as assembly time in your product.

PLITRON PRODUCTS

STANDARD POWER TRANSFORMER LINE

A broad range of high quality, UL and CSA approved, toroidal transformers. Designed for general purpose applications (specifications on facing page).

OEM POWER TRANSFORMER LINE

An economy version of the Standard Line. UL and CSA approved. Single, dual or multi-tapped primaries. 50 to 1500 VA.

ISOLATION TRANSFORMERS

A standard line of transformers to electrically isolate equipment from line. Medical (UL544, IEC601) and Commercial series.

AUDIO OUTPUT TRANSFORMERS

A standard line of output transformers for sound distribution. PLITRON has also developed a wide range of custom audio output transformers, including tube output.

CUSTOM TRANSFORMERS

Computer-aided design solutions for your demanding applications. To 10kVA.

TOROIDAL TRANSFORMERS

UL Recognized and CSA Approved

STANDARD POWER TRANSFORMER LINE

PLITRON MANUFACTURING INC

DESCRIPTION

The Standard Power Transformer Line of toroids is characterized by its tight regulation, for applications where off load voltages are a concern; and very low temperature rise, which is useful for high ambient operating conditions, or where instantaneous power - in excess of rating- is required.

APPROVALS

All standard line products are UL recognized and CSA approved, and carry the respective labels.
UL file number E110277 for class A insulation systems. CSA file number LR-84566 to C22.2 #66-1982, General Requirements, Canadian Electrical Code, part II; and C22.2 #66-1988, Specialty Transformers Standard.
In addition, 50 Hz transformers are constructed to the commercial requirements of European approval agencies, such as VDE. Primary leadouts are double insulated.

INPUTS

Type A: 117 VAC at 60 Hz.
Type 7: Dual 115 VAC windings, series or parallel connected for 115 or 230 VAC at 50 / 60 Hz.
Type 5: Dual 0-100-120 VAC windings, series or parallel connected for 100, 120, 220 or 240 VAC at 50 / 60 Hz.

INSULATION

Primary to secondary: Polyester tape - class B (130°C), three layers minimum. Meets the test requirement of >2.5 kV for 1 minute, 50 Hz transformers: >4 kV.
Interwinding secondary (where required) and outer insulation: Polyester tape, two layers minimum.

TEMPERATURE RISE

Maximum 40°C. At maximum rated load, continuous.

The part number above, 08A026000, would describe a 500 VA transformer with 117 VAC @ 60 Hz input; 2 x 40 VAC outputs @ 6.25A each; standard mounting hardware; and no options.

OUTPUTS

See output table of part number code.
Dual secondaries are bifilar wound where possible for optimum coupling, and theoretically perfect balancing.

OUTPUT TOLERANCE

Better than 3%, at full load.

LOAD REGULATION

See VA rating / Regulation chart in figure 3, part number code. Figures given are for 60 Hz operation, for 50 Hz operation figures increase slightly. Consult factory.

MOUNTING

Standard: supplied with 1 steel cup disk, 2 neoprene washers, a bolt, nut and flat washer.

Potted Center: Epoxy compound potted center, drilled. Supplied with base insulating washer.
Vertical Bracket: supplied mounted to a steel bracket with standard hardware.

LEADS

Standard: Magnet wire self leads are PVC sleeved (surface printed UL VW-1, CSA 105°C) .031 wall. Stripped 6mm. Finished length: 200mm.
Optional*: Stranded tinned copper wire (CSA TEW, UL-1015, 105°C). Stripped 6mm. Finished length: 350mm.

THERMAL PROTECTION

Optional*: Normally closed thermal switch in series with primary, auto resetting, *or* a one shot thermal fuse. In series with primary for 60 Hz transformers. Separate lead outs for 50 Hz units, insulated stranded wire (yellow/green). Both open at 120°C core temperature. UL, CSA listed components.

ELECTROSTATIC SCREEN

Optional*: To reduce capacitive coupling, and/or create a physical barrier, between primary and secondary. Copper foil laminated between polyester tape. Wound over primary. Terminated at one end by insulated stranded wire (green / yellow).

MAGNETIC SHIELD

Optional*: To attenuate stray magnetic fields. Multiple layers of grain oriented silicon steel laminated between insulation. Wrapped around circumference of transformer. Increases OD by approx. 1mm.

* OPTIONS

Items marked * (screens, shields, thermal switch, and stranded leads) are subject to a minimum order of 10 units.

MECHANICAL

Typical size and weights listed in the chart left are for 117 VAC 60 Hz transformers. For 50 Hz transformers, size and weight increase slightly.

PREMIER MAGNETICS NETWORKING & TRANSFORMER PRODUCTS

Premier Magnetics Incorporated offers a broad line of standard products along with the most responsive engineering services available. Our capabilities range from high volume commercial products to high reliability military devices. Premier Magnetics committment to Quality, Service and Support provides cost effective solutions for the most demanding custom or standard applications. Premier Magnetics maintains a Quality System in compliance with ISO 9002 as well as the requirements of MIL-I-45208A.

For detailed information on Premier Magnetics Networking Solutions, Transformers, Delay Lines and DC/DC Converters please contact the factory for our full line product catalogs and application manuals.

DESCRIPTION:

Powertronix Standard Toroidal Power Transformers are designed for step-down voltages or for use in transformer rectifier and filter circuits.

SAFETY APPROVALS:

UL 506 (File # E142730)
CSA 22.2, No. 66 (File # LR 78662)

SPECIFICATIONS:

Primary: 2 x 117 Volt, 50/60 Hz
Secondary: Dual windings, which can be connected in series or parallel
Power: 18 - 1,100 VA
Hi-pot: 4,000 VAC RMS
Mounting: One metal disk and two rubber gaskets included with each transformer.

POWERTRONIX

CUSTOM MADE TOROIDAL POWER TRANSFORMERS

DESCRIPTION:

Powertronix Custom made Toroidal Power Transformers are designed and made according to customer specification.

MOUNTING:

- One metal disk and two rubber gaskets
- Center-potted with a thru-hole
- Encapsulate in a round can
- Assembled between two mounting plates

LEAD TERMINATIONS:

- Solid wires in a sleeving
- Stranded flexible wires
- Leads terminated with AMP, MOLEX, CORCOM or other customer specified terminals

SPECIFICATIONS:

- **Power:** 18 VA – 10,000 VA
- **Frequency:** 47 Hz – 2,000 Hz
- **Primary:** Customer specified
- **Secondary:** Customer specified
- **Efficiency:** 98% – 85%
- **Isolation:** 4,000 VRMS
- **Creepage:** Minimum 8 mm
- **Temperature rise:** Customer specified
- **Voltage tolerance:** Better than 3%

SAFETY APPROVALS:

- UL 506 (File # E 142730)
- UL 544 (File # E 151895)
- CSA 22.2, No. 66 (File # LR 78662)

POWERTRONIX

TOROIDAL TRANSFORMERS

UL544

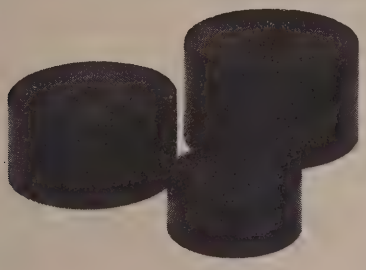
MEDICAL ISOLATION TRANSFORMERS

SPECIFICATIONS:

- **Input:** 2 x (0-100-120) Volt, 50/60 Hz
- **Output:** 2 x 120 Volt
- **Power:** 100 VA – 10,000 VA
- **Isolation:** 4,000 VRMS
- **Leakage current:** < 50 uAmps
- **Overtemperature Protector.**

SAFETY APPROVALS: UL 544 (File # E 151895)
CSA 22.2, No. 66 (File # LR 78662)

SAFETY COMPLIANCE: IEC 601-1, VDE 750, CSA 22.2 No. 601.1



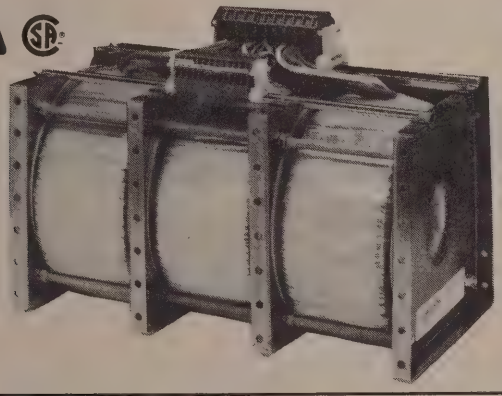
ENCAPSULATED AUDIO POWER TRANSFORMERS

SPECIFICATIONS:

- **Power:** 18 VA – 1,200 VA
- **Size:** Diameter = 2.6" – 7.0"
  Height = 1.6" – 7.0"
- **Input:** Customer specified
- **Output:** Customer specified

FEATURES:

- Ultra Low Noise
- Ultra Low Output Impedance

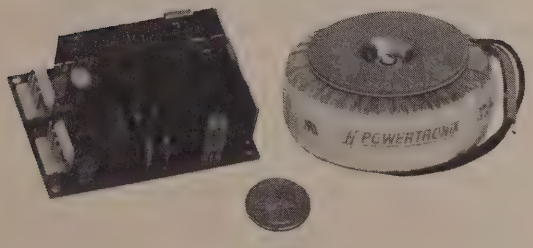


3 PHASE TOROIDAL POWER TRANSFORMERS

SPECIFICATIONS:

- **Power:** 300 VA – 30,000 VA
- **Input:** Customer specified
- **Output:** Customer specified
- **Mounting:** Assembled or separate

SAFETY APPROVALS: UL 506 (File # E 142730)
CSA 22.2, No. 66
(File #LR 78662)



MODULAR AC-DC CONVERTERS

SPECIFICATIONS:

- **Power:** 15 W – 335 W
- **Input:** 2 x 117 Volt, 50/60 Hz
- **Output:** 5 VDC, 12 VDC, 15 VDC, 24 VDC and 28 VDC
- **Current:** 3 ADC, 5 ADC and 12 ADC
- **Size:** 2.3" x 3.3" x 1.5"

FEATURES:

- Short circuit proof
- Current limited
- Low current shut down

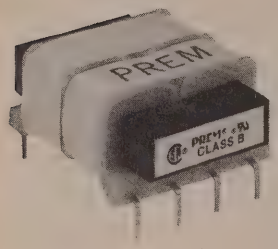
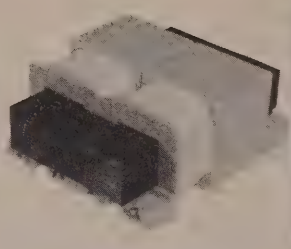
Prem International Series

Low Profile, Interchangeable, VDE-Approved PC Power Transformers



SPW-300



SPW-2300

SPW-2300 Series*	—	UL - #1950, #1446, #1585 (Class II & Class III)
	—	VDE - #0805
	—	IEC - #950
SPW-300 Series	—	UL - #506
	—	CSA - 22.2#66-1988 General Purpose

* Approvals Pending

Prem Magnetics, Inc., is proud to announce the introduction of its latest series of Low Profile Printed Circuit Power Transformers. The SPW-2300 Series is rated at 12.0 VA and has outputs ranging from 5.0 VAC to 230 VAC. This series is interchangeable with Prem's SPW-300 (and its competitors') series, having the same pin-out, physical dimensions, and electrical ratings.

Designed for International markets, approvals are pending for IEC 950, VDE 0805, UL 1950 and UL 1585 Class II and III standards.

The SPW-2300 Series transformers, like all Prem products, feature quality construction and design. In addition to shrouded primaries, each transformer has insulating anchor and crossover tapes. Each Prem unit is totally immersed in 100% solids epoxy to withstand aqueous and solvent PC board cleaning systems.

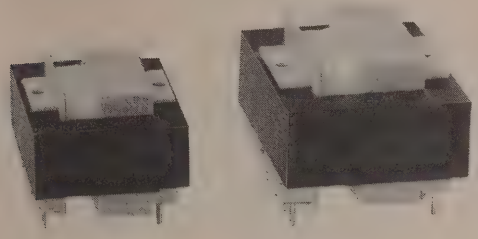
Prem International Series



International Series

(Listed by UL, CSA, IEC and VDE)

UL —#1950, #1446, #1585 Class II, III
VDE —#0805
IEC —#950
CSA —22.2 No. 66-1988 General Purpose

Construction

Primary Voltages:
Pins 1-2 3-4
115/230 Volts 50/60 Hz

We never compromise on any design feature that might cause you quality problems down the road. This new series of Prem PC power transformers has anchor, insulating and crossover tapes as well as shrouded primaries. Our transformers are not bifilar wound, but have two distinct, separate windings for each primary and each secondary assuring an excellent dielectric HIPOT capability between these dual windings. Prem units are totally immersed in 100% solids epoxy, resulting in capability to withstand aqueous and solvent cleaning systems. All this at a price below our competition means more value for your money!

Testing

All of Prem units are 100% final tested on automated panels for induced voltage (short turns), exciting current, open circuit voltage (turns ratio), polarity (phasing) and dielectric strength. This International Series also undergoes a **4500 VRMS Dielectric Strength (HIPOT).**

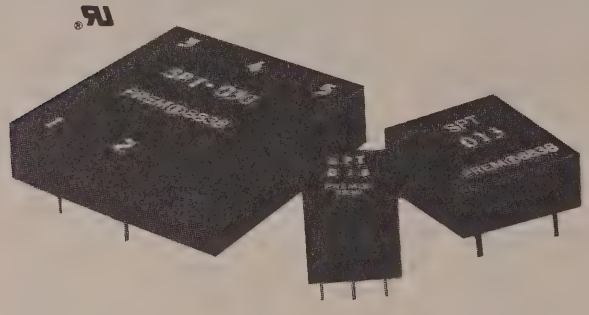
Prem's New Line of British Standards Institute (B.S.I) Approved Telephone Interconnect Transformers

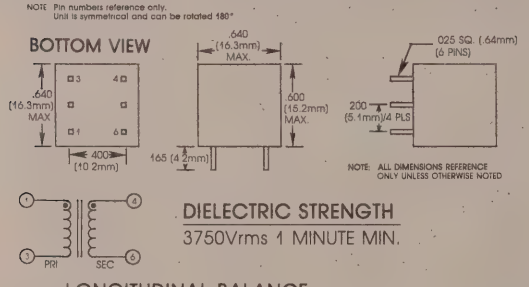


Other manufacturers may offer to ***design for*** B.S.I., but our new series of telephone interconnect transformers is ***already approved by*** the British Standards Institute (B.S.I.).

Designed for voice and data applications in the British market, these transformers also meet Canadian (D.O.C.) and United States (F.C.C.) requirements.

SPT-015

B.S.I. CERTIFICATE NUMBER AVAILABLE UPON REQUEST



DIELECTRIC STRENGTH
3750Vrms 1 MINUTE MIN.

LONGITUDINAL BALANCE
60dB/MIN. 200-4000Hz PER IEEE STD. 455-1985

TOTAL HARM. DIST. @ 300 Hz .1% TYP.

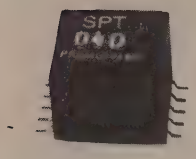
Surface Mount Technology

New Telephone Interconnect Transformers for Surface Mount Technology (SMT) Applications



SPT-040

SPT-042

Both the SPT-040 and the SPT-042 meet United States (FCC) and Canadian (DOC) Standards. In addition, the SPT-040 has received certification to the latest issue of the BSI (British Standards Institution) standard BS 7002 as well as the harmonized pan-European standard EN 60 950. Additionally, the SPT-040 has been certified as meeting the saturation test requirement specified in the BS 6301 (B.S.I.) standard.

Both have impedance ratios of 600 ohms to 600 ohms and are designed for "dry" (0 DC) circuits. HIPOT rating for the SPT-040 is 3750 VRMS and is 1500 VRMS for the SPT-042. Both units utilize the gull-wing lead style and offer small package dimensions. Both are designed for automated pick and place assembly equipment. Typical weights for the SPT-040 and SPT-042 are 7 and 4 grams respectively.

NOTE: These units are symmetrical and can be rotated 180° without changing the pin-out or electrical performance. Terminal numbers are for reference only.

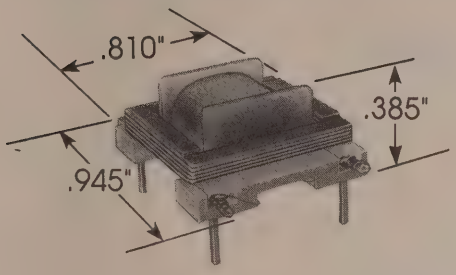
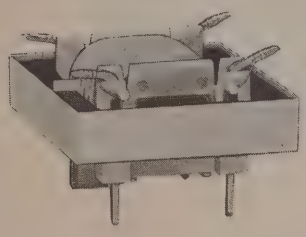
New Sub-Miniature Voice/Data Coupling Transformers

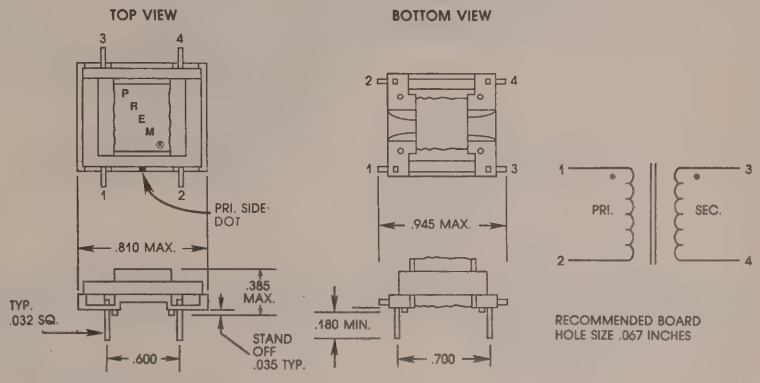


SPT-010 thru SPT-012



SPT-020 and SPT-021

SCHEMATIC



DIELECTRIC STRENGTH

1500 VAC (PRI-SEC-CORE)

LONGITUDINAL BALANCE

MEETS FCC PART 68.310 (a) REQUIREMENTS, SPT-010 AND SPT-011 TESTED AT 0mA DC WITH SEC LOAD OF 600Ω, SPT-012 TESTED AT 30mA DC WITH SEC LOAD OF 470Ω

These transformers are ideal for applications requiring minimal use of pc board area and very low above-board height. The SPT-010 and SPT-011 are both dry (ODC 600Ω:600Ω) coupling transformers with excellent performance for voice and data applications. The SPT-012 has an impedance ratio of 600Ω:600Ω with a DC current rating of 30mA for data applications. The SPT-020 and SPT-021 are for data applications only. All four parts meet FCC Part 68 dielectric strength and longitudinal balance requirements

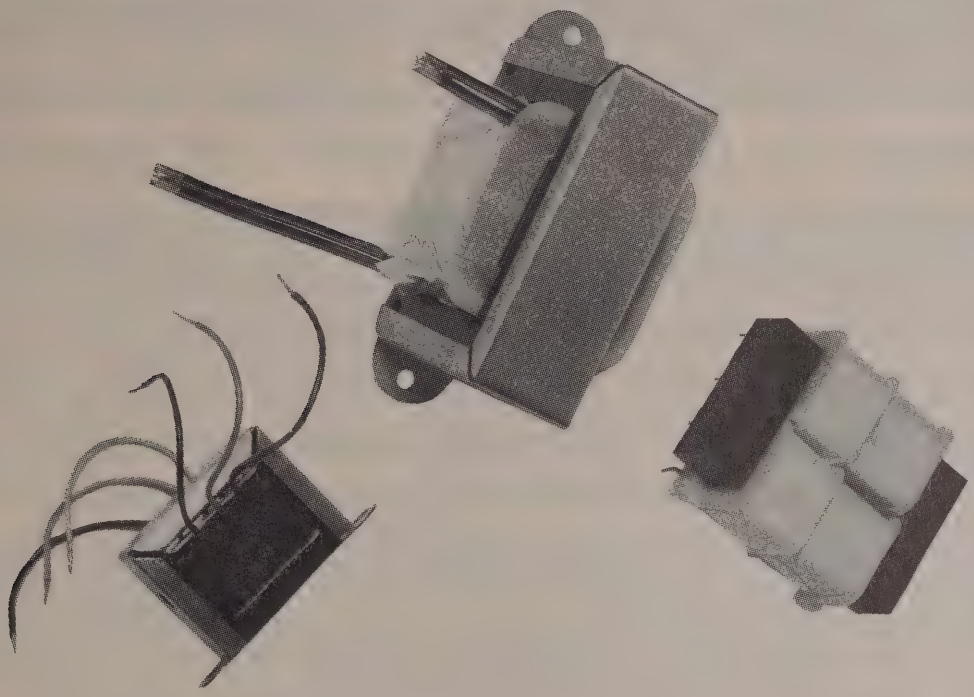
Custom Products



Custom Transformers at Factory Direct Prices

At Prem, we design and produce top quality custom power transformers, inductors and telecommunication magnetics.

We have one of the most experienced and innovative Engineering Departments in the industry. Our engineers have a depth of first-hand experience and can design a competitively priced custom part to meet your specific requirements. They have designed to meet safety standards at home and around the world.

Through a low overhead operation and multiple manufacturing facilities, we are able to set the most rigid quality standards in the business and still produce components at very competitive prices.

- Pot core assemblies
- Horizontal oscillator and drive transformers
- Toroidal assemblies
- Miniature transformers
- Telephone coupling transformers
- High current inductors
- Specialty power transformers
- Linearity and width coils
- Power transformers

We'd like to quote a component for your application. Call our Technical Service Manager at 815-385-2700, or FAX us your specifications at 815-385-8578.

For further information, pricing and delivery, contact Prem's Sales Services Department

RENCO ELECTRONICS, INC.

Since 1955

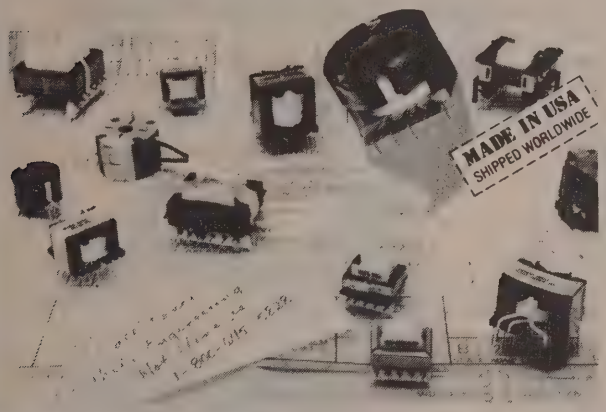
"Precisely Your Best Choice"

MADE IN USA

We Are A TQM Company

Custom Transformers. Nothing standard but the price. All sizes, all core shapes, all frequencies.

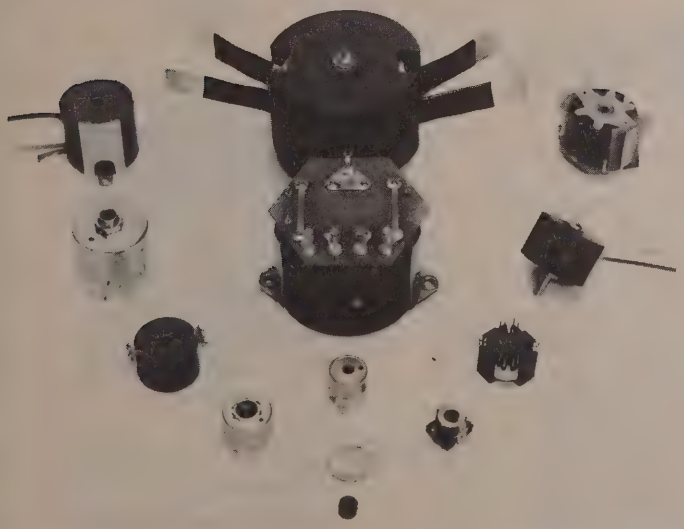
1994 OUR 39th YEAR



With over three decades of experience, we know how to supply precisely the best custom transformer designs at standard prices. We can supply transformers to meet: UL, CSA, VDE and MIL standards. No matter what your core material or wire size is, you can have a No Charge sample in your hands in a week to 10 days. Our transformers are manufactured with robotic assistance to assure quality and keep cost down. Tell us what you need or are currently making and we'll make it for you, most likely at a lower cost.

Renco makes it easy. FAX or mail your specifications now. Call our toll free Engineering Hot Line 1-800-645-5828 for design assistance.

Pot Core Assemblies



Renco has manufactured millions of pot core assemblies since 1955, in the smallest (704 Series), the largest (7042 Series), and every size in between.

Renco is thoroughly experienced with all standard cores and hardware such as; Ferroxcube, Siemens, TDK, Magnetics Inc., Indiana General, Etc. We stock all the popular bobbins including printed circuit types.

Let us assist you with your upcoming pot core designs. We have a fully independent sample and prototype department. Prototypes are usually shipped within 10 days or less.

Send us your existing specifications and designs for pot cores, inductors and transformers. Renco will promptly respond with very competitive prices. We have a reputation for keeping our delivery promises. Try Us!

Transformers That Meet European Safety Standards At American Off-The-Shelf Prices.

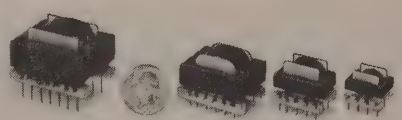
Our "Made in U.S.A." high throughput switchmode transformers operate over a range of 10kHz to 500kHz and meet VDE, TUV, IEC, CSA and UL safety standards. These high efficiency transformers use high technology ferrite cores and high grade UL94-VO glassfilled bobbins designed for low winding losses. The RL-2600 Series can be supplied to meet a wide range of voltages, and currents with power ranges up to 800 Watts. All transformers are UL Class "B" 130°C rated and can be supplied in many drive configurations.

Our large inventory of wire, bobbins and cores assures prompt delivery and off-the-shelf prices.

RL-2600 Series

Four Design Packages Available

Custom Power Supply Transformers- Ferrite Core



This series gives switching power supplies the custom-designed transformers they deserve — at standard prices. We have large stocks of research-selected ferrite "E" cores, and glass-filled nylon bobbins, with which we can quickly meet the specification for your power, driver, interstage, and inverter transformers. Prototypes usually shipped within 10 days.

Wound on custom engineered equipment that ensures conformance to requirements.

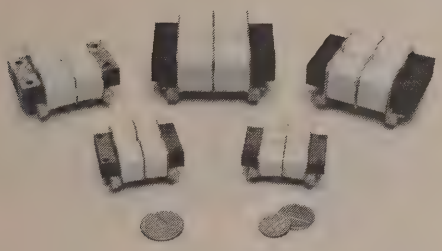
"Precisely Your Best Choice"

MADE IN USA

We Are A TQM Company



This series of rugged low profile transformers is specifically designed for convenient pc board mounting. The low overall height permits close spacing of adjacent pc boards to obtain maximum system density.

Using nonconcentric side-by-side windings reduces the interwinding capacitance and eliminates the need for electrostatic shielding. Semi-toroidal hum bucking construction results in balanced windings reducing EMI. Dual primary windings permit designs for 115/230VAC, 50/60Hz applications. The two independent secondary windings offer the flexibility of series, parallel or two isolated outputs.

These transformers are HIPOT tested at 1500 Volts RMS and are manufactured to Class B 130°C insulation. All transformers are designed to meet UL and CSA specifications.

DUAL/TRAN™ TRANSFORMERS PCB PLUG-IN

1994 OUR 39th YEAR

RENCO ELECTRONICS, INC.
Since 1955
"Precisely Your Best Choice"
MADE IN USA
We Are A TQM Company

The advanced design and manufacturing techniques of using split bobbins and nonconcentric winding of the primary and secondary results in low interwinding capacitive coupling and eliminates the need for electrostatic shielding. It also avoids crossover of primary and secondary leads.

These transformers can be used in a wide variety of applications since they can be supplied with single 115VAC or dual 115/230VAC primaries for 50/60Hz operation. Their split secondary windings allow them to be hooked-up in series, in parallel or they can be used as independent and isolated outputs.

The RL2240 Series is HIPOT tested at 2500VAC and are manufactured to Class B 130° insulation. All transformers are designed to meet UL and CSA specifications.

ALL/TRAN™ INTERNATIONAL SPLIT-BOBBIN TRANSFORMERS

1994 OUR 39th YEAR

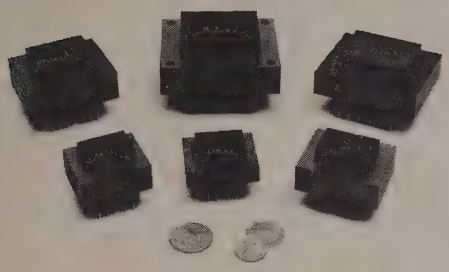
RENCO ELECTRONICS, INC.

Since 1955

"Precisely Your Best Choice"

MADE IN USA

We Are A TQM Company



This series of transformers is specifically manufactured to meet or exceed UL, CSA, VDE and IEC specifications. These transformers incorporate advanced dual bobbin nonconcentric design that reduces interwinding capacitance and eliminates the need for electrostatic shielding. Since the windings are balanced no primary circulating currents are present. Use of high temperature, high stability materials results in excellent interwinding insulation and insulation between windings and core.

Slots in the bobbin flanges eliminate lead crossovers and the need for insulating pads resulting in improved lead termination. This series is PC plug-in mount in power ranges from 2.5 to 56 Volt/Amps. The transformers are HIPOT tested at 4000 Volts RMS and are manufactured to Class B 130° insulation.

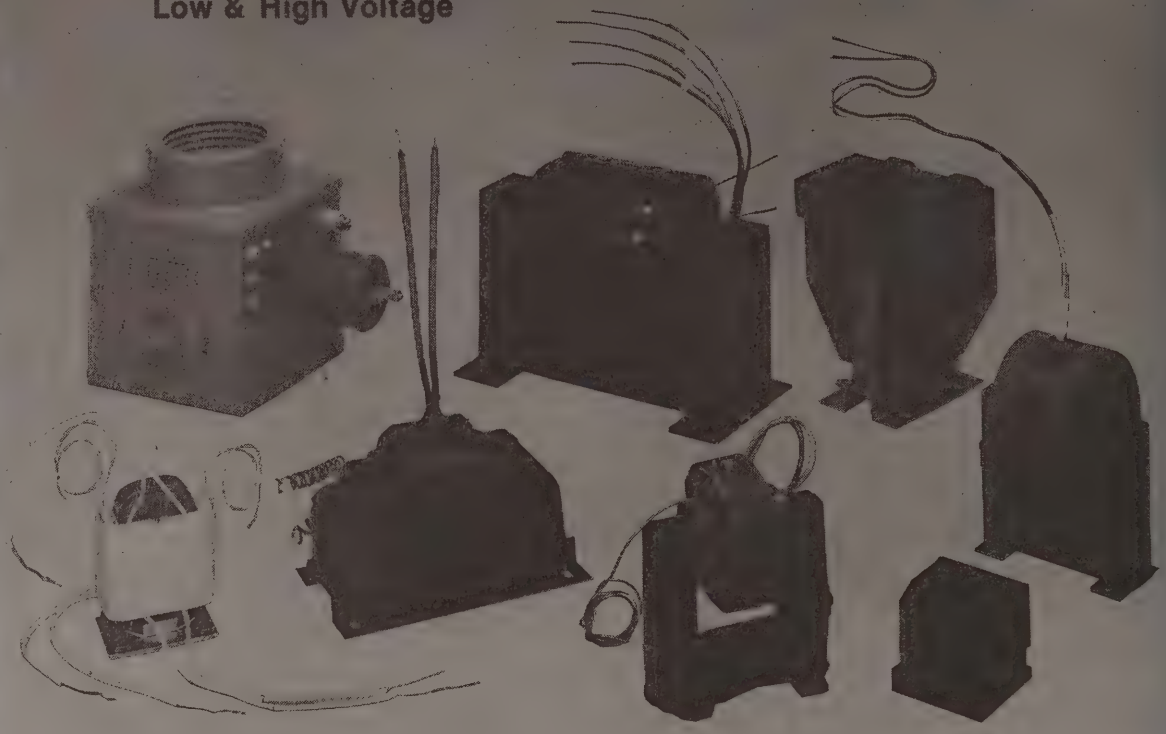
PULSE/POWER MAGNETICS

- **Transformers**
  Medium Voltage High Freq.
  High Voltage High Freq.
  High Voltage Isolation
- **Pulse Transformers**
  Low & High Voltage
- **Filament Transformers**
- **Saturable Reactors**
- **Charging Reactors**
- **Filter Chokes**



FEATURES INCLUDE:

- Epoxy impregnated for up to 30kV dc
- Oil filled hermetically sealed welded constructed to 30 kV and above
- Well suited to applications requiring reliable isolated line voltage at power ratings up to 1kVA
- Electrostatic shield between primary and secondary windings
- Water cooled & oil expansion bellows when required

- Other higher voltage and power units available upon request

Delay Lines & Pulse Transformers

Pulse Transformers and Magnetics

Since 1970, Rhombus Industries has been supplying quality components for Commercial and Military designs. Our capabilities range from the highest volume generic products to custom communication type transformers. Our factory in Southern California has complete process capabilities to expedite the design cycle and provide timely support in critical situations. Because we provide extensive engineering services and prompt sample turnaround (free of charge), Rhombus has been able to address the most demanding requirements for our wide range of customers. Please call one of our application engineers to discuss the details of your requirement.

Contact the factory, or your local representative or distributor to request detailed literature and samples.

SHOGYO TRANSFORMERS AND ADAPTERS

Your design deserves Shogyo quality and reliability.
You deserve...
Shogyo Service...comprehensive, responsive and fast
Shogyo Professionalism...the helpful experience you need
Shogyo Prices...always competitive, usually better
and...
Shogyo Selection...with complete custom design capabilities

Including a diverse offering of UL/CSA approved:

- *Power transformers:*
  standard core sizes from EI-28 to EI-86, Nylon 66, PBT or Phinolic bobbin materials, channel frame or PCB mounting, enclosures with or without endbells, and UL recognized AWM, terminal, or pin connections
- *Double protection power transformers:*
  conform with UL 1411 seven hours construction and abnormal test requirements, 3500V dielectric test voltage
- *Line matching transformers:*
  70.7 and 25 volt, maximum power levels from 2 to 16 watts, standard core sizes from EI-41 to EI-66, and a secondary impedance of 8 ohms
- *Telephone coupling transformers:*
  high quality low insertion loss, core sizes from EI-19 to EI-35, frequency response of 300–3500Hz ± 3dBa, and a secondary impedance of 500, 600, or 900 ohms
- *Lamp ballast transformers:*
  UL 935 listed simple reactance coil type
- *Wall-mount, plug-in adapters:*
  European or American, 120V, 50/60Hz inputs, outputs from 3VDC to 24VDC, 100mA to 1.7Amp, and 0.3 to 14.4 watts

And featuring:

- *PC pin, solder leg mount or lead wire connections*
- *A complete line of mating cords and terminating plug connectors*

STACO ENERGY PRODUCTS CO.

FIG. A

FIG. B

FIG. C

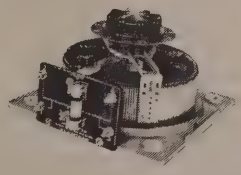

FIG. D

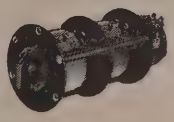

FIG. O

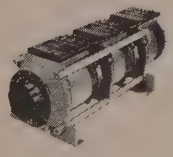

FIG. P

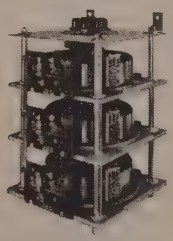

FIG. Q

Staco variable transformers offer versatility and reliability unmatched by solid state voltage controls. Staco contols are used worldwide for industrial and laboratory applications to control voltage, current, power, heat, speed, light and electro-mechanical force. Staco variable transformers provide continuously adjustable output voltage from AC power sources without wave form distortions or SCR generated noise. Outstanding features include gold plated commutators, precise regulation, high efficiency, conservative ratings and rugged construction.

You can select from panel mounted types, cord and plug types, ganged and / or motor driven types, metered types, and fully portable power supplies with or without meters, and ratings from 0.8 amps to 540 amps, 40 volts to 560 volts for single or three phase applications.

Staco has a nationwide network of distributors qualified to offer technical assistance whenever you need it. Additionally, the Staco Engineering Staff is available to help you with special or non-standard applications. Staco's Variable Voltage Controls handbook will be sent to you upon request ...it's loaded with illustrations, engineering data, specifications and ordering information on standard voltage controls.

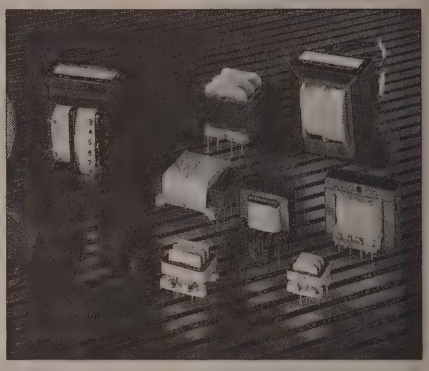
THE SIGNAL WAY OF DOING BUSINESS

Often imitated, but never equaled



The PRONTO PLEDGE 24-Hour Shipping Policy

For over 30 years, Signal has led the magnetic industry. Our innovation, creativity and reliability make Signal one of a kind. We pioneered the industry in the design, manufacture and distribution of transformers and chokes. But we didn't get to be industry leader on our product line alone:

- We sell direct - no intermediary - no additional mark-up
- Largest stocking inventory - over 1,000 different transformers and chokes - in ranges from 1VA to 10 kVA — available **"off the shelf"**
- PRONTO - 24-hour shipments
- Customized J.I.T. programs
- Annual contract program - We'll book your annual requirements, assuring you the most effective volume discounted pricing available
- Safety agency approvals - UL, CSA, VDE, IEC
- Consistent high quality - Our total quality control program utilizes the industry's most modern automated test equipment, to verify that every single unit meets your specifications and our high standards
- Flexibility - Because we use cellular manufacturing dedicated to one project at a time - no one beats our ability to produce high quality product in volume under tight deadlines

Introducing Off-the-Shelf Planar SMPS Magnetics

In keeping with its commitment to leadership in providing tomorrow's magnetics for today's electronic systems, Signal has introduced PLANAR transformers and compatible inductors for switchmode power supplies. Standard versions, available from stock, are designed to plug in to the most frequently used international designs for up to 200 watts of off-line, low voltage SMPS circuits. They are available in one-, two- and three-output configurations with a variety of primary winding complements, to permit easy adjustment to specialized system requirements.

In addition, because of the flexibility of PLANAR construction, it is relatively easy to develop custom variations that accommodate many unique SMPS requirements. Signal's development of PLANAR magnetics could be your opportunity to achieve high power density, high efficiency, and consistent, improved performance at costs in line with your product budget.

signal TRANSFORMER

The American Original.™

Custom Magnetics are our Specialty

At Signal, your input improves our output, especially when it comes to comments, suggestions and requests concerning your custom prototype or production needs. We are committed to satisfying your custom magnetic requirements. With an engineering staff that possesses over 175 years in magnetic design experience, we offer laminated core, toroid core, ferrite core and pot core type units; as well as EE, EI, and planar type transformers and inductors. You will receive consistently high quality, with very competitive pricing, whether your order is for 1 or 25,000 pieces.

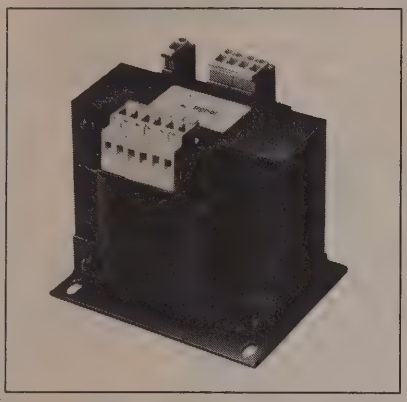
multi-purpose international transformers



FEATURES & BENEFITS

Our new MPI transformers have high performance and international safety characteristics.

Here are some other features that deserve a closer look:

- Higher volumetric efficiency than other 50/60 Hz transformers
- 4000VRMS Hipot
- Regulation – 7.5% or better [dependant on VA rating]
- Low leakage current for medical applications
- 5 mils thick solid copper Faraday shield reduces common mode noise
- Shield terminated to handle high currents
- Incorporate faston/screw type shock proof terminals
- Operate at: 100V, 115V, 200V, 215V, 230V 50/60 Hz
- Pending UL 506, CSA 22.2 # 66 and VDE 0551 (IEC 742) approvals
- Constructed with Class B materials [130°C]

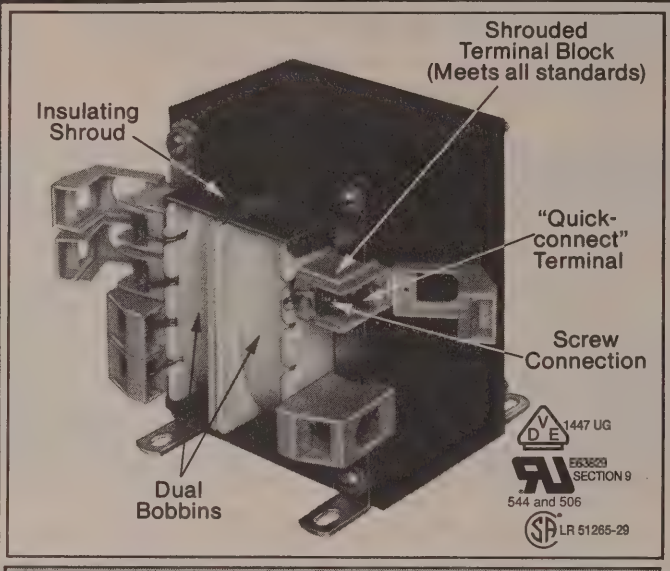
International more-4-less™ high power

GET MUCH MORE PERFORMANCE IN LESS SPACE



Signal's M4L Line is designed with the following "ingredients":

- Grain-Oriented Low Loss, High Saturation Steel
- High Temperature Magnet Wire
- Dual High Temperature Bobbins & Insulating Shroud
- Rugged Dual Terminals (Screw or Quick-Connect) that have international approvals (VDE, IEC, etc.) **AND**
- Superior Electrical & Manufacturing Engineering meeting UL, CSA, VDE, IEC and all international standards.

Which accomplish further savings by:

- Reducing the amount of steel and copper required for a given power rating
- Eliminating hand applied tapes, pads or cross-over insulation
- Reducing winding & lead terminating time.

All of which leads to more:

- Efficiency
- Isolation (4000v RMS TEST)
- Safety Standards (meets UL, VDE, CSA, IEC, etc.)

AND Approximately ⅓ less space & weight. Hence, we call it the More-4-Less Series.

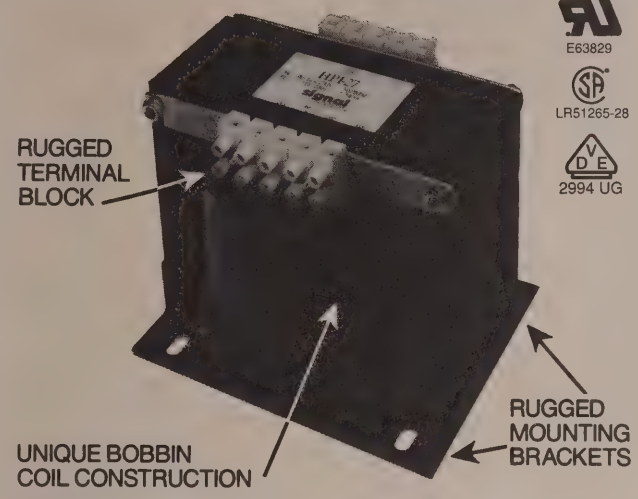
High power international series

GREATER PERFORMANCE IN LESS SPACE AND WEIGHT



E63829
LR51265-28
2994 UG

FEATURES & BENEFITS

- 2kVA, 2.75kVA, 3.5kVA
- Featuring "international" dual primaries with taps @ 100V, 115V and 230V, and dual secondary with 115V and 230V tap
- Excellent regulation @ 5-7%
- Isolation (4000V RMS test)
- Rugged barrier strip terminals and brackets designed to be easily accessible for production line mounting with powered wrenches
- Unique coil construction to meet international standards
- VDE Certification: VDE 0550
- CSA Certification: CSA 22.2 #66
- U.L. Recognition: UL 506
- TUV Pending: IEC 950

*NOTE: Previously this dimension was 1 5/16; now it is 1 7/16.

FEATURES & BENEFITS

- Concentric primary windings and primary cross-over insulation
- Improved side termination design
- All terminations protected by wrap around shroud
- Precise pin alignment for drop-in applications
- Exact pin for pin replacement with previous 14A units
- Plus, all the advantages provided by the previous 14A Series

8325
E63829
LR51265

FEATURES & BENEFITS

- VDE Certification: VDE 0805 Part 100 (IEC 950)
- CSA Certification: CSA 22.2 #66
- U.L. Recognition: UL 506
- Low profile (as low as 0.69")
- Full encapsulation
- Rugged pins
- Screw mounting on all units
- Precise pin alignment for drop-in applications
- Class B insulation (130°C)
- Improved lower regulation
- Unique insulating techniques to meet international standards

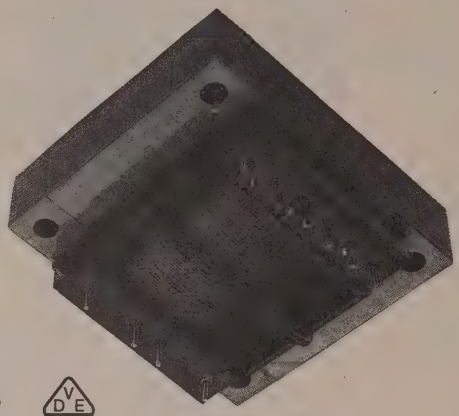
one-4-all transformers... p.c. board for triple-output regulated supplies in (μp) applications

PC BOARD TYPE



LR 51265-35 E63829 SECTION 10 4361 UG

- Dual complementary outputs–with your regulators, ±12VDC and ±15 VDC.
- Additional isolated single output gives you 5VDC after regulation.
- Low noise alternative to multi-output switchers.
- PC board mount has the advantages of Signals one-4-all International Series–isolation and dual bobbin construction.
- UL recognized UL506
- VDE Certification: VDE 0805 Part 100 (IEC 950)
- CSA Certification: CSA 22.2 #66

* Available from Signal: Part No. ST-MS (Screw) & Part No. ST-MN (Nut).
† Size 7 has 4 mtg. holes on 2 3/16 x 1 3/4 centers for a #6 screw. Need not be nylon.

"Split-Tran" transformers combine the best features of our "2-4-1" Series and Signal's pioneering line of pc board miniature transformers.

The use of a "split bobbin" allows the primaries and secondaries to be wound non-concentrically, i.e., side by side rather than one over the other. This results in cost savings and superior performance, namely:

- High isolation — **2500V** hipot is standard.
- Low capacitive coupling — no electro-static shield necessary.
- Less manufacturing time — no cross-overs of primary and secondary leads.
- PC pins — allow direct insertion in PC boards.
- Class S insulation — 130°C.

Each transformer is available with single 115V or dual 115/230V primaries. In addition, secondaries are split so that they can be series or parallel connected.

Special variations will be quoted and shipped promptly.

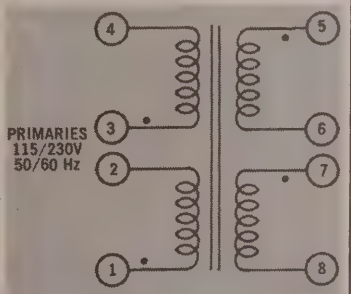
Signal expanded its Flathead® Series because of the trend toward higher power usage on PC boards. Two larger sizes (24 and 48 VA) are now available.

Basic design, layout and construction specifications have not changed. The only exception is that more rugged plug-in pins, using square wire, have been incorporated in order to properly handle the weights and currents required.

(See mechanical drawing for correct footprint)



Regulation of size 2 and 6 units is 30%; size 12 units is 20%; size 24 and 48 units is 15%; i.e., no load-secondary voltage is 15% higher than full load.

LOW PROFILE: Allows ¾″ card spacing for 2.5va units, 1 inch card spacing for 6va units, or 1¼″ inch card spacing for 12va units, 1½″ inch card spacing for 24va and 1⅝″ inch card spacing for 48va.

DUAL PRIMARIES: 115/230v, 50/60 Hz.

NON-CONCENTRIC WINDING: Where secondary is wound alongside primary rather than directly over it. This added isolation reduces inter-winding capacitance and **eliminates the need for an electro-static shield.**

1500V. RMS HIPOT: Is standard because of the advantage of non-concentric windings.

HUM-BUCKING CONSTRUCTION: (Semi-toroidal) results in reduced radiated magnetic field and balanced windings.

The LP line of transformers is ideal for low height, critical pc board power applications in semi-conductor control and instrumentation. They are used extensively in single or dual output dc supplies and isolated control circuit and reference supplies.

Explanation of part number series 241 Size-4 Sec. Volts - 36 Prefix "DP" used for dual primary versions

METHOD OF DETERMINING SECONDARY CURRENT RATINGS

The secondary currents shown in the tables are RMS ratings. Depending upon rectifier circuit configurations, the RMS secondary current is different than the DC output current. This is indicated in the chart below:

Rectifier Type	Filter Type	RMS Secondary Current Is
Full Wave Center-Tap	Choke Input	= 0.7 x DC Amps
Full Wave Center-Tap	Capacitor Input	= 1 to 1.2 x DC Amps
Full Wave Bridge	Choke Input	= DC Amps
Full Wave Bridge	Capacitor Input	= 1.6 to 1.8 x DC Amps

For example, in a F.W. Bridge circuit with a capacitive filter, if the load is 1 Amp DC, the RMS Secondary current is 1.6 to 1.8 Amp RMS.

p.c. board transformers for triple-output regulated supplies

IDEAL FOR MICROPROCESSOR APPLICATIONS

"MP" types have been developed specifically for use in triple-output regulated DC supplies that are commonly used in **Microprocessor Circuits** and other logic, op-amp combinations. Two output combinations have been provided, namely 5V and ±12V, and 5V and ±15V.

All "MP" units are rated in terms of the final **DC** output after a standard three terminal IC regulator. They are designed to provide these outputs with AC line inputs of 100 to 130V 50/60 Hz (or 200 to 260V for nominal 230V lines).

Two basic mechanical configurations are available. Standard PC types (MPC or DMPC) are tested to pass 1500V RMS hipot. Optional mounting brackets are available. MPL types are based on Signal's "flat-head" style and feature low profile, 115/230V primaries, hum-bucking construction, 1500V RMS hipot and the advantages of non-concentric winding (low inter-winding capacitance, high isolation, and no need for an electro-static shield).

All MP's are stocked in depth for immediate delivery. In addition, special variations can be supplied with reasonable delivery times.

BLACK DOT ON LABEL INDICATES POSITION OF TERMINAL #1.

"2-4-1"™ style split-bobbin transformers for triple-output (µp) applications (type MT)

Signal has extended its line of triple-output transformers for microprocessor applications with three new sizes rated to 100VA (35 watts DC regulated). Similar to the split-bobbin design used in Signal's "2-4-1" series, the chassis-mounted style allows for these new higher power applications.

Two output combinations are provided: 5V and ±12V; and 5V and ±15V. Designated "MT" (single primary) and "DMT" (dual primary), these transformers are rated in terms of the final DC output after a 3-terminal IC regulator. They are designed to provide these outputs with AC line inputs of 100-130V, 50/60 Hz (or 200-260V for nominal 230V lines). All auxiliary components required to complete the DC supply are tabulated.

All MT types are stocked in depth for immediate delivery. In addition, custom variations can be supplied with minimal turnaround time.

△Available with dual primary only. Therefore, prefix "DL" is not required.
‡ Nominal 115V primary has added taps, I.E., 105/115/125V, Dual (DL) version is 115/230V only.

Items shown in shaded area are not normally in stock. They are standard designs generally available in 3-4 weeks.

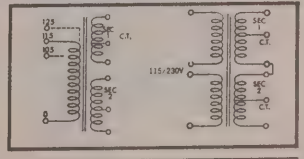
All transformers are designed conservatively and are rated for 50/60 Hz. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss varnish. The transformers and chokes are rugged in construction, well insulated, and have a consistently uniform appearance. All ratings are at full load current continuous operation. Hipot rating of 1500V RMS is standard.

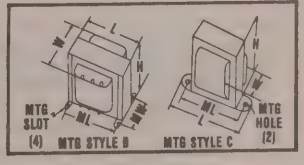
Electrical ratings have been chosen to cover a wide range of applications. All transformers have two center-tapped secondary windings, which may be series or parallel connected as indicated in rating chart.

*The secondary currents shown in the tables are RMS ratings. Depending upon rectifier circuit configurations, the RMS secondary current is different than the DC output current. This is indicated in the chart below:

Rectifier Type	Filter Type	RMS Secondary Current Is
Full Wave Center-Tap	Choke Input	= 0.7 x DC Amps
Full Wave Center-Tap	Capacitor Input	= 1 to 1.2 x DC Amps
Full Wave Bridge	Choke Input	= DC Amps
Full Wave Bridge	Capacitor Input	= 1.6 to 1.8 x DC Amps

For example, in a F.W. Bridge circuit with a capacitive filter, if the load is 1 Amp DC, the RMS Secondary current is 1.6 to 1.8 Amp RMS.





Signal Transformer, 500 Bayview Avenue, Inwood, New York 11696 (516) 239-5777 • Fax: (516) 239-7208

filter chokes

1.0 TO 200 AMPS

Signal's line of filter chokes is the most extensive available. It is designed to complement the selection of Rectifier Power Transformers so that a set may be specified for power supplies using inductive filters.

The inductance ratings given are minimum values guaranteed at full DC current. All resistance ratings are maximum values. Special variations or intermediate values of inductance, current, or resistance can be supplied promptly and accurately.

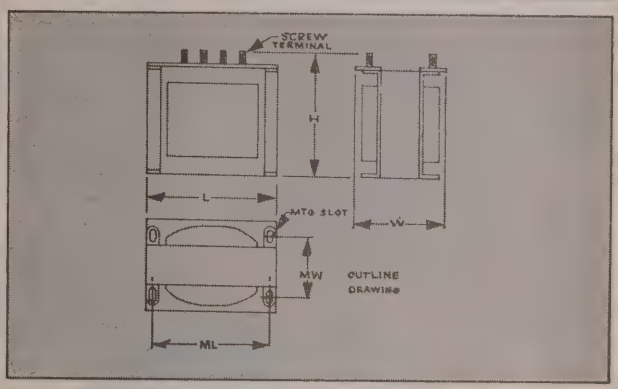
power isolation transformers

INDUSTRIAL GRADE/STEP-UP OR STEP-DOWN. MANY POSSIBLE VOLTAGE RATINGS.

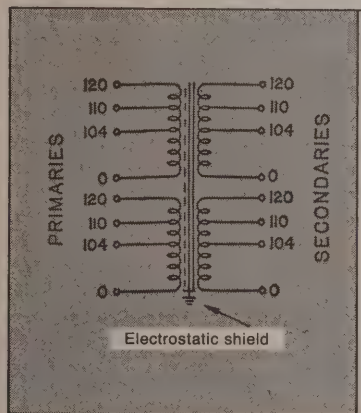
AVAILABLE FROM STOCK FOR IMMEDIATE SHIPMENT

The "DU" and "SU" lines are designed for a maximum of 55°C rise above ambient for use on standard power lines from 50 to 500 Cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers are rugged in construction, well-insulated and have a consistently uniform appearance. All ratings are at full load current, continuous operation. 2500V. RMS Hipot is standard.

Heavy ¼ inch phenolic terminal boards are provided with plated brass screws and flat washers (10-32 on ¼ and ½ KVA, ¼-20 on larger sizes). Connections can be easily made with a nut driver. It is also simple to alter the interconnections to change transformer ratings. **Electrostatic shields are provided grounded to the core.** The connection is made with a lug to ground and may be opened if an ungrounded shield is desired.



DU SERIES 110/220 Dual Primary to 110/220V. Dual Sec. (Primary & Secondary may be reversed)



As shown on the schematic diagram the "DU" line is designed with dual primaries and secondaries. All four windings are identically rated at 0/104/110/120 volts. This permits series or parallel connections on either primary or secondary. Therefore, a nominal 110 to 110 volt, 220 to 220 volt, 110 to 220 volt, or 220 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as 208, 214, or 230 volts. It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings as 440 to 220 volts or 220 to 440 volts can be set-up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is doubled.

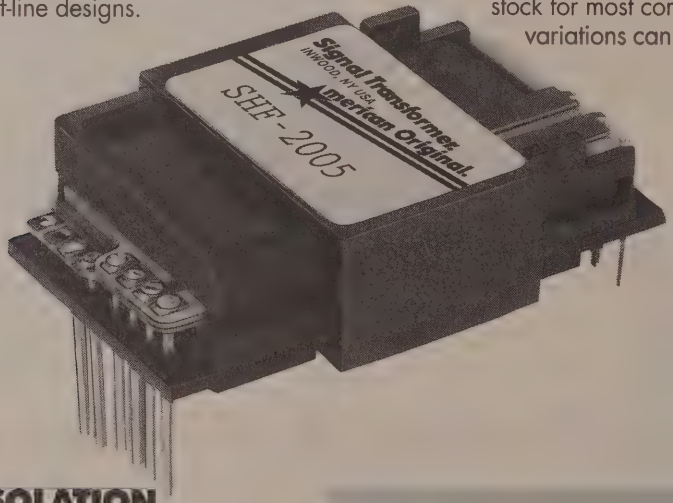
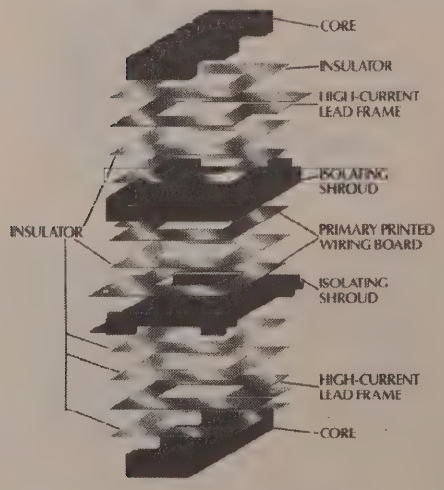
OFF-THE-SHELF SIGNAL PLANAR MAGNETICS FOR HIGH EFFICIENCY, HIGH FREQUENCY SWITCH MODE POWER SUPPLIES

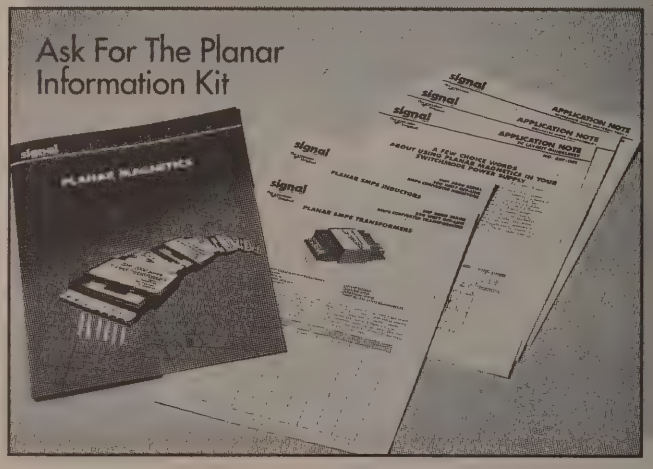
Signal's SHF PLANAR magnetic components take much of the pain and guesswork out of SMPS design. They upgrade performance, reduce package size, improve reliability, minimize design time, satisfy safety requirements and are available from stock. They provide the following advantages.

- LOW CONSISTENT PARASITIC REACTANCES... minimal leakage inductance and parasitic capacitances assure high frequency performance and high power supply reliability. Mechanical structure assures consistent, repeatable values.
- HIGH POWER DENSITY...ultra low profile configuration no longer demands excess height...compatible with 13 watt/in^3 or greater off-line designs.
- HIGH EFFICIENCY AT HIGH OPERATING FREQUENCY... 97% in the 250 to 500 kHz range...usable up to 1MHz.
- DESIGNED TO MEET INTERNATIONAL SAFETY AGENCY REQUIREMENTS... using 130°C rated insulation materials.
- LIGHTWEIGHT...PCB mountable
- OFF-THE-SHELF...standard designs are available from stock for most common applications. Many variations can be provided with minimal delay.



HIGH ISOLATION PLANAR ANATOMY





THE PRONTO PLEDGE

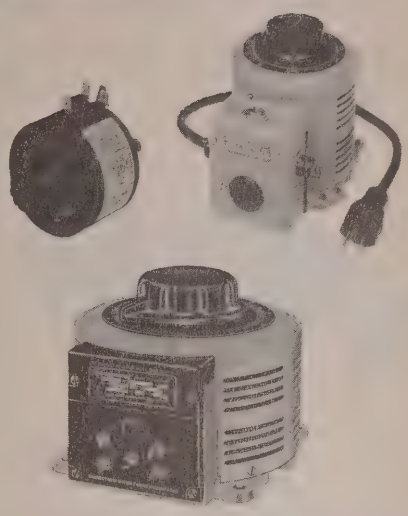
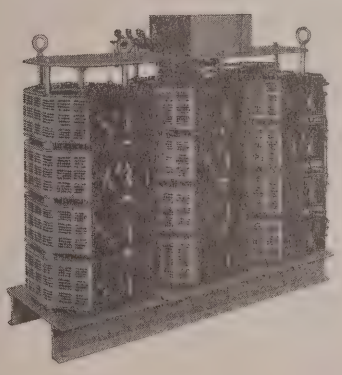
POWERSTAT® Variable Transformers with POWERKOTE® Coils

Epoxy-coated POWERKOTE Coils make the POWERSTAT line the most outstanding value in variable transformers today. *Without increase in price, size or weight,* only POWERSTAT Variable Transformers give an average of 20% higher current ratings, 10:1 greater overload capability, longer life, greater resistance to fungus, salt spray and other contaminating atmospheres. POWERKOTE Coil commutator bars are embedded in place preventing steady-state operating temperature and severe overloads from distorting the commutator.

POWERSTAT Variable Transformers deliver continuously adjustable voltage from AC power lines. They introduce no waveform distortion and feature rugged construction, precious metal plated commutators, excellent regulation, high efficiency and conservative ratings. All manually operated types except the 10C-12 Series are available with motor drives if desired. Motor driven speeds are 5, 15, 30 or 60 seconds for full range travel on all except types 4-gang and over which do not offer the 5-second speed. Single types in the 116C-216C, 117C-217C, 126-226, and 136B-236B Series are also offered with 3-wire cord plug sets. 1156D-1256D Series types are available in ratings to 244 kVA and 1296D Series types to 313 kVA.



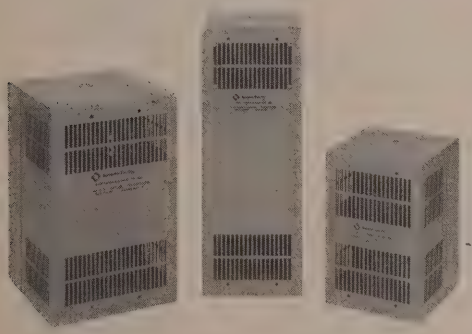


Enclosed Types

Meet OSHA requirements. Portable 120 V, single phase units have grounded NEMA cord-plugs, on-off switches, grounded output receptacles, pilot lights and fuses. Panel controls are recessed for protection from accidental bumping. Rear slots for hanger brackets. Type L10C rated 0-132 V, 2 A; type L21C rated 0-140 V, 4.5 A; type L116C rated 0-140 V, 10 A.

Heavy Duty 1296D Series

Single and 3-phase, manual and motor-driven types in the 1296D series boost ratings in the line to 313 kVA. They operate from 240 VAC, 50/60 Hz lines with rated output 35 A for constant current and 39 A for constant impedance loads. Common utilization voltages 240 to 575 VAC. Request special 1296D Series bulletin for complete data.



Variable Transformer Enclosures

New PBA Series Enclosures are specifically designed to house manually operated and motor-driven, open construction (suffix U) POWERSTAT Variable Transformers. Most are offered as independent assemblies suitable for new or retrofit applications. Constructed of heavy gauge sheet metal, these enclosures are classified NEMA Type 1 as defined in NEMA Standard ICS 1-110.

Three of the four series offered house small to medium frame size variable transformers having power ratings between 0.5 kVA, single phase and 15 kVA, 3 phase. The PBA50 series units are for use with larger assemblies having ratings between 6kVA, single phase and 60 kVA, three phase and can be fitted with optional caster kits.

Wall Plug-In Power Sources

WALL PLUG-IN POWER SOURCES—EUROPEAN AND DOMESTIC

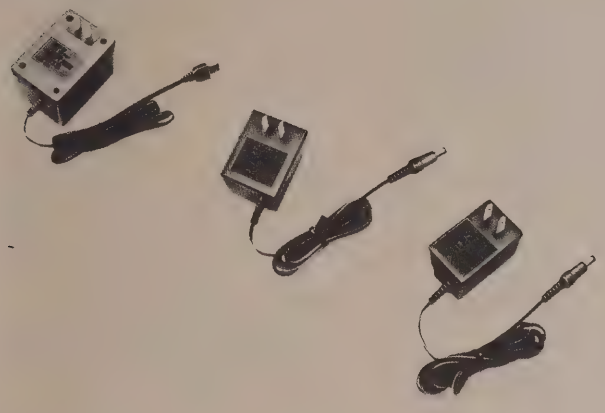
UL-CSA SERIES



Reliable power sources for modems, data communication terminals, security systems, LED displays, power tools, home or personal computers, microprocessors, telecommunications products, battery power systems, medical products and test equipment. Choice of AC-DC regulated or unregulated models or AC-AC models. Wall plug-in power sources are the perfect solution for:

- Gaining agency approval: UL, CSA, VDE
- Reducing size and weight of product; allows low-profile design
- Removing heat from sensitive circuitry
- Eliminating need for cooling devices
- Reducing design time for product
- Providing a secure, tamperproof power source
- Providing safer, low power to any application

Stancor Wall Plug-In Power Sources have output termination compatible with Switchcraft® PC-722A or 722A with 6-ft. output cord. Other terminations available on special order.

UNIVERSAL CONTROL/RECTIFIER TRANSFORMERS

For 50/60 Hz. but may be operated from a 400 Hz source with no change in output ratings. By connecting primaries in series (for 230 volts) but using only 115 V input, a series of half-voltage output raings becomes available at full rated current from each secondary. Solder lug termination.

UNIVERSAL RECTIFIER TRANSFORMERS

Each transformer has the winding arrangement shown. The 117 VAC primary is connected to terminals 1, 2, 3, and 4. The separate winding 5, 6, and 7 may be used in series with the primary to raise or lower the secondary voltage output. Transformers are designed for 50-60 Hz operations, but may also be operated at 400 Hz. Case style is NV with solder lug terminations.

1581-1582 Series Automatic Voltage Regulators

Types 1581 And 1582 Automatic Voltage Regulators

These regulators combine high accuracy with large capacity for laboratory & industrial applications including computers, measurement systems, transmitter supplies and critical industrial processes. Other types of units are available in rack or bench cabinet & wall cabinet. The units listed are single phase regulators, but they can be used to regulate three phase lines by combining two units for open-delta or three units for wye or closed delta applications.

Sizes (W x H x D): Type 1581, 19 x 7 x 10.5 in; Type 1582, 19 x 7 x 14.25 in.

Power Factor: 0 to 1, leading or lagging. Response rms, no distortion. Controls are front panel screwdriver adjustment.

TOROIDAL COMPONENTS TECHNICAL INFORMATION

THE COMPANY

TALEMA ELECTRONIC, INC. began operations in mid-1983. As a member of the TALEMA INTERNATIONAL GROUP OF COMPANIES, the significant growth of the U.S. operation was made possible by sharing design and manufacturing technologies with its German and Irish affiliates.

The factory is located in central Missouri, an area which typically has lower labor rates than coastal areas and offers the advantage of being the geographic center of the continental United States, thereby cutting shipping expenses.

ADVANTAGES OF TOROIDS

LOW WEIGHT
Save as much as 50% over traditional frame style transformers.

SMALL SIZE
To assist in the design of low profile, slim-line equipment.

EASE OF MOUNTING
One bolt through the center is all that's needed.

LOW MAGNETIC STRAYFIELD EMISSIONS
Excellent choice to reduce screen distortion in CRT's and high resolution monitors without costly shielding or reduce audible "hum" in high-end audio equipment.

IMPROVED EFFICIENCY
Reduces power consumption.

TALEMA PRODUCTS

UL RECOGNIZED STANDARD TRANSFORMERS with both single and dual secondary windings are available in power ranges from 15VA to 1000VA at a variety of output voltages. (See page A•2569)

CUSTOM DESIGNED TRANSFORMERS are available in sizes from 0.5VA to 8KVA for applications where standard transformers do not optimize electrical or mechanical performance. In-house manufacturing of silicon steel tapewound cores allows our engineers to economically vary core height and diameter to meet virtually any application.

SOPHISTICATED COMPUTER DESIGN software enables our engineers to quickly and accurately design custom transformers for rectified loads, eliminating approximations and producing prototypes that work the first time.

COMPLIANCE TO SAFETY STANDARDS is an advantage TALEMA offers equipment engineers. Our facility is certified to manufacture RECOGNIZED transformers, typically allowing even custom transformers to bear the UR symbol of recognition without expensive, time consuming applications.

UL RECOGNIZED INSULATION MATERIALS insure these standards are met. The insulation system of our standard line is rated for Class A, 105°C. For higher temperature applications, a **UL RECOGNIZED CLASS B**, 130 C insulation system is available.

OTHER PRODUCTS
3-PHASE TRANSFORMERS

CURRENT TRANSFORMERS
INDUCTORS & CHOKES
AUDIO TRANSFORMERS

SPECIAL OPTIONS
STATIC COPPER SHIELDING
MAGNETIC SHIELDING
POTTING IN SPECIAL HOUSINGS

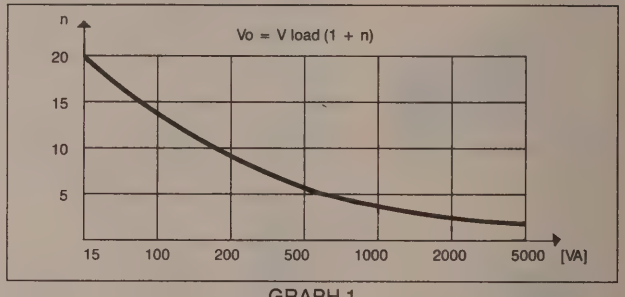
QUALITY

Other companies make grand claims such as "highest quality available", or they tout the "superiority" of their product. TALEMA doesn't have to—the fact that we maintain a ship-to-stock vendor rating with over 200 national and multinational companies is, to us, the best testimonial of our commitment to quality.

APPLICATION NOTES

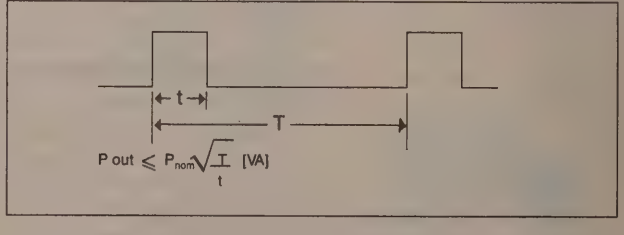
TEMPERATURE RISE
TALEMA transformers are ordinarily designed for a temperature rise of 55°C to 65°C at full load. Ventilation, mounting configuration, and load duty cycle are important considerations.

VOLTAGE DROP
Graph 1 shows the percentage of voltage drop for standard cores at 50/60 Hz. (Voltage drop is slightly higher in transformers designed for 60 Hz only operation.)



GRAPH 1

DUTY CYCLE
A smaller transformer can be used if the load is intermittent. Because the output power in this case significantly exceeds the nominal power, the secondary full-load voltage (using standard line as an example) drops below the voltages shown on the next page. The full-load voltage drop increases proportionately with the current being drawn.



EFFICIENCY
Graph 2 shows typical efficiency which can be expected as a function of the power relationship P_{out} / P_{nom} and transformer size.

TOROIDAL COMPONENTS TECHNICAL INFORMATION

CUSTOM DESIGNED TOROIDAL TRANSFORMERS

Working in close partnership with equipment designers, TALEMA uses its technological expertise to create transformers which are as much a part of original equipment design as any other element of the final product. By operating in this way, TALEMA provides the optimum response to highly specific requirements across a wide application profile including professional audio equipment, specialty lighting, computers, video monitors, compact power supplies, and medical equipment.

We begin the design process by working closely with the equipment designer to create the transformer specifications. Often, our engineering staff will evaluate other key components of newly designed equipment to accurately specify power requirements, size, noise, and strayfield levels in order to provide the highest level of performance within a specific cost per unit framework. Then, by utilizing sophisticated design software, our engineers can quickly and accurately design the optimum toroidal transformer for your application.

There are some key properties of toroidal technology which are critical to success in sensitive applications. TALEMA boasts unequalled experience in the control of these areas.

THE CORE AND NOISE.

The quality of the toroidal core is a vital consideration for sensitive applications. TALEMA has invested heavily to provide extensive core manufacturing, annealing, and testing facilities. Using high grade grain oriented silicon steel, with typical losses of 0.70 watts/lb at 1.7 Tesla, the core is manufactured in-house under close supervision of Quality Control in order to maintain the performance characteristics of the high grade steel.

Because TALEMA cores are manufactured from a continuous strip of high grade steel with both ends welded, there are no loose sheets or laminations to vibrate—minimizing the possibility of mechanical hum.

SIZE CONSTRAINTS

TALEMA engineers are able to utilize a wide range of diameter to height ratios, giving the equipment designer the opportunity to achieve the ultimate level of electrical performance within a specific size.

PERIMETER SHIELD

RADIATED MAGNETIC STRAYFIELD

Achieving low levels of stray field radiation is an important consideration for the equipment designer, as this phenomenon can create unwanted noise through interference with sensitive electronics.

A toroidal transformer generally offers a reduction of 8:1 in magnetic interference levels compared with traditional frame style laminate types. The engineer still has to be aware of the need to locate the transformer away from the sensitive parts of a circuit. Sometimes the only solution is to separate the device entirely by mounting in a remote enclosure, but this can be costly and undesirable.

TALEMA's engineering staff has vast experience in solving this type of problem, and has developed a range of successful techniques over several years. These include:

- Using a combination of lower flux density and special winding techniques to provide further field reduction.
- Grouping of leads to minimize openings in the windings while maintaining safe isolation.
- Applying a low cost silicon steel perimeter shield which is built into the transformer to further reduce stray field by an order of eight to ten times.

MEDICAL APPLICATIONS

TALEMA has vast experience designing toroidal transformers to meet the requirements of UL 544 and IEC 601. The most important aspects of designing a transformer of UL 544 requirements are construction, leakage current, and abnormal operation as defined in UL 544 sections 19, 27, and 41, respectively.

Unless the customer dictates otherwise, we use construction called out in paragraphs 19.4 C or E. These are for patient-care equipment.

Paragraph C is satisfied by using a grounded copper shield between primaries and secondaries in combination with a thermal protection device. Often, our customers prefer this type of construction because the copper shield is considered a fail-safe protection against electrical shock. However, this approach adds cost and may be unnecessary.

COPPER SHIELD

A more economical approach is construction per paragraph E, which is satisfied by using a thermal protection device in combination with "three layers of insulating material", of which any combination of two layers are capable of withstanding a 3500 volt 60 Hz dielectric withstand test potential for 1 minute.

LEAKAGE CURRENT

Leakage current is that current which can be conducted through the patient's body if the protective ground to the wall power cord is broken. Toroidal transformers can contribute leakage current through two paths: from primary to secondary, and from primary to mounting surface. Drawing on years of experience, our engineers can design toroidal transformers and mounting techniques that will minimize the transformers contribution to system leakage. However, the equipment designer must also account for other components within the system that will contribute leakage current such as power cords, switches, line filters, and fuse holders.

TALEMA can measure leakage current with a tester constructed to the circuit in UL 544 figure 27.1 and section 27.5, at the customer's request.

ABNORMAL OPERATION

Section 34 of UL 544 describes tests which the transformer will be subjected to in order to confirm that abnormal operation (which the system may encounter in actual service) will not present a shock or fire hazard to the patient or operator. Equipment designers should investigate the possible abnormal tests UL may perform on their particular system, then contact TALEMA engineers for assistance in creating the transformer specifications. Working together with our engineers as a team, designers can be assured of accurate, functional transformers without multiple iterations thereby cutting development costs.

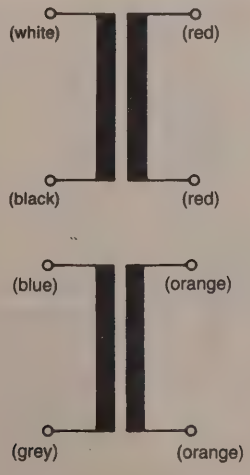
ORDERING INFORMATION

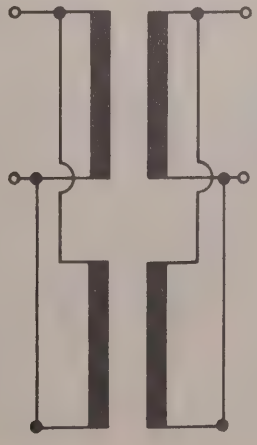
Orders for standard transformers must include the following information:

1. Transformer part number
2. Quantity per item
3. Delivery address
4. Billing address (if different from above)
5. Date of delivery
6. Method of shipment

CONNECTION WIRES

Standard length: 200 mm (primaries or secondaries can be connected in series or parallel).





TALEMA ELECTRONIC INC.

STANDARD TOROIDAL TRANSFORMER, PC MOUNT, LOW PROFILE, PRIMARY 2×110V or 220V 50/60 Hz

ADVANTAGES: Lower strayfield, higher efficiency, reduced "standby" current, reduced weight.

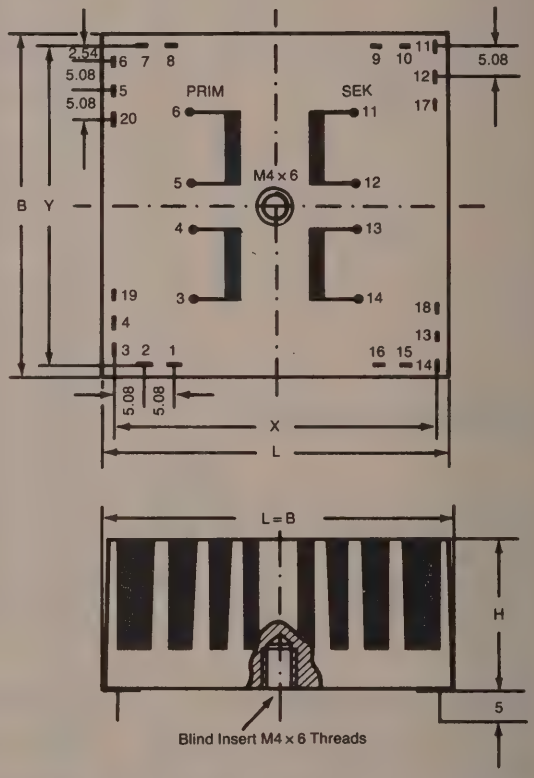
Primary-secondary test voltage 4.0 KV (VDE 0550).
Primaries and secondaries for parallel or series hookup.
Ambient operating temperature +60°C maximum.
Insulation Class A (105°C)



Pin No. 19 and 20 only in Version 15 and 25VA
Pin No. 17 and 18 only in Version 3, 2 thru 25VA

Schematic for alternate types per customer specifications

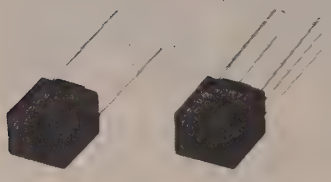
TAMURA MINIATURE ENCAPSULATED TRANSFORMERS AND INDUCTORS

Input, Interface, Isolation & Output Impedance Matching Circuits



FEATURES

- FCC Part 68 (hi-pot 1.5kV or 1kV).
- Miniature: 0.31"x0.41"x0.465".
- Tested to MIL-T-27 Specifications.
- Dielectric Strength: 1kVrms.
- Insulation Resistance: 10kMΩ.
- Oper. Temp: ≤105˚C.
- Thermal Shock: 5 cyc, -55≈105˚C.
- Freq. Response: ±2dB, .3≈100kHz.
- Max. Distort: 10-25% @ rated pwr.
- Impedance: 3.2 to 200kΩ.
- Solder/Gold Plated Nickel Leads.
- Molded Case Constr/Base Mtg Pad.

Note 1: Meets FCC part 68 (Hi-pot 1.5kV or 1.0kV).
Note 2: PRI maDC - Primary maximum rated unbalanced current in milli-amps, DC.
Note 3: PWR (mW) - Maximum power level in milli-watts @ 300Hz.
Note 4: CT* - Winding can be connected as a centertapped winding or as two isolated windings.

Note 1: "OCL" is typical primary open circuit inductance (L), in milli-Henry (except PHT-023), as read on an LC meter.
Note 2: "C pF" is primary to secondary interwinding capacitance (C) in pico-Farad.
Note 3: "L µH" is primary winding leakage inductance (L), in micro-Henry, with the secondary(s) shorted.
Note 4: Designed for IEEE-802.3 LAN applications.
Note 5: Designed and tested to MIL-T-27 specifications.

Note 1: CT* indicates winding can be connected as a centertapped winding or as two isolated windings.
Note 2: Typical insertion loss (IL) in dB @ rated unbalanced maDC, 0dBm & 1kHz. (*) add 3dB to IL for single hybrid use with balancing netwrok on 2-wire side.
Note 3: Typical frequency response (FR) from 0.3 to 3.5kHz, relative to 1kHz at rated maDC & 0dBm.
Note 4: Designed and tested to MIL-T-27 specifications.

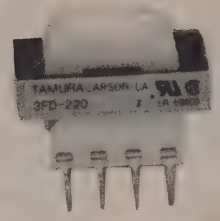
TAMURA OEM PC BOARD POWER TRANSFORMERS

3F Series - 3 Flange Bobbin



FEATURES

- UL 1585 Class II & III Xfmrs File No. E95844.
- UL Gnl Purpose Xfmrs File No. E91239.
- UL Class B Insulation Sys.
- CSA Cert: CSA 22.2 Nos. 0, 66 File No. LR 69808.
- 2500VAC Hipot, Pri to Sec.
- 115V or 115/230V Primary.
- Bobbin Molded Term. Nos.
- 1.1, 2.4, 6 & 12VA.
- Tube Packaged.
- 80 Models Stocked.
- Competitive Prices.
- Drop-in Compatibility.
- DC Power Supply Models.
- 120 Million Xfrms Shipped/Year.

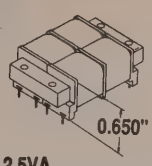
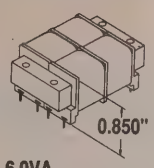
TAMURA LOW PROFILE, PLUG-IN, POWER TRANSFORMERS

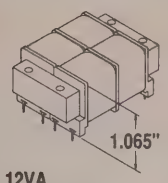
UL RECOG.
FILE NO. E145619



2.5VA



6.0VA



12VA

CSA CERT.
FILE NO. LR81383-7

FEATURES

- Three Flange Bobbin.
- 1500V RMS Hipot.
- 115/230VAC, 50/60Hz., Dual Primary.
- Low Profile: 0.65", 0.85", 1.065" Heights.
- 3 Sizes: 2.5, 6.0 and 12VA Ratings.
- NL-FL Regulation: 30%; 12VA, 20%.
- Tube Packaged.
- 80 Models Stocked.
- Competitive Prices.
- Drop-in compatibility.
- DC Power Supply Models.
- 120M Xfmrs Shipped/Year.

TAMURA ENCAPSULATED SCR and TRIAC TRIGGER TRANSFORMERS

Tamura's STT series transformers are designed for low cost source isolation in half and full wave SCR or TRIAC control citcuits. The STT trigger transformers are encapsulated for environmental protection and pass 2600V rms dielectric breakdown testing.

TAMURA WALL PLUG-IN and SCREW TERMINAL AC-AC TRANSFORMERS

120VAC, 60Hz. and 220VAC, 50Hz.

UL file nos. E82180 CSA file nos. LR38236 VDE file nos.7969-3330 7969-3331

FEATURES

- UL Class II Xfmrs - UL 1310.
- UL 544 Medical Capability.
- Thermal Overload Protection.
- 100% Testing.
- Transformer: 3 flange bobbin.
- US 3-Blade Ground Plug Available.
- Temp Range: 0 to +40˚C.
- Case Temp Rise: ≤35˚C.
- Oper Humidity: 10-90% RH.
- Material: Black ABS resin/UL 94-V0.
- No Audible Noise.
- Mounting Tab Available.

FIG. 2 SCREW TERMINAL

Note 1: Typ. output VAC for load & line shown.

Note 2: UL Notes: UL, UL1310 listed; UL*, UL 1310 & UL1411 Xfmr.

Note 3: Complies (C) or listed (L) to CSA 22.2, No. 223/66.

Note 4: Screw term: 4ea #6-32; input gnd & output screw term gnd.

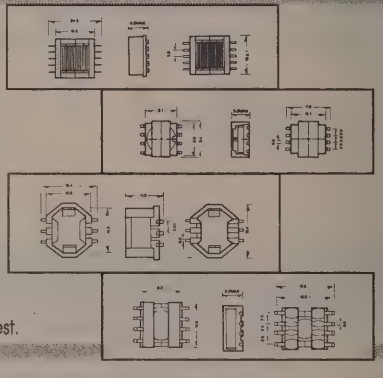
SURFACE MOUNT TRANSFORMERS INDUCTORS

FEATURES:

- Compact for HIGH DENSITY surface mounting.
- Low profile, designed for optimum weight/volume and performance ratio.
- Suitable for surface mounting to withstand reflow process requirements.
- High voltage output(up to 1000 VRMS) provided by multi-sectional bobbin designed for secondary winding.
- High "Q", High "SRF", made by Ferrite material for CHIP inductor.
- Bulk packing or Tape & Reel available per your request.



DRIVER TRANSFORMER

FEATURES:

- Small Ferrite core package.
- Designed for 15V or 30V DC input, 20 KHZ or higher operating frequency.
- Designed for UL, CSA, VDE & IEC requirements, electric strength is 3750 V RMS between primary and secondary.
- Provides max inductance, low leakage and interwinding capacitance.

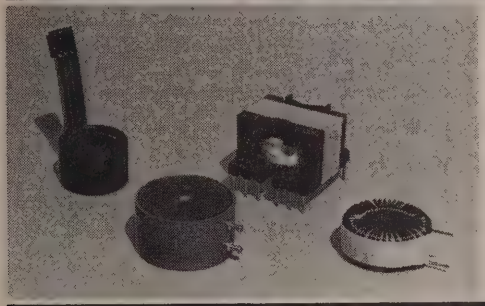
Torelco's Custom Wound Magnetic Devices

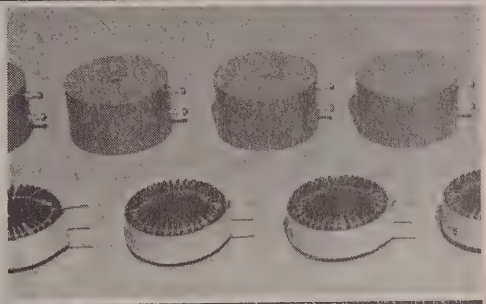
QUALITY MAGNETICS - MADE WITH PRIDE IN THE USA

For over 30 years, the industry has known Torelco as a partner that supplies toroids of superior quality, shipped to you with flawless adhesion to delivery schedules. Coils from .093 inside diameter, to over 10 inches outside diameter can be wound using wire sizes from 8 AWG through 46 AWG, in open or cased styles, varnish or epoxy encapsulated.

TAPE WOUND · MPP · FERRITE · POWDERED IRON · ALL INSULATION SYSTEMS

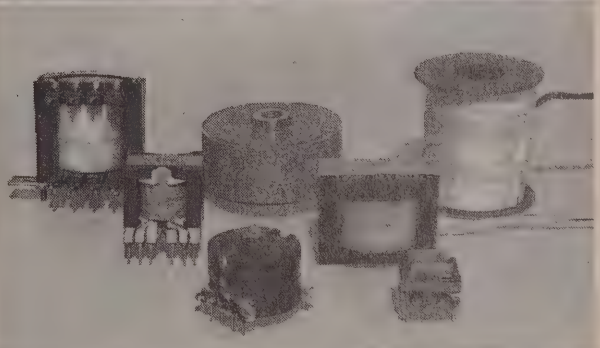


From prototype to production You can count on **Torelco** to supply a Quality product On-time **Every time**.



MIL-T-27 GRADES 4, 5, 6 - FROM 1 PIECE TO 100,000

Torelco is equipped to fill your requirements for bobbin wound devices with the same attention to quality and service that the industry has come to expect from our toroid line. Please give Torelco the opportunity to quote on EI laminated, pot core, E-core and other styles of custom bobbin wound magnetic devices.



RUSH DELIVERIES ON ENGINEERING PROTOTYPES!

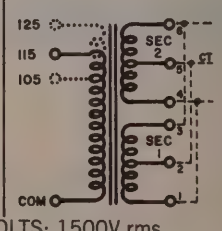
PARALLEL HOOKUP



TODD SYSTEMS "HIGH CURRENT TRANSFORMERS & CHOKES" are designed for use in high power rectifier circuits, and high current A.C. applications. "TODD ENGINEERED" designs feature a nominal temperature rise of 45°C., at full load, thus providing outstanding overload capacity. All designs utilize extremely low regulation, varying from 10% in the smallest to 1% in the larger units.

Four styles . . . select the type best suited for your lab, test rigs, OEM or production equipment

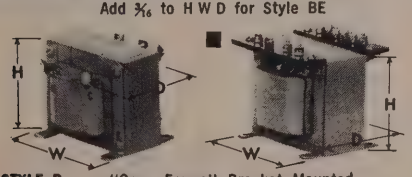
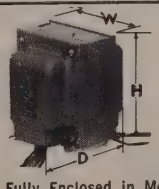
Add 3/16 to H W D for Style BE



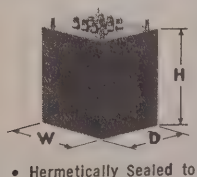
STYLE B:
- "Open Frame" Bracket Mounted
- Double Vacuum Varnish Impregnated

STYLE BE:
- Conforms to MIL-T-27B
- Epoxy Encapsulation added to Style B



OUTLINE DRAWINGS AVAILABLE

STYLE V:
- Fully Enclosed in Metal Shells
- Ease of "Wiring with Leads"
- Attractive Appearance
- Dbl Vacuum Varnish Impregnated



STYLE CM:
- Hermetically Sealed to MIL-T-27B
- Environment Proof
- Attractive Gray Finish
- Permanent Name Plate

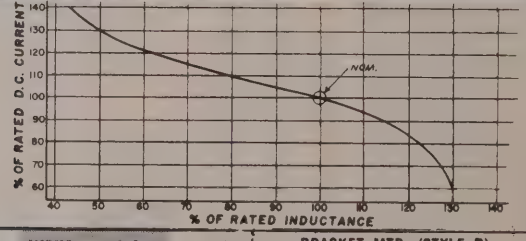
SCREW TERMINALS

HIGH CURRENT CHOKES — 50/500 HERTZ — DIMENSIONS REFER TO HIGH CURRENT XFMR SKETCHES



- **Matching styles complement high current transformers**
- **Wide variety of compatible current ratings**

INDUCTANCE VARIATION

Graph indicates typical variation of inductance (%) when used at D.C. currents (%) other than the rated values.

Chokes operated at D. C. currents higher than rated value must be run on an intermittent basis to avoid overheating.

Toroid®
SUPERIOR TRANSFORMERS

TOROIDAL POWER TRANSFORMERS
GENERAL INFORMATION

FEATURES OF TOROIDAL DESIGN

Compared to the conventional E/I laminated transformer, our toroidal transformers offer you many important advantages.

- Very low magnetic strayfield emission levels
- Quiet operation -- very low hum
- Half the size and weight
- High efficiency
- Easy assembly

For detailed information on the superior performance capabilities of our toroidals, please call or FAX the factory.

COMPANY FACTS

Our company is dedicated to the design and production of high performance toroidal power transformers and chokes. Engineers in a broad range of industries have discovered the performance advantages of our toroidals. Our transformers are used in medical electronics, test and measurement systems, industrial controls, data communications, motor controls, light fixtures, audio systems as well as in many other areas.

Since our company was founded in Maryland in late 1982, we have built a solid reputation on superior quality in design and workmanship. We have maintained our position as industry leader as a result of our continuous effort to provide total customer support from design to delivery.

This brochure contains information about our products, design capabilities and the technical support you can expect from us. Application Notes, Transformer Design Guide, and Product Datasheets are available upon request. If you would like to receive these product publications or have any questions, please use our toll-free number (800) 274-5793 or FAX number (410) 860-0302.

PRODUCT PROGRAM

CUSTOM DESIGN

Custom made transformers are designed from 20VA to 12,000VA with UL and CSA safety standard certifications, or in compliance with international safety standards for industrial or medical applications. A separate chart on these pages lists typical dimensions of various power ratings using our standard core sizes. Other core sizes, either taller and narrower or flatter and wider are available.

STANDARD OFF-THE-SHELF

Standard design rectifier transformers UL and CSA recognized are available for both 117V/60Hz and 115/230V, 50-60Hz operation from 20VA to 1,000VA. See separate page for available power ratings and voltages. A line of multi-voltage rectifier transformers for 5V and +/- 15V regulated DC is also available from stock, as shown elsewhere in these pages.

Low Profile PC Mount Transformers

Our new Mini-Blue Series of UL recognized standard transformers for PC Mount is listed on the last page.

Medical Isolation Transformers

A new line of standard isolation transformers for commercial and medical electronics applications are also listed on a separate page.

OTHER PRODUCTS

- 400 HZ TRANSFORMERS
- 3-PHASE TRANSFORMERS
- AUTO TRANSFORMERS
- INVERTER TRANSFORMERS FOR 50 OR 60HZ
- CURRENT TRANSFORMERS FOR CONTROL APPLICATIONS
- FILTER CHOKES OF TOROIDAL DESIGN FOR 50/60HZ

QUALITY

Our Quality System has been established to comply with requirements of MIL-1-45208A and ISO 9000 Quality Standards. We have a UL family recognition to UL1411 (industrial) and UL544 (medical) for both class A (105C) and class B (130) insulation systems.

Final inspection is performed on 100% of all specified electrical and mechanical data. Our standard electrical tests include *no-load currents* and *no-load voltages* and 4000V Hi-pot test between primary and secondaries. Winding resistances are verified on every production lot. Visual inspection includes physical dimensions and appearances. Other tests as specified by customer are optional, e.g., level of magnetic strayfields, mechanical hum, leakage current, leakage capacitance, etc.

FOREIGN SAFETY STANDARDS

In addition to offering UL recognized transformers, we also have a CSA family recognition to CSA C22.2 No. 66.1988. When required we will construct our transformers to comply with other foreign safety standards, such as EN 60742, IEC 742, VDE 0550, etc.

MEDICAL SAFETY STANDARDS

Our UL family recognition for custom designed transformers also includes UL544 safety standard for medical equipment. For equipment exported to Canadian and the overseas markets, our transformers can be built to meet their equivalent standards (CSA C22.2 No. 125, VDE 0551, IEC 601.1, etc.).

INSULATION SYSTEMS

To meet the stringent safety requirements for transformers, we use only UL recognized material. Toroid transformers are constructed with reinforced insulation, which allows the transformer to be used without grounding. All our transformers are 100% hi-pot tested at 4000V rms for 2 seconds and have a minimum creep distance of 8 mm.

The Industry Leader in Power Toroids

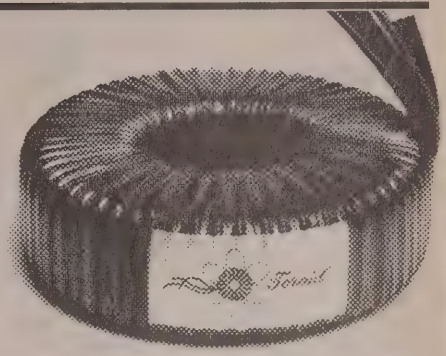
TOROIDAL POWER TRANSFORMERS

DESIGN GUIDE AND APPLICATION NOTES

Toroid®
SUPERIOR TRANSFORMERS

OUR CUSTOM DESIGN CAPABILITIES

Our experienced design group uses sophisticated software programs to calculate the optimal solution of your transformer or choke requirements. Our programs also allow for highly accurate calculations based on your DC data after rectification. Therefore, our prototypes will meet your specifications the first time around. No time is wasted on trial and error. With over 20 years in the toroidal power business, we are the experts. And you can trust us with your most complex transformer designs, up to 10,000VA.

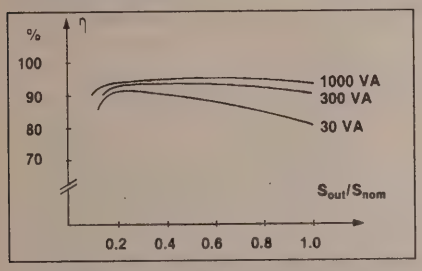


DESIGN DATA AND APPLICATION NOTES

A custom designed transformer is usually based on a standard core with appropriate power rating. Data for our standard cores are shown on the following page. Special cores can be manufactured to meet specific requirements, e.g. extremely low profile designs.

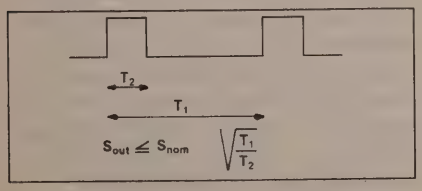
EFFICIENCY

The figure shows typical curves for efficiency as a function of output power in relation to nominal output power for different core sizes.



DUTY CYCLE

A smaller transformer can be designed if the load is not constant and the duty cycle is much shorter than the transformer's thermal time constant (which has a magnitude of hours). Note that the voltage drop increases linearly with the instantaneous current.

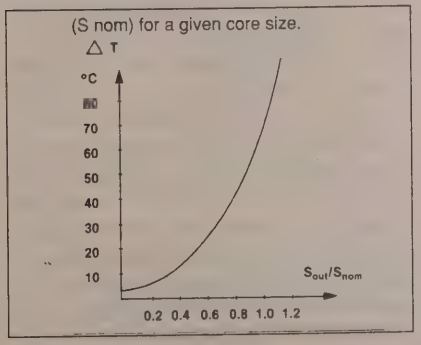


TEMPERATURE CONSIDERATIONS

Operating temperature is an important safety factor. Our transformers, built for Class A (105°C) operation, are normally calculated for a temperature rise of 60°-65°C. Actual increase will depend on how and where the transformer is mounted and how well it is cooled. When higher temperature ratings are needed, we offer UL recognized (UL1411 and UL544) transformers to class B (130°C). Transformers rated for class H (180°C) are also available.

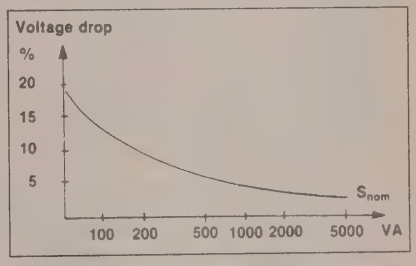
Using a larger core size will reduce the temperature rise due to the small core losses (in comparison with a laminated E/I core). The temperature rise will drop drastically when the output power is reduced. At half the load the temperature rise will only be about 25% of the rise at full load.

The figure shows how temperature rise varies with the actual output power (S out) in relation to nominal power (S nom) for a given core size.



VOLTAGE DROP

This chart shows voltage drop at full load for standard cores at 50/60Hz. The voltage drop is slightly higher for a 60Hz transformer. A design with an oversized core will reduce voltage drop and temperature rise.



ULTRA-LOW MAGNETIC STRAYFIELD EMISSION DESIGN

Our standard design considerably reduces the strayfields in comparison with a laminated transformer. For sensitive applications, our optional Ultra-low Strayfield Design, achieved through a special process, further reduces the emission. In applications such as high resolution CRT displays, a magnetic shield around the circumference of the transformer can be added to achieve even lower strayfield levels.

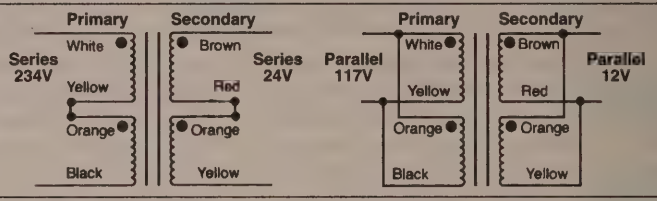
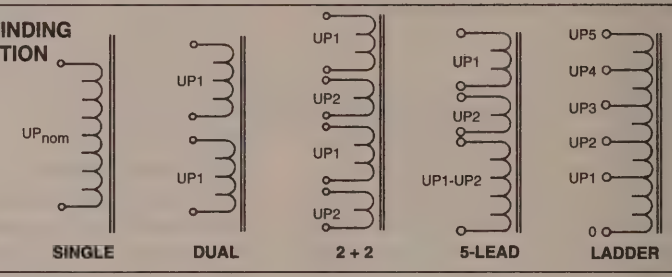
Power rating (VA) is determined by secondary RMS data. Physical size may vary from above data depending on number of primary and secondary windings.

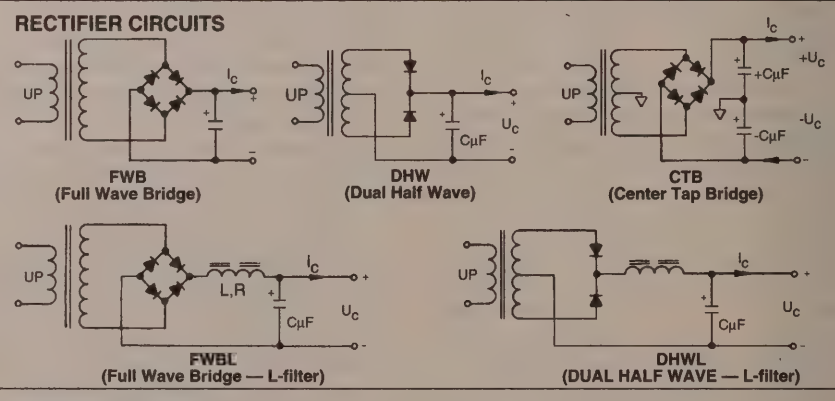
TERMINATION OF DUAL PRIMARIES AND SECONDARIES IN SERIES AND PARALLEL



PRIMARY WINDING CONFIGURATION



RECTIFIER CIRCUITS



STATIC SHIELDING

Static shielding may be required to minimize capacitive coupling between primary and secondary winding when the transformer is used in an extremely noisy environment. Since the shield adds layers, a larger core size may be necessary to provide adequate inside diameter for the shuttle of the winding machine.

IN-RUSH CURRENTS

A consequence of the superior magnetic properties of a toroidal transformer is that the transformer "remembers" what polarity the primary voltage had immediately before the power was last shut off. Whenever the voltage has the same polarity when the transformer next is turned on, the core will saturate for part of a half-cycle, and a high in-rush current will flow in the primary of the transformer. This in-rush current is larger than the in-rush current in a conventional transformer, but it is of very short duration, so it will not affect slow-blow fuses or magnetic overload protectors with thermal delay characteristic. (Some delayed magnetic overload protectors act instantly if the current exceeds a certain value. These cannot be used with large toroidal transformers unless a current limiting resistor is used as described below.)

For very large transformers (1,500VA and up), it is common to use a small current-limiting primary resistor to reduce the magnitude of the in-rush current, and a delayed by-pass relay to short out the resistor after 30-200 milliseconds. This method eliminates external voltage dips caused by the in-rush current, but slow-blow fuses or delayed magnetic overload protectors must still be used, as is the case for all types of transformers.

SUPERIOR TRANSFORMERS

MOUNTING WASHER AND RUBBER PADS

The most economical way of mounting the transformer horizontally is using a metal washer and rubber pads. This mounting method is quite adequate for transformers up to 15 lbs (7 kg), provided the transformer is not installed in a product subject to rough handling.

APPLICATION NOTES

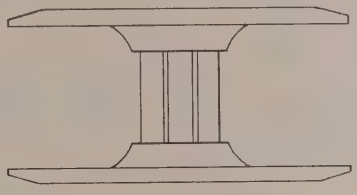
Our engineering staff has written three application notes:

- **Bulletin #1** -- Form Factor and Size of Rectifier Transformers
- **Bulletin #2** -- International Supply Voltages and Primary Windings for Power Transformers
- **How to Specify Transformers** -- A design guide for using toroidal transformers.

We will be glad to send you any of these bulletins free of charge.

POLY-MOUNT

Our Poly-Mount is an option to the standard metal washer and rubber pads for transformers with power ratings up to 600VA. The Poly-Mount is shipped as an integral part of the transformer and will reduce the mounting time of the transformer. The Poly-Mount consists of two parts made of UL recognized Polyamide with high temperature ratings. A screw through the center hole holds the assembly to the chassis. The Poly-Mount adds slightly to the total height of the transformer.

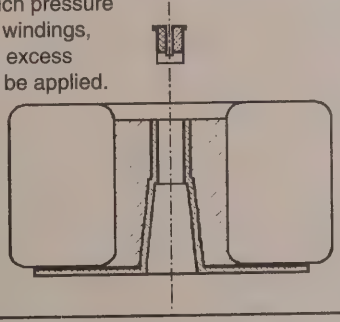


THE EURO-MOUNT

The Euro-Mount is a UL listed plastic insert with a tapered hollow stem in the center. A threaded insert is located at the top of the stem. The cavity surrounding the stem inside the transformer is filled with epoxy. Up to 300 VA the Euro-Mount comes with a single insert. For larger sizes two stems each with an insert are used.

The Euro-Mount is an extremely secure mounting method and guarantees a totally flat bottom of the transformer.

The Euro-Mount eliminates the risk of too much pressure on the windings, should excess torque be applied.



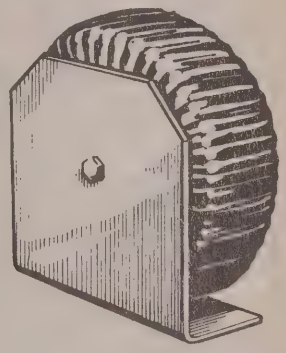
***CAUTION** — It is important that our transformer is mounted in such a way that the mounting screw and the metal chassis will not form a closed loop and thereby a shorted turn on the transformer.*

POTTED CENTER

For large size transformers, 15 lbs or more, or when the washer may cause height problems, we recommend Epoxy potting with a center hole. The top of the potting will be recessed to accommodate the screw head. A flat bottom of the potting is available upon request.

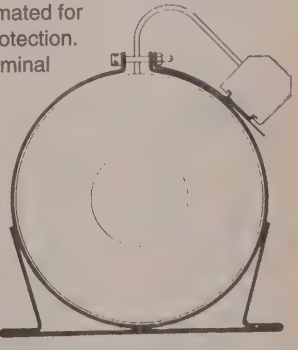
THE L-BRACKET

This L-shaped steel bracket is an economical solution for vertical mounting. A metal washer and two rubber pads are furnished with each L-Bracket. The L-Bracket is available for transformers up to 700VA. Larger sizes are custom designed.



THE OMEGA BRACKET

The Omega bracket is highly recommended when a rugged installation is required — or for large size transformers. The Omega bracket is available for transformers up to 4500VA. Like the L-Mount, the Omega is made of heavy gauge steel, yellow-chromated for corrosion protection. UL listed terminal blocks are optional.



LEADS AND CONNECTORS

Eight-inch flying self-leads are standard. Other lead lengths, multi-stranded leads, or connectors are available options.

ISOLATION TRANSFORMERS WITHOUT ENCLOSURE

Commercial and Medical Equipment for US/Canada and International Markets

FOR COMMERCIAL APPLICATIONS

Standard Isolation Transformers UL recognized to UL1411. Comply with CSA/TUV/IEC 742, 4000V hi-pot tested, 8 mm creep distance. Supplied with metal washer and rubber pads.*

DUAL PRIMARIES (2 x 117V), 50-60Hz operation.

Supplied at no extra cost. See page A•2589 for available mounting hardware options.

MULTIVOLTAGE RECTIFIER TRANSFORMERS

For 5V and ±15V (or ±12V) Regulated DC at 108V-130V Line, 60Hz (available from stock)

Maximum DC Current I_5	I_{15}	OD x H (Inches) Weight	TCM Part No.	Prices FOB Factory Salisbury, MD 1-4 Pcs.	5-24 Pcs.
1.0A	.25A	2.4 x 1.2 .7 lbs	102.515	$41.00	$37.70
2.0A	.30A	2.8 x 1.3 1.1 lbs	104.515	44.10	40.60
3.0A	.50A	3.2 x 1.4 1.5 lbs	107.515	47.30	43.50
5.0A	.90A	3.9 x 1.5	112.515	53.60	49.30

These transformers are designed to work with user-provided components per schematic shown. Note that the rated operating voltage for each component must be larger than the voltage shown in the diagram, and diodes and regulators must be rated to handle the DC current actually used. Capacitor sizes should be at least 7,000 µF per ampere DC used.

Supplied with metal washer and rubber pads at no extra charge. See separate page for available mounting hardware options.

DATA AND PRICE SHEET

PC MOUNT SERIES TOROIDAL POWER TRANSFORMERS

Primaries: 2 x 115V/50-60Hz. **Secondaries:** Dual as listed below.
Primaries and secondaries for parallel or series connection.
Class A (105C) Insulation class. 60C max. ambient operating temperature.
4000V Hi-pot test. Complies with VDE 0550. UL recognized to UL1411.
Transformer potted inside glass-filled Nylon encapsulation with blind insert (M4x6).

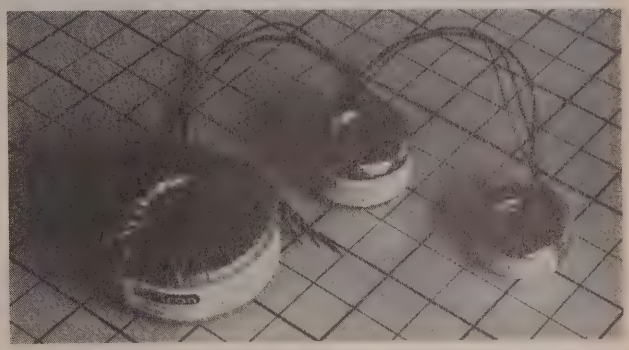
The Industry Leader in Power Toroids

Tortran TOROIDAL MAGNETIC COMPONENTS
CUSTOM MADE-HIGHEST QUALITY

LINE POWER TRANSFORMERS 15 VA TO 10 KVA

TOROIDAL TRANSFORMERS OFFER:

Low Profile	High Efficiency
Reduced Weight	Improved Regulation
Low Noise Level	Easy Mounting
Low Magnetic Stray Field	Unlimited Flexibility



STANDARD PROGRAM, TOROIDAL POWER TRANSFORMERS

In order to meet the day-to-day demand for prototypes and short production runs, we carry a stock of semi-fabricated transformers. These consist of cores with the primary winding and insulation already in place. In most cases the core with a 117V 60Hz primary represents the generic part of a transformer, whereas the secondary often requires special voltages, centertaps or multi-voltages at different current ratings.

By means of our semi-fabricated stock, in the majority of cases we can tailor make your secondaries with windings as required and color coded leads, and ship product out within a few days from the receipt of your order.

The stock program provides us with added flexibility, but in no way limits our capability of providing you with totally tailored transformers, meeting demands for odd dimensions, multiple primaries, or off-standard operating frequencies.

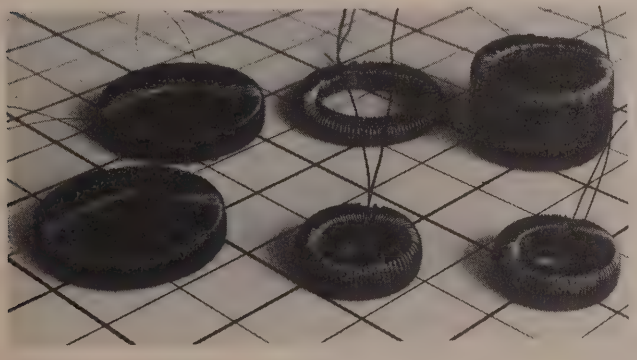
CURRENT TRANSFORMERS, CHOKES, BALLASTS AND FILTERS



The toroidal design is utilized in instrument transformers to measure high currents in power cables and busbars. Instrument transformers can be taped, resin dipped or potted.

Toroids are also used to regulate current in AC systems for electronic and lighting applications and to filter out transients in sensitive electronic equipment. For these applications cores are often provided with a closely controlled air gap which is cut into the core before the wire is put into place. Core size, Gap width, Number of turns and Wire gauge are infinitely variable design parameters.

400 Hz MINIATURE POWER TRANSFORMERS

Reference for all Industrial and Military Standard 400 Hz Miniature Power Transformers

These 400 Hz Miniature Power Transformers are selected for use in all Military and Industrial applications requiring high performance in the smallest possible package size. They conform to all of the requirements of MIL-T-27, Class S (-55°C to +130°C). The minimum continuous operating life expectancy is 10,000 hours. This series is available having power ratings of 0.5 VA through 25 VA. The primaries are 115 Vrms with secondary voltages ranging from 5 Vrms through 300 Vrms. It is recommended that these transformers be specified for all applications where space, weight, and cost effectiveness are prime considerations.

PART NUMBER EXAMPLE

0.5 S T 26

- 0.5 — V.A. Rating (See Table I)
- S — Package Style

400 Hz MINIATURE POWER TRANSFORMERS

Reference for all Industrial and Military Standard 400 Hz Miniature Power Transformers

PHYSICAL SPECIFICATIONS

Size: Sizes for Standard VA Types are given in Table I, and Outline Drawings.

Construction: MIL-T-27, Grade 5; Black Epoxy Encapsulated.

Terminals: Printed circuit pins — tinned brass.

Terminal Strength (Method 211 of MIL-STD-202, Test Condition A): 2.0 pounds.

Marking: Includes MIL-T-27 Type Designation, winding ratings, maximum working voltage, schematic, Torotel name, and part number.

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature Range: -55°C to +130°C (ambient plus temperature rise).

Altitude: 70,000 feet, maximum.

Vibration: MIL-STD-202, Method 204, Test Condition D.

Life Expectancy: 10,000 hours minimum.

Other Environmental Specifications: In accordance with MIL-T-27, Grade 5, Class S, Family 03.

ELECTRICAL SPECIFICATIONS

Primary Voltage: 115 volts rms ±10%

Frequency: 400 Hz ±5%.

Secondary Voltage: See Table II.

Secondary Voltage Tolerance: ±3% at full load and 115 volts, 400 Hz applied to primary.

Electrostatic Shielding (Schematics S and Y): 5 to 1 minimum voltage ratio at 20 KHz.

Phase Shift: 1.0 electrical degree between primary and secondary voltage at rated load, maximum.

Insulation Resistance: 10,000 megohms minimum at 500 VDC.

Dielectric Strength: At sea level—2.8 times the maximum working voltage. At reduced barometric pressure—1.25 times the maximum working voltage.

Mech. Tol. = ±.005 unless indicated.

TRANSFORMERS

Switcher Transformers
AIE Magnetics manufactures custom ferrite E core, Pot core, PQ, EP, ETD, and Toroid transformers operating from 20 KHz to 500 KHz. Bobbin construction is utilized which can conform to the requirements of all safety agencies such as UL, VDE, CSA, CENELEC or IEC.

TYPICAL APPLICATIONS
• FLYBACK • BOOST CONTROLS
• HALF BRIDGE • FORWARD CONVERTER

FEATURES
• BOBBIN CONSTRUCTION
• COST EFFECTIVE CUSTOM DESIGNS

Wide Band Transformers
AIE Magnetics offers thousands of existing designs of impedance matching wide band transformers. These miniature transformers are ideal for coupling and impedance matching over a frequency range from audio to several megahertz. The units feature printed circuit and axial lead designs.

TYPICAL APPLICATIONS
• LOW POWER CIRCUITS • COMMUNICATIONS EQUIPMENT • INDUSTRIAL CONTROLS • ANALOG MONITORING EQUIPMENT • TEST EQUIPMENT • IF • RF

FEATURES
• MINIATURE SIZE • WIDE FREQUENCY RESPONSE
• LOW DISTORTION • LOW PHASE SHIFT • UP TO 1 WATT RATING

Pulse Transformers
AIE Magnetics has developed pulse transformers, for transfer of maximum pulse power with volt-microsecond products ≥10, excellent pulse reproduction, lowest leakage inductances and high inductance values, our unique bobbin and sleeve constructions are used. Our toroidal construction is limited to low volt-microsecond products ≤ 10, very low DC bias current; and less than 50% duty cycles. This type of transformer is widely used in digital equipment for isolation and voltage transformation.

TYPICAL APPLICATIONS
• MULTIVIBRATORS • ONE-SHOT OSCILLATORS
• BLOCKING OSCILLATORS • VOLTAGE TRANSFORMATION • ISOLATION

FEATURES
• MAXIMUM PULSE POWER • HIGH INDUCTANCES
• LOW LEAKAGE INDUCTANCES • SMALL PACKAGE SIZE

Modem Transformers
AIE Magnetics offers an extensive line of modem transformers including units for private line transmission at 56,000 bits per second.

TYPICAL APPLICATIONS
• DATA COMMUNICATIONS
• TELECOMMUNICATIONS

FEATURES
• LARGE SELECTION
• COST-EFFECTIVE DESIGN
• LOW DISTORTION

Low Profile Modem Transformers
AIE Magnetics has designed and developed a line of very low profile transformers for voice or data communication for use on voice grade telephone lines. They have a maximum height of .400" and occupy only 1.0 square inch of circuit board space. Two types of units were designed; one to carry 5 mA dc unbalance current, the other Ø mA dc. Longitudinal balance is better than 60 dB over the operating frequency range of 300 Hz to 3500 Hz.

TYPICAL APPLICATIONS
• DATA COMMUNICATIONS
• TELECOMMUNICATIONS

FEATURES
• MINIATURE SIZE
• COST-EFFECTIVE DESIGN
• LEVEL: –15 dBm to +7 dBm
• VOLTAGE BREAKDOWN: 1500 VAC MIN.
• LONGITUDINAL BALANCE: 60 dB MIN. (MEASURED ON A WILCOM T-207 TEST SET)
• DISTORTION: 0.5% max.

Ulveco

Toroidal Power Transformers

Low Weight
Typically 50% lighter than traditional stacked lamination transformers.

Small Size
Low height profile allows slim, compact design of electronic equipment.

Flexible Dimensions
The Ulveco Toroidal Power Transformer can be "modeled" to fit very limited spaces and still conform to your electrical requirements.

Easy To Mount
Just one center screw easily and quickly mounts the Ulveco Toroidal Power Transformer to the chassis.

Low Magnetic Strayfield
No air gap and with primary and secondary windings evenly spread around the core, resulting in a very low radiated magnetic field.

Low Mechanical Hum
A single continuous strip of steel tightly wound into a roll results in a very solid and stable unit. No loose parts to buzz.

Small No Load Losses
Ulveco Toroidal Power Transformers can reduce open circuit power by 90% compared to traditional stacked lamination transformers.

- **UL/CSA certified—custom made toroidal transformers**
- **Quick response to design inquiries**
- **Computer aided programs provide quick solutions**
- **Rapid delivery of low cost prototype samples**
- **Wide choice of mounting arrangements**
- **20 VA to 10,000 VA**

Over 90% of our output is for custom designs. Because they require no elaborate production tools and are individually wound, **toroidal transformers are particularly suited to custom designs.**

Take advantage of our **custom design service at no obligation.** Our experts can become part of your power supply design group. We'll show you how you can optimize your product's appearance and performance without increasing cost.

Our interactive computer aided design facilities enable us to optimize designs for either AC or DC loads.

Other Products:

- 3-Phase Transformers, to 30 KVA
- 400 Hz Transformers
- Auto Transformers
- Filter Chokes for 50/60 Hz
- Inverter Transformers for 50/60 Hz

For additional Product and Design Data and Application Notes, please call for our informative 16 page brochure.

Ulveco *Is* Dedicated To Product Quality & Customer Service.

Experience
With over twenty-five years of dedication to product excellence and quality, Ulveco enjoys the position of U.S. leader in the design and manufacture of toroidal power transformers and inductors. We know Ulveco has been successful because of two key company philosophies:

— A strong belief that our quality standards will drive us to success

— A commitment to unequaled customer service.

Quality—UL & CSA Recognized—ISO 9001 Certified
ULVECO is certified as a manufacturer of "Recognized" transformers for various configurations from class A (105°C) to class H (180°C). Every single transformer that we make is tested before delivery.

Customer Service
ULVECO's engineering and sales office, located at the manufacturing facility in Houston, Texas, is staffed with experienced transformer designers using proprietary software programs for optimal designs.

In addition to our custom designed toroids, we carrry an extensive inventory of

OFF-THE-SHELF TRANSFORMERS

for 117V/60 Hz, or 2 x 117V/50 - 60 Hz, in power ratings of 15 VA to 1000 VA, UL, CSA, recognized. Please call 1-800-972-8213 for price and data sheets.

QUALITY IS AN ULVECO TRADITION - NOW ALSO ISO 9001 CERTIFIED

Ulveco

Custom Designed Toroidals

The Design Process
Our Computer Aided Design System, based upon years of experience, processes customer furnished data and presents our designers with several alternative solutions for electrical and mechanical dimensions, and a specification is assembled. In some cases the specification is forwarded to the customer for review, in others, prototype design is begun immediately.

Prototype Design
Initial prototypes are designed according to our general procedure based upon UL 1411, 506 and 544, as applicable, as well as CSA 22.2, No. 66. Every effort is made to fit the prototype design into our standard manufacturing process, but, when necessary, engineering and manufacturing cooperate to find new ways to solve customer's problems.

Prototypes
Prototypes are built and extensively tested, usually within a few days, by our regular production and inspection departments. After additional engineering tests for conformity to design specifications and safety agency requirements, the prototypes are shipped with their individual test reports. Our customers are encouraged both to bench test the transformers and to test them in the end equipment. We discuss and process modifications and, when necessary, furnish new prototypes. In most cases, the design is covered by our existing safety agency recognition/certification. In the few instances not covered, we will work closely with the agencies involved until the toroids are accepted.

Applications

- Signal isolation, impedance matching, signal conditioning, EMI filtering and noise suppression in:
  - — Local Area Networks
    - Ethernet, 10BASE-T, Token Ring
  - — ISDN/Telecommunications
    - TI interface
    - S interface
    - U interface
  - — Data coupling

Features

- 200 V rms to 2000 V rms isolation models
- Through-hole and surface-mount packages
- Tape and reel packaging
- Low cost
- Custom designs available

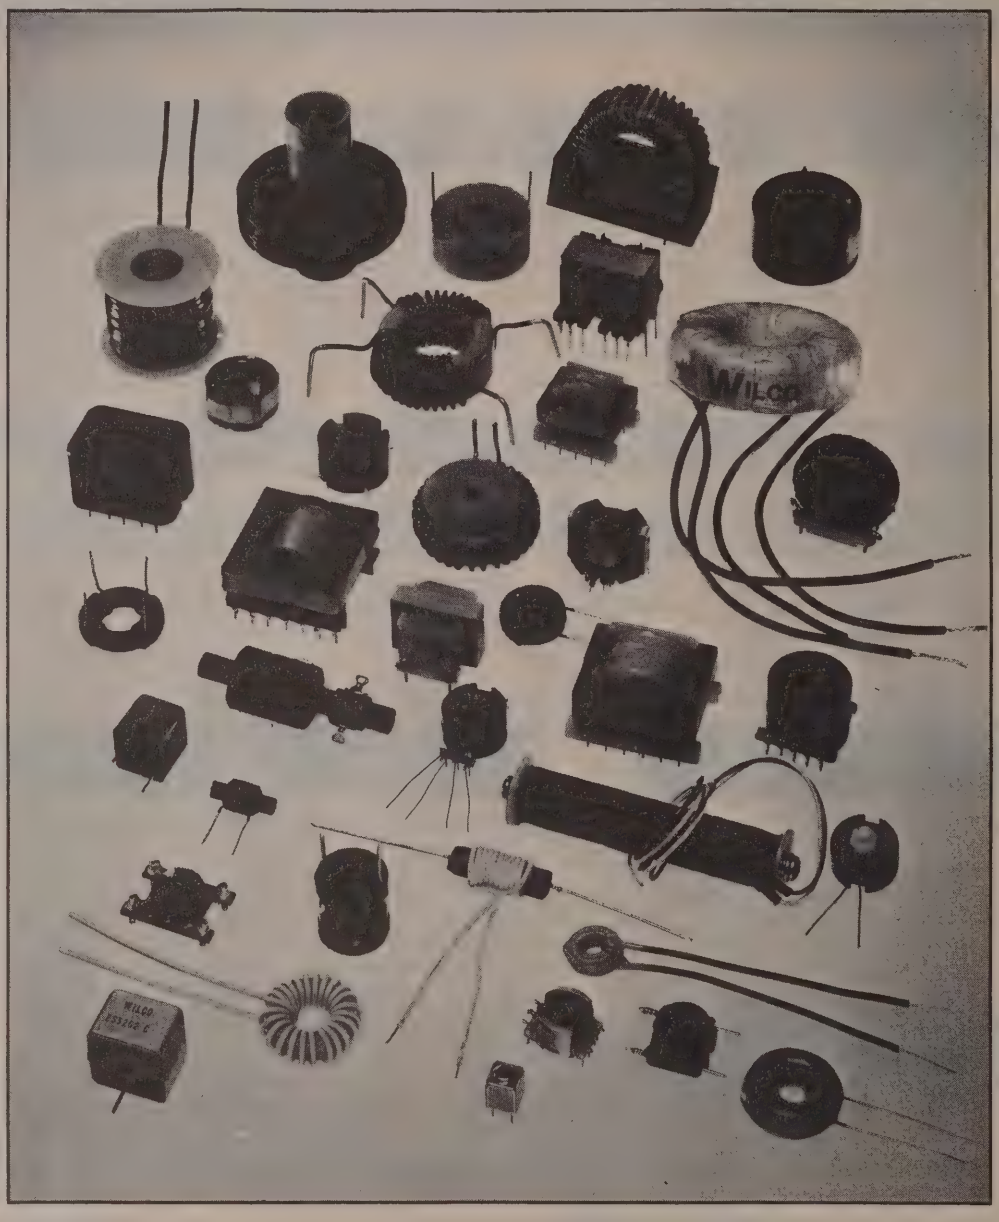
call *WILCO CORPORATION* for CUSTOM MAGNETICS



WILCO CORPORATIONS' manufacturing plant is equipped with some of the most advanced machinery in the industry. This includes high precision computerized winding machines, printing machines, ovens, epoxy encapsulation, testing and measuring instruments.

While **WILCO CORPORATION** manufactures many standard coils and transformers the mainstay of the company has come to be custom magnetics. Every day we wind toroidal power transformers, split bobbin transformers, switch mode power transformers, and switch mode power supply filter inductors to **CUSTOMER SPECIFICATIONS.**

ZMAN *magnetics*

STANDARD VALUE AND CUSTOM DESIGNED MAGNETIC COMPONENTS

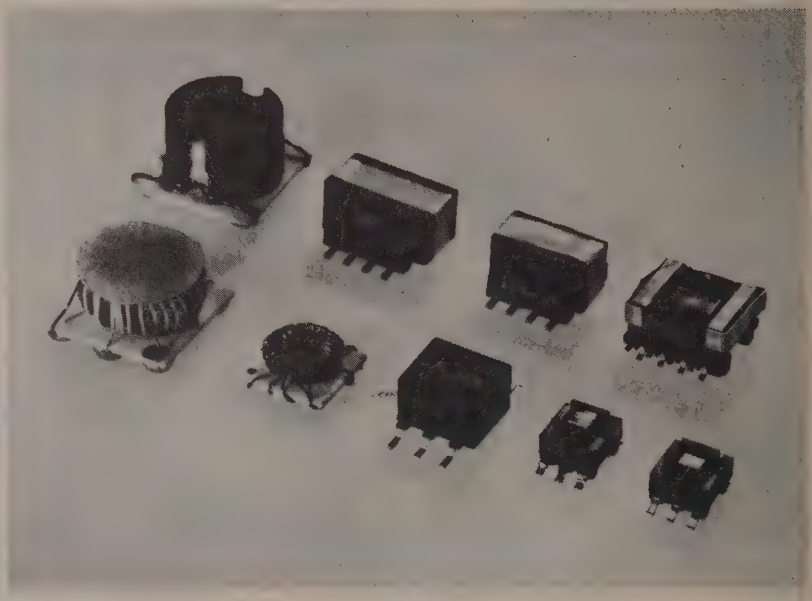
Products:

Surface Mount Transformers
- Toroid, Pot Core, E Core
- Direct or Header Mounting

Switch Mode Magnetics
- Power Transformers
- Driver Transformers
- Current Transformers
- Pulse Transformers
- Output Inductors

EMI/Line Filter Components
- Common mode chokes
- Normal mode chokes

Special Applications
- Audio, IF, RF Transformers
- Signal Isolation
- Matching Transformers



Magnetics for:

Power Conversion, Signal processing, and Filter applications for Industrial, Commercial and Consumer products including:
- DC-to-DC Converters
- Radio Communications
- Telecommunications
- Data Processing
- Instrumentation and Control
- Medical Products

Featuring a wide range of industry standard packages. Complete custom design and manufacturing capability.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

eem/electronic engineers master

4,400 PAGES OF TECHNICAL DATA AT YOUR FINGERTIPS!

If you don't have your own EEM/ELECTRONIC ENGINEERS MASTER catalog, you can obtain you own copy by ordering now. Write for your copy or order by telephone as described below.

EEM is the world's most comprehensive and authoritative catalog of electronic products. With over 4,400 pages of technical data from nearly 1,000 manufacturers, you can find the product you need, when you need it, with a minimum of time and effort.

Organized in four separate and "stand alone" volumes, EEM can save you countless hours of search time and - like no other reference in the industry - insure that you find the right product for the job.

THE 1993/94 4 VOLUME SET CONTAINS:

VOLUME A - Electronic Components

VOLUME B - Electromechanical, Electro-optical, & Military Components

VOLUME C - Interconnections, Packaging, & Hardware

VOLUME D - Power Sources, Instrumentation, Computer Products, & Equipment

IT'S EASY TO ORDER...

- You can order the 1993/94 EEM simply by charging it to your VISA or MasterCard. To place your credit card order call now: 1-800-833-7138.

- Or mail your purchase order and check for $95.00* plus sales tax to :

It pays to design telecom products using a very fine line.

Using the world's finest passive component line can make a big difference to other lines. Like product lines. Like bottom lines.

To the former, of course, Murata Erie brings an unquestionable assurance of superior performance, superior reliability. And that can't help but improve the latter.

But the Murata Erie contribution goes much further.

First, there are the significant benefits that come with finding a single source able to meet virtually any passive component requirement. And we're discussing not only product types, but your needs for on-time delivery, in volume, as well.

That's where multiple plants in North America and overseas help set Murata Erie apart from the rest. Where manufacturing capacity–exemplified by our routinely shipping 3.5 billion ceramic capacitors per month–can play an important role in productivity, in profitability. And both are enhanced by our extensive network of local distributors, nearby sources for both product and dependable technical know-how.

And speaking of technological expertise, it's well to remember who has more of it. And that, from the beginning, it's been Murata Erie setting the pace in electro-ceramic technology–the heart of an array of sub-technologies ranging from dielectrics to piezoelectrics.

Write or call us today. When you have the facts, you'll see why leading telecom OEMs choose the Murata Erie passive component line. It's the one that helps move their lines–product and bottom–in the right direction.
